

**Inspire high school students** to join the clean energy or buildings workforce by sharing your story...**and get paid to do so!**

## SD Pathways

**Grow your clean energy impact and help inspire students to join the fight against climate change!**

The U.S. Department of Energy Solar Decathlon® Pathways program (SD Pathways) connects the [Solar Decathlon](#) network of 25,000 student alumni with high school classrooms across the United States to inspire the next generation of clean energy and buildings professionals through high-impact career talks.

- Beginning in fall 2022, alumni will share their pathways to clean energy/buildings careers with students, both virtually and in person.
- Alumni will receive a small stipend per visit, as well as presentation slides and coaching on how best to tell their story to connect with high school students.

“ I wish this was around when I was in high school! This degree is my second degree because I didn't know what was out there or what I wanted to do my first time around. ”
