

Share your story to **inspire high school students to join the clean energy workforce**

SD Pathways

Grow your clean energy impact and help inspire students to join the fight against climate change!

The U.S. Department of Energy Solar Decathlon® Pathways program (SD Pathways) connects the Solar Decathlon network of 25,000 student alumni with high school classrooms across the United States to inspire the next generation of clean energy and buildings professionals through high-impact career talks.

- Alumni will share their pathways to clean energy and buildings careers, explaining their education path, current job, and other careers in the field to students.
- Alumni will receive a small stipend per visit, as well as presentation slides and coaching on how best to tell their story to connect with high school students.

“ I signed up for this opportunity because it is important to inform and inspire young people to get into a field that is ripe with opportunity. Opportunity not only for personal success, but also for the advancement of technologies that will aid in the fight against climate change. ”
