01 SUMMARY OF CHANGES
SUMMARY OF CHANGES

Significant changes to the project manual that have occurred between submissions have been outlined below. The Construction Drawings should also be reviewed for relevant revisions.

3.22.2011 REVISION
The Project Manual has been updated from the previous issue. Revisions include:

- Section Format and Page Format requirements have been updated
- The version adheres to PDF bookmarking guidelines and all other formatting requirements
- Format of document has been fixed to meet requirements
- Construction Specifications have been modified to match Construction Documents
- Bookmarks have been added
- Construction Specifications have been included in this submission, and are formatted in accordance with International Building Code MasterFormat.

4.25.2011 REVISION
The Project Manual has been updated from the previous issue. Revisions include:

- Addition of Structural Calculations
- Addition of manufacturer specification sheets
- Sub-bulleting of PDF bookmarks

6.30.2011 REVISION
The Project Manual has been updated from the previous issue. Revisions include:

- Addition of manufacturer specification sheets
- Revision of products and the corresponding specification sheets
- Reformatting the manual to create to cohesive package with signage
- Addition of title pages

8.11.2011 REVISION
The Project Manual has been updated from the previous issue. Revisions include:

- Addition of Appendix A: Structural Calculations
- Addition of Appendix B: Manufacturer’s Specifications and Cut Sheets

04 IMPACT ON TURF
**IMPACT ON TURF**

The following analysis is an overview of weight, contact area, and soil-bearing pressure of every component resting directly on the turf of the National Mall.

**BUILDING COMPONENTS**

The Solar Homestead is composed of the 864 square foot main house, six 128 square foot OM trailers, and one 316 square foot Flex OM trailer [120 square foot of which is indoor heated space].

Maximum Building Loads [per square foot of conditioned space]:

- Roof live load = 35 pounds per square foot
- Roof dead load = 15 pounds per square foot
- Floor live load = 40 pounds per square foot
- Floor dead load = 15 pounds per square foot
- Total Loading = 105 pounds per square foot

Bearing Pressures on National Mall:

The main house has 864 square feet of conditioned space with a total load of 90,720 pounds. This load is distributed evenly among eighteen 7,500 pound capacity jacks giving a load per jack of 5,040 pounds. Given a maximum bearing pressure of 1,500 psf that the jack bases can exert on the National Mall lawn the base plate area for each jack was set at 576 square inches [24” by 24”] which results in a bearing pressure of 1,260 pounds per square foot.

The 16,000 pound Flex OM has 120 square feet of conditioned space and approximately 192 square feet of porch space and solar canopy above. The 39,400 pound load is distributed evenly among eight 7,500 pound capacity jacks giving a load per jack of 4,925 pounds. The base plate area for each jack was set at 576 square inches [24” by 24”] which results in a bearing pressure of 1,232 pounds per square foot.

Each of the six 5,800 pound OMs [or canopy modules] has approximately 128 square feet of covered porch area. Given the roof and floor live load the overall weight will be 15,400 pounds. This load will require four 7,500 pound jacks each with base plate areas of 400 square inches [20” by 20’] resulting in a bearing pressure of 1,386 pounds per square foot.

**OTHER SITE COMPONENTS**

The Solar Homestead site will also contain three bladder tanks mounted on 4 inch by 4 inch timber sleepers and numerous straw bales. The straw bales have a bearing surface of about five square feet and weigh about 50 pounds giving a bearing load of 10 pounds per square foot.

The three water tanks are sized at 1000, 600, and 25 gallons. The 1,000 gallon water supply tank will be housed in a plywood structure and covered with straw bales to prevent solar gain. The total weight of the tank and coverings is estimated at 9,930 pounds. This will require a minimum of six 4.5 foot sleepers to bring the bearing pressure to 1,261 pounds per square foot.

The 600 gallon waste water bladder tank will require a minimum of three 5 foot sleepers to bring the bearing pressure to 1,177 pounds per square foot.

The 25 gallon waste water bladder tank will only have a bearing pressure of 221 pounds per square feet using two 2 foot sleepers.

ENERGY ANALYSIS
RESULTS & DISCUSSION
ENERGY ANALYSIS RESULTS AND DISCUSSION

INTRODUCTION

The energy analysis projects the electrical energy production and consumption of The Solar Homestead during the competition in Washington D.C. The size of the bifacial photovoltaic canopy takes into account seasonal variations of sun position, irradiance, and monthly cloud coverage in Washington, DC as to provide sufficient energy year round. The approximate total energy output of the PV array is calculated using the rated efficiency of the panels and the approximate daily isolation on the array. The energy contributions from the Trombe wall and solar thermal hot water system are underestimated to provide a conservative analysis. Three scenarios were considered in the energy analysis: best, intermediate, and worst, based on temperature and irradiance variations in weather data as well as the effectiveness of the solar thermal system in the Solar Homestead. Historical weather data was used to produce a photovoltaic energy estimation of 285.3 kWh.

HVAC LOADS

The preliminary HVAC model assumed an interior temperature of 73.5°F. Hourly temperature data in Washington, DC from September 2010 was used to predict the outside temperatures during the competition. The floors and walls were given R values of a minimum of 35. The R-5 triple pane glass windows and doors facing North, South, East and West in The Solar Homestead were given additional solar heat gain constants of 15, 28, 60 and 15 BTUs per square foot per hour, respectively. The value for the west glazing accounts for the shading from the Great Porch. Component loads were calculated by using standard thermal transmission calculations and the additional solar heat gains as required and were determined by the hourly weather data. The HVAC was modeled to run during the comfort zone contest times. According to the intermediate model, The Solar Homestead’s HVAC system will use approximately 96kWh, while the Flex space will use 18kWh.

HOT WATER DRAWS

The Solar Homestead will employ a solar thermal storage and exchange device which is designed to provide 100% of the water heating energy without consuming electricity. However, an on-demand electric water heater will serve as a backup to the solar thermal system. The hot water competition requires a total of sixteen different 15 gallon water draws, which require a 60 degree Fahrenheit temperature rise from the electric water heater. Assuming a heat capacity of 1 BTU/lb/F and a 10% contingency, the total amount of energy consumed for hot water draws is estimated to be 40 kWh. For the three scenarios considered, “best” is when no backup electricity is needed, “intermediate” is when 50% backup electricity is needed, and “worst” is when 100% backup electricity is needed.

COOKING

The energy analysis includes a detailed energy budget for each of the dinner parties held at The Solar Homestead. The dinner menus include specific cooking instructions. According to these instructions, it is calculated that the 2.0 kW oven will run for a total of 115 minutes for both dinner parties and an extra 10 minutes during the movie night for a total consumption of 4.17 kWh. The oven will also be used in broil mode for a total of 10 minutes. Rated at 3.6 kWh the broiler will consume a total of 0.6 kWh. The stove top consists of four different elements; the 9 inch element, outputting 2.2 kW, will primarily be used. Working for the predicted 114 minutes the stove will consume 4.18 kWh. In addition five pounds of water will be boiled completely to vapor four different times. According to initial testing each boil-off will require 2.55 kWh for a total of 10.2 kWh over the course of the nine day competition. The total consumption of the stove and oven unit is predicted to be 19.15 kWh.

APPLIANCES

The full size refrigerator and freezer will operate nine days of the energy competition at the required temperatures of 36°F and 2°F. The clothes washer and dryer both require eight cycles as part of the contests consuming 0.32 kWh/cycle and 3.65 kWh/cycle, respectively. The dishwasher will operate for five cycles during the competition, consuming 1.34 kWh/cycle. The home electronics including the computer and television are calculated to operate for 35 hours during the competition at 28 W and 150 W, respectively. The movie projector will be used only during movie night; while the home entertainment speakers will be used during both dinner parties and movie night. The total energy consumption of all loads throughout the competition is estimated at 280.35 kWh.
LIGHTING

Lighting for The Solar Homestead was designed with efficiency and ease of use for homeowners, providing a variety of lighting solutions indoors and outdoors. The interior shell of The Solar Homestead is lit by 207 ft. of LED strip lighting along a top and bottom cove. LED cove lighting is the primary ambient light indoors and consumes only 0.95 W/ft. The cove lighting is wired to a 3 way dimmer switch, offering flexibility and reducing energy consumption. The interior core of The Solar Homestead is lit with two linear fluorescents recessed into solar thermal skylights, providing the homeowner with natural light during the day and the option for light at night. The fluorescents will consume 30W total. Task and Accent lighting is provided by LED puck lights; thirty-two puck lights are used throughout the interior and consume 3.6W each. The LED puck lights are wired to a dimmer switch, aiding flexibility and efficiency. Linear fluorescent strips are placed throughout the interior for lighting in the closets and bathrooms for the interiors. Fluorescent strips are an inexpensive way to light efficiently. The strips range from 15W-18W depending on the length and diameter.

Exterior Lighting for The Solar Homestead is minimal but provides ambient landscape light and accent lighting for the Solar Canopy. Fluorescent floodlights are placed on top of the OMs to highlight the canopy, as well as provide lighting for the Great Porch in the evening. The fluorescent floodlights consume 26W each, comparable to a 90W halogen floodlight. LED light bars are placed along the ramps to highlight the landscape and signage. The 24" LED light bars consume 3.6W each. Weather resistant LED strips are placed within three columns along the Great Porch to highlight each entrance into the house; these strips consume .95W/ft.

LIGHTING SCHEDULE

**TOTAL** 280.35 kWh
ENERGY BUDGET RESULTS

The 42 module solar array is rated at 8.2 kW peak. Historical TMY data for Washington, DC predicts a total of 285.3 kWh of photovoltaic electricity will be produced during the system grid-tied period. Therefore, the intermediate consumption scenario is balanced by the photovoltaic electricity produced.

SECTION 01 11 00: SUMMARY OF WORK

PART 1 - GENERAL

1.1 SUMMARY

A. Project: The Solar Homestead, Appalachian State University 2011 Solar Decathlon

B. Owner: Appalachian State University

C. Architect: Appalachian State University Solar Decathlon Team

D. Project Description: Drawing from traditional Appalachian settlements, The Solar Homestead is composed of multiple buildings which unite to form a self-sufficient ensemble. Six Outbuilding Modules [OM's] interconnect to form the Great Porch, a functional outdoor living space protected by an 8.2kW trellis of bifacial solar cells. The spacious 833 square foot home adjacent to the porch features two bedrooms, a day-lit bathroom, energy-efficient appliances, and a versatile living/dining area. The Solar Homestead also includes an independent 120 square foot Flex-OM, accessible via the Great Porch. This space can transform to become a home office, art studio, or guest quarters.

E. Mission: The Solar Homestead team is committed to designing, engineering, and constructing an innovative net-zero energy home, powered by solar energy, which is affordable to the average homebuyer. We also strive to encourage future leaders to promote sustainability in the local and global community, through education, outreach, and service, in order to improve the world in which we live.

F. Goals:

1. To create innovative solar technologies for the developing renewable energy market.

2. To demonstrate how holistic design can blend the aesthetic and technical aspect of solar technologies to be effective, appealing, and flexible to the needs of future residential construction.

3. To educate student participants to communicate to the public about the cost-saving opportunities of solar technologies.

4. To equip students with applicable experiences and unique career training in order to incorporate sustainable practices and renewable energy into the global workforce.

END OF SECTION 01 11 00
SECTION 01 14 00: WORK RESTRICTIONS

PART 1 - ACCESS TO THE SITE
1.1 APPALACHIAN STATE UNIVERSITY SOLAR DECATHLON
   A. Requirements: Only authorized construction personnel, subcontractors, and Appalachian State University Solar Decathlon team members and faculty are allowed on site during construction unless otherwise authorized by the Appalachian State University Solar Decathlon team.
   B. Unauthorized Access: Any persons attempting to access the site without authorization are to be asked to leave in a polite manner. Failure to leave will result in their expulsion [see Criminal Entry].
   C. Criminal Entry: If unauthorized personnel refuse to leave, or if there are visible signs of theft and/or criminal entry, the police shall be notified immediately.

PART 2 - COORDINATION WITH OCCUPANTS
2.1 APPALACHIAN STATE UNIVERSITY SOLAR DECATHLON
   A. Requirements: Appalachian State University Solar Decathlon team members and construction personnel are to comply with any requests made by Appalachian State University. The job site remains the property of Appalachian State University at all times during construction and is to be treated as such.

PART 3 - USE OF SITE
3.1 APPALACHIAN STATE UNIVERSITY SOLAR DECATHLON
   A. Requirements: The site is to be used only for construction of The Solar Homestead and storage of related materials unless otherwise authorized. Construction personnel may not sleep overnight in, dwell within, or otherwise occupy the job site without authorization.
   B. Special Events: The site will be used several times during construction to house special events, which showcase The Solar Homestead. Construction may be halted during these events. Notification will be given by project management as to the date of such events and their impact on construction.

END OF SECTION 01 14 00
SECTION 01 25 13: PRODUCT SUBSTITUTION PROCEDURES

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes all requirements for product substitution for The Solar Homestead.

1.2 GENERAL PRODUCT REQUIREMENTS

A. Packaging and Labels: Deliver items in original, undamaged, factory packaging with complete manufacturer’s labels.
B. Permanent Labels, Trade Marks, & Trade Names: Locate in inconspicuous locations acceptable to the architect.
C. VOC Content: Use VOC-free items to the greatest extent possible. When VOC-free is not available or is impractical, use items with lowest VOCs.
D. Formaldehyde Content: Use formaldehyde-free items to the greatest extent possible. When formaldehyde-free is not available or is impractical, use items with lowest VOCs.
E. Adhesives: Use nonflammable, water resistant adhesives.
F. Odors: Use odor-free items to the greatest extent possible. When odor is unavoidable, submit sample and obtain preapproval prior to purchase in quantity.

1.3 SUBSTITUTION REQUIREMENTS

A. Substitution Conditions: Substitutions are discouraged, except under the following conditions:
   1. Specified item is no longer available.
   2. Specified item is incorrect, inappropriate, or incompatible.
   3. Substitution offers substantial advantage in quality, time, or cost.
   4. Submittal is related to an “or equal” clause in specifications.
B. Substitution Requirements Apply To:
   1. Proprietary “named” specification when submitted item is not listed in the specifications.
   2. All deviations from contract documents.
C. Substitution Procedure Requirements:
   1. Identify the substitution condition [listed above in “A”].
   2. Refer to specification section, article, paragraph numbers, product names, and models.
   3. Certify that proposed substitution is coordinated with all related and adjacent work.
   4. Provide complete and total cost change information related to the proposed substitution.
D. Appearance Characteristics: For items visible in the completed work, appearance is an important substitution evaluation factor. The architect will decide if a proposed substitution has acceptable appearance. Proposed substitutions may be rejected for appearance alone.

END OF SECTION 01 25 13
SECTION 01 50 00: TEMPORARY FACILITIES AND CONTROLS

PART 1 - GENERAL

1.1 SUMMARY
A. These are temporary facilities and controls that are only used for the purposes of the competition in Washington, D.C. and do not apply to the affordability contest of The Solar Homestead.
B. This section includes the temporary facilities and controls that are used for the purposes of the competition in Washington, D.C.

1.2 SECTION REQUIREMENTS
A. Accessible Temporary Egress: Comply with applicable provisions in ICC/ANSI A117.1.

1.3 RELATED SECTIONS
A. Section 01 51 13 - Temporary Electricity

PART 2 - PRODUCTS

2.1 TEMPORARY FACILITIES
A. Provide tool trailer, storage and fabrication sheds, and other support facilities as necessary for construction operations. Store combustible materials apart from building.
B. Provide temporary floor cover and allow for solar decathlon organizer-supplied walkway during construction.

2.2 EQUIPMENT
A. Fire Extinguishers per The Solar Homestead’s Health and Safety Plan: Portable, UL rated; with class and extinguishing agent as required by locations and classes of fire exposures.
B. Generator: Refer to Section 01 51 13 - Temporary Electricity

PART 3 - EXECUTION

3.1 GENERAL
A. Install temporary service or connect to electrical service.
   1. Arrange with event organizers for time when service can be interrupted for the period of grid-tie assembly to connect The Solar Homestead to the village grid on day 5 of the competition.
B. Provide temporary lighting with local switching that provides adequate illumination for construction operations, observations, inspections, and traffic conditions.
C. Comply with The Solar Homestead’s Health and Safety Plan.

3.2 SUPPORT FACILITIES INSTALLATION

3.3 SECURITY AND PROTECTION FACILITIES INSTALLATION
A. Provide protection, operate temporary facilities, and conduct construction as required to comply with environmental regulations and that minimize possible air, waterway, and subsoil contamination or pollution or other undesirable effects.
B. Maximum pressure on grass to be less than 1500 PSF for Solar Decathlon competition.

C. Provide temporary enclosures for protection of construction, in progress and completed, from exposure, foul weather, other construction operations, and similar activities. Provide temporary weathertight enclosure for building exterior.

3.4 OPERATION, TERMINATION, AND REMOVAL

A. Remove each temporary facility when need for its service has ended, when it has been replaced by authorized use of a permanent facility.

END OF SECTION 01 50 00
SECTION 01 51 13: TEMPORARY ELECTRICITY

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the temporary electricity that is only used for the purposes of the competition in Washington, D.C. and does not apply to the affordability contest of The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. Supply a mobile generator to be used for power tools and construction lights during standalone assembly and standalone disassembly as well as times permitted by the DOE.
B. Provide a spill containment pan to be used with the generator.

1.3 SUBMITTALS
A. Product data, information on decibel levels showing the generator shall meet the National Park Service and psf noise regulation stated in 36CFR2.12
   1. Maximum 60 dB at 15 feet under full load.

PART 2 - PRODUCTS

2.1 MANUFACTURER
A. Honda Power Equipment
   4900 Marconi Drive
   Alpharetta, GA 30005-8847
   Phone: 770-497-6400
   www.hondapowerequipment.com
   1. Available at national chain hardware stores, such as Lowes.

B. UltraTech International, Inc
   11542 Davis Creek Court
   Jacksonville, FL 32256
   Phone: 800-764-9563
   www.spillcontainment.com

2.2 PRODUCTS
A. Honda Generator Engine GX390
   1. Model Number: EU6500IS
   2. Location: Construction Staging Area
   3. Dimensions [L x W x H]: 33.5" x 26.4" x 27.5"
   4. Dry Weight: 260 lbs.
   5. 6500 Watts, 120/240V
6. Receptacles: 20A 125V Duplex, 30A 125V Locking Plug, 30A 125/250V Locking Plug
7. Noise Level: 60 dB @ rated load or 52 dB @ 1/4 load at 25 feet
8. Fuel: 4.5 gallons with 4.7 hours @ rated load, 14.0 hours @ 1/4 load

B. Ultra Tech Containment
1. Model Number: UTI-2351
2. Dimensions [L x W x H]: 54” x 29-3/4” x 3-1/2”
3. Weight: 102 lbs.
4. Containment Capacity: 75 gal

END OF SECTION 01 51 13
SECTION 02 43 13.13: BUILDING RELOCATION

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the methods, equipment and schedules necessary for the transportation of The Solar Homestead from Boone, NC to Washington, DC and back.

1.2 SYSTEM DESCRIPTION
A. All building components are permanently mounted on custom-built steel trailers of standard sizes.
B. The 3 House trailers and 1 Flex OM trailer will be pulled by semi-trucks. The DOT has established these vehicle limits: 102 inches wide, 13.5 feet in height, and 80,000 pounds gross weight. These limits can be exceeded as individual states have the right to issue temporary oversize and/or overweight permits.
C. The 6 OM trailers will be pulled by any standard Medium Duty 3/4 - 1 ton truck.
D. Design Requirements
   1. The Solar Homestead is designed as a group of connectable parts, each of which shall not exceed the allowable dimensions of a flatbed truck, nor shall it exceed the allowable dimensions for highway transportation under federal highway laws. All components shall not exceed 13 ft 6 in height from ground when resting on the bed of the truck[s].
   2. The OMs are designed to sit on standard 8’ wide trailers, which can legally be pulled by medium duty trucks. All components of the trailer shall not exceed the allowable dimensions for highway transportation under federal highway laws.

1.3 SUBMITTALS
A. Site Operations and Transportation Plan Solar Decathlon 2011: include trailer specifications, route information, delivery information and site operations.

1.4 PERFORMANCE REQUIREMENTS
A. The Solar Homestead as a whole must perform identically before and after transportation and re-construction.
B. The Solar Homestead as a series of parts shall be transported using specified packing and securing methods and no components shall be damaged during transportation.

PART 2 - EXECUTION

2.1 QUALITY ASSURANCE
A. Ensure that product is in proper and good working order before accepting the delivery of the product.

2.2 DELIVERY, STORAGE & HANDLING
A. The exact time of delivery to Washington DC shall be coordinated with the team’s and the organizer’s schedule.
B. Additional transportation:
   1. Conditioned flower trucks for all plants.
   2. Covered trailers for straw bales and the vegetated protected membrane roof materials.
   3. Trailer for tools.
   4. Moving truck for furnishings
C. All trailers shall be wrapped with waterproof wrapping to protect the canopy, the decking, and finish surfaces. For the three main house trailers, temporary structure shall be constructed at marriage lines to protect the interior of the trailers.

2.3 INSTALLATION

A. The Solar Homestead and all of its components shall be disassembled, reassembled, packed, secured, and shipped by designated individuals in accordance with the specified instructions.

END OF SECTION 02 43 13.13
SECTION 05 05 23: METAL FASTENINGS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes information about structural bolts used to construct The Solar Homestead.

1.2 REFERENCES
B. ANSI / AWS D1.3-89, ‘Structural Welding Code – Sheet Steel.’
C. ASTM A 36-00, ‘Standard Specification for Carbon Structural Steel.’

1.3 PRODUCT REQUIREMENTS
A. Fasteners: “Fasteners” includes nails, screws, bolts, wedge bolts, expansion bolts, chemical bolts, epoxy anchors, pins, power actuated devices, and all other types of mechanical connections.
   1. Completely Specified Fasteners: where fasteners are completely specified in the contract documents, provide the specified fasteners. “Completely specified” means the fastener type, material, finish, size, diameter, length, and spacing are specified.
   2. Fasteners Not Completely Specified: Fasteners may not be completely specified in the contract documents to provide options and allow different means, methods, and techniques of construction. In all cases where the fasteners are not completely specified in the contact documents:
      a. Select fasteners appropriate for each condition, substrate, load, and exposure.
      b. Use fastener manufacturer’s published load table to determine fastener size and spacing.
      c. Provide a factor of safety of four or higher.
      d. Obtain architect’s approval of each fastener prior to use.
      e. Install fasteners in compliance with the fastener manufacturer’s recommendations.
   3. Fasteners Related to Assemblies: For construction and assemblies required to be engineered, provide fasteners indicated on the approved, engineered shop drawings.

PART 2 - PRODUCTS

2.1 MANUFACTURERS
A. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS
A. 1/2” A307 Bolt [CSI 05 05 23.A1]
   1. Location: OM canopy construction
B. 3/4” A307 Bolt [CSI 05 05 23.A3]
   1. Location: OM connections
C. Bolts And Threaded Fasteners
   1. Bolts conform to requirements of ASTM A 307, Grade A.
PART 3 - EXECUTION

3.1 INSTALLATION

A. Installation of bolts shall meet AISC requirements.

END OF SECTION 05 05 23
SECTION 05 12 00: STRUCTURAL STEEL FRAMING

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes all Structural Steel Framing used for The Solar Homestead’s solar canopy. For other metal trailers, including the main house trailers and OM trailers, refer to Section 13 34 19 - Metal Building Systems.

1.2 REFERENCES

A. Comply with applicable provisions of the following:

1. AISC 303
2. AISC 341 and AISC 341s1.
3. AISC 360
4. RCSC’s “Specification for Structural Joints Using ASTM A 325 or A 490 Bolts.”

B. All work shall be in accordance with the AISC Specification.

C. Contractor shall be responsible for coordinating all erection aides that include, but are not limited to erection angles, lift holes, and other aides.

1.3 RELATED SECTIONS

A. Section 13 34 19 - Metal Building Systems

1.4 SUBMITTALS

A. Shop Drawings

PART 2 - PRODUCTS

2.1 STRUCTURAL STEEL

A. Square telescoping columns: 3" x 3" x 3/16" [CSI 05 12 73.L63] outer columns with 2.5" x 2.5" x 3/16" [CSI 05 12 73.L66] inner columns for the Great Porch.

B. Horizontal beams: 3" x 5" x 3/16" [CSI 05 12 73.L250] for the Great Porch canopy.

2.2 ACCESSORIES

A. High Strength Bolts, Nuts, and Washers

B. Anchor Rods

C. Primer: Fabricator’s standard lead-free, rust-inhibiting primer.

2.3 FABRICATION

A. Canopy: Bid per University of North Carolina System bidding regulations.

B. Structural Steel: Fabricate and assemble in shop to greatest extent possible according to construction documents.

C. Weld Connections: Comply with AWS for tolerances, appearances, welding procedure specifications, weld quality, and methods used in correcting welding work.

D. Shop Priming: Shop prime steel to a dry film thickness of at least 1.5 mils. Do not prime surfaces to be field welded.
PART 3 - EXECUTION

3.1 INSTALLATION

A. Set structural steel accurately in locations and to elevations indicated.
B. Test telescoping columns and alignment of bolt holes prior to welding assembly to trailers.
C. All channel structure for OMs at doors to have predrilled holes set in accordance with requirements of door hinges.
D. High-Strength Bolts: Install high-strength bolts according to manufacturer’s recommendations.
E. Weld Connections: Comply with AWS for tolerances, appearances, welding procedure specifications, weld quality, and methods used in correcting welding work.
F. Perform necessary adjustments to compensate for discrepancies in elevations and alignment.

END OF SECTION 05 12 00
SECTION 05 52 13: PIPE AND TUBE RAILINGS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes information about the mechanical handrail system used on the ramps and deck of The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. Mechanical handrail system comprised of paint steel pipe and welded connections.

PART 2 - PRODUCTS

2.1 MANUFACTURERS
A. Supplied and fabricated by Triplett & Coffey.

2.2 PRODUCTS
A. 1-1/2” shop-fabricated pipe railings
   1. Location: Ramps, landings
   2. Steel pipe

2.3 ACCESSORIES
A. Metal primer and paint

PART 3 - EXECUTION

3.1 FABRICATION
A. Structural Steel: Fabricate and assemble in shop to greatest extent possible according to construction documents.
B. Weld Connections: Comply with AWS for tolerances, appearances, welding procedure specifications, weld quality, and methods used in correcting welding work.
C. Shop Priming: Shop prime steel to a dry film thickness of at least 1.5 mils. Do not prime surfaces to be field welded.

3.2 INSTALLATION
A. Weld Connections: Comply with AWS for tolerances, appearances, welding procedure specifications, weld quality, and methods used in correcting welding work.
B. Perform necessary adjustments to compensate for discrepancies in elevations and alignment.

END OF SECTION 05 52 13
SECTION 06 05 23: WOOD, PLASTIC, AND COMPOSITE FASTENINGS

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes information about The Solar Homestead’s foundation pad fasteners for decks, ramps and site walls.

1.2 RELATED SECTIONS

A. Section 06 11 00 - Wood Framing
B. Section 06 80 00 - Composite Fabrications
C. Section 13 34 19 - Metal Building Systems

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Lag Screws
   1. Available at national chain hardware stores, such as Lowes.
B. Simpson Strong Tie
   5956 West Las Positas Blvd.
   Pleasanton, CA 94588
   Phone: 800-925-5099
   www.strongtie.com
   1. Available through Simpson Strong Tie.

2.2 PRODUCTS

A. 3/8” Lag Screw [CSI 06 05 23.B1]
   1. Location: Roofs of the Living Module, Core Module, Flex OM, and OM Closets
B. 1/2” Lag Screw [CSI 06 05 23.B2]
   1. Location: OM Canopy
C. Simpson Tie Adjustable and Standoff Post Base - 4x4 Connector [CSI 06 05 23.N9]
   1. Model Number: ABA44
   2. Location: under site wall
   3. Dimensions [L x W x H]: 3-1/8” x 3-9/16” x 3-1/16”
   4. Finish: galvanized
   5. Anchor diameter: 1/2”
   6. 16 gauge plate, 16 gauge base cover
D. Simpson Tie Adjustable and Standoff Post Base - 6x6 Connector [CSI 06 05 23.N17]
   1. Model Number: ABE66
   2. Location: under ramps and Deck
3. Dimensions [L x W x H]: 5-7/16" x 5-1/2" x 3-1/8"
4. Finish: galvanized
5. Anchor diameter: 5/8"
6. 12 gauge plate, 14 gauge base cover

PART 3 - EXECUTION

3.1 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.

END OF SECTION 06 05 23
SECTION 06 11 00: WOOD FRAMING

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes all wood framing used for The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. Design requirements: wood framing in wall assembly as specified in drawings. All wood used shall be #2 SPF or better.

1.3 RELATED SECTIONS
A. Section 01 25 13 - Product Substitution Procedures
B. Section 06 05 23 - Wood, Plastic, and Composite Fastenings
C. Section 06 80 00 - Composite Fabrications
D. Section 09 93 13.13 - Exterior Staining
E. Section 13 34 19 - Metal Building Systems

PART 2 - PRODUCTS

2.1 MANUFACTURER
A. Georgia-Pacific Building Products
   133 Peachtree Street NE
   Atlanta, GA 30303
   Phone: 404-652-4000
   www.gp.com
   1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS
A. Blocking [CSI 06 11 00.A1]
B. Bridging [CSI 06 11 00.A2]
C. 1x_ Stock Furring: Refer to drawings for specific dimensions, use, and location.
D. 2x_ Stock Lumber: Refer to drawings for specific dimensions, use, and location.
E. 3x_ Stock Lumber: Refer to drawings for specific dimensions, use, and location.
F. 4x_ Stock Lumber: Refer to drawings for specific dimensions, use, and location.
G. Pressure Treated 2x_ Stock Lumber: Refer to drawings for specific dimensions, use, and location.
H. Pressure Treated 4x_ Stock Lumber: Refer to drawings for specific dimensions, use, and location.
I. Pressure Treated 6x_ Stock Lumber: Refer to drawings for specific dimensions, use, and location.

2.3 ACCESSORIES
A. 2" Exterior Screws with T-20 star drive
PART 3 - EXECUTION

3.1 INSPECTION
   A. Lumber should be inspected for uniformity of appearance, quality and moisture content.

3.2 INSTALLATION
   A. Set rough carpentry to required levels and lines, with members plumb, true to line, cut, and fitted. Locate nailers, blocking, and similar supports to comply with requirements for attaching other construction.
   B. All decking and wood siding to be attached with specific exterior screws. Refer to the Construction Drawings for details.

END OF SECTION 06 11 00
SECTION 06 15 13: WOOD FLOOR DECKING

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes all wood decking used for The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. Design requirements: wood framing in wall assembly as specified in drawings. All wood used shall be #2 SPF or better.

1.3 RELATED SECTIONS
A. Section 01 25 13 - Product Substitution Procedures
B. Section 09 93 13.13 - Exterior Staining

PART 2 - PRODUCTS

2.1 MANUFACTURER
A. Georgia-Pacific Building Products
133 Peachtree Street NE
Atlanta, GA 30303
Phone: 404-652-4000
www.gp.com
1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS
A. 5/4" x 6" Stock Lumber
1. Location: Great Porch, Deck, Ramps
2. Treated with a pressure treated wood stain [Refer to Section 09 93 13.13 - Exterior Staining]

PART 3 - EXECUTION

3.1 INSPECTION
A. Lumber should be inspected for uniformity of appearance, quality and moisture content.

3.2 INSTALLATION
A. Set rough carpentry to required levels and lines, with members plumb, true to line, cut, and fitted. Locate nailers, blocking, and similar supports to comply with requirements for attaching other construction.
B. All decking and wood siding to be attached with specific exterior screws. Refer to the Construction Drawings for details.

END OF SECTION 06 15 13
SECTION 06 16 00: SHEATHING

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes the various types of sheathing used throughout The Solar Homestead.

1.2 RELATED SECTIONS

A. Section 09 93 13.13 - Exterior Staining

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Georgia-Pacific Building Products
   133 Peachtree Street NE
   Atlanta, GA 30303
   Phone: 404-652-4000
   www.gp.com
   1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS

A. Wall Sheathing
   1. Plywood: Exposure 1, Structural I Sheathing
   2. Basis-of-Design Product: Subject to compliance with requirements, provide Huber Engineered Woods LLC; AdvanTech Sheathing.
   3. Span Rating and Nominal Thickness
      a. 32/16, 5/8" [CSI 06 16 00.D8]
         i. Location: Main House
      b. 32/16, 3/4" [CSI 06 16 00.D11]
         i. Location: Flex OM and OMds
      c. Exterior Grade 3/4" [CSI 06 16 00.D12] [Refer to Section 09 93 13.13 - Exterior Staining]
         i. Location: Flex OM Kitchen and OM Closets
   4. Edge Profile: Flush.
   6. Exposure Time: Designed to resist weather exposure for 300 days.
   7. Provide fastening guide on top panel surface with pre-spaced fastening symbols 24-inches [610 mm] on center spacing.

B. Roof Sheathing
   1. Plywood: Exposure 1, Structural I Sheathing.
The Solar Homestead

2. **Basis-of-Design Product:** Subject to compliance with requirements, provide Huber Engineered Woods LLC; AdvanTech Sheathing.

3. **Span Rating and Nominal Thickness**
   a. **40/20, 3/4” [CSI 06 16 00.D11]**
      i. **Location:** Main House and Flex OM

4. **Edge Profile:** Tongue and groove.

5. **Provide fastening guide on top panel surface with pre-spaced fastening symbols for 24-inches on center spacing.**

C. **Subflooring**
   1. **Plywood: Exposure 1, Structural I Sheathing**
   2. **Basis-of-Design Product:** Subject to compliance with requirements, provide Huber Engineered Woods LLC; AdvanTech Flooring
   3. **Span Rating and Nominal Thickness**
      a. **16 O.C., 3/4” [CSI 06 16 00.D11]**
      i. **Location:** Main House and Flex OM
   4. **Edge Detail:** Tongue and groove.
   5. **Surface Finish:** Fully sanded face.
   7. **Provide fastening guide on top panel surface with pre-spaced fastening symbols for 24-inches [610 mm] on center spacing.**

D. **Finished Flooring**
   1. **Plywood: Exposure 1, Structural I Sheathing**
   2. **Location:** Flex Space Floor
   3. **Basis-of-Design Product:** Subject to compliance with requirements, provide Huber Engineered Woods LLC; AdvanTech Sheathing.
   4. **Span Rating and Nominal Thickness**
      a. **1/2” [CSI 06 16 00.A3]**
   5. **Edge Profile:** Flush.
   7. **Exposure Time:** Designed to resist weather exposure for 300 days.
   8. **Provide fastening guide on top panel surface with pre-spaced fastening symbols for 24-inches [610 mm] on center spacing.**

E. **Ceiling**
   1. **Plywood: Exposure 1, Structural I Sheathing**
   2. **Basis-of-Design Product:** Subject to compliance with requirements, provide Huber Engineered Woods LLC; AdvanTech Flooring
   3. **Span Rating and Nominal Thickness**
a. Exterior Grade 3/8" [CSI 06 16 00.D5] [Refer to Section 09 93 13.13 - Exterior Staining]
   i. Location: Underneath Main House and Flex OM
4. Edge Profile: Flush.
5. Surface Finish: Fully sanded face.
7. Provide fastening guide on top panel surface with pre-spaced fastening symbols for 24-inches [610 mm] on center spacing.

F. Miscellaneous Uses
1. Plywood Combination Subfloor-Underlayment: Exposure 2 layers of floor panels cross laid.
2. Basis-of-Design Product: Subject to compliance with requirements, provide Huber Engineered Woods LLC; AdvanTech Sheathing.
3. Nominal Thickness:
   a. Treated 1/2" Plywood [CSI 06 16 00.A3] [Refer to Section 09 93 13.13 - Exterior Staining]
      i. Location: Bearing pads for site walls, ramps, and deck throughout The Solar Homestead
   b. Treated 3/4" Plywood [CSI 06 16 00.D11] [Refer to Section 09 93 13.13 - Exterior Staining]
      i. Location: Sleepers elevating supply water tanks and waste water bladders
4. Edge Profile: Flush.
5. Provide fastening guide on top panel surface with pre-spaced fastening symbols for 24-inches [610 mm] on center spacing.

G. Interior Finish
1. MDF Panels
2. Wood Fiber: 100 percent post-industrial recycled wood residuals.
4. Nominal Thickness:
   a. 3/4" [CSI 06 16 00.C5] ripped to 3-1/4" boards
      i. Location: Core Module walls

2.3 ACCESSORIES
A. Fasteners
1. Provide fasteners of size and type indicated that comply with requirements specified in this article by the authority having jurisdiction, International Building Code, International Residential Code, Wood Frame Construction manual, and National Design Specification

B. Adhesives
1. Adhesives for Field Gluing Subfloor Panels to framing: Polyurethane-based formulation complying with APA AFG-01 or ASTM D 3498 that is approved for use with type of construction panel indicated by manufacturers of both adhesives and panels.
2. Adhesives shall have a VOC content of 50 g/L or less when calculated according to 40 CFR 59, Subpart D [EPA Method 24].
PART 3 - EXECUTION

3.1 DELIVERY, STORAGE & HANDLING
   A. Comply with manufacturer’s recommendations.

3.2 INSTALLATION
   A. Install all sheathing and subflooring plumb, square and true to line.
   B. Install all sheathing and subflooring as specified in the drawings.
   C. Wood Structural Panel
      2. Fastening Methods
         a. Combination Subfloor-Underlayment: Glue and screw to wood framing.
            i. Space panels 1/8 inches apart at edges and ends.
            ii. Install fasteners 3/8 inches to 1/2 inches from panel edges.
            iii. Space fasteners 6 inches on centers on supported edges [4-foot ends], and 12 inches [305 mm] on centers at intermediate support locations.
            iv. Penetrate wood framing members at least 1 inch.
         b. Wall and Roof Sheathing:
            i. Screw to wood framing.
            ii. Space panels 1/8 inch apart at edges and ends.
            iii. Install fasteners 3/8 inch to 1/2 inch from panel edges.
            iv. Space fasteners in compliance with requirements of authority having jurisdiction.

END OF SECTION 06 16 00
SECTION 06 16 53: MOISTURE-RESISTANT SHEATHING BOARD

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes all moisture resistant sheathing board in the bathrooms in The Solar Homestead and the Flex OM.

1.2 RELATED DOCUMENTS
A. Drawings and general provisions of the contract apply to this section.

1.3 SUBMITTALS
A. Product Data
B. Material Safety Data Sheet

PART 2 - PRODUCTS

2.1 MANUFACTURER
A. USG Corporation
   550 West Adams Street
   Chicago, IL 60661-3676
   Phone: 800-950-3839
   www.usg.com
   1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS
A. Moisture Resistant Sheathing Board
   1. Model Number: Sheetrock® Mold Tough™
   2. Location: Core Module Bath
   3. 1/2” moisture resistant
   4. 4’ x 8’ panels
   5. Must meet termite resistance requirements of AWPA E1-97, ASTM D3345-74; ASTM D 1758; AWPA E7-93, fastener holding strength of ASTM D-1037, and be a Class A Fire Retardant Material.

PART 3 - EXECUTION

3.1 QUALITY ASSURANCE
A. UL Classified fire resistance, surface burning characteristics and non-combustibility [Type SLX].
B. Per ASTM E84, flame spread is 20; smoke developed is 0.

3.2 DELIVERY, STORAGE, AND HANDLING
A. Exercise care to prevent crushing of edges with cargo hold down straps during transportation.
B. Carefully load and unload products from trucks to prevent damage.
C. If product must be stored outside, elevate off of the ground on sleepers and cover to protect from weather.

3.3 INSTALLATION

A. Install all sheathing plumb, square, and true to line.

END OF SECTION 06 16 53
SECTION 06 17 53: SHOP-FABRICATED WOOD TRUSSES

PART 1 - GENERAL

1.1 SUMMARY
   A. This section includes the shop-fabricated wood trusses used for the Main House.

1.2 SYSTEM DESCRIPTION
   A. Fabricator Qualifications: Deltec participates in a recognized quality-assurance program that complies with quality-control procedures in TPI 1 and that involves third-party inspection by an independent testing and inspecting agency acceptable to architect and authorities having jurisdiction.
   B. Comply with applicable requirements and recommendations of the following publications
      1. TPI 1, “National Design Standard for Metal Plate Connected Wood Truss Construction.”
      2. TPI DSB, “Recommended Design Specification for Temporary Bracing of Metal Plate Connected Wood Trusses.”
      5. Structural Performance: Provide metal-plate-connected wood trusses capable of withstanding design loads indicated without exceeding TPI 1 deflection limits.

1.3 SUBMITTALS
   A. Shop Drawings
   B. Structural analysis data signed and sealed by the qualified professional engineer responsible for their preparation

PART 2 - PRODUCTS

2.1 MANUFACTURER
   A. Deltec
      69 Bingham Road
      Asheville, NC 28806
      Phone: 800-642-2508
      www.deltechomes.com
      1. Available through Deltec.

2.2 PRODUCT
   A. Deltec Trusses
      1. Location: Main House
      2. Dimensions [L x D]: 24’ x 14”
      3. Spacing: 12” o.c.
      4. Species: southern yellow pine
5. Structural properties: Provide units with depths and design values not less than those indicated in structural calculations.

6. Provide units complying with APA PRI-400, factory marked with nominal joist depth, joist class, span ratings, mill identification, and compliance with APA standard.

2.3 ACCESSORIES

A. Connector Plates: TPI 1, fabricated from hot-dip galvanized-steel sheet complying with ASTM A 653/A 653M; Structural Steel [SS], high-strength low-alloy steel Type A [HSLAS Type A], or high-strength low-alloy steel Type B [HSLAS Type B]; Z180 coating designation; and not less than 0.9 mm thick. 18 gauge G60 galvanized metal.

B. Fasteners: Where trusses are exposed to weather or in area of high relative humidity, provide fasteners with hot-dip zinc coating complying with ASTM A 153/A 153M.

2.4 FABRICATION

A. Assemble trusses using jigs or other means to ensure uniformity and accuracy of assembly with joints closely fitted. Fabricate wood trusses within manufacturing tolerances in TPI 1.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install and brace trusses according to manufacturer’s recommendations. Install trusses plumb, square, and true to line and securely fasten to supporting construction.

B. Do not cut or remove truss members.

C. Remove trusses that are damaged or do not meet requirements and replace with trusses that do meet requirements.

END OF SECTION 06 17 53
**SECTION 06 20 23: INTERIOR FINISH CARPENTRY**

**PART 1 - GENERAL**

1.1 SUMMARY  
A. This section includes information on the Core Module bathroom vanity and wood shelving in the Living Module. Refer to details in Construction Documents.

1.2 SYSTEM REQUIREMENTS  
A. Comply with ASTM Codes

1.3 RELATED SECTIONS  
A. Section 09 93 13.13 - Exterior Staining

1.4 SUBMITTALS  
A. Shop Drawings

**PART 2 - PRODUCTS**

2.1 MANUFACTURER  
A. Available at national lumber yards and hardware chain stores, such as Lowes.

2.2 PRODUCT  
A. Black Locust Wood Vanity  
   1. Location: Core Module Bath  
   2. Top of vanity [W x D]: 24" x 24"  
   3. Base of vanity [W x H]: 30" x 24"  
   4. Board size: 5-1/2"  
   5. Weight: 48.2 lbs/ft³  
   6. Finish: natural white vinegar stain and protective clear coat [Refer to Section 09 93 13.13 - Exterior Staining]  
   7. Resistance to insects & decay: high  
B. 3/4" White Pine Shelving  
   1. Location: Bay Window  
   2. Dimensions [W x D]: 15" x 17"  
   3. Thickness: 3/4"  
   4. Finish: protective clear coat [Refer to Section 09 93 13.13 - Exterior Staining]

**PART 3 - EXECUTION**

3.1 INSTALLATION  
A. Condition finishes carpentry in installation areas for 24 hours before installing.
B. Install finish carpentry level, plumb, true, and aligned with adjacent materials. Scribe and cut to fit adjoining work. Refinish and seal cuts.

C. Select and arrange paneling for best match of adjacent units. Install with uniform tight joints.

END OF SECTION 06 20 23
SECTION 06 46 00: WOOD TRIM

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes all wood trim used throughout The Solar Homestead.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Georgia-Pacific Building Products
   133 Peachtree Street NE
   Atlanta, GA 30303
   Phone: 404-652-4000
   www.gp.com
   1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS

A. Base and Crown Molding
   1. Location: exterior walls of Core
   2. 1x4 pine

B. Jamb Extensions
   1. Location: around all windows and doors
   2. 1x8 pine

C. Window Casing
   1. Location: Flex Space
   2. 1x4 pine

D. Closet Door Trim
   1. Location: Bedroom Closets
   2. 1x2 pine

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install in accordance with Construction Documents.

END OF SECTION 06 46 00
SECTION 06 61 00: SIMULATED STONE FABRICATIONS

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes simulated stone fabrications or equivalent product as approved by the architect for bathroom and shower details as mounting blocks.

1.2 RELATED SECTIONS

A. Section 01 25 13 - Product Substitution Procedures

1.3 SUBMITTALS

A. Product Data

PART 2 - PRODUCTS

2.1 MANUFACTURER

A. Grainger
7 11th Street NW
Hickory, NC 28601
Phone: 800-323-0620
www.grainger.com

1. Available through Grainger.

2.2 PRODUCTS

A. Grainger Delrin
1. Model Number: 2VEP6
2. Location: Core Module Bath
3. Dimensions [L x W x D]: 12” x 12” x 1/4”
   a. Product shall be cut down to sizes based on products. See Construction Documents for details.
   b. Toilet paper roll [L x H]: 8” x 2-5/8”
   c. Shower trim valve [L x H]: 8-1/2” x 7” with a 2-1/2” diameter hole in the center for plumbing

4. Finish: white

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install in accordance with manufacturer's recommendations and as detailed in Construction Documents.
B. Form inconspicuous and nonporous joints.

END OF SECTION 12 36 61
SECTION 06 64 00: PLASTIC PANELING

PART 1 - GENERAL
1.1 SUMMARY
A. This section includes the plastic polycarbonate paneling that will be used in The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. Polycarbonate sheets will be used as a “light wall” inside the Flex Space and between the two bedrooms in the main house. The skylight [Refer to Section 08 63 00 - Metal-Framed Skylights] located in the Core Module will also use polycarbonate sheets.

1.3 RELATED SECTIONS
A. Section 08 63 00 - Metal-Framed Skylights

   PO Box 410592
   Charlotte, NC 28241
   Phone: 800-537-0095
   www.polygal-northamerica.com
   1. Available at Polygal Inc. or other online plastic suppliers.

2.2 PRODUCTS
A. Polygal Titan Sky
   1. Location: Bedroom Module, Core Module, Flex Space
   2. 4’ x 8’ sheets on 16” o.c. stud wall
   3. 16 mm for the “light walls” in the Flex Space and the Bedroom Module
   4. 8 mm for skylight covers in the Core Module
   5. Weight: 0.51 lb/ft²
   6. Finish: ice
   7. Light transmission: 32%

2.3 ACCESSORIES
A. Steel washers
B. Steel squarehead screws
PART 3 - EXECUTION

3.1 INSTALLATION

A. Install in accordance with construction details.

END OF SECTION 06 64 00
PART 1 - GENERAL

1.1 SUMMARY
   A. This section includes the composite fabrications used to create the foundation system in conjunction with the manufactured steel trailers [Refer to Section 13 34 19 - Metal Building Systems] of The Solar Homestead.

1.2 RELATED SECTIONS
   A. Section 06 05 23 - Wood, Plastic, and Composite Fastenings
   B. Section 06 11 00 - Wood Framing
   C. Section 13 34 19 - Metal Building Systems

1.3 SUBMITTALS

      1. Available through Uline.

   B. Abesco Distributing, Inc.
      5851 Florin Perkins Road
      Sacramento, CA 95828
      Phone: 800-382-8831
      www.abseco.org
      1. Available through Abesco Distributing, Inc.

   C. RubberForm Recycled Products, LLC
      75 Michigan Street
      Lockport, NY 14094
      Phone: 866-424-6981
      www.rubberform.com
      1. Available through RubberForm Recycled Products, LLC.

2.2 PRODUCTS
   A. Uline Burlap Sacks [CSI 06 80 00.A1]
1. Model Number: S-12332  
   a. Location: underneath Ramps, Deck, and Site Walls  
   b. Dimensions [L x W]: 20” x 36”  
   c. Weight: 10 oz  
2. Model Number: S-15524  
   a. Location: underneath scissor jacks [Refer to Section 13 34 19 - Metal Building Systems]  
   b. Dimensions [L x W]: 36” x 48”  
   c. Weight: 10 oz  

B. Abesco ABS Foundation Pads [CSI 06 80 00.A2]  
   1. Model Number: 513  
   2. Location: underneath Ramps, Deck, Site Walls, and scissor jacks [Refer to Section 13 34 19 - Metal Building Systems]  
   3. Dimensions [L x W x D]: 24” x 24” x 1”  

C. RubberForm Recycled Rubber Pads [CSI 06 80 00.A3]  
   1. Model Number: Custom  
   2. Location: underneath Ramps, Deck, Site Walls, and scissor jacks [Refer to Section 13 34 19 - Metal Building Systems]  
   3. Dimensions [L x W x D]: 14” x 14” x varies between 1/2” to 1” depending on site  
   4. Compressive design loads up to 1,500 psi  
   5. Ultimate compressive strength of 10,000 psi  

PART 3 - EXECUTION  

3.1 INSTALLATION  
   A. Burlap Sacks shall be filled with sand and folded over then placed under the Foundation pads to distribute the load over the soil evenly.  
   B. ABS Foundation Pads shall be placed beneath the Recycled Rubber Pads and shall vary in thickness in order to accommodate changes in the grade of the site and level the supported manufactured steel trailers above.  
   C. Recycled Rubber Pads bear the load of the manufactured steel trailers and transfer the load to the other products and finally to the ground.  
   D. Install in accordance with manufacturer’s recommendations.  

END OF SECTION 06 80 00
SECTION 07 13 00: SHEET WATERPROOFING

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes the sheet waterproofing that will wrap the Main House and Flex OM.

1.2 REFERENCES

A. Comply with all ASTM International, AATCC, and TAPP codes

1.3 SYSTEM DESCRIPTION

A. DuPont Tyvek ThermaWrap Membrane: A low-emissivity metalized surface designed to manage radiant heat flow through wall systems to help improve energy efficiency.

1.4 SUBMITTALS

A. Product Data

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. DuPont

1007 Market Street
Wilmington, DE 19898
Phone: 800-441-7515
www.dupont.com

1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS

A. DuPont Tyvek ThermaWrap

1. Model Number: D1349991
2. Location: Main House and Flex OM
3. Dimensions [L x W]: 9’ x 150’
4. R-Value: R-2
5. Water penetration resistance: 210 cm
6. UV exposure: 120 days

2.3 ACCESSORIES

A. DuPont Tyvek Tape
B. DuPont Tyvek Wrap Caps

PART 3 - EXECUTION

3.1 QUALITY ASSURANCE
A. Verify substrate and surface conditions are in accordance with weather barrier manufacturer recommended tolerances prior to installation of weather barrier and accessories

3.2 DELIVERY, STORAGE & HANDLING
A. Deliver weather barrier materials and components in manufacturer’s original, unopened, undamaged containers with identification labels intact.
B. Store weather barrier materials as recommended by weather barrier manufacturer.

3.3 WARRANTY
A. Weather barrier manufacturer’s warranty for weather barrier for a period of ten years from date of substantial completion.

3.4 INSTALLATION
A. Install weather barrier over exterior face of exterior wall substrate in accordance with manufacturer recommendations prior to installation of windows and doors.
B. Start weather barrier installation at a building corner, leaving 6-12 inches of weather barrier extended beyond corner to overlap
C. Install weather barrier silver side facing air space.
D. Install weather barrier in a horizontal manner starting at the lower portion of the wall surface with subsequent layers installed in a shingling manner to overlap lower layers. Maintain weather barrier plumb and level
E. Sill Plate Interface: Extend lower edge of weather barrier over sill plate interface. 3-6 inches. Secure to foundation with elastomeric sealant as recommended by weather barrier manufacturer.
F. Window and Door Openings: Extend weather barrier completely over openings.

END OF SECTION 07 13 00
SECTION 07 13 26: SELF-ADHERING SHEET WATERPROOFING

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes self-adhering sheet waterproofing as a roof underlayment for the Main House and Flex OM.

1.2 REFERENCES
A. American Society for Testing and Materials [ASTM]
   1. D412 Standard Test Methods for Vulcanized Rubber and Elastomeric Tension
   2. D461 Standard Test Methods for Felt
   3. D903 Test Methods for Peel or Stripping Strength of Adhesive Bonds

1.3 SYSTEM DESCRIPTION
A. Grace Ice and Water Shield: A self-adhered membrane roofing underlayment offers premium leak protection for sloped roofs subject to the effects of ice dams or wind driven rain. The membrane is designed to be applied to the roof deck prior to the application of the finished roof coverings.

1.4 RELATED SECTIONS

2.2 PRODUCT
A. Grace Ice and Water Shield
   1. Model: 5003002
   2. Location: Main House and Flex OM
   3. Dimensions [L x W]: 75’ x 36”
4. Weight: 62 lbs
5. Color: gray-black
6. Thickness: 40 mil [1.02 mm]
7. Tensile strength: 250 psi [1720 kPa]
8. Maximum permeance: 0.05 perms

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install in accordance with manufacturer’s recommendations and as shown on Construction Documents.

END OF SECTION 07 13 26
SECTION 07 21 13: BOARD INSULATION

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the board insulation for the Main House and Flex OM on the walls, roofs, and beneath the floor.

1.2 SUBMITTALS
A. Product Data

PART 2 - PRODUCTS

2.1 MANUFACTURER
A. GreenGuard Pactiv
   1900 West Field Court
   Lake Forest, IL 60045
   Phone: 800-241-4402

   1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCT
A. GreenGuard Type IV Board Insulation
   1. Location: Main House and Flex OM
   2. Dimensions [L x W]: 8’ x 4’
   3. Edge treatment: square edge
   4. Minimum compressive strength: 25 psi
   5. 1” thickness for all walls and beneath the floor system with R-value of 5 [CSI 07 21 13.B2]

2.3 ACCESSORIES
A. Adhesive: single-component, polyurethane adhesives tested to:
   1. Underwriters Laboratory Inc. - UL 1897 Standard for Safety for Uplift Tests for Roof Covering Systems
   2. Factory Mutual Approvals for fire and wind uplift resistance for roof deck applications approved by Factory Mutual.
B. Joint Closure Strips - Clip Strip Type: rigid PVC construction, J-channel shape, 1 inch [25 mm] nominal size
C. Joint Closure Strips - Interlocking Type: rigid PVC construction, two piece male-to-female connection, 1 inch [25 mm] nominal size; female profile complete with pre-drilled holes spaced at 12 inches [300 mm] on center, both sides of attachment flange
D. Joint Tape: 2.0 mil [0.051 mm] thick aluminum tape, 3 inches [75 mm] wide. Board joints must be clean prior to applying tapes.

PART 3 - EXECUTION
3.1 ENVIRONMENTAL REQUIREMENTS
   A. Do not apply adhesives or sealants when substrate and ambient air temperatures are below 40°F [4°C].

3.2 DELIVERY, STORAGE AND HANDLING
   A. Store product in protected area to protect product from moisture or damage.

3.3 INSTALLATION
   A. Install in accordance with manufacturer’s recommendations.
   B. Install boards with long axis perpendicular to supports. Ensure end joints are fully supported.
   C. Install insulation boards to ensure board width spans not less than 3 framing supports.
   D. Cut and fit boards to suit project requirements.

END OF SECTION 07 21 13

2.2 PRODUCTS
A. Johns Manville Un-Faced Fiberglass Batt Insulation
   1. Model Number: U-1330
   2. Location: Main House and Flex OM interior walls
   3. Dimensions [L x W]: 93” x 15”
   4. Thickness: 3-1/2”
   5. R-Value: R-13

B. Johns Manville Kraft-Faced Fiberglass Batt Insulation
   1. Model Number: K834
   2. Location: Main House and Flex OM exterior walls
   3. Dimensions [L x W]: 96” x 24”
   4. Thickness: 6-1/2”
   5. R-Value: R-19
PART 3 - EXECUTION

3.1 DELIVERY, STORAGE & HANDLING
   A. When transporting, cover completely with a waterproof tarpaulin as necessary.
   B. Store indoors, and keep clean and dry.
   C. Wear safety glasses, leather or cotton gloves, long pants, and a long, loose-fitting shirt when handling insulation. If necessary, wear ear protection and respirator.

3.2 INSTALLATION
   A. Install in accordance with the manufacturer’s recommendations.

END OF SECTION 07 21 16
SECTION 07 21 19: FOAMED-IN-PLACE INSULATION

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes foamed in place Icynene insulation for the Main House and Flex OM.

1.2 SYSTEM DESCRIPTION
A. ICYNENE MD-R-200: a trademark for medium density, 100% water-blown polyurethane spray foam manufactured by Icynene. ICYNENE MD-R-200™ is a nominal 2 lbs/ft³ density, free rise material.
   1. Type III vapor retarder with low vapor permanence.
   2. 100 % water-blown foam insulation and air barrier material containing resins with pre- and post-consumer recycled content

         www.homeenergypartners.com

2.2 PRODUCT
A. Icynene Insulation
   1. Model Number: MD-R-200
   2. Location: Main House and Flex OM floor and roof, northeast corner of the Bay Window, south wall of the Core Module
   3. Thermal resistance: R/in = R5.2 hr ft² °F/BTU
4. Average insulation in a 2” x 4” stud wall: R-16 [3” foam] and R-26 [5” foam] for a 2” x 6”
5. Water vapor transmission properties: 1.3 perms @ 3”
6. Surface burning characteristics @ 2” thickness: flame spread of ≤25 and smoke development of ≤450
7. Water absorption: 0.57% by volume

PART 3 - EXECUTION

3.1 DELIVERY, STORAGE & HANDLING
   A. ICYNENE MD-R-200 Resin ideally should be stored between 60°F and 90°F and never exceed 100°F.

3.2 INSPECTION
   A. Inspect stud cavity for proper installation methods prior to installing in The Solar Homestead.
   B. Verify all electrical, plumbing, and other trades have been coordinated prior to installation.

3.3 INSTALLATION
   A. Liquid components are manufactured on site and supplied by independent Icynene licensed dealers.
   B. Install by a licensed, trained dealer in accordance with manufacturer’s recommendations.

END OF SECTION 07 21 19
SECTION 07 25 00: WEATHER BARRIERS

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes the weather barrier on the exterior of the OMs on the side facing the Great Porch as described in the Construction Documents.

1.2 REFERENCES

C. AATCC-127 “Hydrostatic Head Test”
D. ASTM D-5733-9 Trapezoidal Test
E. Air-Ins ASTM E-283 Canadian Air Barrier Materials Standard
F. ASTM D-779 Dry Indicator Method, Water Penetration Resistance

1.3 SYSTEM DESCRIPTION

A. VaproShield WallShield: WallShield is a vapor- and air- permeable water- resistive barrier for wall assemblies. WallShield is used as a concealed or semi-concealed underlayment behind wall cladding systems, including siding and shingles, metal and composite panels, EIFS and stucco, and masonry veneers.

A. Union Corrugated Metal Siding
   1. 2.67” x 1/2” Corrugated Metal Panel [CSI 07 46 19.A1]
      a. Location: Core Module Bath
      b. 26 gauge
      c. Finish: galvalume
   2. 2.67” x 7/8” Corrugated Metal Panel [CSI 07 46 19.A2]
      a. Location: OM Closets, Barn Door
      b. 24 gauge
      c. Finish: galvalume

B. Metal-Tech Perforated Corrugated Metal Siding
   1. 2.67” x 7/8” Aluminum Perforated Corrugated Metal Panel [CSI 07 46 19.A11]
PART 3 - EXECUTION

3.1 INSTALLATION

A. Install in accordance with manufacturer’s recommendations. Lap siding as recommended by manufacturer.

B. Seal joints and penetrations through weather resistive barrier with rubber gasket screws.

C. Install accessories according to construction drawings.
SECTION 07 46 23: WOOD SIDING

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes wood siding to be installed as exterior wall sheathing for The Solar Homestead as described in the Construction Documents.

1.2 SYSTEM DESCRIPTION

A. Channel siding is a type of lap siding in which the profile of each board partially overlaps that of the board of next to it, creating a channel that gives shadow line effects, providing excellent weather protection and allowing for dimensional movement. Channel siding will be applied vertically to the exterior of The Solar Homestead.

2.2 PRODUCT
A. Highland Craftsmen Bark House Pioneer Shingle
   1. Location: Flex OM, exterior of Main House south wall
   2. Lengths: 26"
   3. Widths: 6" minimum to 4’ maximum [average shingle width is 13” and wider]
   4. Thickness: 1/2” minimum to 7/8” maximum
   5. Finish: yellow poplar
   6. Moisture content: approximately 6-8% guaranteed Kiln Dried & Heat Sterilized
   7. Squared: re-squared to exact 90 degree edges for precise installation
   8. Appearance graded for performance and appearance. 100% usable sound bark. No open defect, no brown scaly bark.

2.3 ACCESSORIES
A. G.M.C. Roof Felt

1. Model Number: No. 30 Felt
2. Location: Flex OM, exterior of Main House south wall
3. Dimensions [L x W]: 72' x 36"
4. Coverage area: 216 ft²
5. Color: black

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install in accordance with manufacturer’s instructions with a 15” to 18” exposure. Refer to details in Construction Documents. Use fasteners as recommended by manufacturer.
SECTION 07 54 23: THERMOPLASTIC-POLYOLEFIN ROOFING

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the thermoplastic-polyolefin roofing for the Main House, OM Closets, and Flex OM as outlined below.

1.2 SYSTEM DESCRIPTION
A. Apply the Firestone thermoplastic-polyolefin roofing in conjunction with tapered polyisocyanurate insulation over the wood roof deck.

1.3 SUBMITTALS
A. Product Data
B. Material Safety Data Sheet [MSDS]

2.2 PRODUCT
A. Firestone Thermoplastic Polyolefin [TPO] Membrane
   1. Model Number: UltraPly TPO
   2. Location: Main House, OM Closets, Flex OM
   3. Thickness: 0.045", 0.060" over the reinforcing scrim [top-ply thickness]
   4. Color: white

2.3 ACCESSORIES
A. Tapered Polyisocyanurate Insulation [CSI 07 54 23.A1]
   1. 4'x8' panels with a varied thickness of 1" to 2-1/2" with R-value of 19
B. Fasteners and Plates
   1. HailGuard Fasteners

C. Metal Edging and Membrane Terminations
   1. Metal fascia/drip edge system with a 24-gauge continuous anchor cleat and 32 mil thick clear anodized aluminum.

PART 3 - EXECUTION

3.1 QUALITY ASSURANCE
A. The TPO membrane roofing system must achieve a UL Class A, B or C and must have been successfully tested to meet or exceed the calculated uplift pressure required by the International Building Code [ASCE-7] or ANSI/SPRI WD-1.

3.2 PRODUCT DELIVERY, STORAGE AND HANDLING
A. Comply with the manufacturer's written instructions for proper material storage.
   1. Store Sure-Weld membrane in the original undisturbed plastic wrap in a cool, shaded area. Sure-Weld membrane that has been exposed to the elements for approximately 7 days must be prepared with Carlisle Weathered Membrane Cleaner prior to hot air welding.
   2. Store curable materials [adhesives and sealants] between 60°F and 80°F in dry areas protected from water and direct sunlight. If exposed to lower temperature, restore to 60°F minimum temperature before using.
   3. Store materials containing solvents in dry, well ventilated spaces with proper fire and safety precautions. Keep lids on tight. Use before expiration of their shelf life.

B. Insulation must be on pallets, off the ground and tightly covered with waterproof materials.

C. Any materials which are found to be damaged shall be removed and replaced at the applicator's expense.

3.3 INSTALLATION
A. Install in accordance with manufacturer's recommendations.

B. Position sheets to accommodate contours of the roof deck and shingle splices to avoid standing water.

END OF SECTION 07 54 23
SECTION 07 55 63: VEGETATED PROTECTED MEMBRANE ROOF

2.2 PRODUCTS
A. Permasnap Parapet Wall Coping
   1. Location: Main House
   2. Metal: 0.050” aluminum for all sizes
   3. Coping Cap: length of 10’ [3048 mm]; width of 13”
   4. Coping vertical face and back leg: standard 4” [100 mm] nominal; custom size by request.
   5. Internal splice plates: concealed with matching finish to maintain outside face continuity.
   6. Coping Cleat: 20 gauge galvanized steel anchor cleat; normally 12” [305 mm] wide @ 5’ [1524 mm] on center to be mechanically fastened as indicated and detailed.
   7. Gutter/support chair: Metal Gutter Chair in color and finish to match coping cap.
   8. Fasteners: stainless steel screw type with a minimum pull-out resistance of 240 Number [109 kg] as supplied by the manufacturer per substrate application. No exposed fasteners permitted.

2.3 ACCESSORIES
A. Corners, end caps, pier caps, etc. shall be fabricated by the coping manufacturer.

PART 3 - EXECUTION
3.1 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.
B. Installer shall use mechanical fasteners with minimum 240 Number [109 kg] pull-out resistance suitable for parapet substrates.

END OF SECTION 07 71 13
SECTION 08 14 23.13: METAL-FACED WOOD DOORS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes 4-17/32 inch [115mm] stile Ultra Series Inswing Entrance doors complete with hardware, glazing, weatherstripping, screens, jamb extensions, stationary panel, stationary sidelite and standard or specified anchorages, trim, attachments, and accessories [CSI 08 14 23.13]. Used for exterior doors for the Main House and Flex OM.

1.2 REFERENCES

1.3 SYSTEM DESCRIPTION
A. Design and Performance Requirements
   1. Standard Performance windows include residential application [design pressure required 55psf].
B. Energy Ratings
   1. All units tested are one-lite, residential, LoE²-270, argon filled, with Kolbe ID No. as listed on the NFRC label adhered to each unit. Values are certified per NFRC and units are labeled per state requirements.
   2. R-5 glass panes installed by manufacturer.

1.4 SUBMITTALS

PART 2 - PRODUCTS

2.1 MANUFACTURER
A. Kolbe & Kolbe Millwork Co., Inc.
   1323 S. 11th Ave
   Wausau, WI 54401
   Phone: 715-842-5666
   www.kolbe-kolbe.com
   1. Available through Kolbe & Kolbe Millwork Co., Inc. and national chain hardware stores.

2.2 PRODUCT
A. Frame: Constructed of kiln-dried pine, with pine interior stops, water repellent, preservative treated in accordance with WDMA I.S. 4-07'A. Ultra assembled frames have factory installed heavy vinyl nailing fins at head and side jambs. Nailing fin at head has integral drip cap.
   1. Jamb Thickness: Head and side jambs are 3/4 inch [19mm] on the interior; 1-5/16 inch [33mm] exterior.
   2. Basic Jamb Width: Extended jamb width 7 inch [178mm].
   3. Sill Thickness: Handicap sill is 1/2 inch [13mm] meeting ADA requirements.

5. Exterior: Head and side frame parts are .050 inch [1.3mm] thick 6063 extruded aluminum alloy with accessory grooves, press fit onto the wood frame.

6. Corner Construction: Mitered corners use internal corner key and sealer.

7. Other wood species available: Pine [standard] on exposed wood frame components.

B. Panels: Direct set sidelites are constructed of glass directly set into frame. Sash set sidelites are constructed of kiln dried pine, water repellent, preservative treated in accordance with WDMA I.S. 4-07'A.

1. Thickness: 1-23/32 inch [44mm].

2. Top Rails: Face dimension is 4-17/32 inch [115mm] for wide stile units.

3. Stiles: All lock stiles are constructed of laminated veneer lumber with solid wood edge banding. Face dimension is 4-17/32 inch [115mm].

4. Bottom Rail: Face dimension is standard 7-9/16 inch [192mm].

5. Exterior: Panel parts on doors are completely covered by a .062 inch [1.6mm] thick 6063 extruded aluminum alloy with all corners coped and sealed.

6. Other wood species and LVL with wood veneers available: Pine [standard] on exposed wood sash components.

7. Interior glazed.

8. Fixed panels are installed with panel spacers to ensure proper margin.

9. Prep for locks, hinges, and handle boring.

C. Surface Finish:

1. Exterior Finish – Aluminum
   a. Aluminum Anodized: Exterior Components: Exterior aluminum frame and sash components are to have an anodized finish in compliance with AAMA 611-98 specifications. The anodized finish is to be clear.

2. Interior Finish - Wood:
   a. Interior wood is to be treated bare wood without stain or top coat.

D. Hardware:

1. Handles and escutcheon plates: Active handle, inactive handle, interior and exterior escutcheon plates are made of solid brass with protective lacquer. Gasket is made of Black Neoprene. All handles are shipped for field installation. Toronto handle is standard on Patio units and optional on Entrance units. Color: Satin Nickel.

2. Locking hardware has a 1 inch [25mm] throw deadbolt with Schlage key lock cylinder. Color: Satin Nickel.

3. Locking system options: All components are corrosion resistant. Plastic sill block is made of Bronze ABS with UV inhibitor.

4. Adjustable shoot bolt strike: made of Stainless Steel.

5. Hinge:
E. Weatherstripping:
   1. Frame head and side jambs: polypropylene rigid santoprene flex kerf-mounted weatherstrip, available in Beige.
   2. Weep sill: polypropylene weatherstripping on the exterior of the bottom panel, with a rigid and flexible Beige PVC fin weatherstripping on the interior of the panel bottom.
   4. Panel: Along bottom panel is a leaf-type weatherstrip made of rigid and flexible Beige PVC.
   5. Stationary panel filler: made of Beige rigid and flexible PVC.

2.3 GLAZING

A. Glass:
   1. Standard one-lite IG is 1” with tempered LoE2-270, argon filled. R-5 Triple Glazed.
   2. Standard IG or single glazed has standard design pressure of 20 psf [DP 20].
   3. High altitude IG has open breather tube.
   4. All glass is select quality complying with FS-DD-G-451D.
   5. IG complies with IGCC and ASTM E2190-08’.
      a. For operating and fixed units, Standard Impact Resistant Laminated Glass is Lami 27 and 31.

B. Glazing Methods:
   1. Operating units and fixed units have K-Glaze with 3/16 inch [5mm] wide glazing tape and primary silicone on Number1 surface along sight line paired with latex sealant on Number4 surface at wood glazing bead.
      a. Impact glazed units are interior glazed using silicone and EPDM shims or tape glaze, with vinyl bracket secured with additional silicone. Wood glazing bead are mitered on the corners and fastened with brads.

C. Glass Options:
   1. R-5 double glazed, installed by manufacturer.
   2. Tempered glass.
   4. Filled with argon gas.

D. Glazing Bead Options:
   1. Beveled profile.

2.4 ACCESSORIES AND TRIM

A. Installation Accessories:
   1. Galvanized steel installation clips [number required to meet DP20 may be factory applied to unit]. Units without exterior casing are shipped with a factory applied nailing fin.
2. Mull anchors.

PART 3 - EXECUTION

3.1 DELIVERY, STORAGE AND HANDLING
   A. Deliver in original packaging, store in an upright position off the ground in a clean, dry area. Protect from weather and construction activities.
   B. Prime or seal wood surfaces, including surfaces to be concealed by wall construction if more than 30 days will expire between delivery and installation.

3.2 INSTALLATION
   A. Verify that openings are plumb and square and of proper dimension.
   B. Install doors according to manufacturer’s installation instructions.

6. Outside glazed

7. Thermal break via polymer glazing clip

PART 3 - EXECUTION

3.1 INSTALLATION

A. Verify that openings are plumb and square and of proper dimension.

B. Install in accordance with manufacturer’s recommendations.
END OF SECTION 08 43 13
SECTION 08 52 13: METAL-CLAD WOOD WINDOWS

PART 1 - GENERAL

1.1 SUMMARY
   A. This section includes clad casement operating windows operating fixed picture complete with hardware, glazing, weatherstripping, screens, jamb extensions, and standard or specified anchorages, trim, attachments, and accessories.

1.2 REFERENCES

1.3 SYSTEM DESCRIPTION
   A. Design and Performance Requirements
      1. Standard Performance windows include residential application [design pressure required 50 psf].
      2. Air, water, structural, and forced entry resistance shall be at levels which meet the specified design pressure as per AAMA/WDMA/CSA 101/I.S.2/A440-05’, 101/I.S.2/A440-08’.
      3. Unique, non-listed unit’s performance, when not tested, may be addressed by a manufacturer’s Statement of Qualification.
      4. Mullion design can be adequate for specified design pressure.
   B. Energy Ratings
      1. All units tested are one-lite, residential, LoE2-270, argon filled, with Kolbe ID No. as listed on the NFRC label adhered to each unit. Values are certified per NFRC and units are labeled per state requirements.
      2. Unique, non-listed units may have U & SHGC determined by NFRC procedures and listed on a manufacturer’s.
      3. R-5 glass panes installed by manufacturer.

2.1 MANUFACTURER
   A. Kolbe & Kolbe Millwork Co., Inc.
      1323 S. 11th Ave
      Wausau, WI 54401
      Phone: 715-842-5666
      www.kolbe-kolbe.com
      1. Available through Kolbe & Kolbe Millwork Co., Inc. and national chain hardware stores.

2.2 PRODUCT
A. Kolbe Window Frame: Constructed of kiln-dried pine, with pine interior stops and mull casings on mulled units, water repellent, preservative treated in accordance with WDMA I.S. 4-07'A. Clad assembled frames have factory installed heavy vinyl nailing fins at head, side jambs and sill. Nailing fin at head has integral drip cap.

1. Jamb thickness: 1-1/8 inch [29mm] at the side jambs and 1 7/16" [37mm] at head.
2. Basic jamb width: 2-3/4 inch [69mm].
3. Standard overall jamb with extensions applied: 4-9/16 inch [116mm].
4. Sill thickness: 1-7/16 inch [37mm].
5. Exterior: All frame parts are .050 inch [1.3mm] thick 6063 extruded aluminum alloy with accessory grooves, press fit and fastened onto the wood frame. Optional Anodized Aluminum Clad Finish.
6. Corner Construction: Mitered corners use internal corner key and sealer.
7. Other wood species available: Pine [standard] on exposed wood frame components.
8. Prep for stool.

B. Kolbe Window Sash: Constructed of kiln dried pine, water repellent, preservative treated in accordance with WDMA I.S. 4-07'A.

1. Thickness: 1-11/16 inch [43mm]
2. Sash Width/Face Dimension: 2-1/4 inch [58mm].
3. Exterior: Sash parts, segment head, 1/2 and 1/4 circle top sash exterior are completely covered by .050 inch [1.3mm] thick 6063 extruded aluminum alloy with corners coped and sealed on rectangular units and full radius units. Radius unit corners mitered on segment and quarter circle. Anodized Aluminum Clad Finish.
5. Other wood species available: Pine [standard]
6. Interior glazed.

C. Kolbe Surface Finish:

1. Exterior Finish – Aluminum
   a. Aluminum Anodized: Exterior Components: Exterior aluminum frame and sash components are to have an anodized finish in compliance with AAMA 611-98 specifications. The anodized finish is to be clear.
2. Interior Finish - Wood:
   a. Interior wood is to be treated bare wood without stain or top coat.

D. Hardware: All major exposed operating hardware to be stainless steel.

1. Operator: Factory installed dual arm, roto-gear style corrosion resistant with concealed heavy duty adjustable hinges. Slim series uses one dyad operator; segment head, 1/2 and 1/4 circle head venting units utilize a single arm operator and concealed Euro hinges made of chromate conversion finish over aluminum. [On certain rectangular sizes, concealed Euro hinges are needed to achieve emergency escape and rescue.] Corrosion resistant gears and drive worm. Exterior operator parts are coated with corrosion resistant materials.
2. Operator Arms, Track and Adjustable Hinges: Made from corrosion resistant materials. Hinge track is made from corrosion resistant materials. Concealed Euro hinge made of chromate conversion finish over aluminum rectangular unit.
5. Locking System: Single actuated multi-point lock[s] are standard. Standard, High and Impact performance tie bars are made of corrosion resistant materials. Tie bar has UV resistant acetyl rollers. Guides are gray acetal. Keepers are corrosion resistant.
8. Concealed Snubbers: Made of Zamac Number3 plated with bright zinc coating.
9. On Fixed Units and Transoms: Sill sash, head and sides use retainer clips.

E. Weatherstripping: On all units.
1. Frame: Full perimeter Beige sponge EPDM with dense EPDM stem. Water cap at head and sill.
2. Sash: Perimeter dual durometer polyolefin bulb with arloc slipcoat – Black.

F. Screens: Factory installed on all operating units.
1. Screen cloth: Bright aluminum
2. Screen Channels: .024 inch [0.6mm] thick roll formed aluminum.
3. Attachment: Spring loaded plungers.
4. Corner Construction and Finish Color: Screen channels in Clay are standard White. Channels are joined and reinforced with a corner key.

2.3 GLAZING

A. Glass:
2. Standard IG or single glazed has standard design pressure of 50 psf [DP 50].
3. High altitude IG has open breather tube.
4. All glass is select quality complying with FS-DD-G-451D.
5. IG complies with IGCC and ASTM E2190-08’.
6. For operating casement units, Standard Impact Resistant Laminated Glass is Lami 11.

B. Glazing Methods:
1. Operating units and fixed units have K-Glaze with 3/16 inch [5mm] wide glazing tape and primary silicone on Number1 surface along sight line paired with latex sealant on Number4 surface at wood glazing bead.
2. High Performance option operating units and fixed units have silicone-glazed structural silicone bedding sealant on Number1 surface with a 0.5 inch [13mm] bite, and supplemental siliconized latex sealant on Number4 surface at wood glazing bead.
3. Impact glazed units are interior glazed using silicone and EPDM shims or tape glaze, with vinyl bracket secured with additional silicone. Wood glazing bead are mitered on the corners and fastened with brads.

C. Glass Options:
1. LoE3 366
2. Tempered glass.
4. With argon gas

D. Glazing Bead Options:
   1. Beveled profile.

2.4 ACCESSORIES AND TRIM

A. Installation Accessories:
   1. Galvanized steel installation clips [number required to meet DP20 may be factory applied to unit]. Units without exterior casing are shipped with a factory applied nailing fin.
   2. Mull anchors.

PART 3 - EXECUTION

3.1 DELIVERY, STORAGE AND HANDLING

A. Deliver in original packaging, store in an upright position off the ground in a clean, dry area. Protect from weather and construction activities.

B. Prime or seal wood surfaces, including surfaces to be concealed by wall construction if more than 30 days will expire between delivery and installation.

3.2 INSTALLATION

A. Verify that openings are plumb and square and of proper dimension.

B. Install in accordance with manufacturer’s recommendations.

END OF SECTION 08 52 13
SECTION 08 63 00: METAL-FRAMED SKYLIGHTS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the custom metal-framed skylight located above the Core Module of the Main House.

1.2 SYSTEM DESCRIPTION
A. Fixed curb-mount skylight that consists of five integrated components - an interior condensation drainage gasket, an insulating polycarbonate unit, exterior structural sealant, roll-formed aluminum frame counter flashing with ASA corner keys.
B. The skylight unit shall be placed on top of the constructed, sloped-parapet with proper flashing in order to protect the Appalachian State University Solar Thermal Collector Bank below [Refer to Section 22 33 30.23 - Residential, Collector-To-Tank, Solar-Electric Domestic Water Heaters].

2.2 PRODUCTS
A. Custom Metal-Framed Skylight
   1. Location: Core Module
   2. Dimensions [L x W x H]: 16’ 3-1/2” x 8’ 3” x 1.302” [4965.72 mm x 2514.61 mm x 33.08 mm]
   3. Aluminum Frame:
      a. Dimensions [L x W x H]: 16’ 3-1/2” x 8’ 3” x 1-1/8” [4965.72 mm x 2514.61 mm x 28.58 mm]
      b. Manufactured by Triplett & Coffey per the design of Appalachian State University students and faculty.
   4. Plexiglass SG Plus
      a. Dimensions [L x W x D]: 16’ 3-1/2” x 8’ 3” x 0.177” 4965.72 mm x 2514.61 mm x 4.5 mm
      b. Color: colorless
      c. Critical craze stress: 1600 psi
d. Impact energy: 39 in/lbs

2.3 ACCESSORIES
A. Field fasteners: [Skylight frame to curb] 1/2" x 2-1/2" stainless steel lag bolts

PART 3 - EXECUTION

3.1 DELIVERY, STORAGE & HANDLING
A. Clean exposed skylight according to manufacturer’s written instructions. Touch up damage to metal coatings and finishes.
B. Remove excess sealants, dirt, and other substances.
C. During the construction process, protect the skylight surfaces from contact with contaminates.

3.2 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.
B. Align skylight with curb, free of warp or twist, maintaining dimensional tolerances.

      2. Thickness:
         a. 5/8” for the wall cove detail in the Main House [CSI 09 29 00.D1]
         b. 5/8” for the ceiling in the Flex OM and Main House [CSI 09 29 00.D1]
c. 1/2” for the walls in the Flex OM [CSI 09 29 00.A3]

B. QuietRock Soundproof Drywall [CSI 09 29 00.C3]
   1. Model Number: 510
   2. Location: Bedroom Module
   3. Dimensions [L x W x D]: 9’ x 4’ x 1/2”
   4. Weight: 2.25 lbs/sq ft
   5. Materials: paper faced gypsum, sound-absorbing viscoelastic polymer core

2.3 ACCESSORIES
   A. QuietSeal for QuietRock Soundproof Drywall
      1. Color: yellow
      2. Weight: 14.1 lbs/gallon
      3. Layer thickness: 1/16”
      4. Drying time: remains soft
      5. Engageability: -10°F
      6. Storage temperature: 40-100°F, do not freeze
   B. QuietPutty for QuietRock Soundproof Drywall
      1. Color: blue/green
      2. Weight: 6 oz/pad
      3. Size: 7” x 7”/pad
      4. Thickness: 1/8”
      5. Unit Size: 10 pads/box

PART 3 - EXECUTION

3.1 INSTALLATION
   A. Install all gypsum wallboard plumb, square, and true to line.

END OF SECTION 09 29 00
SECTION 09 34 00: WATERPROOFING-MEMBRANE TILING

PART 1 - GENERAL
1.1 SUMMARY
A. This section includes the waterproofing-membrane that will be applied beneath the floor of the shower in The Solar Homestead’s Core Module Bath.

1.2 SYSTEM DESCRIPTION
A. Schulter-KERDI: a bonded waterproof membrane with limited crack-bridging capabilities. It is made of soft polyethylene, which is covered on both sides with a special fleece webbing to anchor the membrane in the thin-set mortar.

3.1 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.
END OF SECTION 09 34 00
SECTION 09 62 00: SPECIALTY FLOORING

PART 1 - GENERAL

1.1 SUMMARY
   A. This section includes information on specialty flooring that will be on the floor, walls, and ceiling of bathroom in the Core Module. Locust is also used for a custom bathroom vanity [Refer to Section 06 20 23 - Interior Finish Carpentry].

1.2 RELATED SECTIONS
   A. Section 06 20 23 - Interior Finish Carpentry
   B. Section 09 93 13.13 - Exterior Staining

PART 2 - PRODUCTS

2.1 MANUFACTURER
   A. Available at national chain lumber stores and online Locust decking websites.

2.2 PRODUCT
   A. Black Locust Wood
      1. Location: Core Module Bath
      2. 1x6 wood flooring
      3. Natural white vinegar stain and protective clear coat [Refer to Section 09 93 13.13 - Exterior Staining]
      4. Family name: Robinia Pseudoacacia
      5. Growing location: native in the United States from Pennsylvania to northern Georgia
      6. Height/diameter: range from 40 to 60 feet high, trunk reaches 1-2 feet in diameter
      7. Dimensional stability: high density
      8. Strength: 12% moisture content
      9. Weight: 48.2 lb/ft³
      10. Drying: use a mild kiln schedule
      11. Shrinkage: total volumetric shrinkage is 10.2%, once dry wood maintains stability
      12. High resistance to insects & decay

PART 3 - EXECUTION

3.1 QUALITY ASSURANCE
   A. Use a reduced cutting angle, keep edges sharp, and always predrill for nails or screws. Have numerous extra drill bits handy. Locust planks do not bend well, but the wood finishes and sands quite smoothly, with no splintering.

3.2 INSTALLATION
   A. Condition flooring in installation areas for 24 hours before installing.
B. Install flooring level, plumb, true, and aligned with adjacent materials. Scribe and cut to fit adjoining work. Refinish and seal cuts.

C. Select and arrange paneling for best match of adjacent units. Install with uniform tight joints.

END OF SECTION 09 62 00

         4. North Wall: 4'-9" x 24-1/4" x 1-1/2"
         5. South Wall: 4' x 24-1/2" x 1-1/2"
         6. Flex OM: 4'-11" x 1'-2" x -1/2"
      4. Finish: maple

PART 3 - EXECUTION

3.1 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.

END OF SECTION 12 36 19
SECTION 13 34 19: METAL BUILDING SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes all metal trailers fabricated for The Solar Homestead. Refer to Construction Documents for details on the manufactured custom steel trailers as specified and detailed by the Structural Engineer.

1.2 RELATED SECTIONS
A. Section 06 05 23 - Wood, Plastic, and Composite Fastenings
B. Section 06 11 00 - Wood Framing
C. Section 06 80 00 - Composite Fabrications

PART 2 - PRODUCTS

2.1 MANUFACTURERS
A. Kraftsman Trailers
10051 US Hwy 64E
Ramseur, NC 27316
Phone: 866-890-1918
1. Available through Kraftsman Trailers.
B. BAL R.V. Products Group
2600 Jeanwood Drive
Elkhart, IN 46514
Phone: 800-347-2232
www.norcoind.com
1. Available at tjtrailers.com, pplmotorhomes.com, and other online trailer websites.

2.2 PRODUCTS
A. Manufactured Custom Steel Trailers [CSI 13 34 19.A1]
1. Custom-designed road-safe steel trailers with brake lights as required by law.
2. Refer to details in Construction Drawings.
3. House Trailers
   a. Dimensions [L x W]: 23 3-1/2” x 11’ 11”
4. Flex OM Trailer
   a. Dimensions [L x W]: 12’ x 25’ 10-1/4”
5. OM Trailers
   a. Dimensions [L x W]: 15’-9” x 7’-9”
2.3 ACCESSORIES

A. BAL Leveling Scissor Jack [CSI 13 34 19.A2]
   1. Model Number: BAL-24SJ
   2. Jack to be welded to underside of manufactured custom steel trailers as specified and detailed by the Structural Engineer. Refer to Construction Documents for details.
   4. Extended height: 23-3/4"
   5. Retracted height: 4"

PART 3 - EXECUTION

3.1 QUALITY ASSURANCE

A. Contract in accordance with all Construction Drawings as detailed by the Structural Engineer.

END OF SECTION 13 34 19
SECTION 21 05 19: METERS AND GAGES FOR FIRE-SUPPRESSION SYSTEMS

PART 1 - GENERAL
1.1 SUMMARY
A. This section includes all meters and gages for the water-based fire-suppression system used in The Solar Homestead.

1.2 RELATED SECTIONS
A. Section 21 10 00 - Water-Based Fire-Suppression Systems

1.3 SUBMITTALS
A. Product Data

PART 2 - PRODUCTS
2.1 MANUFACTURERS
A. Potter Electric Signal Company, LLC
   2081 Craig Rd
   St. Louis, MO 63146
   Phone: 800-325-4161
   www.pottersignal.com
   1. Available through Ferguson Fire and Fabrication.
      2750 South Towne Avenue
      Pomona, CA 91766
      Phone: 909-517-3085
      www.fergusonfire.com

   722 1st Street
   Lyndhurst, NJ 07071
   Phone: 201-933-1331
   www.proplumber.net
   1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS
A. Potter Waterflow Alarm Switch [CSI 21 05 19.A1]
   1. Model Number: VSR-S
   2. Location: Main House Mechanical Closet, Outdoor Kitchen Mechanical Closet
   3. Dimensions [L x W x H]: 5-1/2” x 3-1/2” x 2-3/8” [141.2 mm x 89 mm x 59.4 mm]
   4. Finish: die-cast, red enamel
   5. Service Pressure: 300 psi maximum [20.7 bar]
6. Maximum surge: 18 fps [5.5 m/s]
7. Flow sensitivity range for signal: 4-10 gpm [15-38 lpm]

   1. Model Number: PP100G
   2. Location: Main House Mechanical Closet, Outdoor Kitchen Mechanical Closet
   3. Dimensions [Diameter]: 1” [25.4 mm]
   4. Finish: steel
   5. Maximum rated pressure: 100 psi

PART 3 - EXECUTION

3.1 INSTALLATION
   A. Install in accordance with manufacturer’s recommendations.

END OF SECTION 21 05 19
SECTION 21 10 00: WATER-BASED FIRE-SUPPRESSION SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the water-based fire-suppression system used in The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. This system uses a non-coded, hardwired, zoned and battery back-up smoke detectors coupled with a fire-suppression system utilizing sprinkler heads. The sprinkler heads and smoke detectors work independently of one another.

1.3 SUBMITTALS TO AUTHORITIES HAVING JURISDICTION
A. Submittal to Boone, NC Fire Department for code approval.

1.4 UL LISTED AND LABELED
A. All electrical components of fire suppression and detection system are listed and labeled as defined as pursuant to the NFPA 70, by a qualified testing agency and located as determined by design.

1.5 RELATED SECTIONS
A. Section 21 05 19 - Meters and Gages for Fire-Suppression Systems
B. Section 21 16 00 - Fire-Suppression Pressure Maintenance Pumps
C. Section 22 11 16 - Domestic Water Piping
D. Section 28 31 00 - Fire Detection and Alarm

2.2 PRODUCTS

A. Victaulic Residential Horizontal Sidewall Sprinkler

1. Model Number: V2738 [CSI 21 10 00.A1]
   a. Location: Flex Space, Bedroom Module, Main House Mechanical Closet, Laundry Closet
   b. Finish: white
   c. K-factor: K4.2 - 6.1
   d. Thread size: 1/2" [15 mm]
   e. UL pressure: 175 psi [1200 kPa]
   f. Sprinkler temperature range: 155°F - 175°F [68°C - 79°C]

2. Model Number: V2744 [CSI 21 10 00.A2]
   a. Location: Living Module
   b. Finish: white
   c. K-factor: K5.6 - 8.1
   d. Thread size: 1/2" [15 mm]
   e. UL pressure: 175 psi [1200 kPa]
   f. Sprinkler temperature range: 155°F - 175°F [68°C - 79°C]

B. Victaulic Residential Concealed Pendent Sprinkler [CSI 21 10 00.A3]

1. Model Number: V2734
2. Locations: Hallways, Bedroom Closets
3. Finish: white
4. K-factor: K4.9 – 7.1
5. Thread size: 1/2" [15 mm]
6. UL pressure: 175 psi [1200 kPa]
7. Sprinkler temperature range: 155°F - 175°F [68°C - 79°C]

C. Viking BlazeMaster 3/4" CPVC Piping [CSI 21 10 00.B1]

1. Model Number: 34 PIPE
2. Dimensions [Diameter x L]: 3/4" x 15’ [19mm x 4.6 m]
3. Weight: 2.52 lbs/15' [1.14 kg/4.6 m]
5. Pipe meets or exceeds ASTM F442.

2.3 ACCESSORIES
A. NIBCO BlazeMaster CPVC Fittings [CSI 21 10 00.B2]
   1. 3/4" x 1/2" BRASTIC Sprinkler Head Adapters
      a. Model Number: 5003-S-BT
      b. Location: throughout The Solar Homestead
      c. Weight: 0.16 lbs [73 g]
      d. Joint: SXFNPT
   2. 3/4" 5011 Tees
      a. Model Number: 5011
      b. Location: throughout The Solar Homestead
      c. Weight: 0.10 lbs [45 g]
      d. Joint: SXSXS

PART 3 - EXECUTION
3.1 INSTALLATION
A. The fire-suppression and detection systems will be installed pursuant to NFPA 13d regulations. The system has been oversized to ensure proper protection.
B. The water storage for fire-suppression will be tied in to freshwater storage for home.
C. The system shall be designed and stamped by Elm Engineering.

END OF SECTION 21 10 00
SECTION 21 16 00: FIRE-SUPPRESSION PRESSURE MAINTENANCE PUMPS

PART 1 - GENERAL

1.1 SUMMARY
   A. This section includes the pressure maintenance pump for the fire-suppression system.

2.2 PRODUCT

A. McMaster-Carr Thermowells
   1. Model Number: 3957K64 [CSI 22 05 19.A1]
      a. Location: roof of Core Module
         i. Specifically for piping the solar water exchanger [Refer to Section 22 33 30.23 - Residential, Collector-to-Tank, Solar-Electric Domestic Water Heaters]
      b. Dimensions [Diameter x L]: 1/2" x 4"
      c. Finish: brass
      d. Maximum temperature: 400°F
      e. Maximum pressure: 5,000 psi at 70°F
2. Model Number: 3957K11 [CSI 22 05 19.A2]
   a. Location: Main House Mechanical Closet
      i. Specifically for domestic water piping [Refer to Section 22 11 16 - Domestic Water Piping]
   b. Dimensions [Diameter x L]: 3/4” x 4”
   c. Finish: brass
   d. Maximum temperature: 400°F
   e. Maximum pressure: 5,000 psi at 70°F

   1. Model Number: FTB4707
   2. Location: Main House Mechanical Closet
   3. Dimensions [L x W x H]: 10-1/4” x 2-3/4” x 1-1/2” [259 mm x 69 mm x 40 mm]
   4. Finish: nickel-plated brass
   5. Maximum temperature: 185°F [85°C]
   6. Maximum pressure: 175 psi [12 bar]
   7. Voltage: 5 to 30 Vdc
   8. Current: 20 mA

PART 3 - EXECUTION

3. Weight: 1.6 lbs [.73 kg]
4. Finish: bronze
5. Temperature out: 90°F - 160°F [32°C - 71°C]
6. Maximum temperature: 200°F [93°C]
7. Maximum pressure: 150 psi [10.34 kPa]
8. Minimum supply pressure: 30 psi [207 kPa]

   1. Model Number: 110-DLF
   2. Location: Main House Mechanical Closet
   3. Finish: bronze
   4. Flow rate: 1.0 gpm - 20 gpm
   5. Temperature out: 90°F - 130°F [32°C - 54°C]
   6. Maximum pressure: 145 psi [1000 kPa]

D. American Valve 1" Ball Valve [CSI 22 05 23.C1]
   1. Model Number: M100S 1
   2. Finish: brass
   3. Turn: quarter turn
   4. Inlet thread type: sweat

E. American Valve 3/4" Ball Valve [CSI 22 05 23.C1]
   1. Model Number: T200W 3/4
   2. Finish: brass
   3. Turn: quarter turn
   4. Inlet thread type: female

F. American Valve 3/4" Full Port Ball Valve [CSI 22 05 23.C1]
   1. Model Number: M100S 3/4
   2. Finish: brass
   3. Turn: quarter turn
   4. Inlet thread type: sweat

G. American Valve 1" Full Port Ball Valve [CSI 22 05 23.C1]
   1. Model Number: M100 1
   2. Finish: brass
   3. Turn: quarter turn
   4. Inlet thread type: female

H. Vanguard 3/4" x 3/4" Ball Valve [CSI 22 05 23.C1]
1. Model Number: PXV3434
2. Finish: brass
3. Turn: quarter turn
4. Inlet thread type: crimp
5. Outlet thread type: crimp
6. Minimum working temperature: 35°F
7. Maximum working temperature: 200°F

I. American Valve 1-1/2” Check Valve IPS [CSI 22 05 23.D1]
   1. Model Number: M31 1-1/2
   2. Finish: brass
   3. Inlet thread type: female

J. American Valve 1” Check Valve [CSI 22 05 23.D1]
   1. Model Number: M31 1
   2. Finish: brass
   3. Inlet thread type: female

K. American Water Heater Temperature and Pressure Valve [CSI 22 05 23.E1]
   1. Model Number: 6900829
   2. 3” cavity

PART 3 - EXECUTION

3.1 INSTALLATION
   A. Install in accordance with the manufacturer’s recommendations.

END OF SECTION 22 05 23

1501 Edwards Ferry Road, NE
Leesburg, VA 20176
Phone: 703-777-5255
www.na.rehau.com
1. Available at national chain hardware stores, such as Lowes.

2.2 PRODUCTS
3. PEX shall be used for all domestic water lines to fixtures and appliances in the main house, Flex OM, and Kitchen OM.
B. PVC Piping [CSI 22 11 16.B1]
1. **1.5” PVC pipe**
   a. From the domestic water pump [Refer to Section 22 11 23 - Domestic Water Pump] to the supply lines for the main house and the water heaters [Refer to Section 22 33 13 - Instantaneous Electric Domestic Water Heaters] in the Flex OM and Outdoor Kitchen.

2. **2” PVC pipe**
   a. From the supply water storage tanks [Refer to Section 22 12 19 - Facility Ground-Mounted, Potable-Water Storage Tanks] for freshwater to the domestic water pump [Refer to Section 22 11 23 - Domestic Water Pump] in the main house.
   b. For the plumbing of both waste water storage tank and bladder [Refer to Section 22 13 53 - Facility Septic Tank].

3. **3” PVC pipe**
   a. For the roof drain [Refer to Section 22 14 26.13 - Roof Drain] located on the Main House and Flex Space.

### 2.3 ACCESSORIES

**A. Brass Fittings**

1. Comply with ASTM F 2080, ASTM F 877, NSF 61, CSA B 137.5

**B. Copper Piping**

1. For the main house, copper will run through the products below in the following order:
   a. Appalachian State University Latent Storage Exchange Device [ASU-LSED] [Refer to Section 22 33 30.23 - Residential, Collector-to-Tank, Solar-Electric, Domestic Water Heaters]
   b. Whole House Water Heater [Refer to Section 22 33 13 - Instantaneous Electric Domestic Water Heaters]
   c. Wilo Standard Circulating Pump [Refer to Section 22 33 30.23 - Residential, Collector-to-Tank, Solar-Electric, Domestic Water Heaters]
   d. Next Generation Energy Collectors [Refer to Section 22 33 30.23 - Residential, Collector-to-Tank, Solar-Electric, Domestic Water Heaters].

2. For the Flex OM, type L copper will run through the instant water heater [Refer to Section 22 33 13 - Instantaneous Electric Domestic Water Heaters] to the fixtures.

**C. Manifold system will be used for the hot water system [Refer to Section 22 11 13 - Facility Water Distribution Piping] in the Main House.**

**D. PVC Fittings**

1. Use PVC fittings as detailed in the Construction Documents.
2. All drain lines are 2” PVC.

**E. Viking BlazeMaster CPVC Piping**

1. Used for the supply lines to the water-based fire-suppression system [Refer to Section 21 10 00 - Water-Based Fire-Suppression Systems].
A. Installation of PEX should follow the following specifications:

END OF SECTION 22 11 16
SECTION 22 11 23: DOMESTIC WATER PUMPS

PART 1 - GENERAL

1.1 SUMMARY

A. This is a temporary facility that is only used for the purposes of the competition in Washington, D.C. and does not apply to the affordability contest of The Solar Homestead.

B. This section includes the pump used to supply all potable water for The Solar Homestead.

1.2 RELATED SECTIONS

A. Section 22 11 16 - Domestic Water Piping

B. Section 22 12 19 - Facility Ground Mounted, Potable Water Storage Tanks

C. Section 22 33 13 - Instantaneous Electric Domestic Water Heaters

2.2 PRODUCT
A. Rotonics Loaf Water Tank [CSI 22 12 19.A1]
   1. Model Number: 6457 H
   2. Location: east of the north ramp beneath straw bales
   3. Dimensions [L x W x H]: 62-1/2” x 41-1/2” x 30”
   4. Weight: 95 lbs
5. Capacity: 300 gal
6. 8" lid opening

   1. Model Number: LPT-20H
   2. Location: underneath Outdoor Shower
   3. Dimensions [Diameter x H]: 15" x 17"
   4. Capacity: 20 gallons
   5. Drawdown gallons:
      a. 7.4 gallons @ 20-40 PSI
      b. 6.2 gallons @ 30-50 PSI
      c. 5.4 gallons @ 40-60 PSI

2.3 ACCESSORIES
A. Rotonics Loaf Water Tank
   1. 4" fill cap [CSI 22 12 19.C1]
   2. 1-1/2" PVC bulkhead fitting [CSI 22 12 19.D1]

PART 3 - EXECUTION
3.1 PLACEMENT
A. Tank will be located on three 4" x 4" sleepers with 3/4" plywood beside the north side ramp.

3.2 INSTALLATION
A. Plumb with 2" PVC piping unless otherwise specified [Refer to Section 22 11 16 - Domestic Water Piping].
B. Install in accordance with manufacturer’s specifications.

END OF SECTION 22 12 19
SECTION 22 13 19.36: AIR-ADMITTANCE VALVES

8. Current: 2 x 50 A

   1. Model Number: 220817- MINI 6
   2. Location: Flex Bath and Outdoor Kitchen Mechanical Closet
   3. Dimensions [W x H x D]: 7-1/2” x 6-1/2” x 3-1/4”
   4. Weight: 3.44 lbs
   5. Working pressure: 150 psi
   6. Wattage: 537 W
   7. Voltage: 220-240 V
   8. Current: 24.7 A

2.3 ACCESSORIES

   1. Model Number: LET-2
   2. Location: Main House Mechanical Closet
   3. Dimensions [Diameter x H]: 8” x 12-1/2”
   4. Capacity: 2 gallons

B. Water connections 3/4” and 3/8”

C. PEX and copper piping [Refer to Section 22 11 16]

PART 3 - EXECUTION

3.1 INSTALLATION

A. The main house hot water heater will be attached to the hot water loop of the main house and is located in the mechanical closet.

B. The mini tankless hot water heaters will be installed under the kitchen sink in the Outdoor Kitchen and the bathroom sink in the Flex Bath.

C. Install in accordance with manufacturer’s recommendations.

END OF SECTION 22 33 13
SECTION 22 33 30.23: RESIDENTIAL, COLLECTOR-TO-TANK, SOLAR-ELECTRIC DOMESTIC WATER HEATERS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the solar thermal water heating components used in The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. Appalachian State University Solar Thermal Collector Bank: This device is a student-designed-and-built low-concentration solar thermal collector. The purpose of the collector is to provide solar thermal energy for indirect domestic water heating. The collector consists of 10 evacuated tubes, each paired with a custom concentrator. The concentrator optical design revolved around ease of manufacturing, simplicity, and low cost production. The resulting concentrator is a round design. Each concentrator is bolted to an aluminum frame to support the collector. Finally a 1/2” brazed copper header is fitted onto the collector and plumbed into the solar thermal water heating loop.

B. Appalachian State University Latent Storage and Exchange Device: This device is a student-designed-and-built heat exchanger with integral phase change material energy storage, specifically for use with solar thermal water heating systems. The purpose is to absorb energy from a solar thermal working fluid using a phase change material while simultaneously allowing energy exchange to the domestic water supply for domestic hot water uses such as cleaning, bathing, etc. The phase change material is immobile within the LSED, while the solar thermal working fluid and domestic water supplies flow through separate tubing. Therefore, there is no local hot water storage as in traditional electric water heaters.

2.2 PRODUCT

A. Appalachian State University Solar Thermal Collector Bank [CSI 22 33 30.23.A1]
   1. Location: roof over Core Module
   2. Dimensions [L x W x H]: 62" x 72-13/16" [without header] x 7"
   3. Number of tube collectors: 10
      a. Designed and manufactured by Appalachian State University students and faculty with products below:
   a. Model Number: NGE-224-TU
   b. Location: roof over Core Module
   c. Dimensions [L x W x H]: 77-1/2” x 73” x 6-1/4”
   d. Weight: 185 lbs
   e. Outer tube diameter: 2-1/4”
   f. Inner tube diameter: 1-7/8”
   g. Collector casing: aluminum
   h. *Only the evacuated tube will be used as part of the Solar Thermal Collector Bank.*

7. Solar Thermal Collector Frame [CSI 22 33 30.23.A14]
   a. Designed and manufactured by Appalachian State University students and faculty
   b. 1-1/2” aluminum angle 1/8” Thick Stock from Lowes with a length of 65’

B. Sunda Seido2 [CSI 22 33 30.23.F1]
   1. Model Number: Seido 2-16
   2. Location: roof over Core Module
   3. Dimensions (L x W x H): 83-3/4” x 75-1/2” x 5-3/8” [2126 mm x 1920 mm x 150 mm]
   4. Weight: 220.5 lbs [100 kg]
5. Tube construction: SEIDO2---Direct flow vacuum tube with flat absorber
6. Angle of inclination: 0° to 90°
7. Number of tube collectors: 16
8. Absorber area: 2.77 m²
9. Aperture area: 2.93 m²
10. Gross area: 4.08 m²

C. Appalachian State University Latent Storage and Exchange Device [ASU-LSED] [CSI 22 33 30.23.B1]
   1. Designed and manufactured by Appalachian State University students and faculty.
   2. Location: Main House Mechanical Closet
   3. Dimensions [L x W x H]: 40” x 28” x 20”
      a. Collected and re-melted and combined paraffin wax with a melting point of 140°F.
      b. This will be used as a medium for thermal storage in a custom built heat-exchanging device “ASU-LSED.”
   5. Custom Drain Pan [CSI 22 33 30.23.B12]
      a. Designed by Appalachian State University students and faculty. Manufactured by Triplett & Coffey.
      b. Dimensions [L x W x H]: 55” x 35” x 2”
      c. Material: 1/8” Aluminum

2.3 ACCESSORIES
A. McMaster-Carr Thermowells [Refer to Section 22 05 19 - Meters and Gages for Plumbing Piping]
B. DynaQuip Controls 3-Way Valve [Refer to Section 22 05 23 - General-Duty Valves for Plumbing Piping]
C. Dragon Breath Heater [CSI 22 33 30.23.C1]
   1. Model Number: DB70
   2. Location: HVAC Compartment
   3. Location [L x W x D]: 7-1/2” x 17-1/2” x 22”
   4. Flow rate: 12 gpm
   5. Efficiency: 69,892 BTU/hr
   6. Current: 1.4 A
   1. Steelworks Plated Perforated Tube
      a. Model Number: 11203
      b. Location: HVAC Compartment
      c. Dimensions [L x W x H]: 3’ x 1-1/2” x 1-1/2”
      d. 14 gauge
e. Finish: galvanized zinc

2. The Hillman Group Threaded Rod
   a. Model Number: 880990
   b. Location: HVAC Component
   c. Dimensions [Diameter x L]: 1/4" x 6'
   d. Threads per inch: 18"

E. Omega Low Flow Liquid Flowmeter [Refer to Section 22 05 19 - Meters and Gages for Plumbing Piping]

F. Wilo Standard Circulating Pump [CSI 22 33 30.23.D1]
   1. Model Number: Star 32 F
   2. Location: Main House Mechanical Closet
   3. Dimensions [L x W x H]: 5-1/16" x 5-3/8" x 6-3/8"
   4. Finish: cast iron
   5. Maximum working pressure: 140 psi
   6. Wattage: 113 W
   7. Voltage: 115 V

G. Utilitech 5 Gallon Water Heater Expansion Tank [CSI 22 33 30.23.E1]
   1. Model Number: LET-5
   2. Location: Main House Mechanical Closet
   3. Dimensions [Diameter x H]: 11" x 14-3/4"
   4. Capacity: 5 gallons

H. Copper tubing: 1/2" nominal, type L [Refer to Section 22 11 16 - Domestic Water Piping]
I. Copper tubing: 3/4" nominal, type L [Refer to Section 22 11 16 - Domestic Water Piping]

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install in accordance with manufacturer’s recommendations.

B. Proper insulation of components and plumbing is necessary.

C. ASU Solar Thermal Collector Bank
   1. Installation instructions are proprietary of Appalachian State University’s The Solar Homestead.

D. ASU Latent Storage and Exchange Device
   1. Installation instructions are proprietary of Appalachian State University’s The Solar Homestead.

E. Re-melt paraffin wax blend
   1. Used in a self-contained custom heat exchanger unit that will be filled and sealed prior to the competition in the mechanical closet.
2. Wax will act as a phase change material that will assist in the heat exchange between the solar thermal system and the domestic hot water plumbing.

2.2 PRODUCTS

A. Moen Camelot 20 Gauge Double Bowl Drop In Sink
   1. Model Number: 22234
   2. Location: Living Module
   3. Dimensions [W x H]: 25.5” x 18.75”
      a. Bowl 1 dimensions [W x H x D]: 14” x 16” x 7”
      b. Bowl 2 dimensions [W x H x D]: 7-1/2” x 16” x 5”
   4. Finish: stainless steel

B. Avanity Vitreous China Vessel Sink - Square
   1. Model Number: CVE460SQ
   2. Location: Core Module Bath
   3. Dimensions [W x H x D]: 18” x 18” x 6”
   4. Finish: white

C. Opella Undermount Bar Sink
   1. Model Number: 13200.045
   2. Location: Outdoor Kitchen
   3. Dimensions [W x H x D]: 9” x 12” x 5-1/8”
   4. Finish: stainless Steel

D. IKEA Lillangen Ceramic Sink
   1. Model Number: 001.483.32
   2. Location: Flex Bath
   3. Dimensions [L x W x H]: 33-1/8” x 17-3/8”x6-7/8”
   4. Weight: 53 lbs
   5. Finish: porcelain
   6. Included in IKEA vanity [Refer to Section 12 35 30.23 - Bathroom Casework]

PART 3 - EXECUTION

3.1 INSTALLATION

A. Level shall be maintained while installing sinks.
B. Clear 100% silicon caulk shall be used at all joints.
C. Install in accordance with manufacturer’s recommendations.

   A. Install in accordance with manufacturer’s recommendations.

END OF SECTION 23 37 00
SECTION 23 71 00: THERMAL STORAGE

PART 1 - GENERAL

1.1 SUMMARY
   A. This section includes the Trombe Wall in the Living Module.

1.2 SYSTEM DESCRIPTION
   A. ASU Trombe Wall: This system is a tasteful reinterpretation of the classic Trombe wall – a passive solar heating device – that uses vertical aluminum, black powder coated “Trombe fins” filled with an oil-based phase change material to regulate energy transfer to conditioned space. The purpose of the Trombe Wall is to provide passive solar heating during cooler times (such as nighttime) by releasing energy stored during the day in the phase change material over the day. The Trombe fins can be freely rotated into position to achieve natural daylighting as well as light reduction as desired. The Trombe Wall is located behind a double pane glazing.

      1. Location: Living Module
      2. Trombe Wall Fins  [CSI 23 71 00.A11]
         a. Design by Appalachian State University students and faculty and manufactured by Triplett & Coffey.
         b. 2" x 5" architectural aluminum tubing
         c. Dimensions [H]: 6’
         d. Mill finish
         e. Finish: powder coated black
      3. Phase Change Material [CSI 23 71 00.A12]
a. Model Number: BIOPCM-27M
b. Oil based phase change material with a peak melting point at approximately 79° F [27°C].
c. Stored in Trombe Wall Fins to be used as a passive cooling and heating device.
d. Latent heat storage capacity: 165-200

PART 3 - EXECUTION

3.1 INSTALLATION

A. Phase change material is integrated with the Trombe Wall fins.
B. Installation instructions are proprietary of Appalachian State University’s The Solar Homestead.

   a. Indoor Model Number: LAN095HV [CSI 23 81 43.B1]
      i. Location: Flex Space
      ii. Dimensions [W x H x D]: 35-3/16" x 11-1/8" x 6-1/2" [770 mm x 283 mm x 165 mm]
      iii. Weight: 23.1 lbs [10.5 kg]
      iv. Rated voltage indoor 230/208-60-1
      v. Indoor dB: 38/35/32 A
   b. Outdoor Model Number: LAU095HV [CSI 23 81 43.B2]
      i. Location: Outdoor Kitchen Mechanical Closet
ii. Dimensions [W x H x D]: 30-5/16” x 21-5/16” x 9-5/8” [786 mm x 557 mm x 244 mm]
iii. Weight: 83.8 lbs [38 kg]
iv. Rated voltage outdoor 230/208-60-1
v. Outdoor dB: 48 A

2. Finish: PSAPECW10 organic cream white
3. High-wall duct-free
4. Cooling capacity: 9,200/8,900 BTUs
5. Heating capacity: 12,000/11,700 BTUs

2.3 ACCESSORIES
A. BBJ Engineering Mr. Slim Mounting Bracket [CSI 23 81 43.A3]
   1. Model Number: CKB4
   2. Location: HVAC Compartment
   3. Dimensions [W x H x D]: 43.3” x 23.8” x 17.7” [1100 mm x 580 mm x 450 mm]
   4. Maximum load: 300 lbs [140 kg]
   5. Finish: ivory

PART 3 - EXECUTION
3.1 INSTALLATION
A. Ductwork
   1. 6” Flex duct feed to one vent to each bedroom, bathroom, and two vents to living room.
   2. Duct insulation provided via spray foam insulation from roofing. [Refer to Section 07 21 19 - Foamed-In-Place Insulation]

B. Lines
   1. Avoid sharp turns and excessive movement of refrigerant lines. Keep as straight as possible with the shortest and most appropriate route. Ensure all lines are parallel and perpendicular to wall and floor lines and to appear straight and in good order.
   2. Slope suction lines down slightly [1” in 20’] towards the outdoor unit [Refer to manufacturer’s installation guide for refrigerate line length for considerations.] Provide oil traps at the base of vertical suction risers over 6 feet high.

C. Install in accordance with manufacturer’s recommendations.

END OF SECTION 23 81 43
SECTION 25 13 00: INTEGRATED AUTOMATION CONTROL AND MONITORING NETWORK

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the integrated automation equipment, including the programmable logic controller for The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. The home automation system utilizes a programmable logic controller [PLC] with an array of temperature and humidity sensors to control comfort levels, fresh air intake, and solar thermal system performance.

      c. Dimensions [L x W x H]: 11-1/4" x 4-3/4" x 6" [286 mm x 121 mm x 152 mm]
      d. Weight: 26.5 oz [752 g]
      e. Operating temperature: 32°F - 140°F [0°C - 60°C]
      f. Storage temperature: -4°F - 158°F [-20°C - 70°C]
2. **CPU Module**
   a. Model Number: P3-550
   b. Location: Main House Mechanical Closet
   c. Dimensions [L x W x H]: 11-1/4” x 4-3/4” x 6” [286 mm x 121 mm x 152 mm]
   d. Weight: 9 oz [260 g]
   e. User memory: 50 MB
   f. Memory type: flash and battery backed RAM
   g. Operating temperature: 32°F - 140°F [0°C - 60°C]
   h. Storage temperature: -4°F - 158°F [-20°C - 70°C]

3. **AC Power Supply**
   a. Model Number: P3-01AC
   b. Location: Main House Mechanical Closet
   c. Weight: 12.1 oz [365 g]
   d. Input voltage range: 100-240 VAC [-15% /+10%]
   e. Rated operating frequency: 50 - 60 Hz with ± 5% tolerance
   f. Maximum input power: 72W

4. **DC Input Modules**
   a. Model Number: P3-08ND3S
   b. Location: Main House Mechanical Closet
   c. Weight: 2.82 oz [80 g]
   d. Inputs per module: 8 [sinking/ sourcing]
   e. Operating voltage range: 12-24 VDC [± 10%]
   f. Peak voltage: 26.4 VDC

5. **Analog Input Modules**
   a. Model Number: P3-16AD-2
   b. Location: Main House Mechanical Closet
   c. Weight: 3.73 oz [105 g]
   d. Input channels: 16
   e. Module signal input range: 0-10 VDC
   f. Input type: single-ended [one common]
   g. Maximum continuous overload: ± 100V

6. **Analog Output Modules**
   a. Model Number: P3-16DA-2
   b. Location: Main House Mechanical Closet
c. Weight: 3.73 oz [105 g]
d. Output channels: 16
e. Module signal output range: ± 10VDC
f. Output type: voltage [10mA max Current]

7. Relay Output
   a. Model Number: P3-16TR
   b. Location: Main House Mechanical Closet
c. Weight: 5.64 oz [160 g]
d. Output channels: 16
e. Operating voltage range: 6.25-24 VDC [± 20%]
f. Output type: relay, form A [SPST]

8. Relay Output Modules
   a. Model Number: P3-08TRS-1
   b. Location: Main House Mechanical Closet
c. Weight: 10.08 oz [286 g]
d. Output per module: 8 relays [non-latching]
e. Operating voltage Range: 6.25-24 VDC [-15% / +20%]
f. Output type: 4 form C [SPST-NO/NC], 4 form A [SPST-NO]

2.3 ACCESSORIES
A. Sola/Hevi-Duty 24V Power Supply
   1. Model Number: SDP 4-24-100LT
   2. Location: Main House Mechanical Closet
   3. Dimensions [W x H x D]: 2-7/8” x 2-7/16” x 3-7/8” [73 mm x 75 mm x 97 mm]
   4. Weight: 0.7 lbs [.32 kg]
   5. Input voltage: 85-132 / 176-264 Vac, 210-376 Vdc
   6. Input frequency: 47-63 Hz
   7. Input current: 1.8 A / 1 A
   8. Output current: 3.8 A
   9. Output voltage: 24-28 Vdo
B. Sola/Hevi-Duty 12V Power Supply
   1. Model Number: SDP-2-12-100T
   2. Location: Main House Mechanical Closet
   3. Dimensions [W x H x D]: 1-3/4” x 2-7/16” x 3-1/2” [45 mm x 75 mm x 91 mm]
   4. Weight: 0.5 lbs [.23 kg]
5. Input voltage: 85-264 Vac, 90-375 Vdc
6. Input frequency: 47-63 Hz
7. Input current: 0.6 A @102 Vac, 0.33 A @ 196 Vac
8. Output current: 3-2.5 A
9. Output voltage: 10-12 V

PART 3 - EXECUTION

3.1 INSTALLATION

   A. Install in accordance with manufacturer’s recommendations.

   3. Dimensions [W x H x D]: 6-1/4" x 3" x 3-3/8" [160 mm x 76 mm x 84 mm]
   4. Power supply: 24 Vac ±20%
   5. Power consumption: 2 W running, 1.3 W holding

PART 3 - EXECUTION

3.1 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.

END OF SECTION 25 35 23
SECTION 26 05 26: GROUNDS AND BONDING FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes grounding and bonding for the electrical systems throughout The Solar Homestead.

1.2 RELATED SECTIONS

A. Section 26 05 33.16 - Boxes for Electrical Systems

   Phone: 800-522-6752
1. Available through TE Connectivity.

2.2 PRODUCTS

A. Arlington GB5 Grounding Bridge
   1. Model Number: 76095
   2. Location: Outdoor Kitchen Mechanical Closet
      a. Specifically underneath the Solarlok combiner box [Refer to Section 26 05 33.16 - Boxes for Electrical Systems] as a grounding bus bar.
      b. For Sub-Array 3 between each series string and the Solarlok combiner box.
   3. Dimensions [L x W x H]: 4-3/8” x 1-5/6” x 1-1/2”
   4. Finish: zinc
   5. Grounding electrode or equipment grounding conductor: #6 to #2 CU/AL

B. IDEAL Split Bolt Connector
   1. Model Number: 6921K58
   2. Location: Great Porch Canopy
      a. Each solar panel will have a ‘branch’ ground wire; the split bolt connector will join that ‘branch’ ground wire to the main ground wire, which terminates at the inverter (or Solarlok combiner box for Sub-Array 3). See E-603 for grounding details.
   3. Finish: copper
   4. Wire range: 8 solid to 4 solid
   5. Minimum tap size: 16 solid
   6. Recommended torque: 165 in-lbs
   7. Voltage: 600 V

C. TE Connectivity Solarlok Grounding Clip
   1. Model Number: 2106831-1
   2. Location: Great Porch Canopy
      a. Specifically on each SANYO HIP 195 DA3 module frame. The 6 AWG grounding wire runs through the grounding bolt and interconnects with the wire that terminates at the inverter.
   3. Dimension [Diameter]: 0.7”
   4. Finish: stainless steel
   5. Thread: #10-32 UNF
   6. Use with wire sizes: 6 AWG, 7 or 19 stranded

PART 3 - EXECUTION

3.1 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.

END OF SECTION 26 05 26
SECTION 26 05 29: HANGERS AND SUPPORTS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes all pipe hangers and supports which were selected to withstand all static and dynamic loading conditions which act upon the piping system and associated equipment of The Solar Homestead. Refer to E-107 of the Construction Documents for locations of conduit where supports were used.

1.2 SYSTEM DESCRIPTION
A. CADDY Hammer-On Z Purlin Clips: These CADDY clips are used to provide support for steel EMT located underneath each trailer.
B. Gampak Rigid Two Hole Strap: Straps are used to provide support for steel EMT where higher load bearing supports are desired as required by the National Electrical Code.
C. Gampak Rigid One Hole Strap: Straps are used to provide support for steel EMT where higher load bearing supports are desired as required by the National Electrical Code.

2.2 PRODUCTS
A. Erico CADDY Hammer-On Z Purlin Clips
   1. Model Number: 1238P
      a. Location: underneath various trailers
      b. For 1/2” conduit to Z purlin
   2. Model Number: 12312P
      a. Location: underneath various trailers
      b. For 3/4” conduit to Z purlin
   3. Model Number: 12316M
      a. Location: underneath various trailers
      b. For 1” conduit to Z purlin

B. Gampak Electrical Metallic Tubing [EMT] Steel Straps
   1. Model Number: 47830
      a. Locations: Outdoor Kitchen, Outdoor Kitchen Mechanical Closet, Electrical Closet, Main House Mechanical Closet, OM Closet 1, OM Closet 2
      b. For 1/2” Electrical Metallic Tubing [EMT]
      c. 2 hole strap
   2. Model Number: 47920
      a. Location: Outdoor Kitchen, Outdoor Kitchen Mechanical Closet, Electrical Closet, Main House Mechanical Closet
      b. For 1/2” Electrical Metallic Tubing [EMT]
      c. 1 hole strap

PART 3 - EXECUTION
3.1 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.
B. “Z” Purlin Clips: Hammer on clips in order to attach conduit [Refer to Section 26 05 33.13 - Conduit for Electrical Systems] underneath trailers.

END OF SECTION 26 05 29
SECTION 26 05 33.13: CONDUIT FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes all conduit for the electrical systems used in The Solar Homestead. Refer to E-107 of the Construction Documents for exact locations of products.

1.2 SYSTEM DESCRIPTION

A. Conduit shall be used for various circuit conductor protection underneath trailers and inside OMs where wires would be otherwise exposed.

2.2 PRODUCTS

A. 1/2" Electrical Metallic Tubing [EMT] [CSI 26 05 33.13.A1]

1. Model Number: 101543
2. Location: underneath various trailers
3. Dimensions [Diameter x L]: 1/2" x 10'
4. Internal diameter: 0.622"
5. Wall thickness: 0.042"
6. Finish: galvanized steel

B. 3/4" Electrical Metallic Tubing [EMT] [CSI 26 05 33.13.A2]

1. Model Number: 101550
2. Location: underneath various trailers
3. Dimensions [Diameter x L]: 3/4” x 10’
4. Internal diameter: 0.824”
5. Wall thickness: 0.049”
6. Finish: galvanized steel

C. 1” Electrical Metallic Tubing [EMT] [CSI 26 05 33.13.A3]
1. Model Number: 101568
2. Location: underneath Flex OM trailer
3. Dimensions [Diameter x L]: 1” x 10’
4. Internal diameter: 1.049”
5. Wall thickness: 0.057”
6. Finish: galvanized steel

D. Southwire Liquidtight Flexible Metal Conduit [LFMC] [CSI 26 05 33.13.B1]
1. Model Number: 55082721
2. Location: underneath various trailers
3. Dimensions [Diameter x L]: 3/4” x 25’
4. Internal diameter: 0.380”
5. Finish: construction steel

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install in accordance with manufacturer’s recommendations.

END OF SECTION 26 05 33.13
SECTION 26 05 33.16: BOXES FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes junction boxes and combiner boxes used in The Solar Homestead.

1.2 SYSTEM DESCRIPTION

A. Solarlok Combiner Box Assemblies: used to combine up to five strings in a pre-terminated connectorized weather-resistant enclosure to meet National Electric Code [NEC] requirements for series fusing of photovoltaic [PV] modules.

B. Junction Box: Designed for use as wiring boxes provides protection against rain, sleet and snow in outdoor installations, or against dripping water indoors.

2.2 PRODUCTS

A. TE Solarlok Combiner Box [CSI 26 05 33.16.A1]

1. Model Number: 408-10271
2. Location: Outdoor Kitchen Mechanical Closet
   a. Underneath the inverter [Refer to Construction Documents on sheet E-301]
   b. Specifically to parallel each series string of Sub-Array 3 or 18 HIP 195 DA3 modules [six panels in each series string]
3. Maximum system voltage [DC]: 600 V
4. Maximum output current [DC]: 75 A
5. Maximum input voltage [DC]: 600 V
6. Maximum input current [DC]: 15 A
7. Maximum continuous current [DC]: 60 A
8. Maximum current per string [DC]: 15 A
9. Maximum fuse rating [DC]: 15 A
10. Fuse size: 13/32” x 1-1/2” [10 mm x 38 mm] - Midget/5AG form factor [Refer to Section 26 18 16 - Medium-Voltage Fuses]
11. Weatherability enclosure type: NEMA Type 3
12. Maximum ambient temperature: 50°C

B. Austin Electrical Junction and Pull Box [CSI 26 05 33.16.B1]

1. Model Number: AB-444SB
2. Location: underneath each trailer
   a. Underneath each trailer where vertical framing channels terminate underneath 1/2” EMT and terminate at this junction box. PV conductors routed through 1/2” EMT travel through the columns and terminate at this junction box. See E-111 for junction and pull box locations.
3. Dimensions [L x W x H]: 4” x 4” x 4”
4. Finish: galvanized steel

C. Cantex Rigid PVC Junction Box [CSI 26 05 33.16.B2]

1. Model Number: CTX-5133710
2. Location: underneath the Great Porch, Electrical Closet, Main House Mechanical Closet
3. Dimensions \([L \times W \times H]\): 6\" x 6\" x 4\"
4. Weight: 2.6 lbs
5. Weather tight

D. Carlon Junction Box [CSI 26 05 33.16.B3]
   1. Model Number: E989NL
   2. Location: Flex Bath, Electrical Closet, Outdoor Kitchen Mechanical Closet
      a. Specifically underneath the vanity of Flex Bath.
   3. Dimensions \([L \times W \times H]\): 8\" x 8\" x 4\"
   4. Junctions all circuits coming into the space in compliance with the NEC.

E. Allied Moulded Residential Receptacle Boxes
   1. Single Gang [CSI 26 05 33.16.C1]
      a. Model Number: 1099-N
      b. Location: throughout The Solar Homestead [Refer to Construction Documents on sheet E-103 for locations]
      c. Dimensions \([W \times H \times D]\): 2-1/4\" x 3-3/4\" x 3-9/16\"
      d. Volume: 22.5 in\(^3\)
      e. Finish: thermoset-fiberglass
   2. Double Gang [CSI 26 05 33.16.C2]
      a. Model Number: 2300-NK
      b. Location: throughout The Solar Homestead [Refer to Construction Documents on sheet E-103 for locations]
      c. Dimensions \([W \times H \times D]\): 4\" x 3-3/4\" x 3\"
      d. Volume: 32.5 in\(^3\)
      e. Finish: thermoset-fiberglass
   3. Three Gang [CSI 26 05 33.16.C3]
      a. Model Number: 3300-NK
      b. Location: throughout The Solar Homestead [Refer to Construction Documents on sheet E-103 for locations]
      c. Dimensions \([W \times H \times D]\): 5-11/16\" x 3-3/4\" x 3\"
      d. Volume: 46 in\(^3\)
      e. Finish: thermoset-fiberglass
      a. Model Number: 4300-NK
      b. Location: Main House Bath [Refer to Construction Documents on sheet E-103 for locations]
c. Dimensions [W x H x D]: 7-1/2" x 3-3/4" x 3"
d. Volume: 60 in³
e. Finish: thermoset-fiberglass

5. 3/0 Round Outlet
   a. Model Number: 9335-NC2
   b. Location: Flex Space
      i. Specifically for smoke alarm mounting [Refer to Section 28 31 00 - Fire Detection and Alarm]
   c. Dimensions [Diameter x L]: 3-1/2" x 2-7/8"
   d. Volume: 20.5 in³
e. Finish: thermoset-fiberglass
   f. Fixture support rating: 50 lbs
   g. Fire rating classification: 2-HR wall and ceiling

F. RACO 2-Gang Metal Square Electrical Box
   1. Model Number: 8232
   2. Location: Main House Kitchen, Outdoor Kitchen, OM Closets
   3. Dimensions [L x W x D]: 2-1/8" x 4" x 2-1/8"
   4. Capacity: 30.3 in³
   5. Fire rating in minutes: 120

G. Gampak 2.17" Rectangle Metal Electrical Box Cover
   1. Model Number: 14252
   2. Location: OM Closet 3
   3. Number of gangs: 1
   4. Die cast construction
   5. Powder coated for corrosion resistance

H. Gampak 2.29" Square Metal Electrical Box Cover
   1. Model Number: 14353-5
   2. Location: Main House Mechanical Closet, Electrical Closet, Outdoor Kitchen Mechanical Closet
   3. Number of gangs: 2
   4. Die cast construction
   5. Powder coated for corrosion resistance

PART 3 - EXECUTION

3.1 INSTALLATION
   A. Install in accordance with manufacturer’s recommendations.
END OF SECTION 26 05 33.16
SECTION 26 05 83: WIRING CONNECTIONS

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes wiring connections for The Solar Homestead.

1.2 SYSTEM DESCRIPTION

A. Solarlok Interconnection System: Used at the end of Sub-Array 3 conductors to ‘plug’ into the Solarlok Combiner box [Refer to Section 26 05 33.16 - Boxes for Electrical Systems]. See sheet E-107 and E-301 for connector and combiner box location.

B. Multi-Contact MC3-Solarline Branch Connectors: Used to parallel the series strings from Sub-Array 1 [also applies to Sub-Array 2].

C. Molex connectors: Used to wire circuits which cross between trailers.

A. **TE Solarlok Interconnection System Connectors [CSI 26 05 83.A1]**
   1. **Plus Female Connectors [CSI 26 05 83.A11]**
      a. Model Number: 4-1394462-8
   2. **Minus Female Connectors [CSI 26 05 83.A12]**
      a. Model Number: 4-1394462-9
   3. **Location:** Outdoor Kitchen Mechanical Closet
   4. **Connector:** 4.0 mm²
   5. **Wire size:** 10 AWG, 4.5 to 6.0 mm
   6. **Insulation outside diameter:** 0.177 - 0.236”

B. **MC3 Cable Couplers [CSI 26 05 83.B1]**
1. Female Couplers
   a. Model Number: MC3 32.0062-10

2. Male Couplers
   a. Model Number: MC3 32.0063-10

3. Location: underneath trailers, Great Porch
   a. Specifically as a connector on each SANYO HIP 195 DA3 module.
   b. The MC3 cable couplers are installed onto USE-2/RHW-2 cable which is used between solar modules, solar modules and MC3 branch connectors and inverters.

4. Current: 30 A
5. Voltage: 1000 V

C. MC3 PV Branch Plugs [CSI 26 05 83.C1]
1. Branch Plugs: MC3 32.0009-UR
2. Location: underneath trailer 4 and 6
   a. Specifically in the Cantex Rigid PVC Junction Box
   b. Used to parallel series strings from Sub-Array 1 [six modules in series per string]; also applies to Sub-Array 2

3. Current: 30 A
4. Voltage: 1000 V

D. MC3 PV Branch Sockets [CSI 26 05 83.D1]
1. Model Number: MC3 32.008-UR
2. Location: underneath trailer 4 and 6
   a. Specifically in the Cantex Rigid PVC Junction Box
   b. Used to parallel series strings from Sub-Array 1 [six modules in series per string]; also applies to Sub-Array 2

3. Current: 30 A
4. Voltage: 1000 V

E. 3M Scotchlok Connector[CSI 26 05 83.E1]
1. Model Number: UR2
2. Location: throughout The Solar Homestead
   a. Specifically connects the low voltage wire to the wire from LED lighting fixture

3. Self-stripping, insulated and moisture-resistant butt connector for 2 – or 3 wire solid copper conductor combinations of 26-19 AWG having maximum insulation O.D. of 0.082 inches.
4. Insulation outside diameter: 0.082" [2.08 mm]
5. PIC-unfilled: 19-26 AWG
6. PIC-filled: 19-26 AWG
F. Molex Connector [CSI 26 05 83.F1]
   1. Model Number: 0194011000
   2. Location: underneath trailers
   3. Operating temperature range: 35°C - 85°C
   4. Wire Size: 12 AWG, 14 AWG
   5. Circuit Detail: 3 circuits with ground
   6. Voltage: 300 V
   7. Current: 20 A

PART 3 - EXECUTION

3.1 INSTALLATION
   A. Install in accordance with manufacturer’s recommendations.

   A. Lutron Magnetic Low Voltage Dimmer
      1. Model Number: DVLV-600P [-WH, -GR]
      2. Location: interior white walls [-WH], interior wooden surfaces [-GR]
      3. Finish: white, gray
      4. Wattage: 450 W
      5. Voltage: 120 V
      6. Load rating: 600 VA

   B. Lutron Magnetic Low Voltage 3 Way Dimmer
      1. Model Number: DVLV-603P-WH
      2. Location: interior white walls
      3. Finish: white
      4. Wattage: 450 W
      5. Voltage: 120 V
      6. Load Rating: 600 VA

   C. Lutron Single Pole Switch
      1. Model Number: CA-1PSH [-WH, -GR]
      2. Location: interior white walls and Core Bath [-WH], Main House wooden surfaces [-GR]
3. Finish: white, gray
4. Voltage: 120 V
5. Current: 15 A
6. Load Rating: 120/277 VAC
7. Frequency: 60 Hz

D. Lutron Three Way Switch
1. Model Number: CA-3PSH [-WH, -GR]
2. Location: interior white walls [-WH], Main House wooden surfaces [-GR]
3. Finish: white, gray
4. Voltage: 120 V
5. Current: 15 A
6. Load Rating: 120/277 VAC, 60 Hz

1.3 ACCESSORIES
A. Lutron 1 Gang Wall Plate
1. Model Number: CW-1 [-WH, -GR]

3. Finish: white, gray

B. Lutron 2 Gang Wall Plate
1. Model Number: CW-2-WH
2. Location: interior white walls
3. Finish: white

C. Lutron 3 Gang Wall Plate
1. Model Number: CW-3-WH
2. Location: interior white walls
3. Finish: white

D. Lutron 4 Gang Wall Plate
1. Model Number: CW-4-WH
2. Location: interior white walls
3. Finish: white

PART 3 - EXECUTION
3.1 INSTALLATION
A. Install in accordance with manufacturer’s recommendations.
END OF SECTION 26 09 23
SECTION 26 22 16: LOW-VOLTAGE BUCK-BOOST TRANSFORMERS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes the low-voltage buck-boost transformers used throughout The Solar Homestead.

   1. Available through Elemental LED.

2.2 PRODUCTS
A. Elemental LED Dimmable Driver
   1. Model Number: EL-TMDRVR
   2. Input: 120 Vac
   3. Output: 12 Vdc
   4. Frequency: 60 Hz
      a. EL-20WDIM
         i. Dimensions [L x W x D]: 5-1/2” x 2” x 1-1/2”
         ii. Weight: 1 lb 8 oz
         iii. Wattage: 20 W
      b. EL-60WDIM
         i. Dimensions [L x W x D]: 8-1/2” x 3” x 3”
         ii. Weight: 4 lb 1 oz
         iii. Wattage: 60 W
      c. EL-100WDIM
         i. Dimensions [L x W x D]: 9” x 3” x 3”
         ii. Weight: 5 lb 12 oz
         iii. Wattage: 100 W
   B. Elemental LED Non-Dimmable Driver
1. Model Number: EL-12VDRVR
   a. Dimensions [L x W x D]: 6-1/2" x 1-1/8" x 1-3/4"
   b. Weight: 22 oz
   c. Wattage: 60 W
   d. Input voltage: 100 V - 240 Vac
   e. Input current: 0.55 A
   f. Output voltage: 12 Vdc
   g. Current: 1.67 A

PART 3 - EXECUTION
3.1 INSTALLATION
   A. Install in accordance with manufacturer's recommendations.

END OF SECTION 26 22 16
SECTION 26 24 16: PANELBOARDS

PART 1 - GENERAL

1.1 SUMMARY

A. This section includes all panelboards in The Solar Homestead.

1.2 SYSTEM DESCRIPTION

A. The Eaton Cutler Hammer Combination Meter Breaker Panel functions as the main panelboard in the Electrical Closet, where the utility service drop will occur.

B. The Square D Indoor Main Breaker Load Center functions as the second panelboard or ‘sub-panel’ in the Main House and serves the house circuits.

2.2 PRODUCTS

1. 12-3-NM-B-W

a. Model Number: 63947655
b. Location: Flex OM, Main House
c. Maximum current: 20 A
d. Voltage: 600 V
e. Number of conductors: 3

2. 12-2-NM-B
   a. Model Number: 28828269
   b. Location: Flex OM, Main House
   c. Maximum current: 20 A
d. Voltage: 600 V
e. Number of conductors: 3

3. 14-2-NM-B
   a. Model Number: 28827469
   b. Location: Flex OM, Main House
c. Maximum current: 15 A
d. Voltage: 600 V
e. Number of conductors: 3

4. 10-3-NM-B
   a. Model Number: 63948426
   b. Location: Flex OM, Main House
c. Maximum current: 30 A
d. Voltage: 600 V
e. Number of conductors: 3

5. 8-3-NM-B
   a. Model Number: 63949221
   b. Location: Flex OM, Main House
c. Maximum current: 40 A
d. Voltage: 600 V
e. Number of conductors: 3

6. 6-3-NM-B
   a. Model Number: 147-4203B
   b. Location: Main House
c. Maximum current: 55 A
d. Voltage: 600 V
e. Number of conductors: 3
B. Romex SIMPull THHN/THWN-2

   a. Model Number: 28894405
   b. Location: Great Porch Canopy
      i. Grounding wire which runs through each solar panel ground bolt. This grounding wire terminates at the inverter for each Sub-Array.
   c. Wire gauge: 6 AWG
   d. Type: stranded 19
   e. Nominal outside diameter: 249 mils
   f. Temperature rating: 167°F
   g. Finish: green jacket nylon
   h. Maximum current: 65 A
   i. Voltage: 600 V

   a. Location: Outdoor Kitchen Mechanical Closet, Electrical Closet, underneath various trailers
   b. Wire gauge: 6 AWG
      i. Type: stranded 19
      ii. Nominal outside diameter: 249 mils
      iii. Allowable ampacity at 75°C: 65 A
   c. Wire gauge: 8 AWG
      i. Type: stranded 19
      ii. Nominal outside diameter: 213 mils
      iii. Allowable ampacity at 75°C: 50 A
   d. Wire gauge: 10 AWG
      i. Type: stranded 1
      ii. Nominal outside diameter: 150 mils
      iii. Allowable ampacity at 75°C: 30 A
   e. Wire gauge: 12 AWG
      i. Type: stranded 1
      ii. Nominal outside diameter: 119 mils
      iii. Allowable ampacity at 75°C: 30 A
   f. Wire gauge: 14 AWG
      i. Type: stranded 19
      ii. Nominal outside diameter: 161 mils
iii. Allowable ampacity at 75°C: 15 A

C. Southwire Aluminum SER Cable [CSI 26 27 26.C1]
   1. Location: underneath various trailers
      a. Specifically for use as the house feeder cable from the main panelboard and sub-panel.
   2. Dimensions [Diameter]: 1168 mils
   4. Stranding 10
   5. Allowable ampacities: 60C 100, 75C 120, 90C 135
   6. Sunlight resistant

D. Southwire Aluminum SER Cable [CSI 26 27 26.C2]
   1. Location: underneath various trailers
      a. Specifically for use as the main feeder cable from the organizer utility panel to The Solar Homestead main panel.
      b. This is a temporary facility that is only used for the purposes of the competition in Washington, D.C. and does not apply to the affordability contest of The Solar Homestead.
   2. Dimensions [Diameter]: 1503 mils
   4. Stranding 19
   5. Allowable ampacities: 60C 150, 75C 180, 90C 205
   6. Sunlight resistant

E. Southwire Thermostat Wire [CSI 26 27 26.D1]
   1. Model Number: 64162143
   2. Location: Main House, Flex OM
      a. Used for various circuits where LEDs are used. This low voltage wire is used between drivers and the LED lights
   3. Dimensions [Diameter]: 132 mils
   4. Jacket thickness: 14 mils
   5. Conductor size: 18 AWG
   6. Number of conductors: 2
   7. Conductor colors: red, white
   8. Allowable ampacities: 60C
   9. Voltage: 150 V
   10. Sunlight resistant
   11. Can be used in temperatures up to 140°F

1. Model Number: 1986164
   a. Location: Great Porch Canopy
      i. Specifically for wiring the photovoltaic power system
   b. Wire size: 10 AWG
   c. Marking: XHHW-2 or XHH or RHW-2 or RHH SR or USE-2 Sunlight Resistant (UL
   d. Voltage: 600 V

2. Model Number: 1986165
   a. Location: Great Porch Canopy
      i. Specifically for wiring the photovoltaic power system
   b. Wire size: 12 AWG
   c. Marking: XHHW-2 or XHH or RHW-2 or RHH SR or USE-2 Sunlight Resistant (UL
   d. Voltage: 600 V

PART 3 - EXECUTION

3.1 INSTALLATION

A. Southwire Aluminum SER Cable: Installed in accordance with the NEC and Solar Decathlon 2011 Building Code, this cable will be hung with supports underneath applicable trailers. This cable will be temporarily installed during the competition and removed for transport. Refer to E-101 of Construction Documents for installation route.

B. Install in accordance with manufacturer’s recommendations.

      2. Location: Electrical Closet
         a. Specifically used to fuse series strings of Sub-Array 3 in the Solarlok Combiner Box
      3. Dimensions [L x W]: 13/32” x 1-1/2” [10 mm x 38 mm]
      4. AC interrupt-current: 10,000 A for 250 Vac fuses, 100,000 A for 600 Vac fuses
      5. DC interrupt-current: 10,000 A

PART 3 - EXECUTION

3.1 INSTALLATION
   A. Install in accordance with manufacturer’s recommendations.
SECTION 26 28 16.13: ENCLOSED CIRCUIT BREAKERS

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes circuit breakers used in The Solar Homestead.

1.2 SYSTEM DESCRIPTION
A. The Eaton Cutler-Hammer 30 amp 3/4 in single-pole type CH circuit breaker protects home wires from overheating or causing a short-circuit. The circuit breaker is 3/4 in. wide and trips to the off position. The UL-listed breaker is compatible with Cutler-Hammer type CH load centers and has a maximum load of 240 volts.
B. The Square D QO Circuit Breaker is a plug-in branch circuit breaker that provides overload protection in QO load centers and enclosures.

**PART 3 - EXECUTION**
3.1 INSTALLATION

A. Install in accordance with manufacturer’s recommendations.
B. Install in accordance with NEC 110, NEC 690, and all other relevant sections.
C. Install lighting equipment in accordance with required clearances.
D. Install lighting to allow maximum possible headroom unless specific mounting heights that reduce headroom are indicated.
E. Install lighting to provide for ease of disconnecting the equipment with minimum interference to other installations.

END OF SECTION 26 51 13
SECTION 26 56 00: EXTERIOR LIGHTING

PART 1 - GENERAL
1.1 SUMMARY
A. This section includes exterior lighting within site walls, on top of OM Closets, within columns of the Great Porch and within Outdoor Kitchen. Refer to electrical drawings and lighting schedule for details.

END OF SECTION 26 56 00
SECTION 28 31 00: FIRE DETECTION AND ALARM

PART 1 - GENERAL

1.1 SUMMARY
A. This section includes all of the electronic equipment that provides fire detection within The Solar Homestead.
B. Installation will be approved and inspected by authorities having discretion Elm Engineering.
C. This system uses a non-coded, hardwired, zoned and battery back-up smoke detectors coupled with a fire-suppression system utilizing sprinkler heads. The sprinkler heads and smoke detectors work independently of one another.

1.2 SUBMITTALS TO AUTHORITIES HAVING JURISDICTION
A. Submittal to Boone, NC Fire Department for inspection and approval.

1.3 SUBMITTALS
A. Smoke Alarm Product Specification Sheet
B. Smoke Alarm Wiring Diagram
C. All Submittals have been tested by [UL] and are listed and labeled.
D. All electrical components of fire-suppression and detection system are listed and labeled as defined as pursuant to the NFPA 70, by a qualified testing agency and located as determined by design.

PART 2 - PRODUCTS

END OF SECTION 48 19 16
A STRUCTURAL CALCULATIONS
March 22, 2011

Mr. Travis McKenzie
Solar Decathlon Team Project Manager
The Solar Homestead
Appalachian State University
1100 E. King Street
Boone, North Carolina 28607

Re: ASU Solar Homestead Structural Review

I have reviewed the structural elements for the subject project. For the most part, the structure is designed and built according to the North Carolina Building Code: Residential Code 2009 (2006 IRC with North Carolina Amendments). I have identified some specific portions of the design that are beyond the scope of the code. I have also attached calculations regarding the specific components:

1) The main canopy rail (Page 1 of the calculation set) is a steel member with significant cantilever sections. The calculations are based on the steel alone and not on the associated pressure treated facade elements.

2) The canopy columns are steel and consist of two different steel tubular members that slide into each other. I have based the calculations on the smaller of the members with the natural assumption that the larger will have a larger structural capacity. The first check was for the effective length with the column strength (Page 2). The other concern was the moment associated with wind force (Page 3). The calculations are modified from component and cladding calculations.

3) The typical beam for the trailer (Page 4) was checked for the worst case scenario. The channel section was adequate when total loading and moments were considered.

4) The design calls for 3 bolts in each column to support the canopy sections. I verified the capacity of the 1/2” bolts and the resulting safety factor (Page 6)

5) The jacks are designated for a capacity of 7500 pounds each. I verified that under dead load situations, the jacks can provide the proper lifting capacity for the worst case scenario (Page 6). I will assume the jacks will not be engaged when the floors are fully loaded with people or when the roof is fully loaded with snow.

The design calls for a few other specific elements that are not conventional. The floor sheathing for the main house section consists of two layers of 3/8" plywood laid with one layer opposed to the other. The plywood should also be staggered in accordance with Figure RS02.2 of the North Carolina Building Code: Residential Code 2009. This is in order to accommodate the 24”o.c. floor framing and prevent
excessive deflection during the Solar Decathlon event. Please note that I did not review the shop fabricated wood trusses that are indicated on sheet S-104. They are the responsibility of another party.

The design is specifically for the Solar Decathlon event for the fall of 2011. In the interest of sustainability, the calculations I have performed have been based on the reuse of the home after the event in the local area. For design purposes, I have applied the following loads:

- Roof Live Load: 35 PSF (Snow Load)
- Roof Dead Load: 15 PSF
- Floor Live Load: 40 PSF
- Floor Dead Load: 15 PSF
- Design Wind Speed: 120 MPH

Additionally, the design has to consider many different phases of loading. The structure will be transported on the indicated trailers with the canopies lowered. The structure will then be set up in the fall of 2011 in Washington DC for the competition with the canopies raised as indicated. The structure will then be transported back to the local area and set up on a traditional foundation which will have to be a site specific design.

The designs are adequate for all of the various phases of the project. I have based my review on the 100% Construction Documents dated March 22, 2010 with the following pages: S-101 thru S-106, S-401, S-501 thru S-505 (less S-503), and Z-101 thru Z-110. Any other aspects of the design are presumed to meet North Carolina Building Code: Residential Code 2009 (2006 IRC with North Carolina Amendments).

Please let me know if you need any other information.

Sincerely,

</tr>
</tbody>
</table>

| OPTION - 3 x 3 x 5/16 | 2.39 HSS |

NOTE: BECAUSE OF SHORT SPAN DEFLECTION DOES NOT RULE

2) CHECK COLUMN CAPACITY

EFFECTIVE WIND LOAD = NC RES WIND MILL TABLE R 301.2(e)

EFFECTIVE WIND AREA: 100 + (216 sq ft) 130 MPH WIND ZONE

ROOF 0 DEGREES LOAD = -33 #/ft

LOAD COMBINATIONS: D + W, D + W, D + 0.75 W + 0.75 S

\[ D + W = 2000 + 33(216) = 9128 \]

\[ D + 0.75 W + 0.75 S = 2000 + 0.75(33)(216) + 0.75(35)(216) = 13016 \]

\[ 13016 \# / 4 = 3254 \# / post \checkmark \text{OK} \]

Post capacity @ 13' = 8 kips

MORE THAN TWICE ALLOWABLE
3) Check column bending

Effective Area = 19' x 7'4" = 139 s.f.

Roof = 0° Zone 3
120 MPH

Table R 301.2(2) NC Wind Code
Component wind = -28.1 x 139 = 3915 #

Telescoping length 9'8" - 13'0" = 4'4"

3915 / 4 x 4'4" = 4.2 k-ft

S = M/Fb = 4.2 k-ft x 12 in/ft = 2.35 in

2 1/2 x 2 1/2 x 5/16 S = 1.50

Because of length deflection does not rule,
assume effective wind area

q = 4 ft in all cases (Figure 301.2(7))

Worst case scenario Area = 19' x 4' = 76

x -28.1 #/ft = 2135.6 #

2135.6 # / 4 x 4'4" = 2.314 k.p ft

S = M/Fb = 2.314 k.p ft x 12 in/ft = 1.28

2 1/2 x 2 1/2 x 5/16 S = 1.50 √
4) Check primary channel on trailer = 4 x 5.4

Worst case = end = 25.5 inches

Assume 2' section floor load = 40 lb + 15 pl

Wall load = 100# / lW ft x 2' = 200#

\[
M = \frac{W \times L^2}{2} = \frac{200 \times (25.5)^2}{2} = 8080 \text{ # in}
\]

\[
S = \frac{M}{Fb} = \frac{8080}{21.6 \text{ ksf}} = 0.374
\]

\[
S = 4'' \times 5.4'' = 1.93 \text{ V OK}
\]

Check central section w/ roof load

\[
\frac{1}{2} \times 23.3 \text{ ft} = 11.65 \text{ ft}
\]

Roof load = 11.65 ft x 35 lb + 15 pl

\[
= 582.3 \text{ #/ft} \quad \text{Span} = 7.66 \text{ ft}
\]

\[
M_{\text{max}} = \frac{wL^2}{8} \quad \text{(highly conservative)}
\]

\[
= 582.3 \times 4.2 \text{ k-ft}
\]

\[
S = \frac{M}{Fb} = \frac{4.2 \text{ k-ft} \times 12''}{21.6 \text{ ksf}} = 2.37 \quad S = 1.93 \text{ N.K.}
\]

Next: Check for negative moment and add floor load
ADD FLOOR LOAD = 5 (10 UL + 15 OUL) = 22.9 ksf + 25% 
TOTAL LOAD = 605.2 #/ft

\[ M_1 = 605.2 \text{#ft} \times 25.5 \text{in} = 1286 \text{#ft} \]
\[ M_2 = \frac{M_1}{2} \]
\[ M_3 = \frac{wL^2}{8} - \frac{M_1 + M_2}{2} \]
\[ M_3 = \frac{(605.2 \times 7.66)^2}{8} - \frac{1286 + 1286}{2} = 3152 \text{#ft} \]

\[ S = \frac{M}{Fl_b} = \frac{3152 \text{#ft}}{25.5 \text{in}} \times \frac{12 \text{in}}{1 \text{ft}} = 1.75 \text{ in/ft} \]
\[ S = 4" \times 5.4" = 1.93 \text{ OK} \]
5) CHECK SHEAR BOLTS

TOTAL LOAD ON CANOPIES (SEE SHEET 2)
= 13016 + 1/4 = 3254 # / POST

EACH POST HITS 3 BOLTS IN DOUBLE SHEAR

1/2" A307 BOLT 6/WSE 8 DOUBLE SHEAR

SHEAR VALUE = √ (4 kps x 3) = 12 kps
APPROXIMATE 4:1 SAFETY FACTOR

6) CHECK JACK CAPACITY = EACH ONE = 7500 #

WORST CASE = MAIN HOUSE = 12' x 24'

FLOOR LOAD = 40 LL + 15 DL
ROOF LOAD = 35 LL + 15 DL

ASSUME 100 #/L.F. OF WALL

TOTAL LOAD = 75 LL + 30 DL + 100(12+12+24+24) DL
= (1.6 (75) + 1.2 (30)) x 12' x 24' + 1.2 (7200)

= 53568 # TOTAL (WORST CASE)

6 JACKS = 45000 #
CHECK D.L. ONLY = 19000 # ✓ OK.
GENERAL NOTES

1. **PLYWOOD SHEATHING**
   - PROVIDE PLYWOOD SHEATHING CONSISTING WITH ALL-PURPOSE **1/2"** GLUE-FACED PLYWOOD, 25 LB. OR GREATER. TO INCLUDE ALL REQUIRED EDGE SANDING AND GLUE, AND INSTALL IN CONFORMITY WITH CURRENTLY PUBLISHED CODES, STANDARDS, AND RECOMMENDATIONS OF RECOGNIZED PROFESSIONAL ORGANIZATIONS. INCORPORATE EXTERIOR RATING WHEN USING INTERIOR GRADES, IF APPLICABLE. FLOORING IN KITCHENS OF EXTERIOR SPAN TO BE EXTERIOR GRADE SHEATHING.
   - ALL PLANKS TO BE COMPONENTS OF TREATMENT, TRIM, OUTER SHEATHING AND OUTER ROLLING ARE TO BE SWEPT AND SMOOTHED TO AVOID VISIBLE CRACKING AND FACE."

Re:  ASU Solar Homestead Structural Calculations Review for Wind Impacts

I have reviewed the attached subject calculations. They are in accordance with our numerous discussions throughout the design process. They also indicate adequate structural resistance to the possible wind impacts on the structure. As such, I have stamped each sheet of the calculations and am returning them to you for your use.

Please let me know if you need any other information.

Sincerely,

[Signature]

Patrick A. Beville, PE, LEED AP
(PE License NC 023045)
Principal, IONCON NC License # P-0820
HOUSE: HORIZONTAL WIND LOADS

Maximum Horizontal Wind Pressure = 5.73 psf @ 60mph (extrapolated from ASCE Chapter 6, figure 6.2)

Total Horizontal Wind Force = 2,682 lbf
Safety Factor of 2 = 5,363 lbf

Sliding:
- Total weight of House = 39,000 lb
- Therefore, normal force Fn = 39,000 lb

The minimum static coefficient of friction required to prevent sliding = \( \frac{2,682}{39,000} \) or 0.06876

The static coefficient of friction is expected to be 0.8 between the jack pads and geotextile wrapped sand bags, therefore, no sliding is expected.

**Overturning (excluding uplift forces):**

<table>
<thead>
<tr>
<th>Moment</th>
<th>Element</th>
<th>Force</th>
<th>Moment Arm</th>
</tr>
</thead>
<tbody>
<tr>
<td>34,861</td>
<td>House</td>
<td>5,363</td>
<td>6.5</td>
</tr>
</tbody>
</table>

Overturning Moment = 34,861 foot pounds
Safety Factor of 2 = 69,723 foot pounds

Resisting Moment = 39,000

Resisting Moment = 390,000 foot pounds

The resisting moment is nearly 6 times the wind generated moment, therefore, no overturning is expected.

HOUSE: VERTICAL WIND LOADS

**Uplift:**
Total uplift is calculated including the combined roof areas, deck area, and canopy area.

Maximum Vertical Wind Pressure = -5.87 psf @ 60mph (extrapolated from ASCE Chapter 6, figure 6.2)

<table>
<thead>
<tr>
<th>Element</th>
<th>Area</th>
<th>Force</th>
</tr>
</thead>
<tbody>
<tr>
<td>Roof</td>
<td>864</td>
<td>-5935.68</td>
</tr>
</tbody>
</table>

Total Vertical Wind Force = -5,936 lbf
Safety Factor of 2 = -11,871 lbf

Since the weight of the House is 39,000 lbs, there is no expected uplift.

**Overturning (including uplift forces):**

Overturning resisting force = 39,000 plus -5,936 which equals: 27,129 lbs

Resisting Moment = 271,286 foot pounds

The resisting moment is still over three times the wind generated moment, therefore, no overturning is expected.

38 area sf
12.5 above ground
95 foot height (typ)

544.35 lbf
95 area sf

446.94 lbf
78 area sf
10 foot

670 base
4 foot

12 foot trailer length

Maximum Horizontal Wind Pressure = 5.73 psf @ 60mph (extrapolated from ASCE Chapter 6, Figure 6.2)

Total Horizontal Wind Force = 1,301 lbf
Safety Factor of 2n = 2,601 lbf

Sliding:
Total weight of Flex OM = 15,000 lb
Therefore, normal force Fn = 15,000 lb

The minimum static coefficient of friction required to prevent sliding = \frac{2,601}{15,000} or 0.1734

The static coefficient of friction is expected to be 0.8 between the jack pads and geotextile wrapped sand bags, therefore, no sliding is expected.

Overturning (excluding uplift forces):

Calculated Overturning Moments

\begin{align*}
\text{Moment} & \quad \text{Element} & \quad \text{Force} & \quad \text{Moment Arm} \\
1,329 \text{ canopy} & \quad 91.68 & \quad 14.5 \\
4,219 \text{ office} & \quad 544.35 & \quad 7.75 \\
1,687 \text{ kitchen} & \quad 217.74 & \quad 7.75 \\
670 \text{ base} & \quad 446.94 & \quad 1.5 \\
\end{align*}

Sum of Moments = 7,906 foot pounds
Safety Factor of 2n = 15,812 foot pounds

Resisting Moment = \frac{60,000 \text{ foot pounds}}{	ext{Resisting Moment}} = 15,000 
(8 feet between jacks) \quad 4

The resisting moment is nearly 4 times the wind generated moment, therefore, no overturning is expected.

FLEX OM TRAILER: VERTICAL WIND LOADS

Uplift:
Total uplift is calculated including the combined roof areas, deck area, and canopy area.

Maximum Vertical Wind Pressure = -6.87 psf @ 60mph (extrapolated from ASCE Chapter 6, Figure 6.2)

\begin{align*}
\text{Element} & \quad \text{Area} & \quad \text{Force} \\
\text{Canopy} & \quad 192 & \quad -1319.04 \\
\text{Trailer} & \quad 300 & \quad -2061 \\
\end{align*}

Total Vertical Wind Force = -3,380 lbf
Safety Factor of 2n = -4,760 lbf
Sinc the weight of the Flex OM is 15,000 lbs, there is no expected uplift.

Overturning (including uplift forces):

Overturning resisting force = 15,000 minus 6,760 which equals: 8,240 lbs

Resisting Moment = 32,960 foot pounds

The resisting moment is still two times the wind generated moment, therefore, no overturning is expected.

</tbody>
</table>

Sum of Moments 3,429 foot pounds
Safety Factor of 2= 6,859 foot pounds

Resisting Moment Force Moment Arm (8 feet between jacks)
6,000 4

Resisting Moments= 24,000 foot pounds
The resisting moment is over 3 times the wind generated moment, therefore, no overturning is expected.

OM TRAILER: VERTICAL WIND LOADS

Uplift: Total uplift is calculated including the combined roof areas, deck area, and canopy area.

Maximum Vertical Wind Pressure= -6.87 psf @ 60mph (extrapolated from ASCE Chapter 6, figure 6.2)

Element Area Force
Canopy 128 -879.36
Trailer 128 -879.36

Total Vertical Wind Force= -1,759 lbf
Safety Factor of 2= -3,517 lbf
Since the weight of the Flex OM is 5,000 lbs, there is no expected uplift.

Overturning (including uplift forces):

Overturning resisting force= 6,000 plus -3,517 which equals: 2,483 lbs

Resisting Moments= 9,930 foot pounds
The resisting moment is still larger than the wind generated moment, therefore, no overturning is expected.

Re: SOLAR HOMESTEAD
24' ROOF TRUSS

The truss drawing(s) referenced below have been prepared by Truss Engineering Co. under my direct supervision based on the parameters provided by Deltec Homes, Inc..

Pages or sheets covered by this seal: E5988789 thru E5988789
My license renewal date for the state of North Carolina is December 31, 2011.

North Carolina COA: C-0844

Important Notice: If visually graded lumber is used for the trusses covered by these designs, see "SPIB Important Notice, Dated July 28, 2010" (reprinted at www.mii.com) before use. Trenco does not warrant third-party lumber design values.

March 30, 2011

Gilbert, Eric

The seal on these drawings indicate acceptance of professional engineering responsibility solely for the truss components shown. The suitability and use of this component for any particular building is the responsibility of the building designer, per ANSI/TPI-1 Chapter 2. Engineering services provided by Truss Engineering Company.

**NOTES:**
1. Wind: ASCE 7-05, 60mph: TCLL=6.0psf, BCLL=6.0psf, r=30°; Cat. II, Exp C; enclosed; MWFRS (low-rise); cantilever left and right exposed; end vertical left and right exposed; lumber DOL=1.33 plate grip DOL=1.33
2. Provide adequate drainage to prevent water pooling.
3. All plates are MT20 plates unless otherwise indicated.
4. All plates are 3/4 MT20 unless otherwise indicated.
5. This truss has been designed for a 10.0 psf bottom chord live load nonconcurrent with any other live loads.
6. Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 35 lb uplift at joint 10 and 30 lb uplift at joint 11.
7. This truss is designed in accordance with the 2009 International Residential Code sections R502.11.1 and R602.10.2 and referenced standard ANSI/PIF Quality Criteria, DDS-4F and BCS Building Component Safety Information, available from Truss Plate Institute, 381 N. Lee Street, Suite 312, Alexandria, VA 22314.

Standard

---

**March 30, 2011**

**WARNING:** Review design parameters and load notes on this and enclosed water reference page and DU for local code rules before use.

Design valid for use with MTK connectors. This design is based only upon parameters shown, and is for an individual building component. Applicability of design parameters and proper incorporation of component is the responsibility of the building designer. Bracing shown is for lateral support of individual web members only. Additional temporary bracing to insure stability during construction is the responsibility of the contractor. Additional permanent bracing of the overall structure is the responsibility of the building designer. For general guidance regarding fabrication, quality control, storage, delivery, erection and bracing, consult ANSI/PIF Quality Criteria, DDS-4F and BCS Building Component Safety Information, available from Truss Plate Institute, 381 N. Lee Street, Suite 312, Alexandria, VA 22314.
Symbols

PLATE LOCATION AND ORIENTATION

Center plate on joint unless x, y offsets are indicated.
Dimensions are in ft-in-sixteenths. Apply plates to both sides of truss and fully embed teeth.

*For 4 x 2 orientation, locate plates 0-½” from outside edge of truss.

*This symbol indicates the required direction of slots in connector plates.

*Plate location details available in MiTek 20/20 software or upon request.

PLATE SIZE

4 x 4
The first dimension is the plate width measured perpendicular to slots. Second dimension is the length parallel to slots.

LATERAL BRACING LOCATION

Indicated by symbol shown and/or by text in the bracing section of the output. Use T, I or Eliminator bracing if indicated.

BEARING

Indicates location where bearings (supports) occur. Icons vary but reaction section indicates joint number where bearings occur.

Numbering System

- Dimensions shown in ft-in-sixteenths (Drawings not to scale)

- Joints are generally numbered/lettered clockwise around the truss starting at the joint farthest to the left.

- Chords and webs are identified by end joint numbers/letters.

General Safety Notes

Failure to Follow Could Cause Property Damage or Personal Injury

1. Additional stability bracing for truss system, e.g., diagonal or X-bracing, is always required. See IBC.
2. Truss bracing must be designed by an engineer. For wide truss spacing, individual lateral bracing may be required or alternative T, I or Eliminator bracing should be considered.
3. Never exceed the design loading shown and never stack materials on inadequately braced trusses.
4. Provide copies of this truss design to the building designer, erection supervisor, property owner and all interested parties.
5. Cut members to bear tightly against each other.
6. Place plates on each face of truss at each joint and embed fully. Knots and wane at joint locations are regulated by ANSI/PI 1.
7. Design assumes trusses will be suitably protected from the environment in accord with ANSI/PI 1.
8. Unless otherwise noted, moisture content of lumber shall not exceed 19% at time of fabrication.
9. Unless expressly noted, this design is not applicable for use with fire retardant, preservative treated, or green lumber.
10. Camber is a non-structural consideration and is the responsibility of the truss fabricator. General practice is to camber for dead load deflection.
11. Plate type, size, orientation and location dimensions indicated are minimum plating requirements.
12. Lumber used shall be of the species and size, and in all respects, equal to or better than that specified.
13. Top chords must be sheathed or purlins provided at spacing indicated on design.
14. Bottom chords require lateral bracing at 10 ft. spacing, or less, if no ceiling is installed, unless otherwise noted.
15. Connections not shown are the responsibility of others.
16. Do not cut or alter truss member or plate without prior approval of an engineer.
17. Install and load vertically unless indicated otherwise.
18. Use of green or treated lumber may pose unacceptable environmental, health or performance risks. Consult with project engineer before use.
19. Review all portions of this design (front, back, words and pictures) before use. Reviewing pictures alone is not sufficient.
20. Design assumes manufacture in accordance with ANSI/PI 1 Quality Criteria.
MANUFACTURER’S SPECIFICATIONS
HONDA GENERATOR ENGINE GX390
[RELATED SECTION 01 51 13]

Model Number: EU6500IS
Location: Construction Staging Area

Dimensions:
- Length: 33-1/2"
- Width: 26-3/8"
- Height: 27-1/2"

Weight: 260 lbs

Features:
- Noise Level: 60 dB
- Displacement: 389 cc
- Starting system: recoil, electric
- Fuel tank capacity: 4.5 gal
- Run time per tankful: 4.7 hrs. @ rated load, 14 hrs. @ 1/4 load

Electrical:
- Wattage: 6500 W
- Voltage: 120/240 V

Available: Lowes
### EU6500iS

*EU6500i, EU6500iSAC*

- 6500 watts, 120/240V
- Perfect for home backup power, RV's, outdoor events, job sites, and more
- Super quiet
- Fuel efficient - up to 14 hrs on 4.5 gals of gas
- Convenient electric start
- Inverter - stable power for computers and more

**MSRP $4,499.95**

ULTRA TECH CONTAINMENT
[RELATED SECTION 01 51 13]

Model Number: UTI-2351
Location: Construction Staging Area
Dimensions:
- Length: 54"
- Width: 29-3/4"
- Height: 3-1/2"
Weight: 102 lbs
Features:
- Sump: 16.5 gal
- Suitable for 5 gal
- Optional 2’ x 4’ grating
Approval Certificates
- EPA storage regulations
Available: The Tank Depot
Price: $156.80
Ultra Containment Tray w/o Grating

Versatile Secondary Containment For Small Containers And Packages

- Low profile, 16.5 gallon sump is perfect for containment of 5-gallon pails, batteries, safety cans, dry cleaning waste drums and leaky machine parts.
- Optional 2' x 4' grating elevates containers from spilled liquid - features 14 gallon capacity with grating.
- Meets EPA Container Storage Regulations for small packages with grating in place.

Part Number: UTI-2351
Size: 54" x 29 3/4" x 3 1/2"

DIVISION 06  WOOD, PLASTICS, AND COMPOSITES
SIMPSON TIE 4X4 CONNECTOR
[RELATED SECTION 06 05 23]

Model Number: ABA44
Location: under Site Wall
Dimensions:
  - Length: 3-1/8"
  - Width: 3-9/16"
  - Height: 3-1/16"
Finish: galvanized
Features:
  - 1/2” anchor diameter
  - 16 gauge plate
  - 16 gauge base cover
  - 6-10d nails
Available: Lowes
AB/ABA/ABE/ABU Adjustable and Standoff Post Bases

Also see additional standoff bases.

The AB is an adjustable post base which offers moisture protection and finished hardware appearance.

These post bases feature 1" standoff height above concrete floors, code-required when supporting permanent structures that are exposed to the weather or water splash, or in basements. They reduce the potential for decay at post and column ends.

**Material:** AB – 12 gauge plates; 16 gauge base cover; all others – see table.

**Finish:** Galvanized. Some products available in ZMAX® coating; see Corrosion Information.

**Installation:**

- Use all specified fasteners. See General Notes.
- Post bases do not provide adequate resistance to prevent members from rotating about the base and therefore are not recommended for non top-supported installations (such as fences or unbraced carpors).
- AB supplied as shown; position the post, secure the easy access nut over the supplied washer, place the standoff base, then bend up the fourth side and nail all sides.
- AB, ABA, ABE and ABU - for pre-pour installed anchors. For epoxy or mechanical anchors, select and install according to anchor manufacturer’s recommendations; anchor diameter shown in table.
- Products require washers between the nut and the base. Washers are supplied with all products except ABA’s which require a standard cut washer.
- Refer to Anchor Designer Software™ for ACI 318 for anchoring solutions.

Some products may be installed with the Strong-Drive® SD Structural Connector screw - [click here for details](#).
Additional standoff bases are on page 199.

The AB is an adjustable post base which offers moisture protection and finished hardware appearance. These post bases feature 1 standoff height above concrete floors, code-required when supporting permanent structures that are exposed to the weather or water splash, or in basements. They reduce the potential for decay at post and column ends.

**MATERIAL**: AB—12 gauge plate; 16 gauge base cover; all others—see table

**FINISH**: Galvanized. Some products available in ZMAX® coating; see Corrosion Information, page 18-19.

**INSTALLATION**: Use all specified fasteners. See General Notes. Post bases do not provide adequate resistance to prevent members from rotating about the base and therefore are not recommended for non-top-supported installations (such as fences or unbraced carpentry).

AB supplied as shown: position the post, secure the easy-access nut over the supplied washer, place the standoff base, then bend up the fourth side and nail all sides.

AB, ABA, ABE and ABU—for pre-pour installed anchors. For epoxy or mechanical anchors, select and install according to anchor manufacturer’s recommendations; anchor diameter shown in table.

Products require washers between the nut and the base. Washers are supplied with all products except ABA’s which require a standard cut washer.

**CODES**: See page 20 for Code Reference Key Chart.

1. Loads may not be increased for short-term loading.

---

## Typical Installation

**Typical AB Installation**

1. AB44 installation for rough lumber (ABE similar)

---

## Typical Bases Installation

**Typical ABE66R Installation**

1. Minimum nail distance for uplift resistance

---

### Notes:

1. Uplift loads have been increased for wind or earthquake with no further increase allowed; reduce where other loads govern.
2. Downloads may not be increased for short-term loading.
3. Specifyer to design concrete for shear capacity.
4. ABU products may be installed with either bolts OR nails (not both) to achieve table loads. ABU88 and ABU88R may be installed with 8-SDS ⅜”x3” wood screws (sold separately) for the same table load.
5. For AB bases, higher download can be achieved by solidly packing grout under 1” standoff plate before installation. Base download on column, grout, or concrete according to the code.
6. HB dimension is the distance from the top of the post up to the first bolt hole.
7. Structural composite lumber columns have sides that show either the wide face or the edges of the lumber strands/veners. For SOL columns, the fasteners for these products should always be installed in the wide face.
8. **NAILS**: 16d = 0.162” dia. x 3½” long, 10d = 0.148” dia. x 3” long. See page 24-25 for other nail sizes and information.

These post bases feature 1” standoff height above concrete floors, code-required when supporting permanent structures that are exposed to the weather or water splash, or in basements. They reduce the potential for decay at post and column ends.

**MATERIAL:** AB—12 gauge plates; 16 gauge base cover; all others—see table

**FINISH:** Galvanized. Some products available in ZMAX® coating; see Corrosion Information, page 18-19.

**INSTALLATION:** Use all specified fasteners. See General Notes.

- **Post bases do not provide adequate resistance to prevent movement of the structure off the column, and therefore are not recommended for non-top-supported installations (such as fences or unbraced carports).**
- **AB supplied as shown; position the post, secure the easy-access nut over the supplied washer, place the standoff base, then bend up the fourth side and nail all sides.**
- **AB, ABA, ABE and ABU—for pre-pour installed anchors. For epoxy or mechanical anchors, select and install according to anchor manufacturer’s recommendations; anchor diameter shown in table.**
- **Products require washers between the nut and the base. Washers are supplied with all products except AB1’s which require a standard cut washer.**

**CODES:** See page 20 for Code Reference Key Chart.

---

These products are approved for installation with the Strong-Drive SD Structural-Connector screw. See page 30 for the correct substitution and SD screw size.

1. Uplift loads have been increased for wind or earthquake with no further increase allowed; reduce where other loads govern.
2. Downloads may not be increased for short-term loading.
3. Specifier to design concrete for shear capacity.
4. ABU products may be installed with either bolts OR nails (not both) to achieve table loads. ABUB8 and ABUB8B may be installed with 8-SDS 1x3" x 3" wood screws (sold separately) for the same table load.
5. For AB bases, higher download can be achieved by solidly packing grout under 1” standoff plate before installation. Base download on column, grout, or concrete according to the code.
6. HB dimension is the distance from the bottom of the post up to the first bolt hole.
7. Structural composite lumber column have sides that show either the wide face or the edges of the lumber strands/veners. For SCL columns, the fasteners for these products should always be installed in the wide face.
8. NAILS: 16d = 0.162” dia. x 3½” long, 10d = 0.148” dia. x 3” long. See page 24-25 for other nail sizes and information.

Sheetrock® Gypsum Panels

Mold Tough® Regular and Firecode® Cores

Quality interior wall and ceiling panels with moisture and mold resistance
- Score and snap easily, no special handling required
- UL Classified as to fire resistance, surface-burning characteristics and noncombustibility
- Install and finish as easily as standard drywall

Description
Sheetrock® brand Mold Tough™ gypsum panels have a noncombustible, moisture- and mold-resistant gypsum core that is encased in moisture- and mold-resistant, 100 percent recycled green face and brown back papers. The panels feature tapered long edges for easy finishing. The 5/8" Firecode® Core and 1/2" Firecode C Core panels are UL Classified for fire resistance (Type X).
Regular Core 1/2" Panels Recommended for single-layer application in residential construction
Firecode Core 5/8" Type X Gypsum Panels Provide additional fire resistance over regular panels.
Firecode C Core 1/2" and 5/8" Type C Gypsum Panels Specialy formulated mineral core provides fire resistance superior to that offered by Firecode Core gypsum panels.

Limitations
1. Avoid exposure to sustained temperatures exceeding 125 °F (52 °C).
2. Avoid exposure to excessive, repetitive or continuous moisture before, during and after installation. Eliminate sources of moisture immediately.
3. Not suitable for use as a substrate for tile in wet areas such as tubs and showers, gang showers and other areas subject to direct water exposure.

Finishing and Decorating
For high-quality finishing results, USG recommends the following products:
- Sheetrock® ready-mixed joint compounds
- Sheetrock® setting-type joint compounds
- Sheetrock® joint tape
- Sheetrock® First Coat primer
- Sheetrock® paper faced metal bead and trim
- Sheetrock® Tuff-Hide™ primer-surfacer

Painting products and systems should be used which comply with recommendations and requirements in Appendices of ASTM G840. For priming and decorating with paint, texture or wall covering, follow manufacturer’s directions for materials used.

All surfaces, including applied joint compound, must be thoroughly dry, dust-free, and not glossy. Prime with Sheetrock® First Coat primer or with an undiluted, interior latex flat paint with high-solids content. Allow to dry before decorating.

To improve fasterner concealment, where gypsum panel walls and ceilings will be subjected to severe artificial or natural side lighting and be decorated with a gloss paint (egg shell, semi-gloss or gloss), the gypsum panel surface should be skim-coated with joint compound. This equalizes suction and texture differences between the drywall face paper and the finished joint compound before painting. As an alternative to skim coating, or when a Level 5 finish is required, use Tuff-Hide™ primer-surfacer.

Product Data
Size: Panels are 1/2" (12.7 mm) or 5/8" (15.9 mm) thick x 4' (1218 mm) wide and available in 8’-12’ (2438-4267 mm) lengths.

Weight: Regular: 1/2" (12.7 mm) – 1.6 lbs/sf; Firecode C Core: 1/2" (12.7 mm) – 1.9 lbs/sf; 5/8" (15.9 mm) – 2.2 lbs/sf (11.9 kg/m²)

Labeling: Each 5/8” Firecode Core, 1/2” Firecode C Core and 5/8” Firecode C Core panel bears the Underwriters Laboratories, Inc. label mark as evidence of UL Classifications for fire resistance, surface-burning characteristics and noncombustibility.
Test Data

<table>
<thead>
<tr>
<th>Moisture and Mold Resistance</th>
</tr>
</thead>
</table>

Per ASTM C473, the average water absorption for panels is not greater than 5 percent by weight after two-hour immersion.

Although all SHEETROCK MOLD TOUGH gypsum panels have improved moisture and mold resistance over standard gypsum panels by treating the core and surface, independent lab tests were conducted on only 5/8" SHEETROCK MOLD TOUGH FREEDOC gypsum panels, 1/2" SHEETROCK MOLD TOUGH FREEDOC C Core gypsum panels (Types X and C), and 5/8" SHEETROCK MOLD TOUGH FREEDOC C Core gypsum panels (Types X and C) at the time of manufacture per ASTM D3273, “Standard Test Method for Resistance to Growth of Mold on the Surface of Interior Coatings in an Environmental Chamber.” The panel score was 10.

This ASTM lab test may not accurately represent the mold performance of building materials in actual use. Given unsuitable project conditions during storage, installation or after completion, any building material can be overwhelmed by mold. To manage the growth of mold, the best and most cost-effective strategy is to protect building products from water exposure during storage and installation and after completion of the building. This can be accomplished by using good design and construction practices.

* 5/8" thickness is recommended for the flex single-layer construction, providing increased resistance to fire and transmission of sound. 1/2" for single-layer application in new residential construction and remodeling. (a) Long edge portion relative to framing. (b) Not recommended if water-based texturing material is to be applied. (c) Max. spacing 1/8" if water-based texturing material is to be applied. (d) Max. spacing 1/8" if fire rating required.

Compliance

SHEETROCK MOLD TOUGH gypsum panels comply with ASTM C1396 and C630.
Per ASTM E136, noncombustible gypsum core.
Per ASTM E84, flame spread is 15; smoke developed is 0.

PRODUCT(S) SHEETROCK® MOLD TOUGH™ Gypsum Panels

CHEMICAL FAMILY / GENERAL CATEGORY Wallboard, Mold Resistant

SYNONYMS Moisture and Mold Resistant Gypsum Panels, Drywall

SECTION 2
HAZARD IDENTIFICATION

EMERGENCY OVERVIEW:
WARNING!
This product is not expected to produce any unusual hazards during normal use. Exposure to high dust levels may irritate the skin, eyes, nose, throat, or upper respiratory tract. This product does not present an inhalation, ingestion, or contact health hazard unless subjected to operations such as sawing, sanding or machining which result in the generation of airborne particulate. This product contains quartz (crystalline silica) as a naturally occurring contaminant.

POTENTIAL HEALTH EFFECTS (See Section 11 for more information)

ACUTE:

Inhalation Exposure to dust generated during the handling or use of the product may cause temporary irritation to eyes, skin, nose, throat, and upper respiratory tract. Persons subjected to large amounts of this dust will be forced to leave area because of nuisance conditions such as coughing, sneezing and nasal irritation. Labor ed breathing may occur after excessive inhalation. If respiratory symptoms persist, consult physician.

Eyes Dust can cause temporary mechanical irritation of eyes. If burning, redness, itching, pain or other symptoms persist or develop, consult physician.

Skin None known.

Ingestion None known.

CHRONIC:

Inhalation The concentration of respirable crystalline silica measured in bulk samples of USG gypsum was less than 0.1 Wt.%. Industrial hygiene testing, following the NIOSH Method 7500, did not detect respirable crystalline silica in dust created during the cutting of USG gypsum wallboard panels by both the recommended score and snap technique and with the use of a power saw in a 10ft by 10ft room. Panels do not release respirable dust in their installed state and therefore do not present any known health hazards when installed and properly maintained. Exposures to respirable crystalline silica are not expected during the normal use of this product; however, actual levels must be determined by workplace hygiene testing. Prolonged and repeated exposure to airborne free respirable crystalline silica can result in lung disease (i.e., silicosis) and/or lung cancer. The development of silicosis may increase the risks of additional health effects. The risk of developing silicosis is dependent upon the exposure intensity and duration.
The Solar Homestead                                                                                                                                          Project Manual
Published 8/11/2011 Appendix A

### Section 6: Accidental Release Measures

**Containment**: Collect panels from spillage and if not damaged or contaminated by foreign material, panels may be reclaimed.

**Clean-up**: Use normal clean up procedures. No special precautions.

**Disposal**: Follow all local, state, provincial and federal regulations. Never discharge large releases directly into sewers or surface waters.
### SECTION 7
**HANDLING AND STORAGE**

**HANDLING:** Avoid dust contact with eyes and skin. Wear the appropriate eye and skin protection against dust (see Section 8). Minimize dust generation and accumulation. Avoid breathing dust. Wear the appropriate respiratory protection against dust in poorly ventilated areas and if TLV is exceeded (see Sections 2 and 8). Use good safety and industrial hygiene practices. When moving board with a forklift or similar equipment, it is essential that the equipment be rated capable of handling the load. The forks should always be long enough to extend completely through the width of the load. Fork spacing between supports should be one half the length of the panels or base being handled so that a maximum of 4' extends beyond the supports on either end.

Follow traditional building practices; such as management of water away from the interior of the structure to avoid the growth of mold, mildew and fungus. Remove any building products suspected of being exposed to sustained moisture and considered conducive to mold growth from the jobsite.

Gypsum panels are very heavy awkward loads posing the risk of severe back injury. Use proper lifting techniques.

**STORAGE:** Store in a cool, dry, ventilated area away from sources of heat, moisture and incompatibilities (see Section 10). Protect product from physical damage. Protect from weather and prevent exposure to sustained moisture.

Gypsum Association literature recommends storing board flat to avoid damaging edges, warping the board and the potential safety hazards of the board falling over. However, in other situations, storing the board flat may cause a tripping hazard or exceed floor limit loads. If stacking board vertically, leave at least 4 inches from the wall to decrease the risk of falling board and no more than 6 inches to avoid too much lateral weight against the wall.

### SECTION 8
**EXPOSURE CONTROLS/PERSONAL PROTECTION**

(T) - Total; (R) - Respirable; (NE) - Not Established; (C) - Ceiling; (STEL) - Short-term exposure limit
(F) - Fume; (Du) - Dust; (M) - Mist
ppm - part per million; f/cc - fiber per cubic centimeter; mppcf - million particles per cubic foot

*ACGIH: 1 fiber/cubic centimeter air for fibers longer than 5 micrometers and thinner than 3 micrometers. Continuous filaments that are chopped, crushed, or severely mechanically processed during manufacture or use may contain very small amounts of respirable particulates [PEL = 5 mg/m3(R)].

**ENGINEERING CONTROLS:** Provide ventilation sufficient to control airborne dust levels. If user operations generate airborne dust, use ventilation to keep dust concentrations below permissible exposure limits. Where general ventilation is inadequate, use process enclosures, local exhaust ventilation, or other engineering controls to control dust levels below permissible exposure limits.
### RESPIRATORY PROTECTION
Wear a NIOSH/MSHA-approved respirator equipped with particulate cartridges when dusty in poorly ventilated areas, and if TLV is exceeded. A respiratory program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use. If engineering controls are not possible, wear a properly fitted NIOSH/MSHA-approved particulate respirator.

</tbody>
</table>
SECTION 11
TOXICOLOGICAL INFORMATION

ACUTE EFFECTS: The acute oral toxicity study [OECD TG 420] of calcium sulfate dihydrate showed that this chemical did not cause any changes even at 2,000 mg/kg b.w. Therefore, the oral LD50 value was more than 2,000-mg/kg b.w. for female rats. Gypsum paste applied experimentally to the eyes of rabbits was not an irritant. Gypsum dust particulate has shown an irritant action on mucous membranes of the respiratory tract and eyes. The sulfate ion has caused gastro-intestinal disturbance in humans following large oral doses. Limited studies involving the repeated inhalation of an (unspecified) calcium sulfate failed to identify any particular target organs in monkeys, rats and hamsters. No evidence of mutagenicity was found in Ames bacterial tests.

CHRONIC EFFECTS / CARCINOGENICITY: Panels do not release respirable dust in their installed state and therefore do not present any known health hazards when installed and properly maintained.

Crystalline Silica: Exposures to respirable crystalline silica are not expected during the normal use of this product; however, actual levels must be determined by workplace hygiene testing. The weight percent of respirable crystalline silica may not have been measured in this product. Prolonged and repeated exposure to airborne free respirable crystalline silica can result in lung disease (i.e., silicosis) and/or lung cancer. The development of silicosis may increase the risks of additional health effects. Smoking in combination with silica exposures increases the risk of cancer. The risk of developing silicosis is dependent upon the exposure intensity and duration.

In June, 1997, IARC classified crystalline silica (quartz and cristobalite) as a human carcinogen. In making the overall evaluation, the IARC Working Group noted that carcinogenicity in humans was not detected in all industrial circumstances studied. Carcinogenicity may be dependent on inherent characteristics of the crystalline silica or on external factors affecting its biological activity or distribution of its polymorphs. IARC states that crystalline silica inhaled in the form of quartz or cristobalite from occupational sources is carcinogenic to humans (Group 1).

SECTION 12
ECOLOGICAL INFORMATION

ENVIRONMENTAL TOXICITY: This product has no known adverse effect on ecology. Toxicity studies of gypsum performed with fish, aquatic invertebrates and aquatic plants showed no toxic effect.

Ecotoxicity value

Not determined.

SECTION 13
DISPOSAL CONSIDERATIONS

WASTE DISPOSAL METHOD: Dispose of material in accordance with federal, state, and local regulations. Never discharge directly into sewers or surface waters. Consult with environmental regulatory agencies for guidance on acceptable disposal practices.

SECTION 14
TRANSPORT INFORMATION

U.S. DOT INFORMATION: Not a hazardous material per DOT shipping requirements. Not classified or regulated.
## SECTION 15
### REGULATORY INFORMATION

#### UNITED STATES REGULATIONS

All ingredients of this product are included in the U.S. Environmental Protection Agency’s Toxic Substances Control Act Chemical Substance Inventory.

### SECTION 16

**OTHER INFORMATION**

**Label Information**

**WARNING!**

Dust can cause irritation to eyes, skin and respiratory tract. Wear eye, skin and respiratory protection as necessary per working conditions. If eye contact occurs flush with water for 15 minutes. Do not ingest. If ingested, call physician. If cutting board with a power tool, use a wet or vacuum saw to reduce the amount of dust generated. Panels are heavy and can fall over, causing serious injury or death. Avoid creating a tripping hazard and do not exceed floor limit loads. Product safety information: 800-507-8899 or usg.com. Customer Service: 800 USG-4-YOU (800 874-4968). KEEP OUT OF REACH OF CHILDREN.

END
BLACK LOCUST WOOD VANITY

[RELATED SECTION 06 20 23]

Model Number: Custom
Location: Core Module Bath
Dimensions:
  Top of vanity [W x D]: 24” x 24”
  Base of vanity [W x H]: 30” x 24”
Finish: natural white vinegar stain and protective clear coat
Features:
  Board size: 5-1/2”
  Weight: 48.2  lbs/ft³
  High resistance to insects & decay
bathroom vanity

SIDE VIEW of VANITY
measurements: 2'Dx2'9"H
* shelving units are spaced evenly from top to bottom

FRONT VIEW of VANITY
measurements: 2'4½"Wx2'Dx2'9"H
door measurements: 1'5"Wx2'7 ¾"Hx ¾" thick
* door hinged on interior & cove cut out of door to fit flush against metal brackets on interior of vanity
GRAINGER DELRIN

[RELATED SECTION 06 61 00]

Model Number: 2VEP6
Location: Core Module Bath
Dimensions:
  - Length: 12"
  - Width: 12"
  - Depth: 1/4"
Finish: white
Features:
  - 150 food contact grade
  - Temperature range: 32°F - 180°F
  - Tensile strength: 11,000 psi
  - Continuous use temperature: 180°F
  - Heat deflection temperature: 250°F
Available: Grainger
Price: $22.77
Delrin® Acetal Homopolymer

- Temp. range: 32° to 180°F
- Sheets and round rods

DELTRIN® 160—FOOD CONTACT GRADE
- Tensile strength: 11,000 psi
- Continuous Use Temperature: 180°F
- Heat Deflection Temperature: 250°F

Offers higher mechanical properties than general purpose acetals. May contain a low-density center, especially in larger cross-sections. For small-diameter, thin-walled bushings. FDA compliant, USDA, NSF, Canada AG.

DELTRIN® AF BLEND—LOW-FRICTION
- Tensile strength: 8000 psi
- Continuous Use Temperature: 180°F
- Heat Deflection Temperature: 244°F

This 2:1 combination of Delrin AF100 and Delrin 150 has PTFE fibers uniformly dispersed throughout; offers excellent sliding/friction properties and better wear characteristics than unfilled Delrin. Closer static and dynamic coefficient of friction allow higher-speed operation with reduced wear and virtually no slip-stick. For use in moving parts.

Did You Know?

New legislation raising the minimum efficiency levels for general purpose 3-phase motors took effect on December 19, 2010.

Raising the efficiency levels not only helps save you money on operating costs, but also helps reduce emissions created by the utility companies. Grainger has worked hard to have these motors in stock and ready to meet the new legislation requirements.

Refer to page 8 for more information.
POLYGAL POLYCARBONATE SHEET

[RELATED SECTION 06 64 00]

Model Number: Titan Sky
Location: Bedroom Module, Flex Space, Core Module
Dimensions:
  - Length: 8’
  - Width: 4’
  - Depth: 16 mm for Flex Space and Bedroom Module
  - Depth: 8 mm for Core Module
Weight: 0.51 lb/ft² [2500 g/m²]
Finish: ice
Features:
  - Light transmission: 32%
  - U-factor: 2.08
  - Minimum radius for cold bending arches: 9'-2"
Available: Polygal
Titan Sky | Internal Cross-Brace Structure | Polycarbonate Sheet

Titan’s internal cross-brace structure makes these sheets twice as strong and stiff as the equivalent standard Polycarbonate sheets, without extra weight.

Titan sheets provide extra strength under heavy loads and difficult climatic conditions, without extra cost.

- Reinforced sheet performance without additional weight, compared to 16mm Standard Sheets
- Especially effective under snow loads, hail, tornadoes and other extreme weather conditions
  - To see sheet performance under loads, go to “Support / Wind Load Charts”.
- Available in super-strength configurations for especially extreme weather conditions (by special order)
- Available with Primalite and Silhouette special coatings
- Recommended Uses: Stadiums, sports facilities, greenhouses and where heavy load support is required.

Titan

Extra Strong, Extra Rigid, Extra Effective Insulation

Polygal Titan internal cross-brace structure gives these panels twice the strength and rigidity of equivalent standard polycarbonate panels. Polygal Titan provides a quality solution that is both intelligent and advanced for use where withstanding heavy loads is required.

Titan Sky sheets combine highly effective thermal insulation with extra strength for low pitch roofing.

Available in different thicknesses, widths and colors. Ideal for low pitched roofs and for glazing in closed structures with large span openings.

- Suitable for cold climates - extremely low 0.37 U-Value
- Save on heating energy costs
- Bright, transparent look, large range of colours, shades and reflective coatings
- Covered by 10 Year Warranty for color, light transmission and strength
- Can be cold - bent to recommended radii
- Best insulation performance during cold winter nights
- Rigid sheet structure provides extra strength under wind and snow loads
- Recommended Uses: Low pitch coverings, Lean-to conservatories, Large span structures, Stadiums, Closed structures with interior climate control, Industrial windows

The data in this advertisement is provided in good faith and constitutes general information without commitment, and no warranty is given or implied. Poly carbonate is a combustible thermoplastic material that complies with various international standards, as customary in each country. Avoid exposure to excessive heat or aromatic cleaning solvents. Normal fire precautions should be taken to protect against combustion.

Wind Load vs. length of 16mm Titan Sheets at a constant deflection of 40mm, width 1050mm.
ULINE 20"X36" BURLAP SACK

[RELATED SECTION 06 80 00]

Model Number: S-12332

</tbody>
</table>

Package heavy parts and supplies, or use as sand-filled flood barriers.

- Woven polypropylene resists punctures and tears.
- Maximum UVI protection – Lasts 1,600 hours in the sun.
- Dense, tight weave holds almost any dry substance.
- Hi-vis orange and yellow bags for highway barricades and outdoor use.
- Green suitable for military applications.

### BURLAP BAGS

*Ship and store metal parts and hardware.*

- Absorbs moisture, oil and grease while allowing airflow.
- Strong 10 oz. natural fibers. Biodegradable.
- Seal with cable ties (page 139) or choose drawstring bags.

RUBBERFORM RECYCLED RUBBER PADS

[RELATED SECTION 06 80 00]

Model Number: Custom
Location: underneath Ramps, Deck, Site Walls, scissor jacks
Dimensions:
  Length: 14"
  Width: 14"
  Depth: varies between 1/2" to 1" depending on site
Features:
  Compressive design loads up to 1,500 psi
  Ultimate compressive strength of 10,000 psi
Available: RubberForm Recycled Products
RubberForm Load Bearing Rubber Pads

RubberForm Load Bearing Rubber Pads are used extensively in standard construction applications, precast and prestressed concrete bridges, buildings and structural steel bearings applications, as well as machinery, equipment foundation, railway tie pads, and shock and vibration isolation. RubberForm Load Bearing Rubber Pads are made from RubberForm masticated rubber which is a fully cured fiber reinforced rubber made from a proprietary blend of recycled rubbers. During the manufacturing process synthetic fibers are added to the base rubber compounds to create an internal stiffening much like steel reinforced concrete. This mesh structure delivers enhanced tensile and compressive strength, stiffness, tear resistance, durability, and superior ozone and weather resistance. These properties cannot be matched by virgin product alone. Our premium grade RubberForm XP Elastomeric Load Bearing Rubber Pads are constructed in a unique cross ply manufacturing process, giving uniform physical properties in all directions. These premium grade load bearing pads are designed for more demanding structural applications with greater load requirements. RubberForm Load Bearing Rubber Pads are manufactured in continuous cure presses, not batch presses, which allow us to economically produce custom shapes and sizes and meet the demands of large scale construction projects. Load bearing pads can be supplied to specified dimensions ready for installation, including required cut outs and holes, or in sheet form for later sizing. Stock sheets are available in 1.219m x 1.219m (48” x 48”) and 3.17mm to 25.4 mm (1/8” to 1”) thickness. Custom sizes to suit your application. RubberForm elastomeric bearing rubber pads have been used in: • Bridge bearing masonry pads • Lighting standard pad seats • Handrail bearing pads • Pads between steel beams, girders, grates and columns • Pads between bridge and roof beams and substructures • Shock and vibration isolation • Heavy equipment mounting pads • Railway tie pad applications • Pads underneath concrete vaults • Civil engineering projects RubberForm Load Bearing Rubber Pads are available in two grades – SP and XP.

RubberForm SP Elastomeric Load Bearing Rubber Pads

- Compressive design loads up to 10.3 N/mm² (1500 psi)
- Ultimate compressive strength of 69.8 N/mm² (10,000 psi)
- Custom sizes can be made to suit your application
- Waterjet or die cutting available

RubberForm XP Elastomeric Load Bearing Rubber Pads

- Compressive design loads up to 13.8 N/mm² (2000 psi)
- Ultimate compressive strength of 103.4 N/mm² (15,000 psi)
- Custom sizes can be made to suit your application
- Waterjet or die cutting available

Grace Ultra is a cold applied, self-adhering membrane composed of a high strength polyethylene film coated on one side with a layer of butyl rubber adhesive and interwound with a disposable release sheet. An embossed, slip resistant surface is provided on the polyethylene.

**PRECAUTIONS AND LIMITATIONS**
- Slippery when wet or covered by frost.
- Consistent with good roofing practice, always wear fall protection when working on a roof deck.
- Release liners are slippery. Remove from work area immediately after membrane application.
- Do not leave permanently exposed to sunlight. Maximum recommended exposure of Grace Select is 30 days, Grace Ice & Water Shield is 30 days and Grace Ultra is 60 days.
- Place metal drip edge or wood starter shingles over the membrane.
- Do not fold over the roof edge unless the edge is protected by a drip edge, gutter or other flashing material.
- Do not install on the chamfered edges of wood plank.
- Do not install directly on old roof coverings.
- Do not install Grace Select or Grace Ice & Water Shield in the desert Southwest. Use Grace Ultra in this climate. Check with your Grace representative.
- Grace Ice & Water Shield and Grace Ultra can be used for high altitude/alpine regions.
- Check with the manufacturer of the metal roofing system for any special requirements when used under metal roofing. Do not install directly under roof coverings especially sensitive to corrosion, such as zinc, without providing proper ventilation.
- Do not install Grace Select or Grace Ice & Water Shield under copper, Cor-Ten® or zinc metal roofing in high altitude climates. These roofs can reach extremely high temperatures due to the low reflectivity, high absorption and high conductivity of the metals. Use Grace Ultra for these roof types in this climate. Check with your Grace representative.
- Provide proper roof insulation and ventilation to help reduce ice dams and to minimize condensation. Grace underlayments are air and vapor barriers.
- Repair holes, fishmouths, tears, and damage to membrane with a round patch of membrane extending past the damaged area 6" (150 mm) in all directions. If fasteners are removed leaving holes in the membrane, it must be patched. The membrane may not self-seal open fastener penetrations.
- Do not install fasteners through the membrane over unsupported areas of the structural deck, such as over the joints between adjacent structural panels.
- Due to its slight asphaltic odor, do not apply where the membrane is exposed to interior living space.
- Not compatible with polysulphides, flexible PVC or high concentrations of resin (pitch).
- Only Grace Ultra is compatible with EPDMs. Also appropriate for use in tie-ins in BPDM with other Grace underlayments.

**4. Technical Data**

**APPLICABLE STANDARDS**
- ASTM D412 Standard Test Methods for Vulcanized Rubber and Thermoplastic Rubbers and Thermoplastic Elastomers in Tension
- ASTM D903 Standard Test Method for Peel or Stripping of Adhesive Bonds
- ASTM D1770 Standard Specification for Self-Adhering Polymer-Modified Bituminous Sheet Materials Used as Steep Sloped Underlayment for Ice Dam Protection

**APPROVALS**

GIWS meets or exceeds all key code performance requirements for self-adhered underlayments.

5. Installation

SURFACE PREPARATION
Install Grace underlayment directly on a clean, dry, continuous structural deck. Some suitable deck materials are plywood, wood composition, wood plank, metal, concrete, or gypsum sheathing. For all other sheathings, contact a local Grace representative.

Remove dust, dirt, loose nails and old roofing materials. Protrusions from the deck area must be removed. Decks shall have no voids, damaged or unsupported areas. Repair deck areas before installing the membrane. Wood planks should be closely butted together.

Prime concrete, masonry surfaces and Dens-Glass Gold® with Perm-A-Barrier WB Primer if adhesion is to be marginal. Apply at a rate of 250 - 350 ft^2/gal (6 - 8 m^2/L). Priming is not required for other suitable surfaces provided that they are clean and dry.

MEMBRANE INSTALLATION
Apply Grace underlayment only in fair weather when the air, roof deck and membrane are at temperatures of 40 degrees F (5 degrees C) or higher. Apply roof covering material at temperatures of 40 degrees F (5 degrees C) or higher.

Cut the membrane into 12' - 16' (3.6 - 5 m) lengths and roll loosely. Peel back 1' - 2' (300 - 600 mm) of release liner, align the membrane, and continue to peel the release liner from the membrane. Press the membrane in place with heavy hand pressure. Side laps must be a minimum of 3 1/2" (90 mm), and end laps must be a minimum of 6" (150 mm). For valley and ridge application, place the release liner, center the sheet over the valley or ridge, and press in place. Use RPPCORDER® to split the release paper for faster and easier installation in these area details. Work from the center of the valley or ridge outward in each direction and start at the low point and work up the roof.

Alternatively, starting with a full roll of membrane, unroll a 3' - 6' (1 - 2 m) "starter strip," leaving the release liner in place. Align the membrane and roll in the intended direction of membrane application. Carefully cut the release liner on top of the full roll in the cross direction being careful not to cut the membrane. Peel back about 6" (150 mm) of the release liner in the opposite direction of the intended membrane application exposing the black adhesive. Hold the release liner with one hand and pull the roll along the deck with the release liner, leaving the starter strip behind. Use the other hand to apply pressure on the top of the roll. Stop frequently to press the membrane in place with heavy hand pressure. When finished with the roll, go back to the beginning, reroll it, and pull the remaining release paper from the material, finishing the installation.

Consistent with good roofing practice, install the membrane so that all laps shed water. Always work from the low point to the high point of the roof. Apply the membrane in valleys before the membrane is applied to the eaves. Following placement along the eaves, continue application of the membrane up the roof. The membrane may be installed either vertically or horizontally.

Use smooth Shank, electroplated galvanized nails for fastening shingles. Hand nailing will provide a better seal than power activated nailing. If nailing of the membrane is necessary on steep slopes during hot weather, backnail and cover the nails by overlapping with the next sheet.

Extend the membrane on the roof deck above the highest expected level of water back-up from ice dams and above the highest expected level of snow and ice on the wall sheathing on vertical side walls (dormers) and

vertical front walls for ice dam protection. Consider a double layer of membrane in critical areas, such as along the eaves or in valleys, in climates where severe ice dams are anticipated. Apply the membrane to the entire roof deck for wind driven rain protection. Apply a new layer of Grace underlayment directly over the old Grace underlayment in retrofit applications following the standard membrane application procedure. Place metal drip edges or wood starter shingles over the membrane.

6. Availability & Cost

AVAILABILITY
Strategically located warehouses and dealers stock Grace underlayments throughout North America.

COST
Grace underlayments are competitively priced. For specific information, contact a Grace representative.

7. Warranty
Grace underlayments are warranted to be free of defects in manufacture.

8. Maintenance
When installed in accordance with manufacturer’s recommendations, Grace underlayments will not require maintenance.

9. Technical Services
Support is provided by full-time technically trained Grace representatives and technical service personnel and backed by a central research and development staff. For technical assistance, call toll free (866) 333-35BM (3726).

GREENGUARD TYPE IV 1” BOARD INSULATION

[RELATED SECTION 07 21 13]

Location: Main House and Flex OM

Dimensions:
- Length: 8’
- Width: 4’

Features:
- Extruded polystyrene
- Thickness: 1”
- R-value: 5
- Edge treatment: square edge
- Minimum compressive strength: 25 psi
- Thermal conductivity: 0.2 BTU-in
- Flame spread: 15
- Smoke development: 140

Available: Lowes
GreenGuard Type IV
25 PSI Insulation Board

GreenGuard extruded polystyrene (XPS) does not absorb moisture and retains its insulating properties over time, making it an ideal exterior insulation.

- R-Value of 5.0 per inch of thickness increases energy efficiency of structures
- Meets and exceeds all Type IV and Type X specifications
- Lightweight, easy to handle, and easy to cut with a knife

**Below Slab**
Suitable for normal loading situations, including radiant floors. See your GreenGuard representative for specific loading requirements.

**Cavity Wall**
Moisture resistance and R-Value retention make GreenGuard XPS an excellent choice for exterior cavity wall applications. It provides a thermal break over steel studs and helps reduce the potential for condensation in block-backed cavity walls. Score board is 48” wide sheets designed to snap into 16”, 24”, and 32” widths for a convenient fit between brick ties in block-backed exterior cavity walls.

**Foundation**
Insulating the exterior of a foundation reduces energy loss and helps control moisture inside the basement. In addition, a layer of durable XPS on the basement exterior helps protect the waterproofing membrane from damage during backfilling. The moisture resistance and R-Value retention of XPS make it an excellent choice for foundation insulation.

  - Coverage: 106.56 ft²
  - Formaldehyde-free fiber glass
Available: Lowes
Formaldehyde-free® Fiber Glass Insulation

**Product Description**
Johns Manville unfaced insulation is a lightweight thermal and acoustical fiber glass insulation made of long, resilient glass fibers bonded with an acrylic thermosetting binder. Where vapor control is required, a separate vapor retarder can be used.

**Available Forms**
- Pre-cut batts – fit standard wall cavities and are faster to install than roll products.
- Rolls – can be cut to fit any size wall cavity and installed in any part of a building—especially long unobstructed areas such as attics or crawl spaces.

**Applications**
**New Construction**
- Wood frame construction – residential homes and light commercial buildings
- Metal frame construction – commercial buildings
- Manufactured homes – modular or manufactured housing
- Engineered wood construction – assemblies framed with 12” to 19.2” (305 mm to 488 mm) on-center cavities, wide-spaced wood trusses or I-Joists
- Suspended ceiling systems – sized to fit above 2’ x 4’ (0.61 m x 1.22 m) ceiling panels
- Interior wall sound control – interior walls, floor and ceiling assemblies. (for sound class ratings for wall assemblies, see the appropriate STC values data sheet for either steel or wood framing).
- Basement wall insulation

**Retrofit**
- Re-insulating attics, crawl spaces
- Back-fill above suspended ceiling systems

**Installation**
Available in many sizes and R-values, unfaced insulation can be quickly installed for a wide variety of applications. JM unfaced insulation cuts easily with an ordinary utility knife and installs by simply pressing in place between studs or I-Joists. Wire rods, chicken wire or wire may be needed to hold insulation in place in horizontal applications. Unfaced insulation must be protected from the outside elements like wind, rain and sunlight.

**Note:** In colder climate areas, vapor retarders (whether attached to the insulation or applied separately) are often placed toward the heated or conditioned side of the wall. This is done to reduce water vapor penetration into the wall from the building interior. Conversely, in predominantly hot, humid climates local practices often call for placing the vapor retarder toward the outside of the wall cavity. Check your local building codes for vapor retarder requirements.

**Packaging**
Johns Manville unfaced insulation is compression-packaged for savings in storage and freight costs.

**Recommended Storage and Transport**
Store insulation indoors. Keep insulation clean and dry at all times. When transporting, cover completely with a waterproof tarpaulin as necessary.

**Specification Compliance**
ASTM C 665, Type I
ASTM E 84 Flame Spread 25 or less, Smoke Developed 50 or less

* Consult your local JM sales representative or product availability chart for other available sizes and R-Values (RSI-Values) including wide-roll products.
** Thickness may vary by producing location.
*** Standard product lengths include 48", 72" and 96" (1219 mm, 1829 mm and 2438 mm) for ASTM C 605. For standard applications in exterior walls, check with your local JM sales representative. Special production may be available. See Special wall and roof applications.

### SHORT FORM SPECIFICATION

All insulation shown on drawings or specified herein shall be “Johns Manville Unfaced Formaldehyde-free Thermal and Acoustical Fiber Glass Insulation.” Thermal resistance “R” (RSI) values of the insulation shall be R (RSI) _______ in ceilings, R (RSI) _______ in walls, and R (RSI) _______ in floors over unheated spaces. The product shall have an FHC rating of 25/50 or less.

### LIMITATIONS OF USE

Check applicable building codes.

---

Technical specifications as shown in this literature are intended to be used as general guidelines only. The physical and chemical properties of unfaced thermal and acoustical fiber glass insulation listed herein represent typical, average values obtained in accordance with accepted test methods and are subject to normal manufacturing variations. They are supplied as a technical service and are subject to change without notice. Any references to numerical flame spread or smoke developed ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions. Check with the sales office nearest you for current information. All Johns Manville products are sold subject to Johns Manville’s Limited Warranty and Limitation of Remedy. For a copy of the Johns Manville Limited Warranty and Limitation of Remedy or for information on other Johns Manville thermal and acoustical insulation and systems, call or write to the 800 number or address listed below.

Section 2 - Hazards Identification

Emergency Overview
Inhalation of excessive amounts of dust from the product may cause temporary upper respiratory irritation and/or congestion—remove individual to fresh air.

Inhalation
Irritation of the upper respiratory tract (scratchy throat), coughing, and congestion may occur in extreme exposures.

Skin
Temporary irritation (itching) or redness may occur.

Ingestion
This product is not intended to be ingested (eaten). If ingested, it may cause temporary irritation to the gastrointestinal (digestive) tract.

Eyes
Temporary irritation (itching) or redness may occur.

Ears
Temporary irritation (itching) or redness may occur.

Primary Routes of Entry (Exposure)
Inhalation, skin, and eye contact.

Target Organs
Nose (nasal passages), throat, lungs, skin, eyes

Medical Conditions Aggravated by Exposure
Pre-existing chronic respiratory, skin, or eye diseases or conditions.

Section 3 - Composition/Information on Ingredients

General Product Description
White fibrous glass board, batt, blanket, or loose-fill insulation with or without tan kraft, blue kraft, FSK, or other facings. No significant odor.
Section 4 - First Aid Measures

First Aid: Inhalation
If dust is inhaled in excess of exposure limits referenced in section 8 of this safety data sheet, remove individual to fresh air. Drink water to clear throat, and blow nose to remove dust. A saline spray in the nose may help clear any fibers.

First Aid: Skin
Wash gently with soap and water to remove dust and fibers. Alternatively, fibers can be removed from the skin by use of ordinary masking or wrapping tape. Should irritation persist, seek medical attention.

First Aid: Ingestion
Rinse mouth with water to remove dust and fibers and drink plenty of water to help reduce irritation. If irritation persists, seek medical attention.

First Aid: Eyes
Do not rub or scratch eyes. Dust particles may cause the eye to be scratched. Flush eyes with large amounts of water until irritation subsides. If irritation persists, seek medical attention.

First Aid: Ears
Wash exposed skin with soap and water. If irritation develops in the inner ear, seek medical attention.

First Aid: Notes to Physician
Dust from the product may cause mechanical irritation of the eyes, skin, and upper respiratory tract. Treat symptomatically.

Section 5 - Fire Fighting Measures

Flash Point: Not applicable
Upper Flammable Limit (UFL): Not applicable
Auto Ignition: Not determined
Rate of Burning: Not determined
Method Used: Not applicable
Lower Flammable Limit (LFL): Not applicable
Flammability Classification: Not determined

General Fire Hazards
There is no potential for spontaneous fire or explosion. Inorganic glass fibers are naturally non-combustible and non-flammable.

Extinguishing Media
Carbon dioxide (CO₂), water, water fog, dry chemical.

Fire Fighting Equipment/Instructions
No special procedures are expected to be necessary for this product. Normal fire fighting procedures should be followed to avoid inhalation of smoke and gases.

Section 6 - Accidental Release Measures

Clean-Up Procedures
Pick up large pieces. Vacuum dusts. If sweeping is necessary, use a dust suppressant such as water. Do not dry sweep dust accumulation. These procedures will help to minimize potential exposures.

Section 7 - Handling and Storage

Handling Procedures
Use protective equipment as described in Section 8 of this safety data sheet when handling uncontained material. Handle in accordance with good industrial hygiene and safety practices.

Storage Procedures
Warehouse storage should be in accordance with package directions, if any. Material should be kept clean, dry, and in original packaging.

Section 8 - Exposure Controls / Personal Protection

The Occupational Safety and Health Administration (OSHA) has not adopted specific occupational exposure standards for fiber glass. Fiber glass is treated as a nuisance dust and is regulated by OSHA as a particulate not otherwise regulated (total dust) shown in CFR 1910.1000 Table Z-3.
Respirable fraction 5 mg/m³
Total dust 15 mg/m³

JM has adopted the fiber glass industry voluntary Product Stewardship Program (PSP), formerly the NAIMA-OSHA Health and Safety Partnership Program (HSPP). Under the PSP, JM recommends that exposures be limited to the voluntary concentration of 1 floc TWA for fibers longer than 5 microns with a diameter less than 3 microns. This will help minimize potential irritation effects. The PSP also includes the PPE recommendations described below.
Material Name: Fiber Glass Building and Flexible Duct Insulation Formaldehyde-free, Antimony trioxide-free

Section B - Stability & Reactivity Information

Stability
These products are not reactive.

Hazardous Decomposition
May form carbon dioxide and carbon monoxide.

Hazardous Polymerization
Will not occur.

Section C - Toxicological Information

Acute Toxicity
A: General Product Information
Dust from this product is a mechanical irritant, which means that it may cause temporary irritation or scratchiness of the throat, and/or itching of the eyes and skin.

B: Component Analysis - LD50/LC50
No LD50/LC50’s are available for this product's components.
Component Carcinogenicity
Fiber glass wool

ACGIH: A3 - Confirmed animal carcinogen with unknown relevance to humans
NTP: Reasonably Anticipated To Be A Carcinogen (respirable size)
IARC: Group 3 - Not Classifiable (IARC Monograph 81 [2002] (listed under Man-made mineral fibres),
       Monograph 43 [1988])

Chronic Toxicity

The U.S. Department of Health and Human Services, National Toxicology Program (NTP 1998, 2000, 2002) classified glass wool (respirable size) as reasonably anticipated to be a human carcinogen, based on sufficient evidence of carcinogenicity in animals. This assessment was originally prepared in 1993-1994 for the 7th Report on Carcinogens (NTP 1994), but has not been updated since then in the 8th, 9th, or 10th Reports on Carcinogens (NTP 1998, 2000, 2002).

Section 12 - Ecological Information

Ecotoxicity
A: General Product Information
   No data available for this product.
B: Component Analysis - Ecotoxicity - Aquatic Toxicity
   No ecotoxicity data are available for this product’s components.

Section 13 - Disposal Considerations

US EPA Waste Number & Descriptions
A: General Product Information
   This product is not expected to be a hazardous waste when it is disposed of according to the U.S. Environmental Protection Agency (EPA) under Resource Conservation and Recovery Act (RCRA) regulations. Product characterization after use is recommended to ensure proper disposal under federal and/or state requirements.
B: Component Waste Numbers
   No EPA Waste Numbers are applicable for this product’s components.

Disposal Instructions
   Dispose of waste material according to Local, State, Federal, and Provincial Environmental Regulations.

Section 14 - Transport Information

International Transport Regulations
   These products are not classified as dangerous goods according to international transport regulations.

Section 15 - Regulatory Information

US Federal Regulations
A: General Product Information
   SARA 311/312: This product is not classified as hazardous under SARA 311/312.
B: Component Analysis
   None of this product’s components are listed under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65), or CERCLA (40 CFR 302.4).

State Regulations
A: General Product Information
   The glass fibers in this product are not known to be regulated.
   Other state regulations may apply. Check individual state requirements.

The following statement(s) are provided under the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65):
WARNING! This product contains a chemical known to the state of California to cause cancer.

<table>
<thead>
<tr>
<th>Component</th>
<th>CAS #</th>

Available: Lowes
JM FORMALDEHYDE-FREE® FIBER GLASS INSULATION

JM Formaldehyde-free® fiber glass building insulation offers superior thermal and acoustical performance—and it improves indoor air quality because it's made without formaldehyde. Why is that important? Because the U.S. Environmental Protection Agency (EPA) recommends limiting exposure to formaldehyde as much as possible, and the California Air Resources Board, a division of the California EPA, recommends that homeowners, builders and architects use building materials and insulation made without formaldehyde when building a home or remodeling. JM is the only company in the industry with a complete line of fiber glass building insulation made without formaldehyde. Visit spec.JM.com for more information.

PRODUCT DESCRIPTION

Johns Manville Kraft-Faced insulation is a lightweight thermal and acoustical fiber glass insulation made of long, resilient glass fibers bonded with an acrylic thermosetting binder. The kraft facing can serve as an integral vapor retarder.

AVAILABLE FORMS

- Pre-cut batts – fit standard wall cavities and are faster to install than roll products.
- Rolls – can be cut to fit any size cavity and installed in any part of a building.

APPLICATIONS

- Wood frame construction – residential homes and light commercial buildings
- Metal frame construction – commercial buildings
- Pre-manufactured homes – modular or manufactured housing
- Engineered wood construction – assemblies framed with 12” to 19.2” (305 mm to 488 mm) on-center cavities, wide-spaced wood trusses or I-joists
- Interior wall sound control – interior walls and floor and ceiling assemblies (for sound class ratings for wall assemblies, see the appropriate STC values data sheet for either steel or wood framing)

INSTALLATION

Kraft-faced insulation cuts easily with an ordinary utility knife. Stapling tabs are provided for attachment to wood framing. The insulation can also be installed with fasteners or simply pressed in place between studs or joists. The kraft facing on this product will burn and must not be left exposed. It must be covered with gypsum board or another approved interior finish. Where an exposed application is required, use FSK-25 flame-resistant faced insulation.

Note: In colder climate areas, vapor retarders (whether attached to the insulation or applied separately) are often placed toward the heated or conditioned side of the wall. This is done to reduce water vapor penetration into the wall from the building interior. Conversely, in predominantly hot, humid climates local practices often call for placing the vapor retarder toward the outside of the wall cavity. Check your local building codes for vapor retarder requirements.

PACKAGING

This insulation is compression-packaged for savings in storage and freight costs.

RECOMMENDED STORAGE AND TRANSPORT

Store insulation indoors. Keep insulation clean and dry at all times. When transporting, cover completely with a waterproof tarpaulin as necessary.

SPECIFICATION COMPLIANCE

ASTM C 665, Type II, Class C, Category 1
ASTM E 96 Permeability (Kraft) 1.0 Perm

KRAFT-FACED

JM Formaldehyde-free® Thermal and Acoustical Fiber Glass Insulation

PERFORMANCE ADVANTAGES

- Improves indoor air quality – because it’s made without formaldehyde.
- Thermally efficient – provides effective resistance to heat transfer with R-values up to R-38 (RSI-6.7).
- Controls moisture – kraft facing resists water vapor transmission.
- Controls sound – reduces transmission of conversations and equipment noises through interior and exterior walls and floor and ceiling assemblies.
- Noncorrosive – does not accelerate corrosion of pipes, wiring or metal studs.
- Durable – unaffected by moisture, oil, grease and most acids. It will not rot, mildew or otherwise deteriorate.
- Resilient – bonded glass fibers will not pull apart during normal applications and resist settling, breakdown and sagging from vibration.
- Flexible – forms readily around corners and curved surfaces.

* Consult your local JM sales representative or product availability chart for other available sizes and R-values (RSI-values).
** Thickness may vary by producing location.
*** Special widths and lengths may be available. Check with your local JM sales representative. Standard product lengths include 48", 52", and 60" (1.22 m, 1.32 m, and 1.52 m) batt.
---

**SHORT FORM SPECIFICATION**

All insulation shown on drawings or specified herein shall be "Johns Manville Kraft-Faced Formaldehyde-free Thermal and Acoustical Fiber Glass Insulation." Thermal resistance "R" values (RSI) of the insulation shall be R (RSI) ______ in ceilings, R (RSI) ______ in walls, and R (RSI) ______ in floors over unheated spaces.

**LIMITATIONS OF USE**

Check applicable building codes. Kraft-faced insulation should not be left exposed.

---

Technical specifications as shown in this literature are intended to be used as general guidelines only. The physical and chemical properties of kraft-faced thermal and acoustical fiber glass insulation listed herein represent typical, average values obtained in accordance with accepted test methods and are subject to normal manufacturing variations. They are supplied as a technical service and are subject to change without notice. Any references to numerical flame spread or smoke developed ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions. Check with the sales office nearest you for current information. All Johns Manville products are sold subject to Johns Manville’s Limited Warranty and Limitation of Remedy. For a copy of the Johns Manville Limited Warranty and Limitation of Remedy or for information on other Johns Manville thermal and acoustical insulation and systems, call or write to the 800 number or address listed below.

Properly insulating a structure using Johns Manville building insulation helps preserve our environment by reducing energy consumption for heating and cooling, reducing the pollution resulting from fuel burning, reducing the emission of hazardous air pollutants during manufacturing and reducing waste through the utilization of recycled materials. Look for the cross and globe emblem on Johns Manville building insulation which indicates independent certification by Scientific Certification Systems, Inc. of 25% or more recycled glass content.

Section 2 - Hazards Identification

Emergency Overview
Inhalation of excessive amounts of dust from the product may cause temporary upper respiratory irritation and/or congestion—remove individual to fresh air.

Inhalation
Irritation of the upper respiratory tract (scratchy throat), coughing, and congestion may occur in extreme exposures.

Skin
Temporary irritation (itching) or redness may occur.

Ingestion
This product is not intended to be ingested (eaten). If ingested, it may cause temporary irritation to the gastrointestinal (digestive) tract.

Eyes
Temporary irritation (itching) or redness may occur.

Ears
Temporary irritation (itching) or redness may occur.

Primary Routes of Entry (Exposure)
Inhalation, skin, and eye contact.

Target Organs
Nose (nasal passages), throat, lungs, skin, eyes

Medical Conditions Aggravated by Exposure
Pre-existing chronic respiratory, skin, or eye diseases or conditions.

Section 3 - Composition/Information on Ingredients

<table>

</table>

General Product Description
White fibrous glass board, batt, blanket, or loose-fill insulation with or without tan kraft, blue kraft, FSK, or other facings. No significant odor.
Section 4 - First Aid Measures

First Aid: Inhalation
If dust is inhaled in excess of exposure limits referenced in section 8 of this safety data sheet, remove individual to fresh air. Drink water to clear throat, and blow nose to remove dust. A saline spray in the nose may help clear any fibers.

First Aid: Skin
Wash gently with soap and water to remove dust and fibers. Alternatively, fibers can be removed from the skin by use of ordinary masking or wrapping tape. Should irritation persist, seek medical attention.

First Aid: Ingestion
Rinse mouth with water to remove dust and fibers and drink plenty of water to help reduce irritation. If irritation persists, seek medical attention.

First Aid: Eyes
Do not rub or scratch eyes. Dust particles may cause the eye to be scratched. Flush eyes with large amounts of water until irritation subsides. If irritation persists, seek medical attention.

First Aid: Ears
Wash exposed skin with soap and water. If irritation develops in the inner ear, seek medical attention.

First Aid: Notes to Physician
Dust from the product may cause mechanical irritation of the eyes, skin, and upper respiratory tract. Treat symptomatically.

Section 5 - Fire Fighting Measures

Flash Point: Not applicable
Upper Flammable Limit (UFL): Not applicable
Auto Ignition: Not determined
Rate of Burning: Not determined

Method Used: Not applicable
Lower Flammable Limit (LFL): Not applicable
Flammability Classification: Not determined

General Fire Hazards
There is no potential for spontaneous fire or explosion. Inorganic glass fibers are naturally non-combustible and non-flammable.

Extinguishing Media
Carbon dioxide (CO₂), water, water fog, dry chemical.

Fire Fighting Equipment/Instructions
No special procedures are expected to be necessary for this product. Normal fire fighting procedures should be followed to avoid inhalation of smoke and gases.

Section 6 - Accidental Release Measures

Clean-Up Procedures
Pick up large pieces. Vacuum dusts. If sweeping is necessary, use a dust suppressant such as water. Do not dry sweep dust accumulation. These procedures will help to minimize potential exposures.

Section 7 - Handling and Storage

Handling Procedures
Use protective equipment as described in Section 8 of this safety data sheet when handling uncontained material. Handle in accordance with good industrial hygiene and safety practices.

Storage Procedures
Warehouse storage should be in accordance with package directions, if any. Material should be kept clean, dry, and in original packaging.

Section 8 - Exposure Controls / Personal Protection

The Occupational Safety and Health Administration (OSHA) has not adopted specific occupational exposure standards for fiber glass. Fiber glass is treated as a nuisance dust and is regulated by OSHA as a particulate not otherwise regulated (total dust) shown in CFR 1910.1000 Table Z-3.

Respirable fraction 5 mg/m³
Total dust 15 mg/m³

JM has adopted the fiber glass industry voluntary Product Stewardship Program (PSP), formerly the NAIMA-OSHA Health and Safety Partnership Program (HSPP). Under the PSP, JM recommends that exposures be limited to the voluntary concentration of 1 floc TWA for fibers longer than 5 microns with a diameter less than 3 microns. This will help minimize potential irritation effects. The PSP also includes the PPE recommendations described below.
Material Name: Fiber Glass Building and Flexible Duct Insulation Formaldehyde-free, Antimony trioxide-free

Section 10 - Stability & Reactivity Information

Stability
These products are not reactive.

Hazardous Decomposition
May form carbon dioxide and carbon monoxide.

Hazardous Polymerization
Will not occur.

Section 11 - Toxicological Information

Acute Toxicity
A: General Product Information
Dust from this product is a mechanical irritant, which means that it may cause temporary irritation or scratchiness of the throat, and/or itching of the eyes and skin.

B: Component Analysis - LD50/LC50
No LD50/LC50's are available for this product's components.
Material Name: Fiber Glass Building and Flexible Duct Insulation Formaldehyde-free, Antimony trioxide-free

Safety Data Sheet
ID: 1071

Appendix A

Manufacturer's Specifications

Component Carcinogenicity

Fiber glass wool

ACGIH: A3 - Confirmed animal carcinogen with unknown relevance to humans
NTP: Reasonably Anticipated To Be A Carcinogen (respirable size)
IARC: Group 3 - Not Classifiable (IARC Monograph 81 [2002] (listed under Man-made mineral fibres), Monograph 43 [1988])

Chronic Toxicity

The U.S. Department of Health and Human Services, National Toxicology Program (NTP 1998, 2000, 2002) classified glass wool (respirable size) as reasonably anticipated to be a human carcinogen, based on sufficient evidence of carcinogenicity in animals. This assessment was originally prepared in 1993-1994 for the 7th Report on Carcinogens (NTP 1994), but has not been updated since then in the 8th, 9th, or 10th Reports on Carcinogens (NTP 1998, 2000, 2002).

Section 12 - Ecological Information

Ecotoxicity

A: General Product Information
No data available for this product.

B: Component Analysis - Ecotoxicity - Aquatic Toxicity
No ecotoxicity data are available for this product's components.

Section 13 - Disposal Considerations

US EPA Waste Number & Descriptions

A: General Product Information
This product is not expected to be a hazardous waste when it is disposed of according to the U.S. Environmental Protection Agency (EPA) under Resource Conservation and Recovery Act (RCRA) regulations. Product characterization after use is recommended to ensure proper disposal under federal and/or state requirements.

B: Component Waste Numbers
No EPA Waste Numbers are applicable for this product's components.

Disposal Instructions
Dispose of waste material according to Local, State, Federal, and Provincial Environmental Regulations.

Section 14 - Transport Information

International Transport Regulations
These products are not classified as dangerous goods according to international transport regulations.

Section 15 - Regulatory Information

US Federal Regulations

A: General Product Information
SARA 311/312: This product is not classified as hazardous under SARA 311/312.

B: Component Analysis
None of this product's components are listed under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65), or CERCLA (40 CFR 302.4).

State Regulations

A: General Product Information
The glass fibers in this product are not known to be regulated. Other state regulations may apply. Check individual state requirements.

The following statement(s) are provided under the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65):
WARNING! This product contains a chemical known to the state of California to cause cancer.

<table>

ICYNENE INSULATION

[RELATED SECTION 07 21 19]

Model Number: MD-R-200

Location: Main House and Flex OM floor and roof, northeast corner of the Bay Window, south wall of the Core Module

Features:

- Thermal resistance: \( R/\text{in} = R5.2 \text{ hr. } \text{ft}^2 \text{ °F}/\text{BTU} \)
- Water vapor transmission properties: 1.3 Perms @ 3”
- Surface burning characteristics @ 2” thickness: flame spread of \( \leq 25 \) and smoke development of \( \leq 450 \)
- Water absorption: 0.57% by Volume

Available: Home Energy Partners
PRODUCT SPECIFICATION

1. PRODUCT NAME

ICYNENE MD-R-200™

ICYNENE MD-R-200™ is a trademark for medium density, 100% water-blown polyurethane spray foam manufactured by Icynene. ICYNENE MD-R-200™ is a nominal 2 lbs/ft³ density, free rise material.

2. MANUFACTURER

ICYNENE MD-R-200™ is made on-site from liquid components manufactured by Icynene Inc. Installation and on-site manufacturing are supplied by Independent Icynene Licensed Dealers.

3. PRODUCT DESCRIPTION

Icynene's next generation of high performance products includes ICYNENE MD-R-200™, a 100% water-blown foam insulation and air barrier material containing resins with pre- and post-consumer recycled content. This unique product is a tough, low water absorption product with applicability across a broad range of substrates, environmental conditions and climate zones.

It is a type III vapor retarder, with low vapor permeance. It can be used to limit diffusion of moisture through building assemblies.

ICYNENE MD-R-200™ insulates and air-seals in one step for maximum energy conservation while minimizing the environmental impact during manufacturing and construction. Significantly reducing air leakage means ICYNENE MD-R-200™ contributes to a healthier, quieter and more comfortable indoor environment, while reducing energy consumption and related greenhouse gas emissions by as much as 50%.

The result is superior quality construction, with higher comfort levels and lower heating and/or cooling costs. Energy savings will vary depending on building design, location, etc.

ICYNENE MD-R-200™ is applied by spraying liquid components onto an open wall, crawlspace, ceiling surface or cathedral ceiling. There it expands approximately 30:1 in seconds to provide a foam blanket of millions of tiny air cells, filling building cavities, cracks and crevices in the process. It adheres to most construction materials, sealing out air infiltration.

Excess material is trimmed off, leaving a surface ready for drywall or other code-compliant finish.

4. TECHNICAL DATA

(Based on Core Samples)

Contains Recycled Content

Thermal Performance

Thermal resistance (ASTM C518)

- \( R/ln = R5.2 \text{ hr.}^\circ\text{F}/\text{BTU} \)

Average insulation contribution in a stud wall:

- 2" x 4" = R16 (3" foam)
- 2" x 6" = R26 (5" foam)

ICYNENE MD-R-200™ provides more effective performance than the equivalent R-value of air permeable insulation materials. ICYNENE MD-R-200™ is not subject to loss of R-value due to aging, windy conditions, settling, convection or air infiltration; nor is it prone to traditional moisture intrusion via convective air flow.

A FACT SHEET with R-value data is available upon request.

Air Permeance/Air Barrier /Air-Seal

ICYNENE MD-R-200™ fills any shaped cavity, and adheres to most construction materials, creating assemblies with very low air permeance. Additional interior or exterior air infiltration protection is subject to applicable codes.

Air permeability of core foam:

ASTM E283 data:

- 0.0016 L/s.m² @ 75 Pa for 2".

ASTM E2178 data:

- 0.0015 L/s.m² @ 75 Pa for 2".

All buildings, insulated and air-sealed with ICYNENE MD-R-200™ must be designed to include adequate mechanical ventilation/outdoor air supply. See ASHRAE Standard 62 – Ventilation for Acceptable Indoor Air Quality.

Water Vapor Permeance

ICYNENE MD-R-200™ is a type III vapor retarder with low water vapor permeability reducing the amount of moisture that can diffuse through the insulation. Water vapor transmission properties:

- 1.3 Perms @ 3”

Water Absorption Properties

The absorption of liquid water is very low.

- ASTM D2842: 0.57%

Burn Characteristics

ICYNENE MD-R-200™ is a combustible product and is therefore, consumed by flame, but will not sustain flame upon removal of the flame source. It leaves a charred foam residue. It will not melt or drip. ICYNENE MD-R-200™ is subject to all National/State and County building codes regarding fire prevention. Requirements for Thermal Barrier and Ignition Barrier coverings must be met as per the applicable building code having jurisdiction.

U.S. Fire Testing

Surface Burning Characteristics (ASTM E84) @ 2” thickness

Flame Spread ≤25

Smoke Development ≤450

*Flame spread rating not intended to reflect hazards under actual fire conditions.

Plastic Piping

ICYNENE MD-R-200™ is compatible in direct contact with CPVC piping systems, as per Paschal Engineering Study for the Spray Polyurethane Foam Alliance.

Bacterial or Fungal Growth and Food Value

Independent testing conducted as per ASTM C238 showed that ICYNENE MD-R-200™ is not a source of food for mold and as an air barrier material, ICYNENE MD-R-200™ restricts the airborne introduction of moisture, nutrients, and mold spores into the building envelope.

Environmental / Health / Safety

ICYNENE MD-R-200™ is 100% water-blown and therefore contains no ozone-depleting blowing agents. It is also PBDE-free.
6. AVAILABILITY

Check regional Yellow Pages™ or contact Icynene Inc. at 800-758-7325 or visit our website at www.icynene.com for a local Icynene Licensed Dealer.

7. WARRANTY

WHEN INSTALLED PROPERLY IN ACCORDANCE WITH INSTRUCTIONS, THE COMPANY WARRANTS THAT THE PROPERTIES OF THE PRODUCT MEET PRODUCT SPECIFICATIONS AS OUTLINED IN THIS PRODUCT SPECIFICATION SHEET. SAVE AND EXCEPTION ANY EXCLUSIONS REFERENCED IN THE WARRANTY.

8. TECHNICAL

Icynene Licensed Dealers and Icynene Inc. provide support on both technical and regulatory issues. Architectural specifications in CSI 3-Part format and design details are available upon request.

9. REGULATORY

ICYNENE MD-R-200™ has been tested as per the requirements of the International Code Council – Evaluation Service’s AC377 Acceptance Criteria (June 2009).

The following Evaluation Service report applies to this product:

- ICC ESR – 3005

Based on the evidence submitted, this product was found to comply with:
- IRC – 2006
- IBC – 2006
- IEOC – 2006

when installed in suitable thicknesses and assemblies listed in the ESR report.

For regulatory issues concerning IcyENENE MD-R-200™, contact Icynene Inc. at 800.758.7325.

10. RELATED REFERENCES

All physical properties were determined through testing by accredited third party agencies.

Icynene Inc. reserves the right to change specifications in its effort of continuous improvement. Please confirm that technical data literature is current.

11. PACKAGING AND STORAGE

Packaging

<table>
<thead>
<tr>
<th>Component</th>
<th>Quantity</th>
</tr>

**NOTE:** Does not contain any ozone destroying or global warming refrigerants such as CFC’s, HCFC’s, or HFA’s.

## Section 3: PHYSICAL DATA

**Appearance:** Semi-rigid platinum coloured cellular foam of “angel food cake” consistency and appearance

**Solubility In Water:** Insoluble.

**Density:** 2.0 lbs./cubic foot

**Odour:** None

**Emissions:** Safe for occupancy after 24 hrs, no emissions detectable after 30 days.

## Section 4: FIRE & EXPLOSION HAZARD DATA

**Flammability:** Combustion occurs at 400°F (material will not sustain combustion on its own)

**Flame Spread:** Less than 20

**Smoke Developed:** Less than 400

**Method Used:** ASTM E84

**Melting:** Does not melt

**Flammable Limits:** LFL: - not determined
                      UFL: - not determined

**Extinguishing Media:** Water, carbon dioxide, dry chemical or foam.
MATERIAL SAFETY DATA SHEET
Product Name: ICYNENE MD-R-200™

Fire & Explosion Hazards: Prevent breathing of combustion fumes (smoke)
Fire Fighting Equipment: Firefighters must wear a self-contained breathing apparatus to avoid breathing smoke generated by combustion.

Section 5: REACTIVITY DATA
Stability: Stable under all normal conditions
Incompatibility: Compatible with all products

Section 6: ENVIRONMENTAL & DISPOSAL INFORMATION
Disposal Method: Follow all federal, provincial, state and local regulations.

Section 7: HEALTH HAZARD DATA
Detectable Emissions: No detectable emissions
Systemic & Other Effects: Not available
Ingestion: The consequences of ingestion of large amounts are unknown
Dust Inhalation: May cause mechanical irritation to the respiratory system
Eye Protection: Use glasses when cutting foam
Skin Protection: Dust from foam cutting may cause irritation

Section 8: FIRST AID
Ingestion: Medical advice should be obtained
Inhalation: Remove to fresh air, consult a physician
Eye Contact: Flush with water to remove particles
Skin Contact: No special precautions required

Section 9: ADDITIONAL INFORMATION
THE INFORMATION HEREIN IS GIVEN IN GOOD FAITH, BUT NO WARRANTY EXPRESS OR IMPLIED, IS MADE. CONTACT ICYNENE INC. FOR FURTHER INFORMATION.

VaproShield breathable membranes are unsurpassed in their ability to dry wet sheathing.

Third-party testing results clearly indicate the superior drying capability of both WallShield and WrapShield.

Drying is essential in preventing the damaging effects of mold, mildew and rot resulting in repair costs, poor indoor air quality and strain on HVAC systems.

Tested in accordance with ICC-ES AC 38 criteria to meet IBC and IRC requirements for Weather Resistant Barriers (ICC Certificate #ESR-1910).

*ASTM E 96 - Method B (wet cup method) typically gives a more realistic result for permeance for highly permeable products than does the Method A (dry cup/absorbent method).

SECTION I – PRODUCT IDENTIFICATION

Product: WallShield®
Emergency Assistance: 866-731-7663

Chemical Name: N/A
Chemical Family: Polypropylene
Formula: N/A

SECTION II – HAZARDOUS COMPONENTS

NONE

SECTION III – PHYSICAL DATA

Boiling Point Range: N/A
Vapor Pressure: N/A
Vapor Density: N/A
Solubility in Water: Insoluble
Appearance and Odor: Numerous Colors/No odor
 Specific Gravity: N/A
Melting Point Range: 329 to 338 degrees Fahrenheit
Evaporation Rate: N/A

SECTION IV – FIRE AND EXPLOSION HAZARD DATA

Flash Ignition Temperature: 662 degrees Fahrenheit
Flammable Limits: N/A
Extinguishing Media: Carbon dioxide, dry chemical, foam, water fog, and water spray
Special Fire Fighting Procedures: Use water spray to cool fire exposed surfaces and to protect personnel.
Unusual Fire and Explosion Hazards: None

SECTION V – REACTIVITY DATA

Stability: Stable
Conditions to Avoid: Overheating
Incompatibility (Material to Avoid): Avoid contact with strong oxidizing agents
Hazardous Decomposition Products: None
Hazardous Polymerization: N/A

SECTION VI – HEALTH HAZARD DATA

Primary Routes of Entry:
- Eyes: None
- Ingestion: Not a normal exposure
- Inhalation: None
- Skin: None

5/5/04 Updated: 4/2010
VAPROSHIELD, LLC

MATERIAL SAFETY DATA SHEET

Permissible Exposure Level: N/A

Chemicals contained herein listed as carcinogens or potential carcinogens:
NTP: NONE IARC: NONE OSHA: NONE

Effects of Overexposure:
• Eyes: N/A
• Ingestion: Acute oral LD50 is greater than 2000mg/Kg
• Inhalation: N/A
• Skin: N/A.

Medical Conditions generally aggravated by exposure: N/A

Emergency and First Aid Procedures:
• Eyes: Flush with water.
• Ingestion: Contact a physician
• Inhalation: N/A
• Skin: Remove with waterless hand cleaner. Wash with soap and water

SECTION VII – PRECAUTIONS FOR SAFE HANDLING AND USE

Steps to be taken in case material is released or spilled: N/A
Waste disposal method: Dispose of in accordance with Federal, State and local regulations.
Precautions to be taken in handling and storing: Do not store near flame, heat or strong oxidizing agents.

SECTION VIII – CONTROL MEASURES

Respiratory Protection: N/A Eye Protection: Chemical goggles
Ventilation: N/A Protective Gloves: N/A

SECTION X - NOTES

Note: N/A = not applicable Date Prepared: May 5, 2004

VERTICAL CEDAR SIDING

[RELATED SECTION 07 46 23]

Location: exterior of Main House

Dimensions:
  - Width: 8”
  - Depth: 1”

Finish: Mark Twain Gray Brick

Features:
  - Channel rustic milled 8” cedar siding with 6” exposure attached to furring strips
  - Species: Western Red Cedar
  - Product pattern: Channel Siding
  - Grade: Select Knotty
  - Grading agency paragraph: NLGA para. 204a
  - Moisture content: Kiln-dried
  - Surface to be exposed: Sawn Face

Available: Lowes

Price: $25.87
HIGHLAND CRAFTSMEN BARK HOUSE PIONEER SHINGLE

[RELATED SECTION 07 46.23.13]

Location: Flex OM, exterior of Main House south wall

Dimensions:
- Length: 26”
- Width: 6” minimum to 4’ maximum [average 13” and wider]
- Depth: 1/2” minimum to 7/8” maximum

Finish: yellow poplar

Features:
- Moisture content: approximately 6-8% guaranteed Kiln Dried & Heat Sterilized
- Squared: re-squared to exact 90 degree edges for precise installation
- Appearance graded for performance and appearance. 100% usable sound bark. No open defect, no brown scaly bark.

Available: Highland Craftsmen, Inc.
Bark Specs

Bark House Shingle Specs
With Highland Craftsmen Bark House® Shingles, you always have options.

Bark House® Shingles come in three grades: Standard™ & Premium™ Grades for exterior use & Interior™ Grade for interior use

**Standard™ Grade**

Thickness:
1/2” minimum to 7/8” maximum

Widths:
6” minimum to 4” maximum (Average Shingle width is 13” and wider)

Lengths:
18” or 26” lengths & 36” x 36” panels available

Moisture Content:
Approximately 6-8% guaranteed Kiln Dried & Heat Sterilized

Appearance:
Graded for performance and appearance. 100% usable sound bark. No open defect, no brown scaly bark

Squared:
Re-Squared to exact 90 degree edges for precise installation

FIRESTONE THERMOPLASTIC POLYOLEFIN MEMBRANE

[RELATED SECTION 07 54 23]

Model Number: UltraPly TPO
Location: Main House, OM Closets, Flex OM
Dimensions:
  - Length: 72'
  - Width: 36"
  - Depth: 0.045"
Color: white
Features:
  - 0.060” over the reinforcing scrim [top-ply thickness]
  - Flat roof type: felt
  - Use: water proofing material
  - Elongation at reinforcement break: 25%
  - Tearing strength: 120 lb,
  - Water absorption: less than 3%
Available: Firestone
Firestone BUILDING PRODUCTS

UltraPly™ TPO

DESCRIPTION:
Firestone UltraPly™ TPO is a flexible Thermoplastic Polyolefin roofing membrane that is produced with polyester web-inserted reinforcement. This heat weldable TPO membrane is available in 45 mil (1.1 mm) and 60 mil (1.5 mm) thicknesses in 8' (2.4 m), 10' (3 m) and 12'4" (3.76 m) widths. The colors available are white, tan or gray. This reflective membrane is suitable for a variety of low slope applications.

METHOD OF APPLICATION:
1. Firestone UltraPly TPO membrane is installed as continuous roofing or waterproofing layer on the roof. Rolls are overlapped (side laps and end laps) prior to the heat welding of the seam areas.
2. Install the UltraPly TPO Roofing System in accordance with current Firestone UltraPly TPO specifications, details and workmanship requirements.
3. Please contact your Firestone Technical Coordinator at 1-800-428-4511 or visit the Firestone Technical Database for additional information at www.firestonebpco.com

PRODUCT DATA:
Thickness: 0.045" (1.1 mm)
0.060" (1.5 mm)
Width: 5 ft to 12 ft 4 in (1.5 m to 3.75 m)
Length: 100 ft (30.5 m)
Colors: White, Tan, Gray

STORAGE:
• Store away from sources of punctures, and physical damage.
• Assure that structural decking will support the loads incurred by material when stored on rooftop. The deck load limitations should be specified by the project designer.
• Store away from ignition sources as membrane will burn when exposed to open flame.

PRECAUTIONS:
• Exercise caution when lifting, moving, transporting, storing or handling membrane rolls to avoid sources of punctures and possible physical damage.
• Contact your Firestone Technical Coordinator at 1-800-428-4511 for specific recommendations regarding chemical or waste product compatibility with Firestone UltraPly TPO Membrane.
• Refer to Material Safety Data Sheets (MSDS) for safety information

FIRESTONE TAPERED INSULATION

[RELATED SECTION 07 54 23]

Location: Main House, OM Closets, Flex OM

Dimensions:
- Length: 4’
- Width: 8’
- Thickness: 1” to 2-1/2”

Features:
- Compressive strength: 20 psi
- Dimensional stability: 2% linear change
- Moisture vapor transmission: less than 1 perm
- Water absorption: less than 1% volume
- Density: 2 pcf

Available: Firestone
ISO 95+™ GL
Flat and Tapered

DESCRIPTION:
Firestone ISO 95+ GL flat and tapered roof insulation consists of a closed-cell polyiso foam core laminated to a black glass reinforced mat facer on both major surfaces. Flat and tapered ISO 95+ GL provide outstanding thermal performance on commercial roofing applications, while providing positive roof top drainage to help eliminate ponding water when tapered ISO 95+ GL is used.

All Firestone polyiso insulations use EPA accepted blowing agents and qualify under the Federal Procurement Regulation for Recycled Material. Flat and tapered ISO 95+ GL with IsoGard™ Foam Technology incorporates a HCFC-free blowing agent that does not contribute to the depletion of the ozone (ODP-Free).

METHOD OF APPLICATION:
Insulation shall be neatly fitted to all roof penetrations, projections and nailers. No more insulation shall be installed than can be covered with membrane and completed before the end of each day’s work or before the onset of inclement weather.

ISO 95+ GL FLAT AND TAPERED MUST BE INSTALLED USING: Fasteners and plates, hot asphalt or Firestone approved insulation adhesives.

For ballasted systems, the top layer of Firestone insulation may not be mechanically attached.

AVAILABLE SIZES:
Flat Boards: 4" x 4" (1.22 m x 1.22 m)
4" x 8" (1.22 m x 2.44 m)
Thickness ranging 1.0" (25.4 mm) to 4.0" (101.6 mm)
Tapered Boards: 4" x 4" (1.22 m x 1.22 m)
4" x 8" (1.22 m X 2.44 m) (special order)
Thickness ranging 0.5" (12.7 mm) to 4.0" (101.6 mm)
Slopes ranging 1/16" per foot (.5%) to 1/4" per foot (4%)
See chart on page 2.

STORAGE AND PRECAUTIONS:
- Keep insulation dry at all times.
- Elevate insulation above the deck or ground.
- Cover insulation with waterproof tarps.
- Combustible. Refer to MSDS for more information.
- Do not install over wet, damp or uneven substrates.

MANUFACTURING LOCATIONS:
Aurora, CO Florence, KY Corsicana, TX
Bristol, CT Jacksonville, FL Salt Lake, UT
DeForest, WI Youngwood, PA

LEED INFORMATION:
Firestone ISO 95+ GL flat and tapered can help contribute to overall L.E.E.D. certification due to its thermal efficiency (R-Value), recycled content, and zero ozone depletion. ISO 95+ GL flat and tapered can help achieve valuable credits in the following categories:

- **Energy and Atmosphere**
  - Benefits of commissioning building energy systems include lower energy use and lower operating costs.
  - Firestone ISO 95+ GL contains the highest R-Value per inch to help assist in the following credits:
    - EA Pre-requisite 2: Minimum Energy Performance
    - EA Credit 1: Optimize Energy Performance (1-19 points)

- **Material & Resources**
  - Benefits include the reduction of waste, as well as the preservation of landfill space and raw materials.
  - Firestone ISO 95+ GL contains recycled content, can be re-used, and is manufactured strategically across the United States.
    - MR Credit 2: Construction Waste Management (1-2 points)
    - MR Credit 3: Material Re-Use (1-2 points)
    - MR Credit 4: Recycled Content (1-2 points)
    - MR Credit 5: Regional Material (1-2 points)

SECTION 3: HAZARD IDENTIFICATION

Primary Route of Exposure: Inhalation
Signs and Symptoms of Exposure:
- May cause irritation to the eyes, skin and respiratory tract.
- Inhalation of high vapor concentrations of pentanes used in this product may cause dizziness, headaches, anesthesia, drowsiness, unconsciousness, and other central nervous system effects, including death.

Medical Conditions Aggravated by Exposure:
The dust produced by reprocessing of this product may aggravate pre-existing respiratory diseases.

Chronic Effects:
- This product contains tris(monochloropropyl) phosphate, which may cause skin sensitization.

Carcinogenicity:
- Direct implantation of glass fibers into the lung tissue of laboratory animals has produced lung fibrosis and lung cancer. Human epidemiological studies of inhalation exposure have yielded negative results.
- Continuous filament glass fibers is listed by IARC as a class 3, unclassifiable as to carcinogenicity in humans.
SECTION 4: FIRST AID MEASURES

**First Aid Procedures:**
For eyes, hold eyelids open and wash with gentle stream of water for at least 15 minutes preferably at eyewash fountain. For skin contact, wash affected area thoroughly with soap and water when time permits. For inhalation, remove to fresh uncontaminated air.

SECTION 5: FIRE FIGHTING PROCEDURES

**Suitable Extinguishing Media:**
Water spray, Alcohol foam, Carbon Dioxide, or Dry chemical.

**Hazardous Combustion Products:**
Carbon dioxide and carbon monoxide, phosphorus oxides, and phosphoric acid.

**Recommended Fire Fighting Procedures:**
Wear impermeable protective clothing and self-contained breathing apparatus. Toxic fumes and vapors may be evolved.

**Unusual Fire and Explosion Hazards:**
Emits dense, black smoke when burned. Certain operations such as grinding or cutting may lead to a buildup of dust suspended in air which can cause a dust explosion if ignited. Provide adequate ventilation and appropriate dust handling systems. Isopentane and n-pentane, highly flammable materials, may be present within this product.

SECTION 6: PRECAUTIONS FOR SAFE HANDLING AND USE

**Steps to Be Taken in Case Material is Released or Spilled:**
None required

**Precautions to Be Taken in Handling and Storing:**
Keep away from heat, sparks, and open flames. Store in a cool, dry area. Applying to hot surfaces requires special precautions. Protect against dust that may be generated by reprocessing, altering or applying this product. Remove dust by vacuuming rather than blowing.

SECTION 7: EXPOSURE CONTROLS / PERSONAL PROTECTION

**Ventilation:**
Use in a well-ventilated location.

**Respiratory Protection:**
During reprocessing, altering, and/or applying this product, a NIOSH respirator may be required based upon the end user's airborne concentration evaluation.

**Eye Protection:**
Wear safety glasses with side shields when reprocessing, altering and/or applying this product.

**Skin Protection:**
Wear cotton or leather gloves when handling this product.

**Other:**
None required.

**Work / Hygienic Practices:**
Wash exposed skin prior to eating, drinking or smoking and at the end of each shift. Wash contaminated clothing prior to reuse.

XERO FLOR ROOT BARRIER

[RELATED SECTION 07 55 63]

Model Number: XF112
Location: Flex OM
Features:
- Installed on top of the roof membrane and below the other green roof components.
- Water-impermeable sheet of 20mil low density polyethylene [LDPE].

Approval Certificates:
- ASTM D1593
- ASTM D1505
- ASTM D638
- ASTM D751
- ASTM D101C Method 2065
- ASTM D1004
- ASTM G22
- ASTM 1203
- ASTM D746
- ASTM D1204
- ASTM D5397 Method A
- ASTM E96
- FTMS 101C

Available: Xero Flor America
**XF 112 Root Barrier (20 mil) – Product Information**

**Application**
XF 112 is the root barrier component of the Xero Flor green roof system and protects the roof waterproofing membrane from direct contact or encroachment by plant roots. The XF 112 root barrier is optional depending on recommendations or requirements by the roof waterproofing membrane manufacturer or architect/builder. To avoid damage from wind uplift, the XF 112 should be secured during unrolling and covered immediately after installation.

**Product Description**
The XF 112 root barrier is a mono-layer membrane consisting of highly flexible, low-density polyethylene (LDPE). The material is delivered in desired widths – up to 20 ft - accordion-folded on 5 ft rolls.

Xero Flor XF157 Retention Fleece – Product Information

Application
The XF157 Retention Fleece serves as both a water-holding capillary mat and filter-fabric component of the Xero Flor green roof system. The XF157 Retention Fleece layer allows storage and lateral wicking of rain or irrigation water for improved water storage and re-use by the vegetated layers. During installation, unrolled fleece should be secured with temporary ballast or by wetting and overlay with XeroTerr growing medium and/or Xero Flor vegetation mats.

Product Description
The XF157 Retention Fleece is a multicolored, needled fleece fabric delivered as end-tied poly-bagged rolls for shipping and transport. The XF157 Retention Fleece is composed of 100% post-consumer recycled polyester and polypropylene with trace content of other synthetic polymers.

PERMASNAP PARAPET WALL COPING

[RELATED SECTION 07 65 00]

Location: Main House

Dimensions:
- Length: 10’
- Width: 13”

Finish: anodized aluminum

Features:
- 24 gauge
- Leg size: 4”

Approval Certificates:
- ASTM D3776
- ASTM D1777-96
- ASTM D5034

Available: Hickman
**Permasnap® Parapet Wall Coping**

Internal metal chair drainage system eliminates caulked joints.

True welded radius, matching corners, end caps, and other accessories, are factory fabricated.

Standard Permasnap with a 20-gauge galvanized steel cleat is Approved for up to an FM 1-90 Wind Storm Rating and has a 20-Year, 110 mph Excel Warranty

UL Classified to meet the ANSI/SPRI ES-1 Roof Edge Standard Test Protocol RE-3 for coping

Pre-punched holes and supplied stainless steel fasteners for proper attachment and fast installation.

© W.P. Hickman Company Revised August 20, 2009
Permasnap® Coping

**SPECIFICATIONS (short form)**
The coping cap shall be the Permasnap® coping system as manufactured by the W.P. Hickman Company. The coping cap shall be formed as indicated with allowance for expansion and contraction. The standard support cleat shall be a 20 Ga. galvanized steel cleat with pre-slotted fastener holes. A 6" wide concealed joint cover with a pre-finished channel on the top surface to channel water shall be installed at coping joints. Installation shall conform to Manufacturer’s written instructions.

**DESCRIPTION**

*Application*

The product is a metal coping with hold down cleats and metal drain chairs for capping most any parapet. Permasnap® is formed from .063” (1.60 mm) or .050” (1.25 mm) aluminum; 24ga. galv. steel with Kynar 500® coating; custom metal by request. Standard coping cap length is 10’. Cleats are 20ga. galvanized steel. Chairs are metal in the same color and finish as the coping cap. Fabricated to the wall width required between 6” and 32”. Face and back leg are 4” (102mm) nominal length with tested approvals up to 6” (152mm). Custom sizes by request. Your Hickman Representative will be happy to discuss your special design requirements.

**INSTALLATION PROCEDURES**

*NOTE: This is a general outline only. Please refer to our full installation guide for additional specific detail.*

*Preparation:*
The substrate should be flat and level from front to back. Shim areas not level.

*Procedure:*
The first cleat/chair set should be installed with the center line of the cleat set to the miter leg length (see chart on front page) and 24” (300mm) from the end of a wall. Install cleats/chairs sets at all corners and ends first, then work along the wall to the center locating sets every 60” on center for walls less than 17” and 40” on center for walls 17” - 32”. Adjust the cleat location in the middle of a run to fit a short coping length. This procedure will provide a symmetrical appearance of the installed coping. Install metal gutter chair/concealed joint covers at joint locations. Hook coping face leg over the cleat face (front) leg and swing over the top. Snap the roof side (back) leg by pressing firmly down on the back edge directly over the cleat chair sets. Leave a 1/4” gap at each joint for thermal movement.

**FINISHES**

- Natural mill aluminum
- Pre-coat Kynar 500® - from the manufacturer’s standard color chart
- Post-coat Kynar 500® - industry standard two coat colors
- Non-standard Kynar 500® - colors requiring multiple coatings or protective clear coats
- Anodized aluminum – clear, bronze and black

**GUARANTEE**

A. **Manufacturer’s Standard Warranty:** Materials shall be free of defects in material and workmanship for five years after shipment. If, after inspection, the manufacturer agrees that the materials supplied by them are defective, the manufacturer shall at their option repair or replace them.

B. **Special Performance/20-Year Excel Warranty:** Manufacturer shall guarantee that a coping system up to 32” wide, when installed per manufacturer’s instructions, will not blow off, leak, or cause membrane failure, even in wind conditions up to 110 mph, or the manufacturer shall at their option repair or replace their materials.

C. **Decorative Finish Warranty (consult manufacturer).**

**QUALITY ASSURANCE**

Permasnap® coping is listed in the current FM Global Approval Guide approved for Windstorm ratings up to FM 1-90 depending upon wall width, clear spacing, and gauge of cap. Consult FMRC Approval Guide or Hickman for other conditions. Permasnap coping is UL Classified to meet ANSI/SPRI ES-1 Test Method RE-3 for coping. The Permasnap® coping system has been tested simultaneously on the horizontal and vertical surfaces and has exceeded design wind pressure as calculated in accordance with the current edition of ANSI/SPRI ES-1 “Wind Design Standard for Edge Systems used with Low Slope Roofing Systems”.

**TECHNICAL SERVICES**

Engineering and shop drawings are available from the factory. Product samples, detail sheets, color chips and color charts are ready for your submittal package. For personal assistance with questions or submittals, contact your local representative or call the W.P. Hickman Company.

\( \) = Dimension in millimeters

Some installation procedures will require a larger rough opening than noted (i.e., installations utilizing our installation clips), therefore, you may need to increase the rough opening size accordingly. Rough opening gaps may be increased up to a maximum of 1/2" on all sides and still be within good practice guidelines.

### Size Limitations for Inswing Door Units

**One Panel (based on door size)**

- **Maximum**
- **Width:** 48"
- **Height:** 120"

Any panel over 3-0 x 8-0 or 3-6 x 6-8 must use 6" stiles and top rail along with ball bearing butt hinges. Units that exceed 3-6 x 9-0 can not be prehung. Non-standard size panels will be finished with our K-Kron II finish - the frame however will be clad.

**Additional Limitations**

- A mulled unit can not exceed 168" (14’) x 108" (9’) overall. Larger sized mull unit assemblies may require alternate installation methods or field mulling.
- Glass ratio can not exceed 6:1 for annealed glass.
- Glass ratio can not exceed 8:1 for tempered glass.

Product Images

Product Specifications

Taking center stage in Kawneer’s lineup, EnCORE® Thermal Framing System is a two-piece, face-and-gutter system that offers thermal efficiency, a Structural Silicone Glazing (SSG) option and numerous design choices.

Engineered for easy installation and lower costs, features include the unique QuickSeal™ self-sealing system, a broad selection of system depths and a 1 3/4-inch (44.5) minimal sightline.

EnCORE® readily adapts to remodeling projects and new construction, whether traditional or modern architecture.

Key Features Include:

- Economical
- 1-3/4” (44.5) sightline with a 3-9/16” (90.5), 4-1/2” (114.3) or 8” (152.4) depth
- Front or Center (4-1/2”) glass applications
- Outside glazed
- Screw Spine, Shear Block or Type-B fabrication
- SSG option
- Infill options up to 1-1/8” (28.6)
- Thermal break via Polymer glazing clip
- Reimann® anodized finishes in 7 standard choices
- Painted finishes in 42 standard choices and unlimited custom choices

Optional Features

- Two color capability
- 1-1/4” (31.5) perimeter sightline
- Project specific U-factors (See Thermal Charts)

For more detailed information on this product, reference the document(s) available for download below.

- EnCORE® Thermal Framing System - Flyer [357KB]
- EnCORE® Thermal Framing System - Architectural Detail Manual [4940KB]

Viewing documents in PDF format requires Adobe Acrobat Reader, which is available as a free download from the Adobe Web site.
FEATURES

- Economical
- 1-3/4" sight line with a 3-9/16", 4-1/2" or 6" depth
- Front or Center (4-1/2") glass applications
- Outside glazed
- Screw Spline, Shear Block or Type-B fabrication
- SSG option
- Infill options up to 1-1/8"
- Thermal break via. Polymer glazing clip
- Permanodic® anodized finishes in 7 standard choices
- Painted finishes in standard and custom choices

OPTIONAL FEATURES

- Two color capability
- 1-1/4" perimeter sight line
- Project specific U-factors (See Thermal Charts)

PRODUCT APPLICATIONS

- Storefront, Ribbon Window or Punched Openings
- Low to mid-rise
- Single-span
- Curved frames
- Integrated entrance framing allowing Kawneer entrances or other specialty entrances to be included
- Kawneer Sealair® windows or GLASSvent® are easily incorporated

For specific product applications, consult your Kawneer Representative

() = DIMENSION IN MILLIMETERS

Unit dimension height calculations utilize Traditional sill nosings. If sill drip is used, the unit dimension height will differ.

For Units with concealed hinge: frame width - 3.812 = clear opening width

Some installation procedures will require a larger rough opening than noted (i.e.: installation utilizing our installation clips), therefore, you may need to increase the rough opening size accordingly. Rough opening gaps may be increased up to a maximum of 1/2" on all sides and still be within good practice guidelines.

### Other Common Dimension Formulas

All formulas are based using standard 2 1/4" stiles and rails.

</table>

Square footage of entire unit must be within 15 sq. ft. for both insulating and single glazed units. (i.e.: a unit that is 36" wide can only be 72" high, however a unit which is 24" wide can be 90" tall)

Square footage of entire unit must be within 53 sq. ft. for both insulating and single glazed units. (i.e.: a unit that is 120" in one direction may only be 60" in the other.) Units over 40 sq. ft. must be tempered.

A mull unit can not exceed 168" (14') x 108" (9') overall. Larger sized mull unit assemblies may require alternate installation methods or field mulling.

Glass ratio can not exceed 6:1 for annealed glass.

Glass ratio can not exceed 8:1 for tempered glass.

PLEXIGLASS SG PLUS

[RELATED SECTION 08 63 00]

Location: Core Module

Dimensions:
- Length: 16’ 3-1/2” [4966 mm]
- Width: 8’ 3” [2515 mm]
- Height: 1/8” [4.5 mm]

Color: colorless

Features:
- Critical craze stress: 1600 psi
- Impact energy: 39 in/lbs

Available: Altuglas International
**Plexiglas® SG Plus**

**CRAZE-RESISTANT IMPACT ACRYLIC SHEET**

**What's your sign?** Geminis tend to have dual characteristics – they're attractive and they're very versatile. That's why Plexiglas® SG Plus craze-resistant impact acrylic sheet is your material. It not only exhibits outstanding thermoforming definition, it's well suited to both channel letter and pan face signs.

Designed specifically to meet the stringent requirements of the quantity and custom sign markets, Plexiglas® SG Plus acrylic sheet has the properties you desire: impact resistance and enhanced machinability.

It's an excellent substrate for channel letters. At 8 times the impact strength of straight acrylic, it will resist in-shop, in-transit, installation, and in-service breakage. If your sign is a pan face, Plexiglas® SG Plus craze-resistant impact acrylic sheet offers outstanding thermoforming definition along with enhanced craze resistance to protect from paint solvents.

- Enhanced machinability.
- Easily fabricated and decorated.
- Outstanding thermoforming definition.
- Eight times tougher than straight acrylic.
- Excellent weatherability and optical clarity.
- Resistant to chemicals.
- Available in colorless, white and several popular sign colors.
- Available on reels and as sheet stock.
- Exceptional lot-to-lot consistency.
Plexiglas® SG Plus craze-resistant impact acrylic sheet also provides excellent craze-resistance properties even after exposure to the harsh solvents, paints, paint thinners and cleaners typically used in the sign industry.

Below, Chart A shows how Plexiglas® SG Plus acrylic sheet outperforms continuous cast impact modified acrylic (CC IMA) when tested with isopropyl alcohol (IPA).

Chart B shows that the impact strength of Plexiglas® SG Plus acrylic sheet is higher than continuous cast impact modified acrylic (CC IMA).

For more information, contact your local Altuglas International sales representative or call 800-523-7500.

</table>

The substance(s) marked with a "Y" in the OSHA column, are identified as hazardous chemicals according to the criteria of the OSHA Hazard Communication Standard (29 CFR 1910.1200).

While this material is not classified as hazardous under Federal OSHA regulations, this MSDS contains valuable information critical to the safe handling and proper use of this product. This MSDS should be retained and available for employees and other users of this product.

The components of this product are all on the TSCA Inventory list.

## 3 HAZARDS IDENTIFICATION

**Emergency Overview**
Clear to opaque sheet in various colors.  
Odorless  
MELT PROCESSING RELEASES VAPORS WHICH MAY CAUSE EYE, SKIN AND RESPIRATORY TRACT IRRITATION  
HANDLE IN ACCORDANCE WITH GOOD INDUSTRIAL HYGIENE AND SAFETY PRACTICES.

**Potential Health Effects**

Inhalation and skin contact are expected to be the primary routes of occupational exposure to this material. As a finished product, it is a synthetic, high molecular weight polymer. Due to its chemical and physical properties, this material does not require special handling other than the good industrial hygiene and safety practices employed with any industrial material of this type.

Ethyl acrylate is classified as possibly carcinogenic to humans (Group 2B) by the International Agency for Research on Cancer (IARC).
4 FIRST AID MEASURES

IF IN EYES, immediately flush with plenty of water.

IN CASE OF CONTACT, flush the area with plenty of water. Remove material from clothing. Wash clothing before reuse.

IF INHALED, remove to fresh air.

5 FIRE FIGHTING MEASURES

Fire and Explosive Properties
Auto-Ignition Temperature >400 C/752 F
Flash Point NA Flash Point Method
Flammable Limits- Upper NA
Lower NA

Extinguishing Media
Use water spray, carbon dioxide, foam or dry chemical.

Fire Fighting Instructions
Fire fighters and others who may be exposed to products of combustion should wear full fire fighting turn out gear (full Bunker Gear) and self-contained breathing apparatus (pressure demand NIOSH approved or equivalent). Fire fighting equipment should be thoroughly decontaminated after use.

Fire and Explosion Hazards
Heated material can form flammable vapors with air.

6 ACCIDENTAL RELEASE MEASURES

In Case of Spill or Leak
Contain spill. Sweep or scoop up and remove to suitable container. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental permits.

7 HANDLING AND STORAGE

Handling
Avoid temperature extremes during storage; ambient temperature preferred.

Storage
Use only with adequate ventilation.

8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls
Investigate engineering techniques to reduce exposures below airborne exposure limits. Provide ventilation if necessary to control exposure levels below airborne exposure limits (see below). If practical, use local mechanical exhaust ventilation at sources of air contamination such as open process equipment.

Eye / Face Protection
Use good industrial practice to avoid eye contact.
8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Skin Protection
Minimize skin contamination by following good industrial hygiene practice. Wearing protective gloves is recommended. Wash hands and contaminated skin thoroughly after handling.

Respiratory Protection
Avoid breathing dust. When airborne exposure limits are exceeded (see below), use NIOSH approved respiratory protection equipment appropriate to the material and/or its components. Consult respirator manufacturer to determine appropriate type equipment for given application. Observe respirator use limitations specified by NIOSH or the manufacturer. For emergency and other conditions where exposure limit may be significantly exceeded, use an approved full face positive-pressure, self-contained breathing apparatus or positive-pressure airline with auxiliary self-contained air supply. Respiratory protection programs must comply with 29 CFR § 1910.134.

- Only those components with exposure limits are printed in this section.
- Skin contact limits designated with a "Y" above have skin contact effect. Air sampling alone is insufficient to accurately quantitate exposure. Measures to prevent significant cutaneous absorption may be required.
- ACGIH Sensitizer designator with a value of "Y" above means that exposure to this material may cause allergic reactions.
- WEEL-AIHA Sensitizer designator with a value of "Y" above means that exposure to this material may cause allergic skin reactions.

10 STABILITY AND REACTIVITY

Stability
This material is chemically stable under normal and anticipated storage and handling conditions.

Hazardous Polymerization
Does not occur.

Incompatibility
Prolonged contact with acids, alkalies and strong oxidizing agents may attack or dissolve the polymer.

Hazardous Decomposition Products
Thermal decomposition may yield acrylic monomers.

11 TOXICOLOGICAL INFORMATION

Toxicological Information
No data are available.

12 ECOLOGICAL INFORMATION

Ecotoxicological Information
No data are available.

Chemical Fate Information
No data are available.

13 DISPOSAL CONSIDERATIONS

Waste Disposal
Incineration is the recommended method for disposal observing all local, state and federal regulations.

SERIOUS QUIETROCK SOUNDPROOF DRYWALL

[RELATED SECTION 09 29 00]

Model Number: 510
Location: Bedroom Module
Dimensions:
  - Length: 9’
  - Width: 4’
  - Depth: 1/2”
Weight: 2.25 lbs/ft²
Color: White
Features:
  - Paper faced gypsum
  - Sound-absorbing viscoelastic polymer core
Approval Certificates:
  - UL Listed
Availability: Serious Materials
Lowest-Cost Solution for Remodels and Commercial Applications

QuietRock 510 sound damping drywall is the lowest cost, noise reduction wall panel on the market. With a simple score, snap and hang, QuietRock 510 installs and finishes like standard drywall, requiring no special tools.

QuietRock 510 Benefits

- Great value, offering solid performance at the lowest cost on the market
- Delivers STC ratings of 47-69
- UL fire-rated (For use in fire rated assemblies)
- Ideal for remodels and upgrades – installs over existing drywall, with no demolition\(^1\)
- Continues to reduce noise even when fixtures are installed, such as shelves or lamps
- Only 1/2" thick
- Outperforms other sound damping methods, including soundboard and resilient channel
- Environmentally friendly, lab tested
- Worldwide patents pending

Retrofit and Remodeling

- **Single Stud Wall**
  - QuietRock on one side of existing drywall
  - UL Design #: U309
  - STC: 47 - Fire: 1 Hour

- **Single Stud Wall**
  - QuietRock on both sides of existing drywall
  - UL Design #: U309
  - STC: 53* - Fire: 1 Hour

High Performance

- **Single Stud Wall**
  - QuietRock on both sides
  - STC: 52

- **Double Stud Wall**
  - Double layer of QuietRock on both sides
  - STC: 71*

Steel - Single layer assemblies with fire ratings and noise reduction

- **Single Stud Wall**
  - QuietRock under one side of Type X drywall
  - UL Design #: U465, U473
  - STC: 54 - Fire: 1 Hour

- **Single Stud Wall**
  - QuietRock under Type X one side 2xType X other side
  - UL Design #: U465, U473
  - STC: 56 - Fire: 1 Hour

*Estimated

See Acoustic and Fire Assemblies document for more information.

The information contained in this document is for general information purposes only. Features and specifications are subject to change. The diagrams and stated STC ratings listed are intended to serve as a guide. Construction practices have an influence on final STC ratings. Serious Energy cannot guarantee actual STC ratings. Flanking sound patterns, the integrity of the wall, and floor and ceiling construction are important factors in effective sound control.

EMERGENCY OVERVIEW

CAUTION: Dust generated from cutting, sanding, grinding, machining or sawing may cause irritation of the upper respiratory tract, eyes and skin. Use exposure controls or personal protection methods described in Section 8.
3. Hazards Identification

**Likely Routes of Exposure:** Skin contact, eye contact, and inhalation.

**EFFECTS OF OVEREXPOSURE**

**Potential Health Effects:**

- **Eye Hazards:** Exposure to airborne dust may cause immediate or delayed mechanical irritation of eyes.
- **Skin Hazards:** Dust and glass fibers may produce dryness, itching, rash and redness. Frequent exposure may have a drying effect on skin. Absorption of boric acid into blood stream through damaged skin may result in erythema or macular rash.
- **Ingestion Hazards:** Not applicable under normal conditions of use. May result in internal discomfort or ill effects if large quantities are swallowed. Large doses of boric acid absorbed into blood may result in erythema, macular rash, diarrhea, dizziness, and CNS effects after 36-72 hours. Ingestion of 5 grams or more boric acid may irritate gastrointestinal system and affect central nervous system.
- **Inhalation hazards:** Exposure to airborne dust generated during the handling or use of the product may cause irritation to nose, throat and upper respiratory system. Boric acid may be absorbed through mucous membranes. Pre-existing upper respiratory and lung diseases may be aggravated. Prolonged inhalation of dust may cause lung disease such as silicosis due to the presence of free crystalline silica. Exposures to respirable crystalline silica have not been documented during normal use of this product. However, good housekeeping practices and industrial hygiene monitoring is recommended when the potential for significant exposure exists.

**Medical Conditions Aggravated By Exposure:** Because of irritating properties, dust and glass fibers may aggravate preexisting skin, eye, and respiratory conditions.

**Target Organs:** Skin, eyes and respiratory system

4. First Aid Measures

- **Eye:** Immediately flush eye thoroughly with water for at least 15 minutes. Remove contact lenses (if applicable). Seek medical attention if irritation persists.
- **Skin:** Wash skin with mild soap and plenty of water. Seek medical treatment if irritation develops and persists.
- **Ingestion:** Not known. May result in obstruction and irritation if ingested. Seek medical attention.
- **Inhalation:** Remove to fresh air. Seek medical attention if symptoms persist.

5. Fire Fighting Measures

- **Flammability Class:** Non-Flammable by OSHA/WHMS criteria.
- **Products of Combustion:** None if below 1450°C. Above 1450°C, gypsum will decompose to calcium oxide with releases of sulfur dioxide and various oxides of carbon.
- **Fire And Explosion Hazards:** None. Not combustible. Above 1450°C, may release product of combustion.
- **Extinguishing Media:** Use the appropriate extinguishing media for the surrounding fire. Dry chemical, foam, water, fog or spray.
- **Fire Fighting Instructions:** None. Although, gypsum panels pose no fire related hazards, firefighters should wear full protective clothing including self contained breathing apparatus. Water can be used to cool and protect exposed material.

6. Accidental Release Measures

- Not applicable, as product is an article composite.
- Collect panels from spillage and if not damaged or contaminated by foreign material, panels may be reclaimed.

**General recommendations:**
- Use exposure control and appropriate personal protect equipment (See Section 8).
- Pick-up larger pieces to avoid a tripping hazard. Sweep or vacuum remaining material into a waste container for disposal. Use a light water spray to minimize dust generation.
- Dispose of in accordance with applicable federal, state and local regulations.
7. Handling And Storage

Handling And Storage Precautions
- Store material in a cool, dry, ventilated area. Do not use when temperatures exceed 125°F.
- Stack or store all panels flat to minimize damage and warping.
- Do not stack panels too high when storing to minimize the risk of falling.
- Panels are heavy and can fall over, causing serious injury or death. Do not stack panels too high.
- Utilize proper lifting techniques when moving product and employ mechanical/ergonomic assistance when possible (i.e. move with forklifts, hold in place with lifts) to minimize the risk of back injury.
- Scoring and snapping is the method to be used when cutting the panels in order to reduce dust generation.
- Use exposure control and appropriate personal protective equipment (See Section 8).

8. Exposure Control/Personal Protection

Engineering Controls: The score and snap method of cutting is recommended. Sawing, drilling or machining will produce dust. Use with adequate general and local exhaust ventilation to maintain a dust level below the PEL/TLV.
Eye/ Face Protection: Safety glasses with side shields or goggles.
Skin Protection: Wear protective gloves. Protective clothing to prevent skin contact is recommended.
Respiratory Protection: General room ventilation is normally adequate. In case of inadequate ventilation, use a NIOSH-approved respirator for particulates (e.g. N95). OSHA’s 29 CFR 1910.134 (Respiratory Protection Standard) must be followed whenever work conditions require respirator use.

† - Respirable Dust

9. Physical And Chemical Properties

Appearance: Paper covered panel with off white core
Odor: Low odor
Physical State: Solid
Specific Gravity: 50-55 lbs/ft³
Evaporation: Not applicable
Flash Point: None
Auto Ignition Temperature: Not combustible
Decomposition Temp: 1450°C
Solubility in Water (% by wt.): 0.241gs/100cc

10. Stability And Reactivity

Stability: Stable.
Conditions to Avoid: High relative humidity will cause panels to deteriorate.
Hazardous Polymerization: Will not occur.
Incompatible Materials: Reaction with strong acids will generate carbon dioxide.
Hazardous Decomposition Products: Above 1450°C, gypsum will decompose to calcium oxide with releases of sulfur dioxide and various oxides of carbon.

11. Toxicological Information

In general, no adverse health effects are expected if product is handled as recommended with suitable precautions for designated uses.

**EFFECTS OF ACUTE EXPOSURE**

**EFFECTS OF CHRONIC EXPOSURE**

Chronic Effects: Hazardous by OSHA/WHMS criteria. Prolonged exposure to respirable crystalline silica has been known to cause silicosis, a lung disease, which may be disabling.
Carcinogenicity: Hazardous by OSHA/WHMS criteria
Mutagenicity: Reproductive Effects: Teratogenicity; Embryotoxicity; Respiratory Sensitization; Skin Sensitization: Not hazardous by OSHA/WHMS Criteria
Toxicologically Synergistic Materials: Not Available.

Target Organs: Lungs

**Ingredient**

Crystalline silica (quartz)

ACGIH – A2 – Suspected human carcinogen
IARC – 1 – The agent is carcinogenic to humans
NTP – 1 – Known to be carcinogens

Toxicologically Synergistic Materials: Not Available.

12. Ecological Information

Aquatic Toxicity: Unknown. Not believed to be toxic.
Other Environmental Information: Unknown.

13. Disposal Considerations

Dispose of according to federal, state and local government regulations. Recycle if possible.
RCRA Information - Product is not a RCRA Hazardous Waste.

14. Transport Information

**Proper Shipping Name** - Not regulated.

15. Regulatory Information

SARA Title III: Not listed under Sections 302, 304 and 313. This product contains substances classified as a delayed (chronic) health hazard under Sections 311 – 312.

OSHA: Dust and potential respirable crystalline silica generated during product use may be hazardous.

**Ingredient(s) – Canadian Regulatory Information:** Crystalline silica & Boric Acid: WHMIS Classification D2A.
Sodium Carbonate.

All components of this product are included in the Canadian Domestic Substances List (DSL).

European Union (EU) Regulatory Information: All components in this product are in compliance with European Inventory of Existing Commercial Chemical Substances (EINECS).

Serious Energy, Inc.
SERIOUS QUIETSEAL

[RELATED SECTION 09 29 00]

Location: Bedroom Module
Weight: 14.1 lbs/gallon
Color: yellow
Features:
  - Layer thickness: 1/16"
  - Drying time: remains soft
  - Engageability: -10°F
  - Storage temperature: 40-100°F, do not freeze
Availability: Serious Materials
Highly resilient sound damping sealant

QuietSeal is ideal for use with QuietRock®, QuietWood®, QuietPutty® and QuietGlue® in construction projects, as it is specifically designed for sound isolation and for interior use between joints. QuietSeal is highly resilient, withstanding any amount of movement normally encountered in partitions. It can be applied as a sealant to all clean concrete, gypsum, plaster, steel, wood and aluminum surfaces without priming.

QuietSeal Benefits

- Excellent for use with QuietRock, QuietWood, QuietPutty and QuietGlue in construction projects
- High quality sound isolating sealant/caulk
- Maintains high STC ratings
- Remains permanently soft and tacky
- Environmentally friendly, lab tested
- Tested in accordance with ASTM C639, Type IId; ASTM D2202; sag testing
- Tested in accordance with ASTM D925; will not deteriorate painted surface
- Tested in accordance with ASTM D750; weatherability

Product Application

QuietSeal should be applied between track or runner, walls, floors and ceilings, as well as between panel edges and contact surfaces. The number of beads required will vary from one to two in most applications depending on the size of the potential airgap. Special problem areas may require a premolded, loose-cell filler or additional sealant between track and drywall at top and bottom edges, according to design specifications.

QuietSeal is designed strictly for interior use between joints. It should not be applied at the sight-line, where dirt pick-up is likely, except where molding or joint taping will conceal it. A non-skinning sealant such as QuietSeal cannot be painted over. QuietSeal is easily removed from unwanted surfaces with any paint thinner.

Applications

- Multi-family
- Commercial
- Hotel rooms
- Conference rooms
- Home theaters

### 3. Hazards Identification

**Likely Routes of Exposure:** Skin contact, eye contact, ingestion and inhalation.

**Potential Health Effects:**

- **Eye Hazards:** Contact may cause discomfort to the eyes leading to irritation or burning sensation, redness and swelling of the conjunctiva.

- **Skin Hazards:** Prolonged or repeated exposure may cause dermatitis, folliculitis or oil acne.

- **Ingestion Hazards:** Not applicable under normal conditions of use. May cause nausea, vomiting or irritation to intestinal tract.

- **Inhalation hazards:** May cause headache, dizziness, or irritation to respiratory system.

### 4. First Aid Measures

**Eye:** Immediately flush eye thoroughly with water for at least 15 minutes. Remove contact lenses (if applicable).

**Skin:** Wash affected area with hand cleaner followed by soap and water. Contact physician if irritation, rash or other disorders develop.

**Ingestion:** Not known. Do not induce vomiting. Never give anything by mouth to an unconscious victim. Consult a physician or poison control center immediately.

**Inhalation (of dust):** Leave area immediately. Avoid further exposure.

### 5. Fire Fighting Measures

**Flash Point:** Non-flammable by WHIMS criteria in consumer commodity packaging of 1 liter or less.

**Fire And Explosion Hazards:** No fire or explosion hazard. May evolve irritating and toxic decomposition under fire conditions.

**Extinguishing Media:** Use the appropriate extinguishing media for the surrounding fire, such as water, carbon dioxide, and dry chemical foam. If water fog is ineffective, use CO2 or dry chemical or foam. Water may be sprayed on closed containers to minimize pressure buildup conditions of flammability, high heat and or ignition sources eg. Sparks, flame, etc., may ignite vapor in confined spaces.

**Fire Fighting Instructions:** Firefighters should wear full protective clothing including self contained breathing apparatus.
6. Accidental Release Measures
   - Use exposure control and appropriate personal protect equipment (See Section 8).
   - Maintain proper ventilation.
   - Avoid spark or open flame.
   - Scoop up and transfer to suitable container for disposal, absorb with clay.
   - Dispose of in accordance with applicable federal, state and local regulations.

7. Handling And Storage
   Handling And Storage Precautions
   - Use exposure control and appropriate personal protect equipment (See Section 8).
   - Store in sealed containers under normal warehouse conditions below 30°C.
   - Keep away from oxidizing agents or reactive substances.
   - For industrial use only, keep out of reach of children.
   - Handle in compliance with normal hygienic practices.

8. Exposure Control/Personal Protection
   **Skin Protection:** Avoid repeated skin contact. Wear suitable gloves. Impervious gloves (eg. Vinyl) should be used to avoid skin contact. Launder clothing and gloves as needed.
   **Respiratory Protection:** General room ventilation is normally adequate and preferred. No respirator required under normal conditions of use. If suspecting overexposure, use an approved organic vapor respirator.
   **Eye Protection:** Not necessary under normal conditions of use. If eye contact is likely, wear safety glasses with side shields.

9. Physical And Chemical Properties
   Appearance: Light yellow paste.
   Odor: Naphtha odor.
   Specific Gravity: 1.4.
   Solubility in Water: Insoluble.
   Boiling Point: > 400°C.
   Melting Point: None.
   Vapor Pressure (mmHg): 5.
   Percent Volatile By Volume: 10
   Volatile Organic Compounds (VOCs): 170.6 g/l

10. Stability And Reactivity
    Stability: Stable under normal conditions of use.
    Hazardous Polymerization: Will not occur.
    Incompatible Materials: oxidizing agents.
    Hazardous Decomposition Products: unknown.

11. Toxicological Information
    No toxicological data available for this product.

12. Ecological Information
    Other Environmental Information: Not Available.

13. Disposal Considerations
    Dispose of product in accordance with federal, state and local environmental control regulations.

14. Transport Information
    Proper Shipping Name: Not regulated.

15. Regulatory Information
**SARA Title III:**

**OSHA:**

**Ingredient(s) – Canadian Regulatory Information:**

**European Union (EU) Regulatory Information:** All components in this product are in compliance with European Inventory of Existing Commercial Chemical Substances (EINECS).

**Toxic Substances Control ACT (TSCA):** All components of this product are on the TSCA Inventory or are exempt from TSCA inventory requirements under 40 CFR 720.30.

**California Safe Drinking Water and Toxic Enforcement Act (Prop. 65):**

### 16. Other Information

**NFPA Rating**
- Health: 1
- Fire: 0
- Reactivity: 1

**HMIS Rating**
- Health: 1
- Fire: 0
- Reactivity: 1

Serious Materials, Inc.
SERIOUS QUIETPUTTY

[RELATED SECTION 09 29 00]

Model Number: 380
Location: Bedroom Module
Dimensions:
   - Length: 7"
   - Width: 7"
   - Depth: 1/8"
Weight: 6 oz/pad
Color: blue/green
Features:
   - Unit Size: 10 pads/box
Availability: Serious Materials
QuietPutty® 380

HIGHER PERFORMANCE, HIGHER RELIABILITY, LOWER COST SOUNDPROOFING SOLUTIONS.

Easy to use acoustical putty - Fire-rated to UL 1479

QuietPutty is a fire-rated, moldable putty, designed to maintain the performance of acoustically rated walls with penetrations such as electrical outlets, HVAC ducts, water hookups and cables. QuietPutty is clean, easy to use and requires no tools.

QuietPutty Benefits

- One hour fire-rated to UL 1479
- Adheres to most construction materials for a high quality seal
- Asbestos free and odorless
- Provides a draft and cold smoke seal
- Minimal shrinkage and will not dry out
- Noncorrosive to metal and plastics
- Environmentally friendly, lab tested
- Patents pending

Using QuietPutty to Prevent Leaks Maximizes Acoustic Performance

Maximum Achievable STC Rating with an Acoustical Leak in a 100 Square Foot Wall

Application of the Product

No tools required. Simply adhere putty using your hands to the back of outlet box or target area.

Applications

- Electrical outlet boxes
- Telecomm outlet boxes
- Electrical switches
- Plumbing hookups

### 3. Hazards Identification

**Potential Health Effects:** Not considered hazardous under normal conditions of use.

- **Eye Hazards:** None under normal conditions of use.
- **Skin Hazards:** Non-irritating to skin.
- **Ingestion Hazards:** None under normal conditions of use.
- **Inhalation hazards:** None under normal conditions of use.

### 4. First Aid Measures

- **Eye:** Not applicable due to physical form.
- **Skin:** Wash with mild soap and plenty of water. Seek medical treatment if irritation (redness, rash, swelling) develops due to personal allergies.
- **Ingestion:** In the event of ingestion, seek medical attention. Do not induce vomiting. No serious acute effects anticipated.
- **Inhalation:** Not applicable under normal conditions of use.

### 5. Fire Fighting Measures

- **Flash Point:** 227°C.
- **Fire And Explosion Hazards:** Normal combustion forms carbon dioxide and water vapor. Incomplete combustion may produce carbon monoxide.
- **Extinguishing Media:** Use the appropriate extinguishing media for the surrounding fire, such as water spray, carbon dioxide, and dry chemical foam.
- **Fire Fighting Instructions:** No unusual fire or explosion hazards. Water can be used to cool and protect exposed material. Firefighters should wear full protective clothing including self contained breathing apparatus.
### 6. Accidental Release Measures
- Use exposure control and appropriate personal protect equipment (See Section 8).
- Maintain proper ventilation.
- Pick up released product with appropriate implements and place in container for disposal.
- Dispose of in accordance with applicable federal, state and local regulations.

### 7. Handling And Storage
**Handling And Storage Precautions**
- Use exposure control and appropriate personal protect equipment (See Section 8).
- Keep away from flames.
- For industrial use only, keep out of reach of children.
- Handle in compliance with normal hygienic practices.

### 8. Exposure Control/Personal Protection
- **Engineering Controls:** Not applicable under normal conditions of use.
- **Eye/Face Protection:** None required.
- **Skin Protection:** Cotton or leather protective gloves should be used if excessive skin contact is likely.
- **Respiratory Protection:** General room ventilation is normally adequate. No respirator required.

### 9. Physical And Chemical Properties
- **Appearance:** Blue-green semi-solid (putty).
- **Odor:** Slight odor.
- **Specific Gravity:** 1.73.
- **Solubility in Water:** Negligible.
- **Boiling Point:** None.
- **Melting Point:** None.
- **Evaporating Rate:** None.

### 10. Stability And Reactivity
- **Stability:** Stable.
- **Conditions to Avoid:** Fire and temperatures over 625°F (329°C).
- **Incompatible Materials:** May react with strong oxidizing materials.
- **Hazardous Decomposition Products:** Normal combustion forms carbon dioxide and water vapor. Incomplete combustion may produce carbon monoxide.

### 11. Toxicological Information
- **Routes of Entry:** Skin contact, ingestion
- **Effects of Acute Exposure to Product:** This material is not expected to be toxic by ingestion or skin contact
- **Effects of Chronic Exposure to Product:** Not established
- **Exposure Limits:** Not Applicable
- **Sensitization to Product:** Not Applicable
- **Teratogenicity:** Not Applicable
- **Mutagenicity:** Not Applicable
- **Irritancy of Product:** Not Applicable
- **Carcinogenicity:** Not Applicable
- **Reproductive Toxicity:** Not Applicable
- **Synergistic Products:** Not Applicable
- **LD50 of Ingredients:** Not Available
- **LC50 of Ingredients:** Not Available
12. Ecological Information

Other Environmental Information: Because of its low water solubility and degree of toxicity, this material is believed to not present any environmental problems.

13. Disposal Considerations

- Regular garbage disposal in approved dumping area.
- RCRA Information - Product is not a RCRA Hazardous Waste.

14. Transport Information

Proper Shipping Name - Not regulated.

15. Regulatory Information

CEPA – Domestic Substances List (DSL):
All substances contained in this product are listed on the Canadian Domestic Substances List (DSL) or are not required to be listed.

Canadian Regulatory Information: This product is not classified as hazardous under WHMIS.

Ingredient(s) – Canadian Regulatory Information:
WHMIS –Ingredient Disclosure List.

European Inventory of Existing Commercial Chemical Substances (EINECS):
All components in this product are in compliance with EINECS.

Toxic Substances Control ACT (TSCA): All components of this product are on the TSCA Inventory or are exempt from TSCA Inventory requirements under 40 CFR 720.30.

16. Other Information

**NFPA Rating**
- Health: 0
- Fire: 0
- Reactivity: 0

**HMIS Rating**
- Health: 0
- Fire: 0
- Reactivity: 0

Description

This gorgeous 5" Wide Plank Character Grade White Oak flooring comes in extra long planks that range from 2 Feet up to 10 Feet long with an average length of 4 1/2 Feet. This factory finished flooring displays beautiful character marks including sound knots, mineral marks, and other natural characters that guarantee a wood floor that looks natural and real.

The longer lengths that we offer add value to your purchase, setting your floor apart from most other products out there that come in standard lengths from 1 to 7 feet, or even shorter.
ICI PREP AND PRIME SEALER

[RELATED SECTION 09 93 23]

Model Number: 1060-1200
Location: Main House and Flex Space interior walls
Color: white
Solids:
  Volume: 34%
  Weight: 48%
Features:
  Dry Time: 30-60 mins.
  Coverage per Gallon: 400²ft.
Availability: Boone Paint & Interiors
PREP & PRIME™ VAPOR BARRIER
Interior Water-Based Primer Sealer
1060-1200

**SPECIFICATION DATA**

A premium quality latex primer sealer and vapor barrier for interior walls and ceilings. It reduces loss of interior moisture through the walls to help maintain insulation efficiency and guard against exterior paint adhesion failures caused by condensation. Moisture and Heat Loss - Every home contains moist air (water vapor) that, in the proper proportion, provides a healthy atmosphere. But under winter conditions, when the inside/outside temperatures differ drastically, the moisture indoors passes through interior walls and condenses within the stud space as it seeks the colder exterior side. The moisture may fill the pockets or voids in insulation, increasing the flow of heat, reducing its insulation value. Insulation must be dry to function efficiently.

Keeping water vapor inside the home will help reduce heat loss and guard against moisture damage. Vapor barrier systems can help to provide this protection. Therefore, to help keep moisture inside apply PREP & PRIME Vapor Barrier Primer Sealer to interior walls and ceilings that contact the outside of any unheated areas. To be effective, a product must have a perm rating of less than 1.0, as set forth by the Federal Housing Administration Minimum Property Standards.

PREP & PRIME Vapor Barrier is specifically formulated to provide a perm rating of 0.6 when applied at a coverage rate of 400 sq ft/gal (10 m²/L) to smooth surfaces. The perm rating for PREP & PRIME Vapor Barrier Primer Sealer compares favorably with a typical 2 mil sheet of medium density polyethylene. PREP & PRIME Vapor Barrier Primer Sealer applies and cleans up with the ease of latex wall paint. It may be topcoated with latex or alkyd paints in any desired finish.

**COMPOSITION**

- Styrene-Butadiene Resin
- Titanium Dioxide and Extender Pigments
- Not manufactured with lead or mercury containing materials.

**DESCRIPTION**

- **Color:** White (tintable, limit 4 oz/gal)
- **Finish:** Flat
- **Clean-up Solvent:** Soap and water
- **Density:** 10.5 lbs/gal (1.26 kg/L)
- **VOC:** 0.71 lbs/gal (85 g/L)
- **Solids:**
  - Volume - 34% ± 1%
  - Weight - 48% ± 1%
- **Practical Coverage:**
  Apply at 400 sq ft/gal (10 m²/L). Actual coverage may vary depending on substrate and application method.
- **Flame Spread Rating:**
  Class A (0-25) over non-combustible surfaces
- **Flash Point:** None
- **Dry Time 77°F (25°C) & 50% RH:**
  - To touch - 30-60 minutes
  - To recoat - 2 hours
- **Shelf Life:** 1 year minimum - unopened

**FEATURES**

- Vapor barrier
- Easy application
- Excellent enamel hold-out
- Fast drying
- High Hiding
- Easy soap and water clean-up
- Low odor
- Low VOC
- Performance alternate for Federal Paint Specification TT-P-650D
### MATERIAL SAFETY DATA SHEET

**Prepared 08/02/07**

#### HAZARDS IDENTIFICATION

**Primary routes of exposure:** Inhalation, skin contact, eye contact, ingestion

**Effects of overexposure:**
- **Inhalation:** Irritation of respiratory tract, lungs. Prolonged inhalation may lead to mucous membrane irritation, dizziness and/or lightheadedness, headache, nausea, coughing, central nervous system depression
- **Skin contact:** Irritation of skin
- **Eye contact:** Irritation of eyes. Prolonged or repeated contact can cause conjunctivitis, tearing of eyes, redness of eyes
- **Ingestion:** Ingestion may cause dizziness and/or lightheadedness, headache, nausea, gastrointestinal disturbances, intoxication

**Medical conditions aggravated by exposure:** Eye, skin, respiratory disorders.

#### FIRST-AID MEASURES

**Inhalation:**
- Remove to fresh air. Restore and support continued breathing. Get emergency medical attention. Have trained person give oxygen if necessary. Get medical help for any breathing difficulty. Remove to fresh air if inhalation causes eye watering, headache, dizziness, or other discomfort

**Skin contact:**
- Wash thoroughly with soap and water. If any product remains, gently rub petroleum jelly, vegetable or mineral-based oil onto skin. Repeated applications may be needed. Remove contaminated clothing. Wash contaminated clothing before re-use.

**Eye contact:**
- Flush immediately with large amounts of water, especially under lids for at least 15 minutes. If irritation or other effects persist, obtain medical treatment.

**Ingestion:**
- If swallowed, obtain medical treatment immediately.

#### FIRE-FIGHTING MEASURES

**Fire extinguishing media:**
- Dry chemical or foam water fog. Carbon dioxide. Closed containers may burst if exposed to extreme heat or fire. May decompose under fire conditions emitting irritant and/or toxic gases. In closed tanks, water or foam may cause freezing or steam

**Fire fighting procedures:**
- Water may be used to cool and protect exposed containers. Firefighters should use full protective clothing, eye protection, and self-contained breathing apparatus.

**Hazardous decomposition or combustion products:** Carbon monoxide, carbon dioxide

#### ACCIDENTAL RELEASE MEASURES

**Steps to be taken in case material is released or spilled:**
- Comply with all applicable health and environmental regulations. Eliminate all sources of ignition. Ventilate area. Spills may be collected with absorbent materials. Evacuate all unnecessary personnel. Place collected material in proper container. Spilled material is extremely slippery. Complete personal protective equipment must be used during cleanup. Large spills - shut off leak if safe to do so. Dike and contain spill. Pump to storage or salvage vessel. Use absorbent to pick up excess residue. Keep salvageable material and rinse water out of sewers and water courses. Small spills - use absorbent to pick up residue and dispose of properly.

#### HANDLING AND STORAGE

**Handling and storage:**
- Store below 100F (38C). Keep from freezing. Keep container tightly closed in a well-ventilated area.

Other precautions:
- Use only with adequate ventilation. Do not take internally. Keep out of reach of children. Avoid contact with skin and eyes, and breathing of vapors. Wash hands thoroughly after handling, especially before eating or smoking. Keep containers tightly closed and upright when not in use. Empty containers may contain hazardous residues.

#### EXPOSURE CONTROLS/PERSONAL PROTECTION

**Respiratory protection:**
- Control environmental concentrations below applicable exposure standards when using this material. When respiratory protection is determined by necessity, use a NIOSH/MSHA (Canadian 294.4) approved elastomeric sealant and face-piece respirator fitted with organic vapor cartridges and paint spray (dust/mist) prefilters. Determine the proper level of protection by conducting appropriate air monitoring. Consult 29CFR1910.134 For selection of respirators (Canadian 294.4).

**Ventilation:**
- Provide dilution ventilation or local exhaust to prevent build-up of vapors.

**Personal protective equipment:**
- Eye wash, safety shower, safety glasses or goggles, impervious gloves, impervious clothing.

#### STABILITY AND REACTIVITY

**Under normal conditions:** Stable. See section 5 fire fighting measures

**Materials to avoid:** Oxidizers, acids, hydrogen fluoride

**Conditions to avoid:** Elevated temperatures, contact with oxidizing agents, freezing, sparks, open flame

**Hazardous polymerization:** Will not occur

#### TOXICOLOGICAL INFORMATION

**Supplemental health information:**
- Contains a chemical that may be absorbed through skin. Notice reports have associated repeated and prolonged occupational exposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. This product will generate formaldehyde under acidic conditions. Workplace exposure to formaldehyde should be evaluated when this product is used in acidic conditions to assess whether the actual airborne concentrations exceed any of the action levels defined in OSHA standard. Prolonged inhalation of mists may cause pneumonitis. Symptoms may include a progressive dry cough, shortness of breath on exertion, decreased chest expansion, weakness and weight loss. Other effects of overexposure may include toxicity to liver, kidney, blood.

**Carcinogenicity:**
- In a lifetime inhalation study, exposure to 250 mg/m3 titanium dioxide resulted in the development of lung tumors in rats. These tumors occurred only at dust levels that overwhelmed the animals' lung clearance mechanisms and were different from common human lung tumors in both type and location. The relevance of these findings to humans is unknown but questionable. The international agency for research on cancer (IARC) has classified titanium dioxide as possibly carcinogenic to humans (group 2b) based on inadequate evidence of carcinogenicity in humans and sufficient evidence of carcinogenicity in experimental animals.

**Reproductive effects:**
- No reproductive effects are anticipated

**Mutagenicity:**
- No mutagenic effects are anticipated

**Teratogenicity:**
- No teratogenic effects are anticipated

#### ECOLOGICAL INFORMATION

**No ecological testing has been done by ICI Paints on this product as a whole.**

---

The information contained herein is based on data available at the time of preparation of this data sheet which ICI Paints believes to be reliable. However, no warranty is expressed or implied regarding the accuracy of this data. ICI Paints shall not be responsible for the use of this information, or any product, method or apparatus mentioned and you must make your own determination of its suitability and completeness for your own use, for the protection of the environment, and the health and safety of your employees and the users of this material.

## DISPOSAL CONSIDERATIONS
(Waste disposal: Dispose in accordance with all applicable regulations. Avoid discharge to natural waters.)

## REGULATORY INFORMATION
(As of the date of this MSDS, all of the components in this product are listed (or are otherwise exempt from listing) on the TSCA inventory. This product has been classified in accordance with the hazard criteria of the CFR (controlled products regulations) and the MSDS contains all of the information required by the CFR.)

BENJAMIN MOORE INTERIOR LATEX PAINT

[RELATED SECTION 09 93 23]

Model Number: W626 4X
Location: Core Module Walls and Bedroom Closet Doors
Finish: Eggshell
Color: Gray
Solids:
  Volume: 35%
  Weight: 45%
Features:
  Dry time: 2 hrs.
  Coverage per gallon: 400-450²ft.
Availability: Boone Paint & Interiors
# Benjamin Moore

**Ben® PREMIUM INTERIOR LATEX**

**EGGSHELL FINISH W626**

## Features
- Attractive eggshell finish
- Painted surfaces can be washed after two weeks
- Easy application
- Self-priming on most surfaces
- Soap and water clean-up
- Premium hide and leveling
- Low odor
- Low VOC's

## General Description
An acrylic blended latex eggshell coating designed for application to a wide variety of interior surfaces. Produces a highly durable, washable finish with excellent hiding.

## Recommended For
Ideal for applications where a fast drying, high hiding, durable coating is required. Recommended for new or previously painted wallboard, masonry, and primed or previously painted plaster, wood or metal. For use on interior walls and ceilings.

## Limitations
- Do not paint when temperature of air and surface is below 50° F (10° C).

3. HAZARDS IDENTIFICATION

Emergency Overview:
Vapors may be irritating to eyes, nose, throat, and lungs. May cause skin irritation and/or dermatitis.

Appearance: liquid
Odor: little or no odor

Potential Health Effects:
Principal Routes of Exposure: Eye contact, skin contact and inhalation.

Acute Effects:
- Eyes: May cause slight irritation.
- Skin: Substance may cause slight skin irritation.
- Inhalation: May cause irritation of respiratory tract.
- Ingestion: Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.
Chronic Effects
Repeated contact may cause allergic reactions in very susceptible persons.

See Section 11 for additional Toxicological information.

Aggravated Medical Conditions None known

HMIS
Health: 1* Flammability: 0 Reactivity: 0 PPE: -

HMIS Legend
0 - Minimal Hazard
1 - Slight Hazard
2 - Moderate Hazard
3 - Serious Hazard
4 - Severe Hazard
* - Chronic Hazard
X - Consult your supervisor or S.O.P. for "Special" handling instructions.

Note: The PPE rating has intentionally been left blank. Choose appropriate PPE that will protect employees from the hazards the material will present under the actual normal conditions of use.

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings are not required on MSDSs under 29 CFR 1910.1200, Benjamin Moore & Co., has chosen to provide them. HMIS® ratings are to be used only in conjunction with a fully implemented HMIS® program by workers who have received appropriate HMIS® training. HMIS® is a registered trade and service mark of the NPCA. HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

4. FIRST AID MEASURES

General Advice No hazards which require special first aid measures.

Eye Contact Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

Skin Contact Wash off immediately with soap and plenty of water removing all contaminated clothes and shoes.

Inhalation Move to fresh air. If symptoms persist, call a physician.

Ingestion Clean mouth with water and afterwards drink plenty of water. Consult a physician if necessary.

Notes To Physician Treat symptomatically

5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Protective Equipment And Precautions For Firefighters As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

Specific Hazards Arising From The Chemical Closed containers may rupture if exposed to fire or extreme heat.
Sensitivity To Mechanical Impact  No
Sensitivity To Static Discharge  No

Flash Point Data
  Flash Point (°F)  Not applicable
  Flash Point (°C)  Not applicable
  Flash Point Method  Not applicable

Flammability Limits In Air
  Lower Explosion Limit  Not applicable
  Upper Explosion Limit  Not applicable

NFPA  Health: 1  Flammability: 0  Instability: 0  Special: Not Applicable

NFPA Legend
0 - Not Hazardous
1 - Slightly
2 - Moderate
3 - High
4 - Severe

The ratings assigned by Benjamin Moore & Co. are only suggested ratings, the contractor/employer has ultimate responsibilities for NFPA ratings where this system is used.

Additional information regarding the NFPA rating system is available from the National Fire Protection Agency (NFPA) at www.nfpa.org.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions  Avoid contact with skin, eyes and clothing. Ensure adequate ventilation.
Environmental Precautions  Prevent further leakage or spillage if safe to do so.
Methods For Clean-Up  Soak up with inert absorbent material. Sweep up and shovel into suitable containers for disposal.
Other Information  None known

7. HANDLING AND STORAGE

Handling  Avoid contact with skin, eyes and clothing. Avoid breathing vapors, spray mists or sanding dust. In case of insufficient ventilation, wear suitable respiratory equipment.
Storage  Keep container tightly closed. Keep out of the reach of children.

16. OTHER INFORMATION

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

GLIDDEN ULTRA-HIDE 150 INTERIOR EGGSHELL PAINT
[RELATED SECTION 09 91 23]

Model Number: 1412-0110V
Location: Main House ceiling and walls
Finish: eggshell
Color: ruffled feathers
Solids:
  Volume: 32%
  Weight: 45%
Features:
  Dry time: 30-60 min.
  Flame spreading rating: class A
  Shelf Life: 1 year unopened
Availability: Boone Paint & Interiors
ULTRA-HIDE® 150
Interior Eggshell Paint
1412-XXXV
Previously GLIDDEN™ ULTRA-HIDE®
Interior Eggshell Wall & Trim Enamel

DESCRIPTION

GLIDDEN PROFESSIONAL™ ULTRA-HIDE® 150 paint is a high-hiding, easy-to-apply interior wall and trim paint that delivers excellent burnish resistance and durability. Recommended for all commercial and property maintenance applications where a uniform, durable interior finish is required.

*Performance ratings are based on product comparisons to other products in that sheen range, performed at 77°F (25°C) 50% RH. Rating scale is from 1-10, 10 being the highest rating.

COMPOSITION

- Vinyl-Acrylic Resin
- Titanium Dioxide and Extender Pigments
- Not manufactured with lead or mercury containing materials.

SPECIFICATION

Color:
White, ready mix & custom colors

Clean-up Solvent:
Soap and water

Finish: Eggshell
Sheen: 10 - 35 units @ 85°
Gloss: 5 - 12 units @ 60°

Density:
10.38 lbs/gal (1.25 kg/L)

Solids:
Volume - 32% +/- 1%
Weight - 45% +/- 1%

VOC:
50 g/L (0.42 lbs/gal) maximum
Refer to MSDS for regulatory VOC content of complete product line

Theoretical Coverage @ 1 mil dry:
508 sq ft/gal (12 m²/L)

Practical Coverage:
Apply at 350-400 sq ft/gal (9-10 m²/L). Actual coverage may vary depending on substrate and application method.

Recommended Film Thickness:
4.0 - 4.6 mils wet
1.3 - 1.5 mils dry

Airless Spray Application:
Pressure - 2000 psi
Tip - .015” - .019”

Dry Time 77°F (25°C) & 50% RH:
To touch - 30-60 minutes
To recoat - 2-4 hours

Flame Spread Rating:
Class A (0-25) on non-combustible surfaces

Flash Point:
None

Shelf Life:
1 year minimum - unopened

Read Label and Material Safety Data Sheet Prior to Use. See other cautions on last page. DSF1-0690
MATERIAL SAFETY DATA SHEET

HAZARDS IDENTIFICATION (ANSI Section 3)

Primary route(s) of exposure: Inhalation, skin contact, eye contact, ingestion.

Effects of overexposure:
- Inhalation: Irritation of respiratory tract. Prolonged inhalation may lead to mucous membrane irritation, headache, nausea, chest pain, coughing, difficulty of breathing, severe lung irritation or damage, pneumoconiosis.
- Skin contact: Irritation of skin.
- Eye contact: Irritation of eyes.
- Ingestion: Ingestion may cause mouth and throat irritation, gastro-intestinal disturbances.

Medical conditions aggravated by exposure: Eye, skin, respiratory disorders, lung disorders, asthma-like conditions.

FIRST-AID MEASURES (ANSI Section 4)

Inhalation: Remove to fresh air. Restore and support continued breathing. Get emergency medical attention. Have trained person administer oxygen if necessary. Get medical help for any breathing difficulty. Remove to fresh air if inhalation causes eye watering, headaches, dizziness, or other discomfort.

Skin contact: Wash thoroughly with soap and water. If any product remains, gently rub petroleum jelly, vegetable oil, or mineral oil onto skin. Repeat applications may be needed. Remove contaminated clothing. Wash contaminated clothing before re-use.

Eye contact: Flush immediately with large amounts of water, especially under lids for at least 15 minutes. If irritation or other effects persist, obtain medical treatment.

Ingestion: If swallowed, obtain medical treatment immediately.

FIRE-FIGHTING MEASURES (ANSI Section 5)

Fire extinguishing media: Dry chemical or foam water fog. Carbon dioxide. Closed containers may burst if exposed to extreme heat or fire. In closed tanks, water or foam may cause frothing or erosion.

Fire fighting procedures: Water may be used to cool and protect exposed containers. Firefighters should use full protective clothing, eye protection, and self-contained breathing apparatus.

Hazardous decomposition or combustion products: Carbon monoxide, carbon dioxide, acryl

ACCIDENTAL RELEASE MEASURES (ANSI Section 6)

Steps to be taken in case material is released or spilled: Comply with all applicable health and environmental regulations. Eliminate all sources of ignition. Ventilate area. Spills may be collected with absorbent materials. Evacuate all unnecessary personnel. Place collected material in proper container. Spilled material is extremely slippery. Small spills - use absorbent to pick up residue and dispose of properly.

HANDLING AND STORAGE (ANSI Section 7)

Handling and storage: Store below 100°F (38°C). Keep from freezing.

Other precautions: Use only with adequate ventilation. Do not take internally. Keep out of reach of children. Avoid contact with skin and eyes, and breathing of vapors. Wash hands thoroughly after handling, especially before eating or smoking. Keep containers tightly closed and upright when not in use. Avoid conditions which result in formation of inhalable particles such as spraying or abrading (sandblasting) painted surfaces. If such conditions cannot be avoided, use appropriate respiratory protection as directed under exposure controls/personal protection.

EXPOSURE CONTROLS/PERSONAL PROTECTION (ANSI Section 8)

Respiratory protection: Control environmental concentrations below applicable exposure standards when using this material. When respiratory protection is determined to be necessary, use a NIOSH/MSHA (Canadian z94.4) Approved elastomeric sealant-facepiece respirator outfitted with organic vapor cartridges and paint spray (dust/mist) filters. Determine the proper level of protection by conducting appropriate air monitoring. Consult 29 CFR 1910.134 for selection of respirators (Canadian z94.4).

Ventilation: Provide dilution ventilation or local exhaust to prevent build-up of vapors.

Personal protective equipment: Eye wash, safety shower, safety glasses or goggles. Impervious gloves, impervious clothing.

STABILITY AND REACTIVITY (ANSI Section 10)

Under normal conditions: Stable see section 5 fire fighting measures.

Materials to avoid: Oxidizers, acids, bases, styrene monomer.

Conditions to avoid: Elevated temperatures, contact with oxidizing agent, freezing, sparks, open flame.

Hazardous polymerization: Will not occur.

TOXICOLOGICAL INFORMATION (ANSI Section 11)

Supplemental health information: No additional effects are anticipated.

Carcinogenicity: In a lifetime inhalation study, exposure to 250 mg/m³ titanium dioxide resulted in the development of lung tumors in rats. These tumors occurred only at dust levels that overwhelmed the animals' lung clearance mechanisms and were different from common human lung tumors in both type and location. The relevance of these findings to humans is unknown but questionable. The international agency for research on cancer (IARC) has classified titanium dioxide as possibly carcinogenic to humans (group 2B) based on inadequate evidence of carcinogenicity in humans and sufficient evidence of carcinogenicity in experimental animals.

Reproductive effects: No reproductive effects are anticipated.

Mutagenicity: No mutagenic effects are anticipated.

Teratogenicity: No teratogenic effects are anticipated.

ECOLOGICAL INFORMATION (ANSI Section 12)

No ecological testing has been done by Akzo Nobel paints llc on this product as a whole.

DISPOSAL CONSIDERATIONS (ANSI Section 13)

Waste disposal: Dispose in accordance with all applicable regulations. Avoid discharge to natural waters.

REGULATORY INFORMATION (ANSI Section 15)

As of the date of this MSDS, all of the components in this product are listed (or are otherwise exempt from listing) on the TSCA inventory. This product has been classified in accordance with the hazard criteria of the CPR (controlled products regulations) and the MSDS contains all the information required by the CPR.

The information contained herein is based on data available at the time of preparation of this data sheet which Akzo Nobel Paints believes to be reliable. However, no warranty is expressed or implied regarding the accuracy of this data. Akzo Nobel Paints shall not be responsible for the use of this information, or any product, method or apparatus mentioned and you must make your own determination of its suitability and completeness for your own use, for the protection of the environment, and the health and safety of your employees and the users of this material.

GLIDDEN ULTRA-HIDE 150 INTERIOR EGGSHELL PAINT
[RELATED SECTION 09 91 23]

Model Number: 1412-0110V
Location: Flex Space Walls and Ceiling
Finish: eggshell
Color: white tint base
Solids:
  - Volume: 32%
  - Weight: 45%
Features:
  - Dry time: 30-60 min.
  - Flame spreading rating: class A
  - Shelf life: 1 year unopened
Availability: Boone Paint & Interiors
**DESCRIPTION**

GLIDDEN PROFESSIONAL™ ULTRA-HIDE® 150 paint is a high-hiding, easy-to-apply interior wall and trim paint that delivers excellent burnish resistance and durability. Recommended for all commercial and property maintenance applications where a uniform, durable interior finish is required.

*Performance ratings are based on product comparisons to other products in that sheen range, performed at 77°F (25°C) 50% RH. Rating scale is from 1-10, 10 being the highest rating.

**COMPOSITION**

- Vinyl-Acrylic Resin
- Titanium Dioxide and Extender Pigments
- Not manufactured with lead or mercury containing materials.

**SPECIFICATION**

- **Color:** White, ready mix & custom colors
- **Clean-up Solvent:** Soap and water
- **Finish:** Eggshell
  - Sheen: 10 - 35 units @ 85°
  - Gloss: 5 - 12 units @ 60°
- **Density:** 10.38 lbs/gal (1.25 kg/L)
- **Solids:**
  - Volume - 32% +/- 1%
  - Weight - 45% +/- 1%
- **VOC:** 50 g/L (0.42 lbs/gal) maximum
- **Theoretical Coverage @ 1 mil dry:** 508 sq ft/gal (12 m²/L)
- **Practical Coverage:**
  - Apply at 350-400 sq ft/gal (9-10 m²/L).
  - Actual coverage may vary depending on substrate and application method.
- **Recommended Film Thickness:**
  - 4.0 - 4.6 mils wet
  - 1.3 - 1.5 mils dry
- **Airless Spray Application:**
  - Pressure - 2000 psi
  - Tip - .015" - .019"
- **Dry Time 77°F (25°C) & 50% RH:**
  - To touch - 30-60 minutes
  - To recoat - 2-4 hours
- **Flame Spread Rating:**
  - Class A (0-25) on non-combustible surfaces
- **Flash Point:**
  - None
- **Shelf Life:**
  - 1 year minimum - unopened
HAZARDS IDENTIFICATION (ANSI Section 3)

Primary route(s) of exposure: Inhalation, skin contact, eye contact, ingestion.

Effects of overexposure:
- Inhalation: Irritation of respiratory tract. Prolonged inhalation may lead to mucous membrane irritation, headache, nausea, chest pain, coughing, difficulty of breathing, severe lung irritation or damage, pneumoconiosis.
- Skin contact: Irritation of skin.
- Eye contact: Irritation of eyes.
- Ingestion: Ingestion may cause mouth and throat irritation, gastrointestinal disturbances.
- Medical conditions aggravated by exposure: Eye, skin, respiratory disorders, lung disorders, asthma-like conditions.

FIRST-AID MEASURES (ANSI Section 4)

Inhalation: Remove to fresh air. Restore and support continued breathing. Get emergency medical attention. Have trained person give oxygen if necessary. Get medical help for any breathing difficulty. Remove to fresh air if inhalation causes eye watering, headaches, dizziness, or other discomfort.

Skin contact: Wash thoroughly with soap and water. If any product remains, gently rub petroleum jelly, vegetable or mineral/baby oil onto skin. Repeated applications may be needed. Remove contaminated clothing. Wash contaminated clothing before re-use.

Eye contact: Flush immediately with large amounts of water, especially under lids for at least 15 minutes. If irritation or other effects persist, obtain medical treatment.

Ingestion: If swallowed, obtain medical treatment immediately.

FIRE-FIGHTING MEASURES (ANSI Section 5)

Fire extinguishing media: Dry chemical or foam water fog. Carbon dioxide. Closed containers may burst if exposed to extreme heat or fire. In closed tanks, water or foam may cause frothing or eruption.

Fire fighting procedures: Water may be used to cool and protect exposed containers. Firefighters should use full protective clothing, eye protection, and self-contained breathing apparatus.

Hazardous decomposition or combustion products: Carbon monoxide, carbon dioxide, acryic monomers. Sodium oxide.

ACCIDENTAL RELEASE MEASURES (ANSI Section 6)

Steps to be taken in case material is released or spilled: Comply with all applicable health and environmental regulations. Eliminate all sources of ignition. Ventilate area. Spills may be collected with absorbent materials. Evacuate all unnecessary personnel. Place collected material in proper container. Spilled material is extremely slippery. Small spills - use absorbent to pick up residue and dispose of properly.

HANDLING AND STORAGE (ANSI Section 7)

Handling and storage: Store below 100°F (38°C). Keep from freezing.

Other precautions: Use only with adequate ventilation. Do not take internally. Keep out of reach of children. Avoid contact with skin and eyes; and breathing of vapors. Wash hands thoroughly after handling, especially before eating or smoking. Keep containers tightly closed and upright when not in use. Avoid conditions which result in formation of inhalable particles such as spraying or abrading (sandblasting) painted surfaces. If such conditions cannot be avoided, use appropriate respiratory protection as directed under exposure controls/personal protection.

EXPOSURE CONTROLS/PERS. PROTECTION (ANSI Section 8)

Respiratory protection: Control environmental concentrations below applicable exposure standards when using this material. When respiratory protection is determined to be necessary, use a NIOSH/MSHA (Canadian z94.4) approved elastomeric sealing / surface mounted respirator, or a mask and respirator. Wear proper protective clothing. Determine the proper level of protection by conducting appropriate air monitoring. (Consult 29CFR1910.134 for selection of respirators. Canadian z94.4).

Ventilation: Provide dilution ventilation or local exhaust to prevent buildup of vapors. Personal protective equipment: Eye wash, safety shower, safety glasses or goggles. Imperious gloves, imperious clothing.

STABILITY AND REACTIVITY (ANSI Section 10)

Under normal conditions: Stable see section 5 fire fighting measures

Materials to avoid: Oxidizers, acids, bases, styrene monomers.

Conditions to avoid: Elevated temperatures, contact with oxidizing agent, freezing, sparks, open flame.

Hazardous polymerization: Will not occur.

TOXICOLOGICAL INFORMATION (ANSI Section 11)

Supplemental health information: No additional effects are anticipated.

Carcinogenicity: In a lifetime inhalation study, exposure to 250 mg/m3 titanium dioxide resulted in the development of lung tumors in rats. These tumors occurred only at dust levels that overwhelmed the animals' lung clearance mechanisms and were different from common human lung tumors in both type and location. The relevance of these findings to humans is unknown but questionable. The international agency for research on cancer (IARC) has classified titanium dioxide as possibly carcinogenic to humans (group 2b) based on adequate evidence of carcinogenicity in humans and sufficient evidence of carcinogenicity in experimental animals.

Reproductive effects: No reproductive effects are anticipated.

Mutagenicity: No mutagenic effects are anticipated.

Teratogenicity: No teratogenic effects are anticipated.

ECOLOGICAL INFORMATION (ANSI Section 12)

No ecological testing has been done by akzo nobel paints inc on this product as a whole.

DISPOSAL CONSIDERATIONS (ANSI Section 13)

Waste disposal: Dispose in accordance with all applicable regulations. Avoid discharge to natural waters.

REGULATORY INFORMATION (ANSI Section 15)

As of the date of this MSDS, all of the components in this product are listed (or are otherwise exempt from listing) on the TSCA inventory. This product has been classified in accordance with the hazard criteria of the CFR (controlled products regulations) and the MSDS contains all of the information required by the CFR.

The information contained herein is based on data available at the time of preparation of this data sheet which Akzo Nobel Paints believes to be reliable. However, no warranty is expressed or implied regarding the accuracy of this data. Akzo Nobel Paints shall not be responsible for the use of this information, or any product, method or apparatus mentioned and you must make your own determination of its suitability and completeness for your own use, for the protection of the environment, and the health and safety of your employees and the users of this material.

ZAR EXTERIOR STAIN
[RELATED SECTION 09 93 13.13]

Model Number: 812
Location: Main House exterior siding
Finish: dark tint base
Color: matched to mark twain gray brick
Solids:
  Volume: 22% to 24%
  Weight: 24% to 29%
Features:
  Dry time: 1 to 2 hrs.
  Coverage: 300 to 400 ft. per gal.
  pH: 8.0 to 9.0
Availability: Lowes
PRODUCT DATA SHEET
ZAR® DECK & SIDING SEMI-TRANSPARENT EXTERIOR STAIN

DESCRIPTION
ZAR Deck & Siding Semi-Transparent Exterior Stain is specially formulated to accent the natural grain, texture and beauty of wood. Protects and shields against the damaging effects of rain, salt air and ultraviolet rays. Recommended for use on new or previously stained (same approximate color semi-transparent deck or siding stain) decks, railings, posts, sheds and siding. ZAR Semi-Transparent Deck & Siding Exterior Stain is a waterborne oil-base formula that offers the richness and color of an oil-base stain with ease of application and clean-up of a water-based product. ZAR’s deep penetration provides maximum protection and durability.

SURFACE PREP
Decks:
Surface must be clean, dry and in good condition. Remove all mildew, dirt, dust, loose wood fibers, paint flakes, oil and grease. Repair or replace any loose, cracked or warped boards.

All mildew (dark, fuzzy or powdery deposits) must be removed with the following solution: 1/3 cup heavy-duty laundry detergent to 1 quart household bleach to 3 quarts of warm water. Or use ZAR Deck & Siding Cleaner. Apply with a scrubbing brush. Rinse thoroughly and allow to dry before staining. Wear protective eye goggles and waterproof gloves when handling cleaning solution.

For Old Grayed Wood Exposed to UV (Sunlight) for more than 3 months:
Lightly sand or power wash the surface to remove the thin layer of degraded wood before applying Deck & Siding Stain. Clean surface as above. Always allow the wood to dry thoroughly after power washing and prior to application of the stain.

NOTE: Do not apply over clear finishes. Do not pre-treat or use a water repellent preservative. Test the wood for factory treatment by sprinkling a few drops of water on the surface. If water is readily absorbed into the wood, proceed. If not, do not apply stain. Wait 2-3 months and then retest.

Siding:
Surface must be clean, dry and in good condition. Remove all mildew, dirt, dust, loose wood fibers, oil and grease. Repair or replace any loose, cracked or warped boards. In warm weather, wet the surface with water and apply stain while surface is still damp to ensure color uniformity and to minimize lap marks.

Previously Stained Wood: Clean thoroughly and remove all loose or flaking stain by scraping.

APPLICATION
Apply only when air and surface temperatures are above 50°F. DO NOT THIN. Stir thoroughly before and during application. Do not apply if rain is expected within 24 hours. When using two or more containers of the same color, mix together to ensure color uniformity. Avoid applying in direct sunlight. Test ZAR Deck & Siding on a sample piece of wood or in an inconspicuous area to determine final color. May be sprayed, but application with a synthetic brush is recommended. If sprayed, coating should be dry brushed or back rolled for color uniformity.

Apply one coat. One coat will protect and beautify the wood while allowing the natural grain to show through. An additional coat may be needed on surfaces that are aged or extremely porous. On vertical siding, start at top on several boards and apply continuously across to a break at a door, window or corner. Be sure to maintain a wet edge.

WARNING
WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

MAINTENANCE
Areas with harsh exposure to sun, weather or foot traffic will show wear more quickly than other surfaces. If this occurs, clean affected areas and recoat as necessary.

CAUTION
Keep out of reach of children. Keep from freezing. Do not take internally. Please read Material safety Data Sheet for additional information.
**ZAR® DECK AND SIDING SEMI-TRANSPARENT EXTERIOR STAIN**

**TECHNICAL DATA**

- **Viscosity**: 16 to 20 seconds
- **pH**: 8.0 to 9.0
- **% Solids by Weight**: 24 to 29
- **% Solids by Volume**: 22 to 24
- **Coverage**: 300 to 400 ft² per gal.
- **For uneven or highly porous surfaces**: 10 to 200 ft² per gal.
- **Recommended film thickness per coat**: 4 to 5 wet mils
- **Dry Time (to touch)**: 1 to 2 hours
- **Dry Time (to recoat)**: 4 hours
- **Dry Time (for decks)**: 24 to 28 hours
- **VOC Content**: 0.250 g/L

*Dry time is dependent upon temperature and humidity. Apply when temperature is between 50° and 80°F and relative humidity is below 60%.

**AVAILABILITY**

ZAR Deck & Siding Semi-Transparent Exterior Stain comes in seven ready mixed colors and light and dark bases for custom color tinting. Available at your favorite paint store, home center, hardware store and lumberyard in one gallon containers.

* Indicates toxic chemical (s) subject to the reporting requirements of Section 313 of Title III and of CFR 372
SEE SECTION IX FOR LIST OF ADDITIONAL INGREDIENTS

SECTION III – PHYSICAL/CHEMICAL CHARACTERISTICS

BOILING RANGE: 212 F
VAPOR DENSITY: HEAVIER THAN AIR
COATING V.O.C.: DOES NOT EXCEED MAXIMUM VOC 250 G/L (VOS 2.08 LB/GAL)
SOLUBILITY IN WATER: SOLUBLE
APPEARANCE AND ODOR: WHITE OR COLORS, PRODUCT SPECIFIC. TYPICAL AMINE ODOR

SECTION IV – FIRE AND EXPLOSION HAZARD DATA

FLASH POINT: N/A
FLAMMABLE LIMITS IN AIR BY VOLUME:
METHOD USED: N/A
EXTINGUISHING MEDIA: NONE KNOWN
SPECIAL FIRE FIGHTING PROCEDURES: CONTAINERS MAY SWELL AND BURST DURING A FIRE DUE TO INTERNAL PRESSURE CAUSED BY HEAT. THIS MAY CAUSE A SLIPPERY CONDITION ON FLOORS
UNUSUAL FIRE AND EXPLOSION HAZARDS: N/A

SECTION V – REACTIVITY DATA

STABILITY: PRODUCT IS STABLE
CONDITIONS TO AVOID: TEMPERATURES BELOW 32 (F) FOR STORAGE. TEMPERATURES BELOW 50 (F) FOR APPLICATION
INCOMPATIBILITY (MATERIALS TO AVOID): N/A
HAZARDOUS DECOMPOSITION OR BYPRODUCTS: N/A
HAZARDOUS POLYMERIZATION: WILL NOT OCCUR
SECTION VI - HEALTH HAZARD DATA

INHALATION HEALTH RISKS AND SYMPTOMS OF EXPOSURE: In its wet state, this product should not pose any threat to health due to overexposure.

SKIN AND EYE CONTACT HEALTH RISKS AND SYMPTOMS OF EXPOSURE: Direct contact may cause burning, tearing, redness and swelling.

SKIN ABSORPTION HEALTH RISKS AND SYMPTOMS OF EXPOSURE: Can cause slight irritation.

INGESTION HEALTH RISKS AND SYMPTOMS OF EXPOSURE: May produce signs of intoxication characterized by incoordination, dizziness, headache, nausea, mental confusion, slurred speech depending on the quantity of material ingested.

HEALTH HAZARDS (ACUTE AND CHRONIC) None known.

CARCINOGENICITY: NTP? No IARC MONOGRAPHS? Yes OSHA REGULATED? No
Titanium dioxide has been characterized by IARC as possibly carcinogenic to humans (Group 2B) through inhalation (not ingestion). This classification is based upon animal inhalation studies. Epidemiology studies do not suggest an increased risk of cancer in humans from occupational exposure to titanium dioxide.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: Inhalation of the sprayed material or the dust from sanding the dry film can aggravate respiratory conditions.

EMERGENCY AND FIRST AID PROCEDURES:
EYES: Flush with large amounts of water for at least 15 minutes. Consult a physician if irritation persists.
SKIN: Wash affected area with soap and water. Consult a physician if irritation persists.
INGESTION: Give one or two glasses of water. If individual is drowsy or unconscious do not give anything by mouth. Consult a physician, medical facility or poison control center for advise about whether to induce vomiting.
INHALATION: Remove victim to fresh air.

SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Dike area around spill. Apply absorbent material, then sweep up and place in proper containers.

WASTE DISPOSAL METHOD: Dispose of in approved sites according to local, state and federal regulations.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Avoid breathing dust. Keep from freezing. Store material in areas where temperatures range from 50°F to 90°F.

OTHER PRECAUTIONS: None.

SECTION VIII - CONTROL MEASURES

RESPIRATORY PROTECTION: When spraying or sanding dry film, use NIOSH approved respirators with solid particulate cartridges.

VENTILATION: Use adequate ventilation in volume and pattern to maintain exposure levels below that listed in Sections II & IX.

PROTECTIVE GLOVES: Use neoprene rubber gloves to prevent skin contact.

EYE PROTECTION: Use chemical splash goggles with side shields.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Remove and wash contaminated clothing before reuse.

WORK / HYGIENIC PRACTICES: Wash hands before eating, smoking or using wash room. Wash contaminated clothing before reuse.

## SECTION X – DISCLAIMER

This information is furnished without warranty, representation, inducement or license of any kind, except that it is accurate to the best of UGL’s knowledge, or obtained from sources believed by UGL to be accurate, and UGL does not assume any legal responsibility for use or reliance upon same. Before using any product, read the label.
SUPERDECK PRESSURE TREATED WOOD STAIN

[RELATED SECTION 09 93 13.13]

Model Number: DB 2001
Location: Great Porch and Deck Deck Boards
Finish: cedar
Features:
  - Density: 7.14 lbs./gal
Availability: Boone Paint & Interiors
Product Data Guide: Pressure Treated Wood Stain
2000 Series - 250 VOC

SUPERDECK® Pressure Treated Wood Stain has been uniquely formulated to transform pressure treated wood from its original color to natural wood tones while accentuating its distinctive grain pattern. Transparent iron oxide pigments provide a rich, warm appearance and protects against harmful UV rays, while the three oil system and highly effective mildewcides protect against water damage and mildew stains. Product is resistant to foot traffic patterning and will not track.

USES: All exterior pressure treated and non-treated wood.

COLORS:
DB 2001-CEedar
DB 2005-HEART REDWOOD
DB 2007-CANYON BROWN
DB 2010-NATURAL
DB 2014-VALLEY
DB 2016-GOLDEN OAK

VOC: 250

PRODUCT HIGHLIGHTS:
- One Coat Coverage
- Penetrating 3-Oil System
- Maximum Grain Clarity
- Use on All Exterior Wood

SURFACE PREPARATION: DO NOT APPLY OVER SEALED SURFACES. Remove previous oxidized stains with Superdeck® Wood Cleaner. NEW WOOD that has not been kiln dried must be allowed to season 2 to 4 weeks before applying product. Dry time will vary depending on weather and moisture content of wood. Wood may be clean enough to directly apply stain. If not, or if wood has mill glaze, clean redwood and cedar surfaces with Superdeck® Wood Brightener; clean pressure treated wood surfaces with Wood Cleaner. WEATHERED WOOD should be free from dirt and other foreign materials. Thoroughly clean all wood surface types with Wood Cleaner and rinse. For redwood and cedar, follow with Wood Brightener to remove tannin stains and brighten wood to its original color.

NOTE: This product is lead free. WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

PRODUCT PREPARATION: Product should be shaken or stirred before and during application.

THINNING: None required.
APPLICATION METHODS: Product may be brushed, rolled or sprayed. If sprayed, use the lowest possible pressure needed for a reasonable spray pattern. Back rolling is suggested when spraying, working the product smoothly and evenly into the wood. This will decrease the possibility of pools or puddles on the surface and ensure a properly penetrated finish.

APPLICATION: Proper application is essential in order to accomplish the full benefits of product appearance and performance. Different wood species, textures and natural color will affect finished shade. Always test a small area first for color satisfaction before coating entire project. Pressure Treated Wood Stain is a penetrating stain that must be applied only at a rate the wood will absorb. Do not pool or puddle product on surface. Excess product allowed to sit on surface will result in a tacky finish and extended dry time. Remove tacky finish with mineral spirits within 24 hours of application or with a mild solution of Wood Cleaner after 24 hours. When properly applied, the wood surface will have a positive dry and the wood fibers beneath the surface will maintain excellent lubrication. Thoroughly coat the porous ends of all boards with product.

NUMBER OF COATS: One coat depending on wood porosity and wood moisture content.

APPLICATION TEMPERATURE: 40° F—95° F. Do not apply if wood surface is hot to touch or if rain is likely to occur.

DRY TIME @ 77° F: 8 hours to touch, 24 hours for traffic; depending on weather conditions.

STORAGE: Pour remaining product into smaller container to reduce skin forming on product. If skin does form, remove it and strain product before re-use.

CLEAN UP/DISPOSAL: Clean brushes and equipment with mineral spirits. Dispose of empty container or unused portion in accordance with local, state, and federal regulations. Soak oily rags, steel wool, roller covers, and other stain soaked materials in water after use to avoid spontaneous combustion.

DANGER! AVOID SPONTANEOUS COMBUSTION: Product contains drying oils (linseed oil & tung oil). Rags, steel wool, roller covers, or any other waste soaked with product may spontaneously catch fire if improperly discarded. Immediately after each use, place rags, steel wool, roller covers, or any other waste in a sealed water-filled metal container.

CONTAINS PETROLEUM DISTILLATE. Keep away from heat, sparks and flame. May be irritating to eyes and skin. Do not use product indoors, for exterior use only. Avoid breathing vapors or mist. Use only in areas with adequate ventilation. Wear a vapor/mist respirator during spray applications. If you experience eye watering, headaches or dizziness, increase fresh air or wear respiratory protection (NIOSH/MSHA TC23C or equivalent) or leave the area. Close container after each use. While using do not eat, smoke or drink. Wear protective clothing, gloves and goggles. Do not use on surfaces intended for food, feed, potable water, livestock or dairy animals.

FIRST AID: If swallowed, do not induce vomiting. Call a physician immediately. In case of eye contact, flush immediately with plenty of water for at least fifteen minutes and get medical attention; for skin,
wash thoroughly with soap and water. Remove contaminated clothing and wash before reuse. Call a physician if any irritation persists.

**WARNING:** This product contains chemicals known to the state of California to cause cancer, birth defects or other reproductive harm. Notice: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

**KEEP OUT OF REACH OF CHILDREN**

**SPECIFICATIONS:**

**MATERIAL:** Tung oil (China wood oil), Linseed oil, highly refined Paraffin oil

**SOLVENT:** Mineral Spirits

**PIGMENT:** Transparent oxide (hydrated ferric oxides)

**TYPICAL LBS. /GAL:** 7.14

**SPECIFIC GRAVITY:** 0.86

**VISCOITY:** 15 SEC. #2 Zahn cup at 77° F.

**TOTAL SOLIDS by WEIGHT:** 60%

**TOTAL VOLATILE by WEIGHT:** 40%

**V.O.C.:** Less than 250 grams/liter (ASTM D-2369)

**FLASH POINT:** 111° F. (T.C.C)

**D.O.T. CLASSIFICATION:** Combustible Liquid

**GUARANTEE:** If you are not completely satisfied with the performance of this product after applying according to label directions, we will replace the product or refund the purchase price at the manufacturer’s option. Proof of purchase, complaint description, and photograph required. Manufacturer’s liability limited to refund of purchase price or product replacement. In no event shall manufacturer be responsible for labor, personal injury, or damage.

** CHEMICAL SUBJECT TO THE REPORTING REQUIREMENTS OF SECTION 313 OF TITLE III AND OF 40 CFR 372. THIS INFORMATION MUST BE INCLUDED IN ALL MSDS'S THAT ARE COPIED AND DISTRIBUTED FOR THIS MATERIAL.

WARNING: THIS PRODUCT CONTAINS CHEMICALS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER AND BIRTH DEFECTS, OR OTHER REPRODUCTIVE HARM.

SECTION III - PHYSICAL / CHEMICAL CHARACTERISTICS

FLAMMABLE LIMITS IN AIR BY VOLUME- LOWER: 1  UPPER: 7

FLASH POINT: 111 DEG F.
BOILING RANGE: 324 DEG F.

VAPOR DENSITY: HEAVIER THAN AIR
SPECIFIC GRAVITY (H2O=1): 0.88

COATING V.O.C.: <250 GRAMS / LITER
MATERIAL V.O.C.: <250 GRAMS / LITER

SOLUBILITY IN WATER: NON SOLUBLE
DENSITY: 7.37 LB / GAL

APPEARANCE: YELLOWISH TO AMBER LIQUID DEPENDING ON COLOR SELECTED
ODOR: SLIGHT HYDROCARBON ODOR

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

EXTINGUISHING MEDIA: USE WATER FOG, FOAM, DRY CHEMICAL, OR CO2. DO NOT USE A DIRECT STREAM OF WATER. PRODUCT WILL FLOAT AND CAN BE REIGNITED ON SURFACE OF WATER.

SPECIAL FIRE FIGHTING PROCEDURES: USE POSITIVE PRESSURE NIOSH APPROVED SELF CONTAINED BREATHING APPARATUS. COOL FIRE EXPOSED CONTAINERS WITH WATER FOG.

UNUSUAL FIRE AND EXPLOSION PROCEDURES: THIS MATERIAL IS COMBUSTIBLE AND MAY BE IGNITED BY HEAT, SPARKS, FLAMES, OR OTHER SOURCES OF IGNITION. MAY CREATE VAPOR / AIR EXPLOSION HAZARD IN HEAT OF FIRE.

SECTION V - REACTIVITY DATA

STABILITY: STABLE.

CONDITIONS TO AVOID: AVOID SPONTANEOUS COMBUSTION BY SOAKING OILY RAGS, BRUSHES ROLLERS, ETC. IN WATER THEN PLACE INTO A SEALED METAL CONTAINER BEFORE PROPER DISPOSAL. AVOID EXCESSIVE HEAT, POOR VENTILATION, CORROSIVE ATMOSPHERES, AND EXCESSIVE AGING.

INCOMPATIBILITY: (MATERIALS TO AVOID)-ALKALINE MATERIAL, STRONG ACIDS, AND OXIDIZING MATERIALS.

HAZARDOUS DECOMPOSITION OR BYPRODUCTS: CARBON MONOXIDE, CARBON DIOXIDE, OXIDES OF NITROGEN, TOXIC FUMES OF CHLORINE AND FLUORINE CONTAINING GASES.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR.
SECTION VI - ACUTE & CHRONIC HEALTH HAZARDS

INHALATION: VAPORS MAY CAUSE IRRITATION TO NOSE, THROAT, AND RESPIRATORY TRACT. HIGH VAPOR CONCENTRATIONS MAY RESULT IN CENTRAL NERVOUS SYSTEM DEPRESSION.

EYE CONTACT: MAY CAUSE SEVERE IRRITATION, REDNESS, BLURRED VISION AND POSSIBLE CORNEAL INJURY UNLESS WASHED FROM EYES PROMPTLY.

SKIN CONTACT: LIQUID IS SLIGHTLY IRITATING TO THE SKIN. PROLONGED OR REPEATED LIQUID CONTACT COULD RESULT IN DEFATTING AND DRYING OF THE SKIN, WHICH MAY RESULT IN SKIN IRRITATION AND DERMATITIS.

INGESTION: INGESTION OF PRODUCT MAY RESULT IN VOMITING. ASPIRATION (BREATHING) OF VOMITUS INTO THE LUNGS MUST BE AVOIDED AS EVEN SMALL QUANTITIES MAY RESULT IN ASPIRATION PNEUMONITIS.

SIGNS & SYMPTOMS: EFFECTS OF OVEREXPOSURE MAY INCLUDE IRRITATION OF THE NOSE AND THROAT, IRRITATION OF THE DIGESTIVE TRACT AND SIGNS OF NERVOUS SYSTEM DEPRESSION INCLUDING HEADACHE, DROWSINESS, DIZZINESS, LOSS OF COORDINATION AND FATIGUE.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: PREEXISTING EYE, SKIN, AND RESPIRATORY DISORDERS MAY BE AGGRAVATED BY EXPOSURE.

CARCINOGENICITY:
NTP CARCINOGEN: NO
IARC MONOGRAPHS: YES
OSHA REGULATED: NO

SECTION VII - FIRST AID MEASURES

INHALATION: MOVE PERSON TO FRESH AIR. IF BREATHING STOPS, APPLY ARTIFICIAL RESPIRATION AND GET MEDICAL ATTENTION.

EYE: FLUSH IMMEDIATELY WITH PLENTY OF WATER FOR 15 MINUTES WHILE HOLDING EYELIDS OPEN AND GET MEDICAL ATTENTION.

SKIN: WASH THOROUGHLY WITH SOAP AND WATER. REMOVE CONTAMINATED CLOTHING, WASH BEFORE RE-USE.

INGESTION: DO NOT INDUCE VOMITING. CALL A PHYSICIAN IMMEDIATELY. IF VOMITING OCCURS KEEP HEAD BELOW HIPS TO PREVENT ASPIRATION OF LIQUID INTO THE LUNGS.

PHYSICIAN NOTE: IF EXCESSIVE AMOUNT HAS BEEN INGESTED AND VOMITING HAS NOT OCCURRED, EMESIS SHOULD BE INDUCED WITH SUPERVISION. KEEP VICTIM’S HEAD BELOW HIPS TO PREVENT ASPIRATION. IF SYMPTOMS SUCH AS LOSS OF GAG REFLEX, CONVULSIONS, OR UNCONSCIOUSNESS OCCUR BEFORE EMESIS, GASTRIC LAVAGE USING A CUFFED ENDOTRACHEAL TUBE SHOULD BE CONSIDERED.

SECTION VIII - PRECAUTIONS FOR SAFE HANDLING AND USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
ELIMINATE IIGNITION SOURCES, PROVIDE GOOD VENTILATION, DIKE SPILL AREA AND ADD SUITABLE ABSORBENT TO SPILLED LIQUID, PLACE ABSORBED MATERIAL INTO A SEALED METAL CONTAINER FOR PROPER DISPOSAL.

WASTE DISPOSAL METHOD: DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL. DISPOSE OF EMPTY CONTAINERS AND ABSORBED SPILL MATERIALS AND ANY UNUSED PRODUCT IN ACCORDANCE WITH ALL LOCAL, STATE, AND FEDERAL REGULATIONS.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: USE NON-SPARKING UTENSILS WHEN HANDLING THIS MATERIAL. AVOID HOT METAL SURFACES. KEEP CONTAINER CLOSED WHEN NOT IN USE. KEEP AWAY FROM EXCESSIVE HEAT AND FLAMES. KEEP OUT OF REACH OF CHILDREN.

OTHER PRECAUTIONS: AVOID SPONTANEOUS COMBUSTION. SUPERDECK CONTAINS DRYING OILS (LINSEED AND TUNG OIL). RAGS, STEEL WOOL, ROLLER COVERS, OR ANY OTHER WASTE SOAKED WITH SUPERDECK MAY SPONTANEOUSLY CATCH FIRE IF IMPROPERLY DISCARDED. IMMEDIATELY AFTER EACH USE, PLACE RAGS, STEEL WOOL, ROLLER COVERS OR ANY OTHER WASTE IN A SEALED WATER FILLED METAL CONTAINER BEFORE PROPER DISPOSAL.

SECTION IX - CONTROL MEASURES

RESPIRATORY PROTECTION: WEAR A VAPOR / MIST RESPIRATOR (NIOSH / MSHA TC 23C OR EQUIVALENT) DURING SPRAY APPLICATIONS OR WHEN VENTILATION IS INADEQUATE TO PREVENT INHALATION OVEREXPOSURE.

VENTILATION: GENERAL MECHANICAL VENTILATION OR LOCAL EXHAUST SHOULD BE ADEQUATE TO PREVENT OVEREXPOSURE.

PROTECTIVE GLOVES: WEAR IMPERVIOUS CHEMICAL HANDLING GLOVES FOR SKIN PROTECTION.

EYE PROTECTION: USE CHEMICAL SAFETY GLASSES, GOGGLES, OR FACE SHIELD FOR EYE PROTECTION.
OTHER PROTECTIVE CLOTHING OR EQUIPMENT:
USE IMPERMEABLE APRONS AND PROTECTIVE CLOTHING WHenever POSSIBLE TO PREVENT SKIN CONTACT.
WORK / HYGIENIC PRACTICES WHEN USING PRODUCT DO NOT EAT, DRINK, OR SMOKE. WASH HANDS THOROUGHLY AFTER USING.

SECTION X - DISCLAIMER
TO THE BEST OF OUR KNOWLEDGE, THE INFORMATION CONTAINED HEREIN IS ACCURATE, OBTAINED FROM SOURCES BELIEVED BY DUCKBACK PRODUCTS TO BE ACCURATE, BUT IS FURNISHED WITHOUT ANY EXPRESSED OR IMPLIED WARRANTIES.
BENJAMIN MOORE ARBORCOAT WATERBORNE EXTERIOR STAIN

[RELATED SECTION 09 93 13.13]

Model Number: 636 00

Location: Canopy, Great Porch Columns, Interior Floors, Interior Door Trim

Finish: clear coat

Features:

- Dries by evaporation, coalescence
- Coverage: 400-600² ft.
- Density: 7.14 lbs./gal
- Viscosity: 62 +/- 2 KU
- Gloss, sheen: low luster

Availability: Boone Paint & Interiors
# ARBORCOAT®
## WATERBORNE EXTERIOR STAIN
### PROTECTIVE CLEAR COAT 636

**Features**
- A clear protective coating for Arborcoat® Transparent (637) and Semi-Transparent (638) stains on deck surfaces
- Functions as an annual refresher coat for Arborcoat® Transparent (637) and Semi-Transparent (638) stains, reviving that newly stained look
- Formulated to protect, and beautify wooden decking and furniture
- Provides mildew resistant coating
- A water repellent coating
- Scuff resistant
- Dual UV protection for Deck systems
- Low lustre finish, can also be used over Arborcoat® Semi-Solid (639)

**General Description**
A premium quality 100% acrylic finish coat for Benjamin Moore® Arborcoat® waterborne exterior stain systems. Use as a protective coating over (637) Transparent and (638) Semi-Transparent Stains on decks or other surfaces where enhanced abrasion resistance and additional protection is desired. Can also be used over (639) Arborcoat® waterborne semi solid stain when a low lustre finish is preferred.

**Recommended For**
Residential or commercial applications where a premium quality finish is desired. For exterior use on wood decking, and furniture.

**Limitations**
- Do not apply when air and surface temperatures are below 40°F (4.4°C).
- High humidity will extend dry and cure times.
- Use only as a topcoat for Arborcoat® transparent, semi transparent or semi solid stains.

Arborcoat® Waterborne Exterior Stain Protective Clear Coat 636

Surface Preparation

When being used as a refresher coat, remove contamination from weathered stained surfaces by washing with Benjamin Moore® Clean, Multi-Purpose Cleaner (318). Surfaces that were previously stained with Arborcoat® Transparent (637) or Semi-Transparent (638) may be touched up with stain prior to the application of an annual refresher coat of the protective clear coat.

Un-weathered areas such as eaves, ceilings, or overhangs must be washed with Benjamin Moore® Clean, Multi-Purpose Cleaner (318) and rinsed with a strong stream from a garden hose to remove surface salts that can interfere with proper adhesion.

WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Carefully clean up with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Application

Arborcoat® Protective Clear Coat is part of a system. It must be applied over Arborcoat® (637) Transparent or (638) Semi Transparent Stains when they are used on decks or other horizontal surfaces. The Arborcoat® Protective Clear Coat can be applied 1 to 3 hours after the stain has been applied, depending on temperature and humidity. Can also be used over Arborcoat® Semi-Solid (639) for a low lustre look.

Stir thoroughly before and occasionally during use. Brushing is the preferred method of application. When applied by roller, spray, or dipping, back brushing is recommended to improve uniform distribution. Apply as received in the container. One coat will provide adequate protection; additional coats may lead to a high sheen or uneven gloss.

Start by coating a sample of the exact wood you intend to finish. The finished color and sheen of the stain and clear coat system can vary depending on the type of wood—its natural color, texture, grain porosity, and section of log from which it was cut.

Apply evenly, allowing the stain to penetrate into the wood. Brush from dry into wet areas, stopping at natural breaks, i.e., stairs or edges. To minimize lapsing, always maintain a wet edge. On horizontal siding apply the stain on a section of 2 or 3 boards completely across the house. Lower the ladder and continue in the same manner until the side is completed. Vertical siding is coated using the same principle from top to bottom. Never stop staining in mid-wall; continue until a natural break is reached, such as a window.

Do not apply excess amounts as this will result in unwanted gloss and peeling. Do not apply in direct sunlight as this will prevent the product from penetrating properly, causing lap marks.

Apply when air and surface temperatures are between 40° F (4.4° C) and 60° F (32° C).

Thinning/Cleanup

Conditioning with Benjamin Moore® 515 Extender may be necessary under certain conditions to adjust open time or spray characteristics. The chart below is for general guidance.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Mild conditions</th>
<th>Severe conditions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brush:</td>
<td>Humid (RH=50%) with no direct sunlight &amp; with little to no wind</td>
<td>Dry (RH=50%), in direct sunlight, or windy conditions</td>
</tr>
<tr>
<td>Roller:</td>
<td>No Thinning Necessary</td>
<td>Add 515 Extender or water: Max of 8 fl. oz. to a gallon of stain</td>
</tr>
<tr>
<td>Spray:</td>
<td>Airless* Pressure: 800 - 1500 psi</td>
<td>Never add other stains, paints or solvents</td>
</tr>
<tr>
<td>Tip:</td>
<td>0.011 - 0.015*</td>
<td></td>
</tr>
</tbody>
</table>

Use soap and water.

USE COMPLETELY OR DISPOSE OF PROPERLY. Dry empty containers may be recycled in a can recycling program. Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.

Environmental, Health & Safety Information

Use only with adequate ventilation. Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer's directions for respirator use. Close container after each use. Wash thoroughly after handling.

WARNING: This product contains a chemical known to the state of California to cause cancer and birth defects, or other reproductive harm.

FIRST AID: In case of eye contact, flush with water for 15 minutes; for skin, wash with soap and water. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

IN CASE OF SPILL — Absorb with inert material and dispose of as specified under “Clean Up”.

KEEP OUT OF REACH OF CHILDREN

PROTECT FROM FREEZING

Refer to Material Safety Data Sheet for additional health and safety information.
1. PRODUCT AND COMPANY IDENTIFICATION

Product Name: ARBORCOAT EXTERIOR WATERBORNE PROTECTIVE CLEAR FINISH
Product Code: 636
Color: Clear

Manufacturer: Benjamin Moore & Co.
Address: 101 Paragon Drive, Montvale, NJ 07645
Phone: 201-573-9600
Website: www.benjaminmoore.com

Emergency Telephone Number(s):
CHEMTREC: 800-424-9300

2. COMPOSITION INFORMATION ON COMPONENTS

Hazardous Components:

3. HAZARDS IDENTIFICATION

Emergency Overview:

Vapors may be irritating to eyes, nose, throat, and lungs. May cause skin irritation and/or dermatitis.

Appearance: Liquid
Odor: Little or no odor

Potential Health Effects:

Principal Routes of Exposure: Eye contact, skin contact and inhalation.

Acute Effects:
- Eyes: May cause slight irritation.
- Skin: Substance may cause slight skin irritation.
- Inhalation: May cause irritation of respiratory tract.
- Ingestion: Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

Chronic Effects: Repeated contact may cause allergic reactions in very susceptible persons.
**4. FIRST AID MEASURES**

**General Advice**

No hazards which require special first aid measures.

**Eye Contact**

Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

**Skin Contact**

Wash off immediately with soap and plenty of water removing all contaminated clothes and shoes.

**Inhalation**

Move to fresh air. If symptoms persist, call a physician.

**Ingestion**

Clean mouth with water and afterwards drink plenty of water. Consult a physician if necessary.

**Notes To Physician**

Treat symptomatically

---

**5. FIRE-FIGHTING MEASURES**

**Suitable Extinguishing Media**

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

**Protective Equipment And Precautions For Firefighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

**Specific Hazards Arising From The Chemical**

Closed containers may rupture if exposed to fire or extreme heat.

**Sensitivity To Mechanical Impact**

No

**Sensitivity To Static Discharge**

No
636 - ARBORCOAT EXTERIOR WATERBORNE
PROTECTIVE CLEAR FINISH

Revision Date: 14-Jul-2009

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions
Avoid contact with skin, eyes and clothing. Ensure adequate ventilation.

Environmental Precautions
Prevent further leakage or spillage if safe to do so.

Methods For Clean-Up
Soak up with inert absorbent material. Sweep up and shovel into suitable containers for disposal.

Other Information
None known

7. HANDLING AND STORAGE

Handling
Avoid contact with skin, eyes and clothing. Avoid breathing vapors, spray mists or sanding dust. In case of insufficient ventilation, wear suitable respiratory equipment.

Storage
Keep container tightly closed. Keep out of the reach of children.

DIVISION 10  SPECIALTIES
DAZIAN ECO-TRAPEZE

[RELATED SECTION 10 11 46]

This is a temporary facility that is only used for the purposes of the competition in Washington, D.C. and does not apply to the affordability of the Solar Homestead.

Model Number: N143753
Location: Living Module
Dimensions:
   Width: 120”
Weight: 19.60 oz. (linear), 5.8 oz. (square)
Finish: white
Available: Dazian
Price: $24.95/yd
**Eco-Trapeze®**

An environmentally friendly PFR version of our Trapeze® fabric, made from 90% Recycled Polyester/10% Lycra®. Same stretch and washability as our regular Trapeze® product. Each yard of Eco-Trapeze® conserves approximately 61,000 BTU's of energy, equivalent to .5 gallons of gasoline. Recycled Polyester is made from post industrial waste and post consumer plastic bottles. Due to the nature of the raw material used, our Eco products will caste in shade to the off white, a more natural look than the stark white of virgin Polyester.

Special pricing applies to Small Cut/Piece Cuts 0-9 yards. Please call your Sales Representative.

GUARDIAN CB-12 ROOF ANCHOR

[RELATED SECTION 10 40 00]

Model Number: 00645
Location: roof of the Main House and OM Closets
Dimensions:
- Height: 12”
- Length: 16”
- Width: 16”
Features:
- Universal base plate
- Durable galvanized finish
- Fasteners provided for wood and steel
- Post extends past roofing substrate to keep attachment point high enough that it is still accessible after the roof is complete
- Round post works with most off-the-shelf flashing kits
Available: Guardian Fall Protection
COMMERCIAL ANCHOR POINTS

1. D-BOLT ANCHORS

2. CB-12 & CB-18

3. CB SWIVEL TOP (00680)

D-BOLT ANCHORS (00370 & 00373)
D-Bolt Anchors are designed as the intermediary for securing a connecting device to an anchorage point.

*00373 includes 1½" long integrated 9/16" bolt, nut & lock washer

CB-12 & CB-18 (00645 & 00656)
- Universal base plate
- Durable galvanized finish
- Fasteners provided for wood & steel
- CB-12 is for use on wood, steel or concrete
- Post extends past roofing substrate to keep attachment point high enough that it is still accessible after the roof is complete
- Round post works with most off-the-shelf flashing kits
- Great for use with retractable or horizontal lifeline systems
- CB-18 is for concrete or special application only
- Custom design and fabrication available
- Available in stainless steel
- CB Series can be used in conjunction with HLL system

CB SWIVEL TOP SYSTEM (00680)
- Mounts on top of the CB-12 or CB-18
- Easy installation
- Swivels 360°
- Removable and reusable bolt on application
- Cost effective accessory to the CB
- Great for first-worker-up system
- Does not include CB or retractable

64-bit computing:

64-bit computing requires that the following hardware and software requirements are met:
- 64-bit Operating System
- 64-bit CPU, Chipset and BIOS (Basic Input/Output System)
- 64-bit Device drivers
- 64-bit applications

Certain device drivers and/or applications may not be compatible with a 64-bit CPU and therefore may not function properly. See "Detailed Specs" for more information.
Details of MobileMark 2007 testing are available at www.bapco.com

Rating is for comparison purposes only, and does not indicate the battery life that will be obtained by any individual user. Actual battery life may vary considerably from specifications depending on product model, configuration, applications, power management settings and features utilized, as well as the natural performance variations produced by the design of individual components. The battery life rating is only achieved on the select models and configurations tested by Toshiba under the specific test settings at the time of publication and is not an estimate of a system's battery life under any conditions other than the specific test settings.

After a period of time, the battery will lose its ability to perform at maximum capacity and will need to be replaced. This is normal for all batteries.

12 **Battery Life - MobileMark™.** Measured by MobileMark. MobileMark is a trademark of the Business Applications Performance Corporation.

13 **Software.** Some software may differ from its retail version (if available), and may not include user manuals or all program functionality.

Certain Microsoft® software products (including Microsoft Office Small Business Accounting if applicable) included with this computer may use technological measures for copy protection. IN SUCH EVENT, YOU WILL NOT BE ABLE TO USE THE PRODUCT IF YOU DO NOT FULLY COMPLY WITH THE PRODUCT ACTIVATION PROCEDURES. Product activation procedures and Microsoft's privacy policy will be detailed during initial launch of the product, or upon certain reinstallations of the software products or reconfigurations of the computer, and may be completed by internet or telephone (toll charges may apply).

Internet access is required to enable certain functionality of certain Microsoft products (including Microsoft Office Small Business Accounting 2006) which may be included with this computer. Includes Microsoft® Office 2010 preloaded. Purchase a Product Key to activate a full Microsoft Office 2010 suite.

14 **Toshiba Media Controller.** Copy protection technology, if any, associated with the content may prevent or limit sharing of content.

15 **Microsoft Office Starter 2010.** Office Starter consists of reduced-functionality versions of Word and Excel with advertising, PowerPoint, Outlook, OneNote, Access and Publisher are not included.

16 **RoHS.** This notebook is compatible with European Union Directive 2002/95/EC, Restriction of the use of certain Hazardous Substances in electrical and electronic equipment (RoHS), which restricts use of lead, cadmium, mercury, hexavalent chromium, PBB, and PBDE. Toshiba requires its notebook component suppliers to meet RoHS requirements and verifies its supplier's commitment to meeting RoHS requirements by conducting component sampling inspections during the product design approval process.

17 **Temperature (Environmental) Conditions.** All temperature references are approximate and the performance of your computer may vary from specifications even when operating within the recommended temperature range.

18 **Warranty.** The terms and conditions of Toshiba’s standard limited warranty are available at www.warranty.toshiba.com.
LG 3-DOOR FRENCH DOOR REFRIGERATOR

**REFRIGERATOR**

**LFC25776**
3 Door French Door Refrigerator

**HIGHLIGHTS**
Sophisticated Style & Design
10-Yr Warranty on Linear Compressor
Energy Star / CEE Tier 3

**STYLE AND DESIGN**
- LFC25776 - 25.0 cu.ft.
  LFC21776 - 20.7 cu.ft (Counter Depth)
- French Door Refrigerator with Bottom Freezer
- Premium Finishes in Stainless Steel, Smooth White and Smooth Black
- Contoured Doors with Matching Commercial Handles
- Hidden Hinges
- Premium LED Interior Light

**ORGANIZATION**
- 4 Slide-Out, Spill Protector™ Tempered Glass Shelves
- Glide N’ Serve™ Drawer
- 2 Humidity Crispers/1 Bonus Drawer
- 6 Door Baskets (5 Adjustable Gallon Size) and Dairy Corner
- Utility Bin
- Freezer Drawer with Full Width DuraBase™ inside

**PERFORMANCE**
- Energy Star/CEE Tier 3, uses 30% Less Energy than Federal Standards
- Linear Compressor for Better Energy, Quiet Operation, and Durability
- Multi-Air Flow Cooling
- Internal LED Touch Pad Digital Temperature Controls
- IcePlus™ Accelerated Freezing Function
- Door Alarm
- LoDecibel™ Quiet Operation with Linear Compressor

**BEAUTIFUL ON THE INSIDE. BEAUTIFUL ON THE OUTSIDE.**
A lot of thought went into this LG refrigerator. On the outside – contoured doors, hidden hinges and commercial steel handles. And Inside is enhanced LED lighting and an integrated 4-compartment crisper system with a full width Glide N’ Serve™ drawer.

**Sophisticated Style & Design**
Contoured doors, hidden hinges, and a host of great interior features give your refrigerator a look as sophisticated as it is functional.

**10-Year Warranty on Linear Compressor**
When you buy a refrigerator, you don’t want to worry that it won’t last. Because the Linear Compressor uses fewer moving parts and operates more efficiently, LG confidently backs the compressor with a 10-year warranty.

**Energy Star / CEE Tier 3**
When your refrigerator uses at least 30% less energy than required by federal standards you’re going to make an impact – on your energy bill, your energy consumption, and most importantly, the environment.
## Refrigerator LFC25776

### Capacity - LFC25776
- **Refrigerator**: 17.7 cu.ft.
- **Freezer**: 7.3 cu.ft.
- **Total**: 25.0 cu.ft.

### Capacity - LFC21776 (Counter Depth)
- **Refrigerator**: 14.7 cu.ft.
- **Freezer**: 6.0 cu.ft.
- **Total**: 20.7 cu.ft.

### Features
- Energy Rating: Energy Star

Features & Specifications

Native 1080p
High definition 1080p resolution for amazing picture quality.

HDMI connectivity
Includes HDMI v1.3 input. Allows for a true digital connection for easy connections to your HD equipment.

Anamorphic Mode Support
Includes Anamorphic Mode 1 and Mode 2 support for your viewing enjoyment and convenience.

Color Management
Use new color management feature allows users to adjust images to their color preferences: Red, green, blue, cyan, magenta and yellow can each be adjusted individually with out affecting the color quality of other colors.

Diamond Lens
The 4-cluster, 13-piece all-glass lens provides excellent focusing performance with 1.5x magnification of high-definition images.

Ultra-Quiet Noise Level
Amazing low 250CA noise level (low mode), so you can sit back and enjoy your home theater picture instead of any distracting equipment noise level.

RS232 support
Convenient compatibility with 3rd party control devices.

Top Access Lamp
Users can replace lamp with out taking down the projector if ceiling mounted. This design simplifies lamp replacements without turning the projector around or over when mounted on the ceiling or resting on a shelf.

Long Lamp Life
An amazing lamp life estimated to last up to 5000hrs. Provides owner with hours of home cinema watching enjoyment.

IS IT A TV? OR SOMETHING BETTER?

If you've been hearing about how amazing Blu-ray entertainment is, or how much better your favorite shows would look in HD, you've heard right. The thing is, you need 1080p Full HD to get the most out of both. With the LK450, you can.
## 37LK450

### 37" Class 1080p LCD TV

#### PANEL SPECIFICATIONS

   2.1 Channels
   Audio Processing: Dolby Digital, DTS
   Speakers: 2 Way 3 Front
   Active Wireless Subwoofer
   Bar Speaker
   Connectivity: 1 Audio Output
Electrical:
   Wattage: 280 W
Approval Certificates:
   Energy Star Qualified
Available: Amazon.com
Price: $319.00
Features

**ENERGY STAR® Compliant**
This eco-friendly feature helps you save money, while helping to save the environment by consuming less energy. ENERGY STAR® is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy that promotes energy efficiency.

**Enhanced experience with Virtual Surround Sound**
Experience a rich, powerful sound that completely envelopes you. All it takes is a 2.1 channel audio system consisting of two front speakers and a subwoofer to allow you to enjoy amazing virtual surround sound.

**Wall mountable to maximize space**
Are you a fan of minimalist design or want to free up space? Maximize your room’s potential and throw out your entertainment stand. With the included wall mount, it’s easy to secure the Samsung HW-C451 to the wall alongside or underneath a wall mounted HDTV. So you can enjoy an elegant, sleeker living space.

**Enhanced sound with Wireless Subwoofer**
You’ll really feel the sound with our 5.8 GHz wireless powered subwoofer, but you won’t see it: since it’s wireless, you can place it anywhere, even behind furniture or in a corner.

*1 Hard disk capacity calculated using base 10 mathematics (1GB = 1,000,000,000 bytes). The system software for this PS3™ system calculates capacity using binary mathematics (1GB = 1,073,741,824 bytes) and consequently displays lower capacity and free space. The difference in displayed values does not indicate a difference in the actual number of bytes.

*2 A portion of the hard disk capacity is reserved for use in connection with system administration, maintenance, and additional options. This may occur upon installation of system software or other software. As a result, the availability of hard disk capacity may vary depending on the system, system software version, or available options, and is not otherwise available for your use.

*3 Functionality of all connected devices is not guaranteed.

*4 3D*, "Deep Color", "x.v.Color" and "HD lossless audio format" are supported.

[RELATED SECTION 21 05 19]

Model Number: VSR-S
Location: Main House Mechanical Closet, Outdoor Kitchen Mechanical Closet
Dimensions:
  Length: 5.56” [141.2 mm]
  Width: 3.5” [89 mm]
  Height: 2.34” [59.4 mm]
Finish: die-cast, red enamel
Features:
  Service pressure: 300 psi [20.7 bar]
  Maximum surge: 18 fps [5.5 m/s]
  Flow sensitivity range for signal: 4-10 gpm [15-38 lpm]
Approval Certificates:
  UL Listed
  ULC Listed
  CSFM Listed
  NYMEA Accepted
Available: Lowes
FOR SMALL PIPE

VANE TYPE WATERFLOW
ALARM SWITCH WITH RETARD

UL, ULC, CSFM Listed and NYMEA Accepted
Service Pressure: Up to 300 PSI (20.7 BAR)
Flow Sensitivity Range for Signal: 4-10 GPM (15-38 LPM) UL
Maximum Surge: 18 FPS (5.5 m/s)
Enclosure: Die-cast, red enamel finish
Cover held in place with tamper resistant screws
Contact Ratings:
  Two sets of SPDT (Form C)
  10.0 Amps at 125/250 VAC
  2.0 Amps at 30 VDC Resistive
  10mAmps min. at 24 VDC
Conduit Entrances: Two openings provided for 1/2" conduit.
  Individual switch compartments suitable for dissimilar voltages.
Usage:
  Listed plastic, copper and schedule 40 iron pipe.
  Fits pipe sizes - 1" (25mm), 1 1/4" (32mm), 1 1/2" (38mm)
  and 2" (50mm)
  Note: 12 paddles are furnished with each unit, one for each pipe
  size of threaded and sweat TEE, one for 1" (25mm) CPVC,
  one for 1" (25mm) CPVC (Central), one for 1" threadedNibco
  CPVC, and one for 1 1/2" (38mm) threaded (Japan).
Environmental Specifications:
  - NEMA-4/TP54 Rated enclosure suitable for indoor or outdoor
    use with factory installed gasket and die-cast housing when used
    with appropriate conduit fitting.
  - Temperature range: 40°F to 120°F, (4.5°C to 49°C) UL
Service Use:
  Automatic Sprinkler
  One or two family dwelling
  Residential occupancy up to four stories
  National Fire Alarm Code
Optional: Cover Tamper Switch Kit, Stock No. 0090148
  (See Fig. 7 for terminations)
Replaceable Components: Retard/Switch Assembly, stock no. 1029030

The Model VSR-S is a vane type workflow switch for use on wet
sprinkler systems that use 1" (25mm), 1 1/4" (32mm), 1 1/2" (38mm) or 2"
(50mm) pipe size. The unit may also be used as a sectional workflow
detector on large systems.

The unit contains two single pole double throw snap action switches and
an adjustable, instantly recycling pneumatic retard. The switches are
actuated when a flow of 10 gallons per minute (38 LPM) or more occurs
downstream of the device. The flow condition must exist for a period of
time necessary to overcome the selected retard period.

Enclosure
The VSR-S switches and retard device are enclosed in a general purpose,
die-cast housing. The cover is held in place with two tamper resistant
screws which require a special key for removal. A field installable cover
tamper switch is available as an option which may be used to indicate
unauthorized removal of the cover. See bulletin number 5401103 for
installation instructions of this switch.

Installation
These devices may be mounted in horizontal or vertical pipe. On
horizontal pipe they should be installed on the top side of the pipe where
they will be accessible. The units should not be installed within 6" (15cm)
of a valve, drain or fitting which changes the direction of the workflow.
Select the proper paddle for the pipe size and type of TEE used see Fig.
1 for instructions on changing paddle. The unit has a 1/2" NPT bushing
for threading into a non-corrosive TEE. See Fig. 2 for proper TEE size,
type and installation. Use no more than three wraps of teflon tape.

Screw the device into the TEE fitting as shown in Fig. 2. Care must be
taken to properly orient the device for the direction of workflow.

The vane must not rub the inside of the TEE or bind in any way. The
stem should move freely when operated by hand.

The device can also be used in copper or plastic pipe installations with
the proper adapters so that the specified TEE fitting may be installed
on the pipe run.

Note: Do not leave cover off for an extended period of time.
**FOR SMALL PIPE**

**VSR-S**

**VANE TYPE WATERFLOW ALARM SWITCH WITH RETARD**

**Fig. 1**

Retard Adjustment
The time delay is factory set at 30 ± 10 seconds. The delay can be adjusted by rotating the retard adjustment knob from 0 to the max setting (60-90 seconds). The time delay should be set at the minimum required to prevent false alarms.

**Fig. 2**

Screw the device into the tee fitting as shown. Care must be taken to properly orient the device for the direction of water flow. On sweat tees, no threaded bushings, inserts, or adapters are permitted, unless they comply with the dimensions listed in the chart below.

**Important**: The depth to the inside bottom of the tee should have the following dimensions:

<table>
<thead>
<tr>
<th>Approximate Depth Requirement</th>
<th>Tee Size</th>
<th>Threaded</th>
<th>Sweat</th>
<th>CPVC</th>
</tr>
</thead>
<tbody>
<tr>
<td>1&quot; x 1&quot; x 1&quot;</td>
<td>2 1/16&quot;</td>
<td>1 3/4&quot;</td>
<td>2 3/8&quot;</td>
<td>N/A</td>
</tr>
<tr>
<td>1 1/4&quot; x 1 1/4&quot; x 1&quot;</td>
<td>2 7/16&quot;</td>
<td>2 7/16&quot;</td>
<td>N/A</td>
<td>N/A</td>
</tr>
<tr>

<td>N/A</td>
</tr>
<tr>
<td>2&quot; x 2&quot; x 1&quot;</td>
<td>3 3/16&quot;</td>
<td>2 3/4&quot;</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

**WARNING**

There are 12 paddles furnished with each unit. One for each size of threaded, sweat or plastic TEE as described in Fig. 2. These paddles have raised lettering that shows the pipe size and type of TEE that they are to be used with. The proper paddle must be used. The paddle must be properly attached (see drawing) and the screw that holds the paddle must be securely tightened.

**Fig. 3**

Switch Terminal Connections Clamping Plate Terminal

**WARNING**

An uninsulated section of a single conductor should not be looped around the terminal and serve as two separate connections. The wire must be severed, thereby providing supervision of the connection in the event that the wire become dislodged from under the terminal. Failure to sever the wire may render the device inoperable risking severe property damage and loss of life.

**Fig. 4**

Typical Electrical Connections

**Fig. 5**

To remove knockouts:
Place screwdriver at edge of knockouts, not in the center.

**Fig. 6**

Break out thin section of cover when wiring both switches from one conduit entrance.

**Notes:**
1. The Model VSR-S has two switches, one can be used to operate a central station, proprietary or remote signaling unit, while the other is used to operate a local audible or visual annunciator.
2. For supervised circuits see “Switch Terminal Connections” drawing and caution note (Fig. 3).
FOR SMALL PIPE

VSR-S
VANE TYPE WATERFLOW
ALARM SWITCH WITH RETARD

Testing
The frequency of inspection and testing for the Model VSR-S and its associated protective monitoring system should be in accordance with applicable NFPA Codes and Standards and/or the authority having jurisdiction (manufacturer recommends quarterly or more frequently.) An inspector's test valve (usually located at the end of the most remote branch line) should always be used for test purposes. If there are no provisions for testing the operation of the flow detection device on the system, application of the VSR-S is not recommended or advisable. A minimum flow of 10 gpm (38 Lpm) is required to activate this device.

NOTICE Please advise the person responsible for testing of the fire protection system that this system must be tested in accordance with the testing instructions.

Maintenance
Inspect detectors monthly for leaks. If leaks are found, replace the detector. The VSR-S waterflow switch should provide years of trouble-free service. The retard and switch assembly are easily field replaceable. In the unlikely event that either component does not perform properly, please order replacement retard switch assembly stock #1029030. There is no maintenance required, only periodic testing and inspection.

Removal
• To prevent accidental water damage, all control valves should be shut tight and the system completely drained before waterflow detectors are removed or replaced.
• Turn off electrical power to the detector, then disconnect wiring.
• Use a wrench on the flats of the bushing. Turn the switch counterclockwise to disengage the pipe threads.
• Gently lift with your fingers, roll the vane so it will fit through the hole while continuing to lift the waterflow detector.
• Lift detector clear of pipe.

CAUTION
Waterflow switches that are monitoring wet pipe sprinkler systems shall not be used as the sole initiating device to discharge AFFF, deluge, or chemical suppression systems. Waterflow switches used for this application may result in unintended discharges caused by surges, trapped air, or short retard times.

Mounting Dimensions

* UL Listed to 250psi, FM Approved to 175 psi.
† For K-Factor when pressure is measured in Bar, multiply S.I. units by 10.0.
‡ Not all combinations of temperature ratings and wax finishes are Approved or Listed. Check specific submittals for combinations. V27 and V34 models are MEA (#62-99-E) and CFM (#7690-0531,112) Approved.
§ Approved for use on sloped ceilings.
** Recessed pendant up to 1/2"/13 mm adjustment; For rooms 12 x 12 ft. to 20 x 20 ft/3.7 x 3.7 m to 6.1 x 6.1 m.
*** Recessed pendant up to 1/4"/6 mm adjustment; For rooms 12 x 12 ft. to 18 x 18 ft/3.7 x 3.7 m to 5.5 x 5.5 m.
†† Also available with Sealing Gasket for Clean Room Applications. Request publication 40.53.
All Victaulic sprinklers are available in British Standard Pipe Threads. Contact Victaulic for details.
VIKING BLAZEMASTER 3/4" CPVC PIPING

[RELATED SECTION 21 10 00]

Model Number: 34 PIPE
Location: throughout The Solar Homestead
Dimensions:
  Diameter: 3/4" [19 mm]
  Length: 15' [4.6 m]
Available: The Viking Corporation
Viking Plastics

BlazeMaster® CPVC Pipe

Features
- Sizes Available (Nominal): 3/4” (DN20) through 3” (DN80) pipe diameters, with a Standard Dimension Ratio (SDR) of 13.5 as specified in ASTM F442.
- Environmental Specifications: Indoor use only.
  Maximum Ambient Temperature: 150°F (65°C)
- Hazen-Williams C Value: 150
- Pressure Data: Working Pressure: 175 PSI (12.1 bar) at 150°F (65°C)
- Specifications:
  - Meets NFPA 13R and 13D standards for residential occupancies as well as NFPA 13 standards for light hazard occupancies.
  - Pipe meets or exceeds ASTM F442.
  - Certified by NSF International for potable water services.
  - CPVC pipe from Viking Plastics use compound class cell 23547 (demonstrated highest structural properties).
  - cULus Listed, FM Approved, New York City (MEA) Approved, LPCB Approved.

Specifications subject to change without notice

*Empty pipe weights

IMPORTANT: Installers should receive thorough hands-on training in the proper methods of assembly and installation of CPVC products.
NIBCO BLAZEMASTER BRASTIC SPRINKLER HEAD ADAPTERS

[RELATED SECTION 21 10 00]

Model Number: 5003-S-BT
Location: throughout The Solar Homestead
Weight: 0.16 lbs [73 g]
Features:
   Joint: SXSXS
Available: NIBCO
**BlazeMaster**

**FIRE SPRINKLER FITTINGS**

- Available in 3/4” x 1/2” and 1” x 1/2”
- Complies with NFPA-13, 13R and 13D requirements
- Use sprinkler manufacturer’s wrench for sprinkler install or removal (No special wrench required to remove sprinkler head)
- Large lead chamfer will not remove PTFE tape or thread sealant upon sprinkler assembly
- No lead-containing metal in contact with fluid. NSF Certified for compliance with NSF/ANSI 61, Annex G (Approved for use with potable water intended for human consumption)
- Dezincification and corrosion resistant
- Wide wrench flats for hold back
- Reduced sprinkler installation torque vs. brass
- Made in USA
- U.S. Patent 6,186,558

**THE NEW PATENTED NIBCO® BRASTIC™ SPRINKLER HEAD ADAPTER REINVENTS SPRINKLER INSTALLATION**

- Unique design provides greater resistance to radial stress along the entire length of the sealing threads
- Sprinkler seals entirely against CPVC when properly installed eliminating a potential leak path
- Improved torque performance
- Robust starter thread to prevent sprinkler cross threading

**“Backed By The Name You Can Trust”**

Printed in USA
BRASTIC™ Sprinkler Head Adapters

SIZE RANGE – ¾” x ½” and 1” x ½” (Socket x FNPT)

FEATURES –

- Sprinkler seals entirely against CPVC when properly installed eliminating a potential leak path
- Unique design provides greater resistance to radial stress along the entire length of the sealing threads
- Robust starter thread to prevent sprinkler cross threading (Large lead chamfer will not remove PTFE tape or thread sealant upon sprinkler assembly)
- Use sprinkler manufacturer’s wrench for sprinkler install or removal (No special wrench required to remove sprinkler head)
- No lead-containing metal in contact with fluid. NSF Certified for compliance with NSF/ANSI 61, Annex G. (Approved for use with potable water intended for human consumption)
- Dezincification and corrosion resistant
- Wide wrench flats for hold back
- Improved torque resistance
- Made in USA
- U.S. Patent 6,186,558

LISTINGS AND APPROVALS –

- UL 1821 Listed
  - Exposed system risers NFPA 13D, 13R
  - Exposed basement NFPA 13D (solid wood joist)
  - Extended coverage (exposed)
    - 20’ spacing on pendant in lieu of 15’
  - Exposed extended coverage sidewall sprinkler listing for exposed pipe & fittings
  - Permitted for use with return air plenums with no set-back at ceiling openings per NFPA 90A
- ULC Listed
- Factory Mutual Approved
  - Factory Mutual Approval exposed
  - Factory Mutual Approval above drop-in ceilings
- LPCB Approved
- NSF Certification -pw Annex-G

INSTALLATION INSTRUCTIONS –

For complete installation instructions see NIBCO’s “Installation and Design Manual” or for Brastic installation instructions reference form No. IM-BLBF-0910.

Conversion Instructions from Shallow Well to DeepWell*

Remove bolts and detach ejector nose from convertible jet pump. Connect suction (D1) and pressure (D3) port to deep well ejector.
* Requires separate ejector to suit specific suction lift needs.
DIVISION 22  PLUMBING
**MCMASTER-CARR 1/2" THERMOWELLS**

[RELATED SECTION 22 05 19]

Model Number: 3957K64
Location: Core Module Roof
Dimensions:
- Diameter: 1/2"
- Length: 4"
Finish: Brass
Features:
- Fits 1/4", 5/32", 9/64" diameters
- Maximum temperature: 400°F
- Maximum pressure: 5,000 psi at 70°F
Available: McMaster-Carr
Price: $22.14
Thermowells

Use a thermowell in your tank to protect your thermometer from vibration, shock, pressure, and corrosive liquids. They also enable you to exchange thermometers without disturbing or draining the system. Thermowells have an external NPT male connection for installation in your tank or vessel and are for use with dial thermometers with a 1/2" NPT male connection.

Brass thermowells have a maximum temperature of 400°F. Maximum pressure is 5,000 psi at 70°F. Type 304 stainless steel and Type 316 stainless steel thermowells have a maximum temperature of 1650°F. Maximum pressure is 7,000 psi at 70°F. Type 304 stainless steel has good corrosion resistance. Type 316 stainless steel has excellent corrosion resistance.

Quick-response thermowells have thinner walls that allow for faster heat transfer and quicker temperature readings. Thermowells for insulated tanks have an extra-long nut to accommodate insulated tank walls. Heavy duty thermowells have thicker walls and a tapered shank to withstand high-pressure and high-flow applications.

MCMASTER-CARR 3/4" THERMOWELLS

[RELATED SECTION 22 05 19]

Model Number: 3957K11
Location: Main House Mechanical Closet
Dimensions:
   Diameter: 3/4"
   Length: 4"
Finish: Brass
Features:
   Fits 1/4", 5/32", 9/64" diameters
   Maximum temperature: 400°F
   Maximum pressure: 5,000 psi at 70°F
Available: McMaster-Carr
Price: $22.50
**Thermowells**

Use a thermowell in your tank to protect your thermometer from vibration, shock, pressure, and corrosive liquids. They also enable you to exchange thermometers without disturbing or draining the system. Thermowells have an external NPT male connection for installation in your tank or vessel and are for use with dial thermometers with a 1/4" NPT male connection.

Brass thermowells have a maximum temperature of 400°F. Maximum pressure is 5,000 psi at 70°F. Type 304 stainless steel and Type 316 stainless steel thermowells have a maximum temperature of 1650°F. Maximum pressure is 7,000 psi at 70°F. Type 304 stainless steel has good corrosion resistance. Type 316 stainless steel has excellent corrosion resistance.

Quick-response thermowells have thinner walls that allow for faster heat transfer and quicker temperature readings. Thermowells for insulated tanks have an extra-long nut to accommodate insulated tank walls. Heavy duty thermowells have thicker walls and a tapered Shank to withstand high-pressure and high-flow applications.

### Quick Response Thermowells

For Thermometers with 1/4", 5/32", and 9/64" Stem Dia.

OMEGA LOW FLOW LIQUID FLOWMETER

[RELATED SECTION 22 05 19]

Model Number: FTB4707
Location: Main House Mechanical Closet
Dimensions:
- Length: 10-1/4" [259 mm]
- Width: 2-3/4" [69 mm]
- Height: 1-1/2" [40 mm]
Finish: Nickel-plated brass
Features:
- Maximum temperature: 185°F [85°C]
- Maximum pressure: 175 psi [12 bar]
- Output: Squarewave
- Cable: #22 AWG 3-conductor, 12 ft [3 m]
- Maximum cable run: 2000 ft [650 m]
Electrical:
- Voltage: 5 to 30 Vdc
- Current: 20 mA maximum
Available: Omega Engineering
Price: $249.00

Square-Wave Output
One Moving Part
Rugged, Nickel-Plated Brass Body or 316 SS

The FTB4700 Series comprises plated brass meters that are ideal for water applications, with ranges from 0.2 to 18 GPM. The FTB4800 covers a wide flow range and is housed in a rugged stainless steel package. Single-jet simplicity, combined with high-quality jewel bearings, results in long life and relatively high tolerance to harsh fluids. Typical applications include chemical batching, proportional chemical injection, fertilizer injection, proportioning of spray chemicals, and general flow rate monitoring.

The FTB4700 is available with ½ and ¾" threads, with union-type meter couplings. The FTB4800 is available with ½, ¾ and 1" threads. A square-wave output makes these meters ideal for many OEM control applications. This signal interfaces easily with programmable logic controllers and computer input boards. The FTB4700 or FTB4800 Series meters can be combined with the DPF701-A panel flow meter for reading flow rate or total flow, with 4 to 20 mA output.

SPECIFICATIONS
Accuracy: ±1% FS

Dynaquip Controls 3-Way Valve

[Related Section 22 05 23]

Model Number: EYHG4AUE20H
Location: Main House Mechanical Closet
Dimensions:
- Length: 3-1/2"
- Width: 4-3/4"
- Height: 6-3/4"
Weight: 5.14 lbs
Finish: Brass
Features:
- Electronic Actuated Ball Valve
- Valve size: 3/4"
- Connection: FNPT
- Rated pressure: 400 psi CWP
- Port: diverter L style
- Number of ports: 3
- Direct mount
- Seats: RTFE
Electrical:
- Voltage: 24 Vac, 12/24 Vdc
Available: DynaQuip
Price: $378.75
DynaMatic Series

Electric Actuator with 3-Way Brass Ball Valve

The DYNAMATIC SERIES offers an excellent option for the majority of automated applications. The packaged valve and actuator unit is pre-sized and pre-assembled taking the guesswork out of sizing and assembly. The valve has a built-in platform mounting (eliminating brackets) giving a more compact assembly and true alignment. The valve has an O-ring stem seal design which keeps torque low and uniform there by extending cycle life.

Durable 3-Way Brass Ball valve has female threads and 90° Standard port diverting "L" pattern. All DynaMatic models are pre-sized for clean water, air, or light oil applications. Please call customer service for recommendations regarding dirty or severe service applications, lower airline supply pressures, or other voltage requirements.

Product Specifications and Information

**MATERIALS**

**Electric Materials**
- Housing: NEMA 4 rated, 4X Rated, Polyester Powder Coated Cast Aluminum
- Gear Train: Hardened Steel
- Output Shaft & Override: 116 Stainless Steel
- Output Shaft Seals: Buna N
- Lubrication: Permanent
- Motor: Reversing 115VAC, 18 or 24 VAC or VDC
- Duty Cycles: 50% (DB) and 20% (MA)
- Cycle Time: 2.5-15 seconds
- Temperature Ranges: -40°F to 150°F depending upon application.

**3-Way Brass Valve**
- Stem: Nickel Plated Brass
- Balls: Chrome Plated Brass
- Seats & Thrustwashers: PTFE
- Stem Seals: Viton® O-Ring
- Valve Rating: 400 psi CWPD
- Actuator Size: for 400 psi CWPD
- Temperature Range: -125°F to 200°F

**FEATURES & BENEFITS**
- Compact
- Reliable
- Economical
- Factory Sized & Assembled
- One Year Warranty from Installation
- Add-on accessories provide these units with wide application appeal
- 1/2" In 1 1/2" sizes can be wired in parallel

*Dependent on Application.*
The DynaMatic Series of actuated ball valves offers an excellent option for the majority of automated applications. The packaged valve and actuator unit is pre-sized and pre-assembled, taking the guesswork out of sizing and assembly. ISO 5211 direct-mount platform provides accurate alignment and a compact package without the need for clumsy brackets. Designed specifically for actuation, the ball valves have O-ring seals for lower torque and longer cycle life. Pneumatic actuated models are sized for 80 PSI air pressure minimum. Electrically actuated DynaMatic valves are available with 115VAC, 220VAC, 24VAC, 24VDC, and 12VDC. All DynaMatic models are pre-sized for clean water, air, or light oil applications. (PLEASE CALL CUSTOMER SERVICE for recommendations regarding dirty or severe service applications, lower airline supply pressures, or other voltage requirements.)

For Electric Actuator details and options, please refer to pages 2 and 3. For Pneumatic Actuator details and accessories, please refer to pages 4 and 5.
WATTS 3/4" SWEAT MIXING VALVE

[RELATED SECTION 22 05 23]

Model Number: 1170-US-M2
Location: Main House Mechanical Closet
Dimensions:
Weight: 1.6 lbs [.73 kg]
Finish: Bronze
Features:
  - Hot inlet temperature: 120°F - 200°F [49°C - 93°C]
  - Cold inlet temperature: 40°F - 85°F [4°C - 29°C]
  - Temperature out: 90°F - 160°F [32°C - 71°C]
  - Maximum temperature: 200°F [93°C]
  - Maximum pressure: 150 psi [10.34 kPa]
  - Minimum supply pressure: 30 psi [207 kPa]
  - Maximum pressure differential between hot and cold water supplies: 25%
Available: Murray Supply
Series 1170 and L1170
Hot Water Temperature Control Valves

Sizes: ½" – 1" (15 – 25mm)

Series 1170, L1170 Hot Water Temperature Control Valves are specifically designed for mixing hot and cold water on hot water supply systems. They can be used for a variety of applications to reduce the temperature of the hot water from the system, and are ideal for radiant heat applications. This series features a “double throttling” design which combines the control of the hot and cold water to provide a sensitive response to changes in water temperature passing through the mixing chamber.

The 1170-M2 can be set to any temperature between 90°F and 160°F (60°F and 120°F for model L1170-M2) with flow rates as low as 0.5 gpm and as high as 23 gpm (refer to capacity chart on the back). The superior flow characteristics of this valve provide accurate temperature control to the requirements of ASSE: 1017* across the rated flow range.

These valves also provide additional safety as they restrict mixed water out to a drip upon loss of cold water supply to the valve.

As an added feature, the 1170-M2 and L1170-M2 incorporate integral check valves and filter washers in both the hot and cold water inlets to protect against cross flow. Available with threaded (-UT), solder (-US), PEX, (-QC) Quick-Connect or CPVC connections.

Features
- Bronze body construction
- Solid wax hydraulic principle thermostat assures dependable mixing of hot and cold water
- Thermostatic controls both hot and cold water
- Models available with solder, thread, PEX, Quick-Connect or CPVC end connections
- Integral filter washers and check valves
- Adjustment cap with locking feature
- ASSE 1017 listed*

Specifications
A Hot Water Temperature Control Valve shall be installed on water heating equipment to provide tempered water to supply piping. Valve shall have a bronze body, include integral check valves and operate so the thermostat controls the cold and hot water ports. The valve shall be provided with solder (-US), threaded (-UT), PEX, (-QC) Quick-Connect or CPVC connections. Valve shall be ASSE Standard 1017* Listed. Valve shall be a Watts Regulator Company 1170-M2 or L1170-M2.

*ASSE 1017 listing is for valves used in hot water source applications.

†WARNING
Watts Hot Water Temperature Control Valve Series 1170 are designed to be installed at or near the boiler or water heater. They cannot be used by themselves for tempering water temperatures at fixtures where ASSE Standard 1016 or ASSE Standard 1070 listed devices are required. To comply with ASSE Standard 1016 or ASSE Standard 1070, listed devices such as Watts Series L111, USG or MMV should be used at fixtures to prevent possible injury.

Watts Hot Water Temperature Control Valves Series 1170 are not designed to compensate for system pressure fluctuations. Such use may result in severe bodily injury (e.g. scalding or chilling) and/or death.

When installing the Series 1170 valves in radiant heat applications, the components of the radiant heat system must be of materials with a construction capable of withstanding the high limit output temperatures of the heating boiler. If you are uncertain as to the product’s adaptability for your application, please consult an authorized representative before installing or using the product.

CASH ACME HEATGUARD 3/4" SWEAT MIXING VALVE

[RELATED SECTION 22 05 23]

Model Number: 110-DLF
Location: Main House Mechanical Closet
Finish: Bronze
Features:
- Flow rate: 1.0 gpm - 20 gpm
- Hot inlet temperature: 195°F maximum [90°C]
- Cold inlet temperature: 39°F - 80°F [5°C - 27°C]
- Temperature out: 90°F - 130°F [32°C - 54°C]
- Maximum pressure: 145 psi [1000 kPa]
Available: Alternative Heating & Supplies
Price: $85.65
Heatguard® 110-D Thermostatic Mixing Valve

Delivers water at a safe 120°F (49°C) or lower from all outlets, while allowing the heater to be set at a germ-killing 140°F (60°C) or higher which aids in preventing the growth of legionella bacteria in the water heater. The higher tank temperature means that hot water demands can be satisfied longer. Robust, low complexity construction. Every valve is tested for performance prior to shipping. Unique purpose designed adjuster tool minimizes unauthorized tampering with valve setting.

Approvals:

The Heatguard® 110-D is certified to ASSE 1017 and CSA B125.3 and is listed by ASSE and IAPMO.

**VIEGA PUREFLOW MANIFOLD 14 PORT**

[RELATED SECTION 22 11 13]

Model Number: MANABLOC

Location: Main House Mechanical Closet

Dimensions:

- Length: 15-15/16" [406 mm]
- Width: 8" [203 mm]
- Height: 3" [76 mm]

Features:

- Total ports: 14
- Port size: 1/2"
- Main waterway: 1-1/4" [31.8 mm]
- Flow rate: 4 gpm
- Pressure drop: 3.4 drop

Available: Murray Supply
PureFlow® MANABLOC® Manifold Control Unit For ViegaPEX™, ViegaPEX™ Ultra and FostaPEX® SDR-9 Cross-linked Polyethylene (PEX)

Scope
This specification designates requirements for the PureFlow MANABLOC Manifold Plumbing Control Unit. The MANABLOC parallel water distribution system supplies water to individual plumbing fixtures through dedicated ports and distribution lines. Each port (outlet) is equipped with a built-in shut-off valve to provide control for each fixture from a central location. The MANABLOC has separate hot and cold water inlets and ports to manage the entire plumbing system. A variety of fitting options are available for the MANABLOC distribution ports, including PEX Compression, Bronze PEX Press, Brass PEX Crimp and PolyAlloy PEX Crimp fittings. These distribution connections come complete with the MANABLOC when ordered. However, supply connections and fixture transition fittings are not included with the unit but are available separately.

Materials
The modular MANABLOC sections are molded from polysulfone (PLS) plastic. This material is used extensively in the medical industry and is highly resistant to hot water, chlorine and other chemicals typically found in potable water systems. The other components making up the MANABLOC consist of corrosion-resistant metals and engineered plastics that have been chosen specifically for each purpose. The stiffener used in the compression port fitting assembly is manufactured from 304 stainless steel.

Marking and Certification
MANABLOC units are marked with the product name, unit part number, material designation, production date and marks of third-party certifications by NSF International (NSF-pw) to ASTM F877 and ANSI/NSF standards 14 and 61, CSA B137.5 Warnock Hersey, and are listed with IAPMO as meeting the requirements of the Uniform Plumbing Code.

Recommended Uses
The MANABLOC is recommended for use in hot and cold potable water distribution systems in single and multifamily dwellings, as well as multiple-unit structures (apartments, condos, hotels, motels, etc.). Maximum pressure/temperature rating is 100 psi @ 180°F. The MANABLOC is not to be used directly in line with hot water domestic recirculation loops. PureFlow MANABLOC system components are not interchangeable with components and tubing from other suppliers. For information on other hot and cold applications not listed here, consult with your Viega representative.

Handling and Installation
The MANABLOC must be protected from UV exposure and petroleum products that can damage them. Use of these materials in hot and cold water distribution systems must be in accordance with good plumbing practices, applicable code requirements, and current installation practices available from Viega. Contact a Viega representative or the applicable code enforcement bureau for information about approvals for specific applications.

Quality Assurance
When the product is marked with the ASTM F877 designation, it affirms that all MANABLOC manifold control units are factory-assembled and pretested prior to delivery to the field. Viega utilizes protective packaging to reduce risk of damage during shipping and storage. MANABLOC manifolds are not intended to be fabricated or disassembled in the field. MANABLOC manifolds are intended for potable water use only.

Certification
- NSF International Performance and Health Effects (Standards 14 & 61)
- IAPMO Certified
- Intertek Testing Services (Warnock Hersey) - certification to CSA B137.5

ROTTONICS LOAF WATER TANK

[RELATED SECTION 22 12 19]

This is a temporary facility that is only used for the purposes of the competition in Washington, D.C. and does not apply to the affordability of the Solar Homestead.

Model Number: 6457 H
Location: east of the north ramp beneath straw bales
Dimensions:
  - Length: 62-1/2”
  - Width: 41-1/2”
  - Height: 30”
Weight: 95 lbs
Features:
  - Capacity: 300 gal
  - 8” lid opening
  - Molded-in grooves for easy tie down
  - Impact and corrosion resistant
  - Seamless, one-piece construction
  - Materials NSF-61 approved
Approval Certificates:
  - ANSI/ MSF
Available: Rotronics
Rotronics Loaf and Pickup Truck Tanks

**RMI-I**

- Industrial and agricultural tanks designed for transporting and sprayer applications.
- Ideal for numerous farming containment needs, from farm chemicals to potable water.
- Impact and corrosion resistant.
- Molded-in grooves for easy tie down.
- Available in Crosslink Polyethylene or FDA approved High Density Linear Polyethylene (ANSI/NSF Standard 61).

- Seamless, one piece construction.
- Polyethylene offers tremendous chemical resistance.
- RMI Polyethylene Tanks are very durable, yet lightweight, and easy to install and clean.
- Molded-in tie downs secure tanks.
- Low profile for cab visibility.
- FDA approved High Density Linear Polyethylene (ANSI/NSF Standard 61).
- Available in sizes to fit both full size and compact pickup trucks.

**Limited Tank Warranty:** RMI warrants to the original purchaser all tanks manufactured by RMI to be free from defects in material and workmanship for a period of five (5) years from date of manufacture, with the exception of D.O.T. and Septic Tanks, which have a special warranty. The Guide Tanks also have a (5) year warranty. Review the chemical resistance guide and warranty instruction information prior to the installation and use of RMI Tanks. Hard-plumbing of tanks is not recommended due to the expansive/contractive characteristics of Polyethylene. All weights, dimensions, and gallowage markers are approximate.

WELLSAVER 20 GALLON PUMP TANK

[RELATED SECTION 22 12 19]

This is a temporary facility that is only used for the purposes of the competition in Washington, D.C. and does not apply to the affordability of the Solar Homestead.

Model Number: LPT-20H
Location: underneath Outdoor Shower
Dimensions:
  Diameter: 15”
  Height: 17”
Finish: blue high UV powder coat
Features:
  Capacity: 20 gal
  Drawdown gallons:
    7.4 gallons @ 20-40 PSI
    6.2 gallons @ 30-50 PSI
    5.4 gallons @ 40-60 PSI
  4” fill cap
  1-1/2” PVC bulkhead fitting
Available: Lowes
Price: $149.00

SURE-VENT AIR-ADMITTANCE VALVE

[RELATED SECTION 22 13 19.36]

Model Number: 39016
Location: Flex Bath
Dimensions:
  Diameter: 2-5/8"
  Length: 4-1/2"
Weight: 0.37 lbs
Features:
  PVC with 2" NPT threads
  2" PVC adapter
Available: Oately
TECHNICAL SPECIFICATION: The purpose of an Air Admittance Valve is to provide a method of allowing air to enter the plumbing drainage system without the use of a vent extended to open air and to prevent sewer gases from escaping into a building. An Air Admittance Valve is a one way valve designed to allow air to enter the plumbing drainage system when negative pressures develop in the piping system. The device shall close by gravity and seal the vent terminal at zero differential pressure (no flow conditions) and under positive internal pressures.

Materials and Dimensions
- Valve – PVC with 2” NPT Threads
- Tension Membrane – Neoprene
- Adapter – 1-½” x 2” PVC or ABS

Features
- Rated 20 DFU’s for venting DWV 2” and smaller
- Sweet Spot™ technology opens at -0.01 psi and seals at 0 psi and above
- Screening on air inlets to guard the seal
- Protective rubber sleeve provides grip for installation and keeps valve free from debris
- 100% functionally tested at ¾” H₂O and 30” H₂O ensuring trouble free performance
- Limited Lifetime Warranty

Listings
- ASSE 1050 & 1051
- ICC ESR-1664
- NSF Standard 14
- IAPMO – Classified Mark
- ASTM D 2665/D 2661

Code Approvals
- International Plumbing Code (IPC) 2003
- International Residential Code (IRC) 2003

Installation: Read installation instructions prior to use of this product. Always consult local plumbing codes prior to installing an AAV. Individual, branch and circuit vents are permitted to terminate with a connection to a Sure-Vent® AAV. The Sure-Vent® AAV will only vent fixtures that are on the same floor and connect to a horizontal branch drain. The horizontal branch drain shall connect to the drainage stack a maximum of four branch intervals from the top of the stack. The Sure-Vent® AAV should be located within the maximum developed length permitted for the vent. The Sure-Vent® AAV must be located a minimum of 4 inches above the horizontal branch drain and 6 inches above any insulation material and within 15 degrees of vertical. Every structure in which plumbing is installed shall have at least one primary stack vent. The stack vent should run as directly as possible from the building drain through to the open air.

Apply approved pipe joint compound or thread seal tape to the male threads of the valve. Remove protective orange rubber sleeve after installation.

Sure-Vent® AAV are intended for installation in the confines of a structure, cannot be exposed to outside elements and are intended for use between -40° F and 150° F. AAVs must be accessible for inspection and service.
HUSKY CUSTOM WASTE WATER BLADDER TANK

[RELATED SECTION 22 13 53]

This is a temporary facility that is only used for the purposes of the competition in Washington, D.C. and does not apply to the affordability of the Solar Homestead.

Model Number: Custom
Location: underneath Deck
Dimensions:
  Length: 240"
  Width: 60"
  Height: 8"
Weight: 60 lbs
Features:
  Capacity: 500 gal
  Folds down for compact storage
  1-1/2" flange and ball valve
  2" PVC vent
  3" PVC bulkhead fitting
  4" fill cap
Approval Certificates:
  NSF-61
Available: The Tank-Depot
Price: $514.99
Husky 500 Gallon Gray Water Bladder Tank

Bladder tanks have unlimited practical uses including:

- Providing drinking water storage for disaster area victims
- Additional fresh water for boats or RV
- Waste water containment
- Rain Water Collection for Irrigation Systems
- Pesticides and insecticides
- Nurseries
- Farming, watering livestock or treating with insecticides
- Fuel storage, diesel, gas, jet, etc.
- Gray water storage for pressure washing systems
- Fire Fighting
- Black Water (sewage)
- Flatbed Truck Tanks
- Railcar Tanks

- Materials NSF-61 Approved (potable water)
- 25-75 gal. comes with a 3/4” Flange and Ball Valve
- 1 1/2” Flange and Ball Valve Standard on Sizes 100-1000 gal.
- 4” Fill Cap or 7” Diameter Fill Sleeve
- Easy to Handle, Folds down for Compact Storage

Part Number: HPC-BT-500
Capacity: 500 Gallons
Size: 84"L x 108"W x 16"H
Weight: 33 lbs.
Ships From: OK

ZURN SMALL AREA ROOF DRAIN

[RELATED SECTION 22 14 26.13]

Model Number: RD2080

Dimensions:
- Diameter: 8-3/8” [213 mm]
- Length: 9-7/8” [275 mm]

Features:
- 2” PVC hub connections
- Dura-Coated cast iron clamp device with an integral gravel guard and a polyethylene dome strainer

Available: Murray Supply
**RD2080 Small Area Roof Drain**

**Diameter Small Roof Drain** Constructed of a PVC or ABS body, complete with steel-threaded inserts for increased strength and longevity. Standard to the roof drain is a Dura-Coated cast iron clamp device with an integral gravel guard and a polyethylene dome strainer.

**Options:**
- AL Aluminum Dome Strainer
- C Underdeck Clamp
- CI Cast Iron Dome Strainer
- E Extension Flange
- R Roof Sump Receiver
- VP Vandal Proof Screws for Dome

**Features:**
- Recommended for installation in flat areas with decks that are constructed of steel, wood, or concrete.
- Cast iron clamp device is provided to ensure strength and stability necessary for water-tight seal.
- PVC or ABS plastic body easily adapts to plastic pipe, simplifying the installation process.

Our most popular heater for whole house applications, the Stiebel Eltron Tempra 24 electric tankless water heater is a powerful 24 KW heater is an excellent choice for most whole house applications in the Northern U.S., Canada, and other regions where the incoming water temperature can drop below 45°F. The Tempra 24 is also frequently used in warmer southern climates for applications requiring higher flow rates of up to 5 gallons per minute (larda Roman-style or jacuzzi tubs, simultaneous showers, etc.), as well as for commercial applications.

Like all Tempra Series tankless water heaters, the Tempra 24 features true microprocessor-controlled temperature regulation and a dial selector which allows you to set the desired output water temperature at any level between 80 and 140°F (30 and 60°C). It is one of the only tankless water heaters on the market that features a true thermostatic temperature control and full power-modulation based on both the incoming water temperature and the water flow rate. The Tempra 24 will automatically adjust its power output to accommodate changes in the incoming water temperature and flow rate so it can precisely maintain the desired output temperature. The result is the most precise temperature control of any tankless water heater on the market today!

* Suitable for supply with up to 130°F / 55°C  
* Tankless water heaters are considered a non-continuous load  
* Conductors should be sized to maintain a voltage drop of less than 3% under load  
** Requires a 1/2” main service

## Description

- Saves Energy and Reduces Your Electric Bills  
- Residential or commercial applications  
- Outperforms bulky hot water tanks  
- Reduces hot water pipe runs  
- Reduces piping losses  
- Made in Germany  
- No venting required  
- Sleek design fits in anywhere  
- 3-year warranty  
- Seismic proof construction  
- Microprocessor control  
- Accurate temperatures (from 86 °F - 140 °F) ensure code compliance is easy  
- No mixing valve, drain valve, or T&P* valve required (*Except in MA, or where local code dictates)

Temptra® Plus featuring Advanced Flow Control™

Advanced Flow Control is exclusive to the Temptra® Plus and ensures a constant temperature output no matter how great the hot water demand is.

Advanced Flow Control technology works by automatically adjusting the flow of water to eliminate unpleasant temperature fluctuations. This ensures an accurate temperature output at all times.
STIEBEL ELTRON TEMPRA POINT-OF-USE WATER HEATER

[RELATED SECTION 22 33 13]

Model Number: 220817 - MINI 6
Location: Flex Space and Outdoor Kitchen Mechanical Closet

Dimensions:
- Width: 7-1/2" [165 mm]
- Height: 6-1/2" [190 mm]
- Depth: 3-1/4" [82 mm]

Weight: 3.44 lbs [1.56 kg]

Features:
- Minimum required circuit breaker size: 30 A
- Recommended wire size: 10 AWG
- Working pressure: 150 psi
- Minimum water flow: 0.85 gpm
- 3/8" outside diameter flex connector

Electrical:
- Wattage: 537 W
- Voltage: 220-240 V
- Current: 24.7 A

Approval Certificates:
- ETL

Available: e-Tankless Water Heaters
Price: $159.00
The Stiebel Eltron Mini™ Series tankless water heaters are economical, ultra-compact, attractive point-of-use tankless water heaters designed for consistent, low-flow point of use applications. The Mini Series is most suited to applications in which a relatively constant flow rate is used. If the flow rate of your application is likely to fluctuate due to varying water demands or varying water pressures, etc., we recommend that you consider a DHC-E 8 tankless water heater instead as they include thermostatic control and flow-based power modulation technology.

Due to its compact size, the Stiebel Eltron Mini 6 easily fits directly under a sink or an adjacent cupboard or closet, so it delivers hot water straight to the sink with almost no delay. By locating the heater right next to where the hot water will be used, you can also virtually eliminate thermal heat loss which is commonly associated with long pipe runs. If the Mini 6 is able to supply all of the hot water needs for the entire room, you can also eliminate the need to run a hot water line all the way from the main central water heater in new construction applications.

The Mini 6 is extremely energy efficient as it produces hot water on demand only as it is required. A sophisticated water flow sensor recognizes when hot water is being used and activates and deactivates the unit automatically so it only runs when you are actually using water. This eliminates standby thermal heat losses often associated with traditional tank style water heaters. Due to this, you can expect to see a significant cost reduction over the operating cost of a conventional water heater.

UTILITECH 2 GALLON WATER HEATER EXPANSION TANK

[RELATED SECTION 22 33 13]

Model Number: LET-2
Location: Main House Mechanical Closet
Dimensions:
  Diameter: 8"
  Height: 12-1/2"
Finish: blue high UV powder coat
Features:
  Capacity: 20 gal
  Drawdown gallons:
    7.4 gallons @ 20-40 PSI
    0.6 gallons @ 30-50 PSI
    32.3 gallons @ 40-60 PSI
  4" fill cap
  1-1/2" PVC bulkhead fitting
  Discharge size: 3/4"
Available: Lowes
Price: $39.00

NEXT GENERATION ENERGY COLLECTOR

[RELATED SECTION 22 33 30.23]

Model Number: NGE-224-TU
Location: roof over Core Module
Dimensions:
   Length: 77-1/2"
   Width: 73"
   Height: 6-1/4"
Weight: 185 lbs
Features:
   Outer tube diameter: 2-1/4"
   Inner tube diameter: 1-7/8"
   Length of tube: 70-7/8"
   Collector casing: aluminum
   Aperture area without reflector: 26.26 ft²
   Maximum pressure: 87 psi
   Inlet/outlet connect: 3/4"
   Heat transfer fluid: 0.67 gal
   Stagnation temperature with reflector: 482°F
Available: Indoor Environment Systems
NGE - TU Series
Solar Thermal Collectors

The Most Efficient Tube Collector On The Market

10 Year Warranty
Year round functionality
Versatile and easy to install
Functions well in cold and windy weather conditions
Extremely durable
Can achieve temps of 400° F

</table>
• The most efficient, cost-effective tube collector on the market today
• Applications include heating, hot water, and cooling
• Can be mounted on any pitch, vertically or horizontally
• 2 NGE-116TU tube collectors provides domestic hot water for an 80 gallon tank
• 25 year life span

NGE TU Powerhouse

The main components of NGE tube collectors are glass, aluminum, copper, and brass. All aluminum is anodized and structurally strong to allow fastening anywhere on the frame, using stainless steel fasteners. The tubes are built to be installed in any direction; horizontal, vertical, manifold up, down, left or right.

NGE TU series collectors work extremely well in all climates. Extreme cloud cover, cold, windy, or rain does not affect this system in the same way as more traditional systems. Our ability to capture infrared energy eliminates the low or zero production typical in cloudy weather. NGE evacuated tube collectors capture and deliver heat to you when you need it the most.

Each of our collectors use significantly less power due to the low flow requirements of the U-tube design. The collectors utilize pipe runs of small diameter due to these low flow requirements. Most NGE domestic hot water systems use 3/8 inch copper line sets.

Our collectors do not need to be disassembled for installation. The 1x6 series can be assembled and commissioned by a single installer, cutting labor costs. In the rare instance a tube does become damaged, replacement is a snap, completed in a few minutes at minimal cost by one Installer. Fluid in the system can be changed out when necessary. Tradespeople who are familiar with closed loop pressurized systems will not need major retraining.

NGE tube have been designed to interface with standard size tanks available on the market. String is easy with our “per tube” hot water charts. Because these collectors are so much more efficient and can do more with less light, they can be much smaller. When utilizing the Zilla™ Racking and Mounting system, the NGE TU series are low profile, elegant and efficient solar thermal systems that will function for decades.

• Works well in low ambient air temps and in cloudy or windy conditions
• Will receive consistent amount of sun year-round
• Low flow rate = smaller pipes and pumps
• No mechanical parts to wear out
• Designed to integrate with Zilla™ Rac

Superior Technology

NGE evacuated tube collectors are superior to all other “evacuated tube” collectors for several aesthetic and technological reasons. Our tubes have no mechanical components to wear out. Heat transfer fluid (water or a glycol/water mix) simply circulates through the collector. There are no snap discs, and no copper to copper friction heat transfer connections that lose energy and thus efficiency over time. The three coil absorber process design of the U-tube collector and construction within the internal heat transfer system allows energy to be collected from any angle. There is no need to turn the tube to maximize heat collection. Our collectors, depending upon the mounting method, can have the same angle of incidence throughout the day or season. Our tubes collect energy all day. Typically our collectors are working from 0.5 hour after sunrise to 0.5 hour before sunset.

Not all collector days are the same. It is important to note that the current and outdated testing methods do not do our collectors justice. For our tubes, there does not need to be a full sun hour or a “no degree angle of incidence.” These collectors make maximum use of the sun of all day. Low slope roofs – no problem, steep pitches – no problem, flat roofs – no problem, wall mounts – no problem. In fact, our collectors are the most aesthetically pleasing and easily installed evacuated tube collectors on the market. The absorber surface is 300 degrees, allowing our collectors to capture energy from all angles. They can even capture energy from the backside.

Another key element to our unique design is that the majority of energy transfer of energy to the heat transfer fluid occurs within the vacuum itself. Other designs do this same process outside of the vacuum, resulting in increased heat loss. NGE evacuated tube collectors are simply superior in real world applications.

Evacuated Tube Diagram
WICKS & WAX RE-MELT PARAFFIN WAX BLEND

[RELATED SECTION 22 33 30.23]

Model Number: Re-Melt Paraffin Wax Blend
Location: Main House Mechanical Closet
Features:
- Collected and re-melted and combined paraffin wax with a melting point of 140°F.
- This will be used as a medium for thermal storage in a custom built heat-exchanging device “ASU-LSED.”
- Off-white, yellow color
- Slight vanilla fragrance
Available: Wicks & Wax
Re-Melt Paraffin Wax

Save with these paraffin blocks that are melted down candles that were damaged during shipping. Colour is an off-white yellow and has a slight Vanilla fragrance. Melt point 180°. Pour at 200°-210°F.

Blocks weigh approx 2.5kgs (5.5 lbs) each.

Place your order in Kilograms and we will adjust the final price +/- depending on the actual weight of each block.

**SUNDA SOLAR COLLECTOR**

[RELATED SECTION 22 33 30.23]

Model Number: Seido 2-16
Location: roof over Core Module

Dimensions:
- Length: 83-3/4" [2126 mm]
- Width: 75-1/2" [1920 mm]
- Height: 5-3/8" [150 mm]

Weight: 220.5lbs [100kg]

Features:
- Tube construction: SEIDO2---Direct flow vacuum tube with flat absorber
- Angle of inclination: 0° to 90°
- Number of tube collectors: 16
- Absorber area: 2.77 m²
- Aperture area: 2.93 m²
- Gross area: 4.08 m²
- Glass material: borosilicate glass
- Glass tube diameter: 100
- Wall thickness: 2.5mm
- High vacuum, long term stability: <10-5 mbar
- Absorber material: aluminum
- Selective coating: aluminum nitride
- Absorbance: >.92
- Emittance: <.08
- Insulation: polyurethane foam
- Maximum operating pressure: 6 Bar
- Stagnation temperature module: 190°
- Stagnation temperature pipe: 247°C

Available: Alternative Energy Engineering

**CARE AND CLEANING:**

Care should be given to the cleaning of this product. While its finish is extremely durable, it can be damaged by harsh abrasives or polish. To clean, simply wipe gently with a damp cloth and blot dry with a soft towel.

**NOTE:** Dimensions may vary +/-1/2” and are subject to change or cancellation. Primary dimensions are provided in Imperial measurements, transposition to millimeters is the sole responsibility of the installer. Dimensions for Location of Supply are Suggested. Opella, LLC assumes no responsibility or liability for local or state regulations which deviate from national standards. It shall be the responsibility of the installer to comply with local codes and standards prior to installation of any Opella product.

- **Spout Height (Inches):** 20.0
- **Side Spray Included:** No
- **1-Hole Sink Compatible:** Yes
- **2-Hole Sink Compatible:** Yes
- **Number of Faucet Handles:** 1-handle
- **3-Hole Sink Compatible:** Yes

---

#### Specifications

- **4-Hole Sink Compatible:** Yes
- **Maximum Flow Rate (GPM):** 2.2
- **CA and VT Low-Lead Standards Compliant:** Yes
- **Handle Type:** Lever
- **Items Required for Standard Installation:** Plumber's putty, adjustable wrench
- **ADA Compliant:** Yes
- **Built-In Water Filter:** No
- **Mounting Location:** Sink/counter mount
- **Color/Finish Family:** Steel-Stainless
- **Manufacturer Color/Finish:** Stainless Steel
- **Collection Name:** AquaSource Faucets
- **Soap or Lotion Dispenser:** Yes
DIVISION 23

HEATING, VENTILATION, AND AIR CONDITIONING
VAISALA INTERCAP HUMIDITY AND TEMPERATURE PROBE

[RELATED SECTION 23 09 13.23]

Model Number: HMP60
Location: HVAC Compartment and South Hall
Dimensions:
- Diameter: 1/2" [12 mm]
- Length: 2-7/5" [71 mm]
Features:
- Temperature measurement range: -40° C to +60°C with accuracy of ±0.6°C
- Relative humidity [RH] measurement range: 0 to 100% RH
- Cable length: 15’
Available: Vaisala
Vaisala INTERCAP® Humidity and Temperature Probe HMP60

Technical Specifications
Relative humidity measurement
- Measurement range: 0 ... 100 % RH
- Accuracy: ±3 % RH
- Temperature range: 0 ... +40°C
- Resolution: ±0.5 % RH

For other temperatures, please see the brochure.

Humidity sensor: Vaisala INTERCAP®

Temperature measurement
- Measurement range: -40 ... +60°C
- Accuracy over temperature range: ±0.6°C
- Resolution: ±0.1°C

Operating environment
- Operating temperature: -40 ... +60°C
- Relative humidity: 0 ... 100 %
- Altitude: up to 2000 m

Inputs and outputs
- Operating voltage: 5 ... 24 VDC / 0 ... 20 VDC with 5V output
- Additional voltage: 8 ... 24 VDC with loop power converter
- Current consumption: max. 5 mA, max. 10 mA

Other supply voltages: 10.5V 4s

Outputs: 2 channels
- 1 channel loop-power converter (separate module, compatible with humidity accuracy only)
- 1 channel RS485 2-wire half duplex

Mechanics
- Materials:
  - Body: chrome coated aluminum
  - Grille filter: chrome coated AISI 316 plastic
  - Cable: polyethylene or FEP
  - Housing: MD2 x 10 mm
  - Connector: 4-pin M8 (IEC 60947-5-2)
  - Weight: 23 g

For complete specifications, please see the brochure or user guide in "Documents".
Vaisala INTERCAP® Humidity and Temperature Probe HMP60

The HMP60 for extreme conditions.

**Features/Benefits**
- Miniature-size humidity probe
- Low power consumption
- Measurement range: 0 ... 100 %RH; -40 ... +60°C
- Cable detachable with standard M8 connector
- Rugged metal housing
- Interchangeable Vaisala INTERCAP® Sensor
- Optional RS485 digital output
  - Optional dew point output
- Applications: volume applications, integration into other manufacturers’ equipment, glove boxes, greenhouses, fermentation chambers, and data loggers.

**HMP60**
The HMP60 is a simple, durable and cost-effective humidity probe. It is suitable for volume applications, integration into other manufacturers’ equipment, incubators, glove boxes, greenhouses, fermentation chambers, and data loggers.

**Easy Installation**
The probe cable has a screw-on quick connector for easy installation. Different cable lengths are available. Also other compatible M8 series cables can be used. Accessories are available for different installation needs.

**Low current consumption**
The HMP60 is suitable for battery-powered applications because of its very low current consumption.

**Several outputs**
There are two configurable voltage outputs with relative humidity, temperature or dew point scaling. Four voltage output ranges are available.

**Rugged design**
The HMP60 is designed for extreme conditions. The aluminum body of the HMP60 is classified as IP65. The probe has a sealed structure and the sensor is protected by a membrane filter and a plastic grid, or optionally by a stainless steel filter.

**Recalibration not needed**
The Vaisala INTERCAP® Sensor is interchangeable. No recalibration is required; the sensor can simply be replaced, also in the field.

BAPI LOW PROFILE “BUTTON” SENSOR

[RELATED SECTION 23 09 13.23]

Model Number: BA/10K-2-LP-15
Location: Bedrooms
Dimensions:
  Diameter: 3/8” [9.5 mm]
  Depth: 1” [25.4 mm]
Features:
  Cable type: plenum rated
  Thermistors: 10 Ω @ 25°C
  Low profile flush mounting sheath
Available: Building Automation Products, Inc. [BAPI]
Price: $25.00
Button Sensor - Low Profile Room Temperature Sensor

Part Number: BAI-LP

Description

The Low Profile "Button" Sensor is ideal for locations where aesthetics are as important as the temperature measurement. The inconspicuous room sensor mounts easily by pushing through a 3/8" hole and secured with a peel off tape strip. The only visible portion is a flush 7/8" dot on the wall.

The Button Sensor is available in multiple thermistor or RTD sensors as shown in the specifications. Other sensor types are available on request.

- Small Flush Sensor Mounting
- Accurate Direct Air Measurement
- Paintable with Latex or Oil Base
- Wide Selection of Sensing Elements
- Plenum Rated Wiring
- Limited Lifetime Warranty

BROAN ULTRA SILENT HUMIDITY SENSING FAN

[RELATED SECTION 23 34 00]

Model Number: QTXE110S
Location: Core Module Bath
Dimensions: [L x W x H]: 10-1/2" x 11-3/8" x 7-5/8"
Weight: 12.2 lbs
Features:
  - Current: 0.3 A
  - 0.7 Sones
  - 110 CFM
Available: Broan-NuTone, LLC
Humidity Sensing Fan
Model QTEXE110S

- 0.7 Sones
- 110 CFM
- Sensaire® technology detects the rapid rise in humidity over time
- Auto shut-off time is adjustable from 5 to 60 minutes
- Helps prevent lingering, excessive humidity which can cause mold
- Humidity is sensed at the ceiling where it is most prevalent
- Hanger bars for easy, Fast and Universal installation in all types of construction
- UL Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit.
- 6" ducting for superior performance
- ENERGY STAR® qualified

Sensaire® technology detects rapid increases in moisture levels at the ceiling, where steam and humidity naturally rise. Regular humidistsats located on the wall simply detect absolute humidity levels and are prone to false triggers, or not operating when they should.

An automated solution to fight excess humidity and mold.

Our humidity sensing fans turn on and off automatically to help prevent cosmetic and structural problems associated with excess moisture.

Adjust the sensitivity level and run-time.
Just beneath the drop-down grille are easy-to-adjust sensitivity and run-time controls. Choose your preference, set with a screwdriver and forget it. Of course, you can always override the sensor at the touch of a switch.

Hands-free operation.
Since you never have to worry about turning the fan on, Broan Ultra Silent™ is ideal for problem areas in residential, institutional and light-commercial applications. Our exclusive Sensaire® technology is a perfect solution for high-traffic bathrooms, or a kid’s bathroom.

It turns off automatically, and that saves money.
Humidity sensing fans are ideal for anyone who leaves the house before humidity is properly vented. With a fan this quiet, you can’t forget to turn it off when the job is done. That saves energy and money.

Contact your local dealer for pricing information.

Additional Models Available:
- QTEXE110S: Humidity Sensing Fan
MODEL QTXE110S
VENTILATOR

A modern-styled, high performance fan, with sensing circuitry, that “knows” when to ventilate the room.

FEATURES

BLOWER:
• Plug-in, permanently lubricated motor - engineered for continuous operation
• Dynamically balanced centrifugal blower wheel for quiet, efficient performance
• Maintains a high percentage of rated CFM in less than ideal installations
• Low RPM for quiet operation

HOUSING:
• Rugged, 26 gauge, galvanized steel construction
• 6” round ducting for superior performance
• Polymeric duct connector with tapered sleeve and no metallic clutter
• 7-5/8” height allows for 2” x 8” (nominal) joist installations
• Sturdy, easy, four-point mounting directly to joist
• Includes unique spacer (patent pending) for mounting to engineered “I” joists
• Includes hanger bars to position housing anywhere between 16” to 24”-on-center joists
• Two sets of mounting holes for hanger bars allow flush installation with bottom or top of drywall

AUTOMATIC CONTROL:
• Humidity control automatically turns fan ON when either of these conditions is detected:
  - a rapid to moderate (user adjustable) increase of humidity
  - humidity above user-adjustable set-point (50%-100% RH)
• Two wire manual operation for odor control - Turns fan ON when power line through wall switch is cycled ON, OFF and back ON
• Remains ON for a user-adjustable 5 to 60 minutes after humidity has stabilized and is below set-point or after manually initiated through power line cycling
• Saves energy because unit runs only for the time required. A unit controlled with a wall timer may keep fan ON longer than required or turn it OFF before room is sufficiently ventilated

ACCESSORY CONTROL (Purchase separately):
Designed by Broan for use with this product (purchase separately)
• Model 68V, P68V (Ivory) / 68W (White) 2-Function Wall Control

U.L. Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit (ceiling mount only).

3-Year Warranty

TYPICAL SPECIFICATION

Ceiling Ventilator shall be Broan Model QTXE110S.
The unit will have a control that will automatically turn fan ON when humidity increase is rapid to moderate (user adjustable), or when humidity is higher than user-adjustable set-point (50%-100% Relative Humidity), or when supply power is cycled from ON (for more than a second) to OFF (for less than a second) and back ON. It shall be user-adjustable to turn OFF 5 to 60 minutes after humidity has stabilized and is below user-adjustable set-point, or after manually initiated by supply power cycling.

Ceiling Ventilator shall have corrosion resistant galvanized steel housing with four-point mounting capability. It shall be ducted to a roof or wall cap using 6” round ductwork.

Blower assembly shall be removable, have a centrifugal-type blower wheel and a permanently lubricated motor designed for continuous operation.

Non-metallic damper/duct connector shall be included.

Air delivery shall be no less than 110 CFM and sound level no greater than 0.7 Sones. All air and sound ratings shall be certified by HVI. Ceiling Ventilator shall be Energy Star® qualified and have an energy efficient permanent split capacitor motor.

Ceiling Ventilator shall be U.L. Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit.

AIR FLOW PERFORMANCE

HVI-2100 CERTIFIED RATINGS comply with new testing technologies and procedures prescribed by the Home Ventilating Institute, for off-the-shelf products, as they are available to consumers. Product performance is rated at 0.1 in. static pressure, based on tests conducted in a state-of-the-art test laboratory. Sones are a measure of humanly-perceived loudness, based on laboratory measurements.

Technical Details

- Provides makeup (outside) air to help balance indoor versus outdoor air pressure
- Through-the-wall sleeve has 3-Inch diameter and 12-Inch length and fits a 3-Inch wall opening
- Foam pad reduces outdoor noise and condensation
- Insulation lining also prevents condensation
- Durable ABS and PP resin body and includes seven stainless steel installation screws

Product Description

From the Manufacturer

Home ventilation is one of the most important things you can manage in order to maintain a healthy environment for you and your loved ones. The air in your home is used many times over, often with fresh air entering only when we open doors or windows. Very tight homes benefit from the use of controlled ventilation that allow for fresh, draft-free make-up air to enter the house. Put these passive air inlets high on an exterior wall in every bedroom and one in a central living space to insure a constant supply of controlled fresh make-up air. The Panasonic FV-GKF32S1 Passive Inlet Vent provides makeup (outside) air to help balance indoor versus outdoor air pressure. The foam pad reduces outdoor noise and condensation and the insulation lining also prevents condensation. It has a durable ABS and PP resin body and includes seven stainless steel installation screws. The through-the-wall sleeve is three inches in diameter and 12 inches long and fits a 3-Inch wall opening. It has a washable air filter and a secure bug screen. With three positions, it can be completely closed with a flip of a lever or set as 02 or 18 CPM (cubic feet per minute). The Panasonic FV-GKF32S1 Passive Inlet Vent is covered by a manufacturer warranty for period of three years from the date of the original purchase and is sold one item per package.

Product Description

Specification Data
Panasonic Ventilation Fan

Panasonic Passive Inlet provides make up air to help balance indoor vs. outdoor air pressure.

**Body:**
- Durable ABS and PP resin body.
- Sturdy open/close lever.
- 2 Position air delivery (12 & 18 cfm).
- Washable air filter.
- Foam covering reduces outdoor noise and condensation.
- 12 inch through wall sleeve can be cut to required length.
- Exterior hood with bug screen included.

**Typical Specifications:**
Passive Inlet vent shall be through-the-wall type with open/close lever. Inlet shall provide 12 or 18 cfm. Inlet shall include through wall sleeve and exterior hood. Inlet shall include air filter, bug screen and sound abatement padding.

PHASE CHANGE MATERIAL

[RELATED SECTION 23 71 00]

Model Number: BIOPCM-27M
Location: Living Module
Features:

- Oil based phase change material with a peak melting point at approximately 27°C
- Used as per the design and engineering of the Adjustable Trombe wall system in the living room
- Stored within extruded aluminum tubing and then sealed within the tube with welds that is then mounted on a racking device and placed in front of glazing inside the conditioned space.
- Device will be supplemental to the [HVAC] system within the space and will perform passive cooling and heating as it goes through thermo-cycles.

Available: Phase Change Energy Solutions
bioPCmat 27°C / 79°F

Available Sizes
- 16x12" 30'
- 16x48" 30'
- 10x24" 50" Sample
- 50" 2" Pocket Sample

* The temperatures shown in the properties table are within close proximities of the “true” melting temperatures. Like all PCM, there is a small range that the PCM melts in. Please call or email if you have any questions, if your specifications require a different temperature, you need to know if the temperature range covers your specifications or if you would like to discuss your potential application.

** Depending on formulation and application of product.**

*N* NOTE: All Phase Change Energy building products are tested to ASTM E84 standards

*N* NOTE: Custom formulations for temperature and loading also available

MITSUBISHI MR. SLIM MINI SPLIT HEAT PUMP [OUTDOOR UNIT]

[RELATED SECTION 23 81 43]

Model Number: MXZ-2B20NA
Location: HVAC Compartment
Dimensions:
  Width: 33-1/6" [840 mm]
  Height: 27-15/16" [710 mm]
  Depth: 13" [330 mm]
Features:
  Weight: 130 lbs [59 kg]
  SEER [efficiency]: 18
  Rated cooling capacity: 18,000 BTU/hr - 20,000 BTU/hr
  Rated heating at 47°F capacity: 22,000 BTU/hr
  Rated heating at 17°F capacity: 12,500 BTU/hr
Available: Gemaire Distributors Inc
Outdoor Unit Item # MXZ-2B20NA 1, Wall-Mounted Multi-Room Inverter Heat Pumps

**Multi-Room Wall-mounted INVERTER Heat Pumps**

Available in 2-to-1, 3-to-1, 4-to-1 and 8-to-1 indoor units to one outdoor unit systems with wall-mounted and/or ducted indoor units in a wide range of capacities, the MXZ multiroom system has the right position for your needs.

Test conditions are based on AHRI 210/240. One indoor unit is turned off during low-speed testing under the new test conditions. Systems actually exhibit higher energy efficiencies during normal operation.

Power factor equals 97 percent.

Specifications are subject to change without notice.

Limited warranty: Seven-year warranty on compressor. Five-year warranty on parts.

**Additional Information**

Multi-zone systems mean that people can enjoy the ideal level of comfort no matter where they are in the home. Each zone (room) operates independently. People in the kitchen, master bedroom or living room can all enjoy the temperatures that make them feel most comfortable.

If you're looking for a complete comfort solution for several different rooms, the MXZ multi-zone systems the right choice for you. You can use up to 16 different indoor unit combinations so the system is flexible enough to conform to your particular cooling and heating needs with up to four rooms from one outdoor unit. And now with a SEZ ceiling-concealed ducted unit you can enjoy a greater range of zoning options with a MXZ system.

#### GENERAL FEATURES
- Compact side discharge outdoor unit
- Wireless or wired remote controller, depending on the indoor units used
- Quiet operation—both indoor and outdoor units
- Automatic fan speed control
- Auto restart following a power outage
- Self-check function—integrated diagnostics
- Advanced microprocessor control
- Limited warranty: five years on parts and seven years on compressors

#### OPTIONAL OUTDOOR UNIT ACCESSORIES
- Air Outlet Guide (MAC-899SG)
- 3/8" x 1/2" Port Adapter (MAC-A454JP-E; for use with 15,000 Btu/h Indoor units)

#### Cooling
- Rated Capacity (Non-deducted/Deducted): 18,000 Btu/h / 20,000 Btu/h
- Minimum Capacity (Non-deducted/Deducted): 7,800 Btu/h / 7,800 Btu/h
- Total Input (Non-deducted/Deducted): 1,440 W / 2,100 W

#### Heating at 47°F
- Rated Capacity (Non-deducted/Deducted): 22,000 Btu/h / 22,000 Btu/h
- Minimum Capacity (Non-deducted/Deducted): 8,500 Btu/h / 8,500 Btu/h
- Total Input (Non-deducted/Deducted): 1,950 W / 1,780 W

#### Heating at 17°F
- Rated Capacity (Non-deducted/Deducted): 12,500 Btu/h / 12,500 Btu/h
- Minimum Capacity (Non-deducted/Deducted): 5,000 Btu/h / 5,000 Btu/h
- Total Input (Non-deducted/Deducted): 1,350 W / 1,430 W

#### Electrical Requirements
- Power Supply: 208 / 230V, 1-Phase, 60 Hz
- Blower Size: 20 A
- MCA: 15 A

#### Voltage
- Indoor: AC 208 / 230V
- Outdoor: DC 12 - 24V

#### OPERATING RANGE

- Rated heating capacity: 10,900 BTU/hr
Available: Gemaire Distributors Inc
# Indoor Unit Item # SEZ-KD09NA, Ceiling-concealed Inverter Heat Pumps

## SEZ Horizontal Ducted Indoor Units for MXZ Heat Pump Systems

SEZ ducted units can provide similar split air-conditioning system advantages, with the added benefit of being concealed to provide virtually no visual footprint within the conditioned space other than a register and grille for the air to flow. With the use of short run ductwork, these units can provide comfort to a single room that needs air dispersed evenly throughout the space, unusually shaped rooms and even adjacent rooms.

Other features of the SEZ unit on MXZ systems include:
- Concealed design for short run ductwork
- Quiet operation
- Built-in condensate lift mechanism
- Wired remote control

Specifications are subject to change without notice.  
Limited warranty: Seven-year warranty on compressor.  Five-year warranty on parts.  
For use with all MXZ-Series

SUBMITTAL DATA: SEZ-KD09NA
9,000 BTUH HORIZONTAL-DUCTED INDOOR UNIT FOR MXZ MULTI-ZONE HEAT-PUMP SYSTEMS

Job Name: Location: Date:

Purchaser: Engineer:

Submitted to: For [ ] Reference [ ] Approval [ ] Construction

System Designation: Schedule No.:

GENERAL FEATURES
- Ceiling-concealed ducted indoor unit for residential applications
- Ultra thin body: 7-7/8" high
- Built-in drain mechanism for condensate removal; lifts to 21-11/16"
- Air filter is included with indoor unit
- Quiet operation — as low as 23 dBA
- PAR-21MAA wired remote controller is included
- Indoor unit powered from outdoor unit using A-Control
- Automatic fan speed control
- Auto restart following a power outage
- Limited warranty: one year on parts and defects

OPTIONAL ACCESSORIES
- M-NET Control Adapter (MAC-399IF)
- External Heat Adapter (PAC-YU25HT)
- CN24 Relay Kit (CN24RELAY-KIT-CM)
- Three-pole Disconnect Switch (TAZ-MS303)

Cooling
- Rated Capacity: 9,000 Btu/h
- Total Input: 60 W
- Current: 0.51 A

Heating
- Rated Capacity: 10,000 Btu/h
- Total Input: 40 W
- Current: 0.39 A

* Rating Conditions (Cooling) - Indoor: 80°F (27°C) DB / 67°F (19°C) WB; Outdoor: 95°F (35°C) DB / 75°F (24°C) WB.
* Rating Conditions (Heating) - Indoor: 70°F (21°C) DB / 60°F (16°C) WB; Outdoor: 47°F (8°C) DB / 43°F (6°C) WB.

(For data on specific indoor units [all ducted, all non-ducted, and both ducted and non-ducted] combinations, see the MXZ Technical and Service Manual.)

Electrical Requirements
- Power Supply: 208 / 230V, 1-Phase, 60 Hz
- MCA: 1 A
- Voltage: Indoor - Outdoor S1-S2 AC 208 / 230V
- Indoor - Outdoor S2-S3 DC 24V

Unit: mm (in.)

- Drain pipe (O.D. ø32(1-1/4))
- Emergency draining
- Suspension bolt hole
- Control box
- Refrigerant piping (field connection) (ø6)
- Refrigerant piping (field connection) (ø10)
- Drain pipe (O.D. ø32(1-1/4)) (Remote controller transmission line)
- Knockout hole ø27(1-3/32)
- Knockout hole ø27(1-3/32) (Indoor/outdoor connecting line)
- Terminal block (Remote controller transmission line)
- Terminal block (Indoor/outdoor connecting line)

Required space for service and maintenance:

Drain hose (I.D. ø32(1-1/4))

Access door

Notes:
1. Use M10 screw for the suspension bolt (field supply).
2. Keep the service space for the maintenance at the bottom.
3. This chart indicates for SEZ-KD11NA model, which has 3 fans. SEZ-KD09, 17NA models have 2 fans. SEZ-KD18NA models have 4 fans.
4. In case an inlet duct is used, remove the air filter (supply with the unit), then install the filter (field supply) at suction side.

LAN095HV
Innovative Comfort Solutions

The most comfortable airflow for the human body can be found in nature. After centuries of study, LG has applied the scientific Chaos theory to its Air Conditioning range, which effectively produces a natural, fresh breeze.

9,200 BTU Heat Pump Unit

Features

- Inverter
- R-410A Refrigerant
- Plasma air purifying system
- Chaos Swing
- Self-cleaning indoor coil
- Auto changeover
- Jet Cool
- Cooling/Heating/Fan Mode
- Auto sleep mode
- Ultra-quiet operation
- Dehumidifying mode
- Auto restart
- 24-Hour on/off timer
- Built-in low ambient standard, down to 14°F (cooling mode)
- Manual power switch
- Clock timer
- Temperature display on indoor unit
- Evaporator frost control
- Energy Saving
- Gold Fin Anti-Corrosion
### HIGH WALL DUCT-FREE • ART COOL MINI-SPLIT SINGLE ZONE • INVERTER

WALL MINI SPLIT CONDENSER BRACKET

[RELATED SECTION 23 81 43]

Model Number: CKB4
Location: HVAC Compartment
Dimensions:
  Width: 43.3” [1100 mm]
  Height: 23.8” [580 mm]
  Depth: 17.7” [450 mm]
Features:
  Maximum load: 300 lbs [140 kg]
  Finish: ivory
Available: e-ComfortUSA
Price: $130.00
Airtec CKB4 Wall Bracket for the Outdoor Unit

Description

CKB4 Wall Bracket is used for the Mini Split Outdoor Units that weigh more than 175 Lbs.

Product Details

This wall bracket is used to mount the outside section of a mini-split system. It will support condensers that weight more than 175 lbs. For condensers that weight less than 175 Lbs use the Wall Bracket.

Other Features:

- 3 sizes available: 60, 90, 140kg maximum load
- Self adjusting
- A high quality finish for the air conditioning and refrigeration industry
- Easy installation, boxed and complete with all necessary fixings
- All steelwork undergoes a 5-part phosphating pretreatment prior to a 60 micron powder coat finish in ivory
- Self adjusting brackets designed for quick installation and easy levelling on uneven wall surfaces

The BBJ Type 2 Condensing Unit Brackets are easy to install and benefit from a high quality finish. They offer a professional appearance and highly economic solution for installations.

The self-adjusting Type 2 Brackets are designed for quick installation and easy levelling on uneven wall surfaces. The sturdy and secure Brackets offer horizontal flexibility. They are designed for easy installation and are boxed complete with all necessary fixings.
AUTOMATION DIRECT PROGRAMMABLE LOGIC CONTROLLER – 5 SLOT BASE

[RELATED SECTION 25 13 00]

Model Number: P3-05B
Location: Main House Mechanical Closet
Dimensions:
  - Length: 11-1/4” [286 mm]
  - Width: 4-3/4” [121 mm]
  - Height: 6” [152 mm]
Weight: 26.5 oz [752 g]
Features:
  - Operating Temperature: 32 to 140°F
  - Storage Temperature: -4 to 158°F
Approval Certificates:
  - 508 file E157382
  - UL Safety Approval (UL1604 file E200031)
  - CE: EN61121-2

*Meets EMC and Safety requirements. See the Declaration of Conformity for details.*
Dimensions and Installation

It is important to review and understand the installation requirements for your Productivity3000 system. Your knowledge of these requirements will help ensure that your system operates within its environmental and electrical limits.

Plan for Safety

This catalog should never be used as a replacement for the product inserts and user manual. Each base, CPU, power supply, I/O module, remote slave, and expansion module comes with a product insert. You can purchase, download for free, or view online the Productivity3000 user manual (P3-USER-M). These documents, along with the software help files, contain important safety information that must be followed.

The system installation should comply with all appropriate electrical codes and standards.

Enclosures

Your selection of a proper enclosure is important to ensure safe and proper operation of your Productivity3000 system. Applications for the Productivity3000 system vary and may require additional hardware considerations. The minimum considerations for enclosures include:

- Conformance to electrical standards
- Protection from the elements in an industrial environment
- Common ground reference
- Maintenance of specified ambient temperature
- Access to the equipment
- Security or restricted access
- Sufficient space for proper installation and maintenance of the equipment

Mounting Position

Mount the bases horizontally, as shown in the illustration, to provide proper ventilation. Do not mount the bases vertically, upside down, or on a flat horizontal surface.

NOTE: Add 3 inches (76 mm) to mounting depth when using ZIPLink cable ZL-CBL40.
Dimensions and Installation

Mounting Clearances

Provide a minimum clearance of 2 inches (50mm) between the bases and all sides of the enclosure. Allow extra door clearance for operator panels and other door mounted items. There should be a minimum of 3 inches (76mm) clearance between the base and any wire duct, and a minimum of 7.2 inches (183mm) from base to base in a multiple base installation.

Base Dimensions

Grounding

A good common ground reference (earth ground) is essential for proper operation of the Productivity3000 system. One side of all control circuits, power circuits and the ground lead must be properly connected to earth ground by either installing a ground rod in close proximity to the enclosure or by connecting to the incoming power system ground. There must be a single-point ground (i.e. copper bus bar) for all devices in the enclosure that require an earth ground.

Temperature Considerations

The Productivity3000 system should be installed within the operating temperature specifications as listed in this document. If the temperature deviates above or below the specification, measures such as cooling or heating the enclosure should be taken to maintain the specification.

Power Considerations

The Productivity3000 system is designed to be powered by 110/220 VAC or 24/48 VDC via one of the P3000 power supplies. The Productivity3000 has achieved CE certification without requiring EMF/RFI line noise filters on the AC power supply. Please review the "EU Directives" document, located in the User Manual or at www.productivitypac.com, for applications which require CE Compliance.
Base Installation

Using Mounting Rails

The Productivity3000 bases can be secured to the cabinet using mounting rails. You should use rails that conform to DIN EN standard 50 022. We offer a complete line of DIN rail, DINnectors and DIN rail mounted apparatus. These rails are approximately 35mm high, with a depth of 7.5mm. If you mount the base on a rail, you should also consider using end brackets on each side of the base. The end brackets help keep the base from sliding horizontally along the rail. This helps minimize the possibility of accidentally pulling the wiring loose.

If you examine the bottom of the base, you'll notice retaining clips. To secure the base to a DIN rail, place the base onto the rail and gently push up on the retaining clips. The clips lock the base onto the rail.

To remove the base, pull down on the retaining clips, slightly lift up the base, and pull it away from the rail.
AUTOMATION DIRECT PROGRAMMABLE LOGIC CONTROLLER – CPU MODULE

[RELATED SECTION 25 13 00]

Model Number: P3-550
Location: Main House Mechanical Closet
Dimensions:
  Length: 11-1/4” [286 mm]
  Width: 4-3/4” [121 mm]
  Height: 6” [152 mm]
Weight: 9 oz [260 g]
Features:
  User memory: 50 MB
  Memory type: flash and battery backed RAM
  Operating Temperature: 32 to 140°F
  Storage Temperature: -4 to 158°F
Approval Certificates:
  508 file E157382
  UL Safety Approval (UL1604 file E200031)
  CE: EN61121-2
  Meets EMC and Safety requirements
Available: Automation Direct
P3-550 CPU Module

The P3-550 is a full-featured, high-performance CPU. Features include a 4 line x 10 character LCD and seven communications ports which support USB, Ethernet and serial devices.

Each Productivity3000 system requires one CPU module mounted in the controller slot in the first base of the local base group. The CPU stores and executes the user's program.

The system can be expanded with the P3-RS or P3-EX modules. The local, expansion, and remote I/O are assigned preconfigured or user-defined tags which can be easily referenced in the ladder logic program.
P3-550 CPU Module

LCD Message Display
The CPU incorporates a 4 line x 10 character LCD Display for system alarms and information or for displaying user-defined messages.

LCD control buttons located beneath the display allow the user to navigate through a menu, and arrow buttons allow for configuration of time and date settings.

For user-defined messages, the display is configured using the Productivity Suite Programming Software. An LCD Page instruction allows the user to program text into user-defined tags and display the messages based on the ladder execution.

Important!

Hot-Swapping Information
Note: This device cannot be Hot Swapped.
**P3-550 CPU Module**

**Battery (Optional)**
A battery is included with the P3-550 CPU, but is not installed. The battery can be installed to retain the Time and Date along with any Tagname values that are set up as retentive.

The battery is not needed for program backup.

**CPU Installation**

**Step One:**
Locate the two sockets next to the power supply; the CPU will be inserted into this location.

**Step Two:**
Insert the CPU at a 45° angle into the notch located at the top of the base and rotate down until seated.

**Step Three:**
Snap retaining tab into the locked position.

**WARNING:** Explosion hazard – Do not connect or disconnect connectors or operate switches while circuit is live unless the area is known to be non-hazardous. Do not hot swap.
P3-550 CPU Module - Communications

Port Specifications

RS-485 Port

A 3-pin removable terminal block used for:
- Modbus RTU Master connections
- Modbus RTU Slave connections
- ASCII Incoming and Outgoing communications
- Custom Protocol Incoming and Outgoing communications

Removable connector included. Spare connectors available (part no. P3-RS485CON).

AUTOMATION DIRECT PROGRAMMABLE LOGIC CONTROLLER – AC POWER SUPPLY

[RELATED SECTION 25 13 00]

Model Number: P3-01AC
Location: Main House Mechanical Closet
Weight: 12.1 oz [365 g]
Features:
  - Input Voltage Range: 100-240 VAC [-15% / +10%]
  - Rated Operating Frequency: 50 - 60 Hz with ± 5% tolerance
  - Maximum Input Power: 72W
Approval Certificates:
  - UL Safety Approval (UL508 file E157382 and UL1604 file E200031)
  - CE: EN61121-2
  - Meets EMC and Safety requirements
Available: Automation Direct
Price: $190.00
Power Supplies

Power Supply Installation

Step One: Locate the left most socket in the base.

Step Two: Insert the Power Supply at a 45° angle into the notch located at the top of the base and rotate down until seated in socket.

Step Three: Snap the two retaining tabs into the locked position.

WARNING: Explosion hazard – Do not connect or disconnect connectors or operate switches while circuit is live unless the area is known to be non-hazardous. Do not hot swap.

Power Connections

P3-01AC

P3-01DC

Grounding

A good common ground reference (earth ground) is essential for proper operation of the Productivity3000 system. One side of all control circuits, power circuits and the ground lead must be properly connected to earth ground by either installing a ground rod in close proximity to the enclosure or by connecting to the incoming power system ground. There must be a single-point ground (i.e. copper bus bar) for all devices in the enclosure that require an earth ground.
AUTOMATION DIRECT PROGRAMMABLE LOGIC CONTROLLER – DC INPUT MODULES

[RELATED SECTION 25 13 00]

Model Number: P3-08ND3S
Location: Main House Mechanical Closet
Features:
- Inputs per Module: 8 Sinking/ Sourcing
- Status Indicators: Logic Side [8 points]
- Terminal Type: 20-Position removable terminal lock
- Commons: 8 Isolated [1 point/ common]

Electrical:
- Operating Voltage Range: 12-24 VDC [±10%]
- Peak Voltage: 26.4 VDC
- Input Current:
  - 5 mA at 12 VDC
  - 11 mA at 24 VDC
- Maximum Input Current @ Temperature: 12.5 mA @ 60°C
- On Voltage Level: >10 VDC
- Off Current: <3 VDC
- Minimum On Current: 4 mA
- Maximum Off Current: 2 mA

Approval Certificates:
- UL Safety Approval
- CE

Available: Automation Direct
Price: $68.00
The Solar Homestead Project Manual

Manufacturer's Specifications

8-point, 12-24 VDC sinking or sourcing input module. 8 commons (isolated). Requires removable terminal block (sold separately, P3-RTB), optional ZIPLink connector modules and pre-wired cables are available.

To help select the proper ZIPLink cable modules, view our Productivity/ZIPLink Selection Chart.

Recommended Items

For each item, enter the quantity you wish to order and press Update. Items can be added to your favorites list or a list of materials by clicking on the icon in the right-hand column.

AUTOMATION DIRECT PROGRAMMABLE LOGIC CONTROLLER – ANALOG INPUT MODULES

[RELATED SECTION 25 13 00]

Model Number: P3-16AD-2
Location: Main House Mechanical Closet
Features:

- Input Channels: 16
- Module Signal Input Range: 0-10 VDC
- Data Range: 0 to 65535
- Input Type: Single-ended
- Maximum Continuous Overload: +/- 100V
- Filter Characteristics: Low Pass, -3dB at 100 Hz
- Sample Duration Time: 7ms per Channel
- All Channel Update Rate: 112ms
- Conversation Method: Successive Approximation
- Accuracy vs. Temperature: +/- 25 PPM/°C Maximum
- Maximum Inaccuracy: 0.1% of Range
- Input Stability and Repeatability: +/- 10 LSB

Approval Certificates:
- UL Safety Approval
- CE

Available: Automation Direct
Price: $442.00
You are looking at: Programmable Controllers > Productivity3000 (Programmable Automation Controller) > Analog I/O > P3-16AD-2

P3-16AD-2
16-channel voltage analog input module, 16-bit resolution, 0-10 VDC, external 24VDC required. Requires removable terminal block (sold separately, P3-RTB). optional ZIPLink connector modules and pre-wired cables are available.

For each item, enter the quantity you wish to order and press Update. Items can be added to your favorites list or a bill of materials by clicking on the icon in the right hand column.

Recommended Items
The following items are recommended by AutomationDirect for purchase with a P3-16AD-2

For each item, enter the quantity you wish to order and press Update. Items can be added to your favorites list or a bill of materials by clicking on the icon in the right hand column.
Analog Input Modules

P3-16AD-2

Voltage Analog Input
The P3-16AD-2 Voltage Analog Input Module provides sixteen channels for receiving 0 to 10 VDC signals.

#### Module Installation Procedure

**Step One:** Align circuit card with slot and press firmly to seat module into connector.

**Step Two:** Pull top and bottom locking tabs toward module face. Click indicates lock is engaged.

**Step Three:** Attach field wiring using optional terminal block or ZIPLink wiring system and install cover.

**WARNING:** Do not apply field power until the following steps are completed. See hot-swapping procedure for exceptions.

**WARNING:** Explosion hazard—Do not connect or disconnect connectors or operate switches while circuit is live unless the area is known to be non-hazardous. Do not hot-swap modules unless the area is known to be non-hazardous.
AUTOMATION DIRECT PROGRAMMABLE LOGIC CONTROLLER – ANALOG OUTPUT MODULES

[RELATED SECTION 25 13 00]

Model Number: P3-16DA-2
Location: Main House Mechanical Closet
Features:

- Output Channels: 16
- Module Signal Output Range: +/- 10VDC
- Output Signal Resolution: 16-Bit
- Data Range: -32768 to +32767
- Output Type: Voltage [10mA max Current]
- Allowed Load Type: Grounded
- Accuracy vs. Temperature: +/- 25 PPM/ °C Maximum
- Maximum Inaccuracy: 0.1% of Range
- Maximum Offset Calibration Error: +/- 0.025% of Range Maximum
- Output Stability and Repeatability: +/- 10 LSB after 10 minute Warm Up

Approval Certificates:
- UL Safety Approval
- CE

Available: Automation Direct
Price: $776.00
16-channel voltage analog output module, 16-bit resolution, 4.75-10VDC, external 24VDC required. Requires removable terminal block (sold separately, P3-RTB); optional ZIPLink connector modules and pre-wired cables are available.

To help select the proper ZIPLink cables and modules, view our Productivity3000 ZIPLink Selection Chart.

## Analog Output Modules

### P3-16DA-2

#### Voltage Analog Output

The P3-16DA-2 Voltage Analog Output Module provides sixteen channels of ±10VDC outputs.

![Image of P3-16DA-2 module](image)

- **Patent-pending LCD gives access to field signal values, as well as module and signal faults.**
- **Terminal block sold separately; terminal block cover included with module.**

#### General Specifications

- **Operating Temperature:** 0° to 60°C (32° to 140°F)
- **Storage Temperature:** -20° to 70°C (4° to 158°F)
- **Humidity:** 5 to 95% (non-condensing)
- **Environmental Air:** No corrosive gases permitted
- **Vibration:** IEC60068-2-6 (Test Fc)
- **Shock:** IEC60068-2-27 (Test Ea)
- **Field to Logic Side Isolation:** 1800VAC applied for 1 second
- **Insulation Resistance:** >10MΩ @ 500 VDC
- **Heat Dissipation:** 0.4 W
- **Endsure Type:** Open Equipment
- **Agency Approvals:** UL508 and UL1604 (Certified for Canada and USA) CE (EN61131-2*)
  - This equipment is suitable for use in Class I, Division 2/Zone 2, Groups A, B, C, and D or non-hazardous locations only.
- **Module Keying to Backplane:** Electronic
- **Module Location:** Any I/O slot in any local, expansion, or remote base in a Productivity3000 System
- **Field Wiring:** Removable terminal block (not included). Use ZIPLink wiring system or optional terminal block. See “Wiring I/O Modules”.
- **EU Directive:** See the “EU Directive” topic in the Productivity3000 Help File. Information can also be obtained at: www.productivitypac.com
- **Terminal Type (not included):** 20-position removable terminal block
- **Weight:** 105g (3.73 oz)

*Meet EMC and Safety requirements. See the Declaration of Conformity for details.

**WARNING:** Explosion hazard – Substitution of components may impair suitability for Class I, Division 2

We recommend using prewired ZIPLink cables and connection modules. See “Wiring Systems”. Terminal block cover included. If you wish to hardwire your module, a removable terminal block is sold separately. Order part number P3-RTB.
Analog Output Modules

P3-16DA-2 (cont’d)
AUTOMATION DIRECT PROGRAMMABLE LOGIC CONTROLLER – RELAY OUTPUT

[RELATED SECTION 25 13 00]

Model Number: P3-16TR
Location: Main House Mechanical Closet
Weight: 5.64 oz [160 g]
Features:

- Output Channels: 16
- Operating Voltage Range: 6.25-24 VDC [± 20%]
- Output Type: Relay, form A [SPST]

Approval Certificates:

- UL Safety Approval (UL508 file E157382 and UL1604 file E200031)
- CE: EN61121-2
- Meets EMC and Safety requirements

Available: Automation Direct
Price: $130.00
16-point, 8-27 VDC, 6-240 VAC relay output module. 1.25A / point. 6.3A / common @ 60 deg C, 2 commons (isolated), 8 points / common, with Form A (SPST) relays. Requires removable terminal block (sold separately, P3-RTB), optional ZipLink connector modules and pre-wired cables are available. 6.3A user replaceable fuse / common (replacement fuse P3-FUSE-2).

For P3-RTB or a ZipLink is required with each Productivity3000 Discrete and Analog I/O module under 12 pt.

I/O connector required (ZipLink or terminal block - P3-RTB). Order separately.

For each item, enter the quantity you wish to order and press Update. Items can be added to your favorites list or a bill of materials by clicking on the icon in the right-hand column.

Recommended Items

For each item, enter the quantity you wish to order and press Update. Items can be added to your favorites list or a bill of materials by clicking on the icon in the right-hand column.

For P3-RTB, only the following items are recommended by AutomationDirect for purchase with a P3-RTB.

Item Code: \( P3-16TR \) 16PT OUTPUT RELAY (16 FORM A), PRODUCTIVITY3000 RELAY OUTPUT MODULE, I/O connector required (ZipLink or terminal block - P3-RTB). Order separately.

For each item, enter the quantity you wish to order and press Update. Items can be added to your favorites list or a bill of materials by clicking on the icon in the right-hand column.

Recommended Items

For P3-RTB, only the following items are recommended by AutomationDirect for purchase with a P3-RTB.

Item Code: \( P3-16TR \) 16PT OUTPUT RELAY (16 FORM A), PRODUCTIVITY3000 RELAY OUTPUT MODULE, I/O connector required (ZipLink or terminal block - P3-RTB). Order separately.

For each item, enter the quantity you wish to order and press Update. Items can be added to your favorites list or a bill of materials by clicking on the icon in the right-hand column.
Relay Output Modules

P3-16TR

Relay Output
The P3-16TR Relay Output Module provides sixteen 1.25A relay outputs with two isolated fused commons.

### Module Installation Procedure

**WARNING:** Do not apply field power until the following steps are completed. See hot-swapping procedure for exceptions.

**Step One:** Align circuit card with slot and press firmly to seat module into connector.

**Step Two:** Pull top and bottom locking tabs toward module face. Click indicates lock is engaged.

**Step Three:** Attach field wiring using optional terminal block or ZIPLink wiring system and install cover.

**WARNING:** Explosion hazard – Do not connect or disconnect connectors or operate switches while circuit is live unless the area is known to be non-hazardous. Do not hot-swap modules unless the area is known to be non-hazardous.
AUTOMATION DIRECT PROGRAMMABLE LOGIC CONTROLLER – RELAY OUTPUT MODULES

[RELATED SECTION 25 13 00]

Model Number: P3-08TRS-1
Location: Main House Mechanical Closet
Weight: 10.08 oz [286 g]
Features:
  - Output per Module: 8 relays [non-latching]
  - Operating Voltage Range: 6.25-24 VDC [-15% / +20%]
  - Output Type: 4 form C [SPST-NO/NC], 4 form A [SPST-NO]
Approval Certificates:
  - UL Safety Approval (UL508 file E157382 and UL1604 file E200031)
  - CE: EN61121-2
  - Meets EMC and Safety requirements
Available: Automation Direct
Price: $106.00

*WARNING: Explosion hazard – Substitution of components may impair suitability for Class I, Division 2.

---

**Amps**

- All 8 outputs on, 100% duty cycle allowed.

We recommend using preswired ZIPLink cables and connection modules. See "Wiring Systems".

Terminal block cover included. If you wish to hangwire your module, a removable terminal block is sold separately. Order part number P3-RTB.

**Analog Combo**

*The P3-64ND3, P3-64TD1, and P3-64TD2 modules have two 32-point connectors and require 2 ZIPLink cables and 2 ZIPLink connector modules.

**These modules are not supported by the ZIPLink wiring system. Removable terminal block P3-RTB included.

***The P3-08TRS-F output module is derated, not to exceed 2A per point maximum when used with the ZIPLink wiring system.
I/O Modules

A variety of discrete and analog I/O modules are available for use in local, expansion, and remote I/O bases. Specifications for each module are on the following pages.

A filler module is available for unused I/O module slots (part number P3-FILL).

Module Installation Procedure

**WARNING:** Do not apply field power until the following steps are completed. See hot-swapping procedure for exceptions.

**Step One:** Align circuit card with slot and press firmly to seat module into connector.

**Step Two:** Pull top and bottom locking tabs toward module face. Click indicates lock is engaged.

**Step Three:** Attach field wiring using optional terminal block or ZIPLink wiring system and install cover.

**WARNING:** Explosion hazard – Do not connect or disconnect connectors or operate switches while circuit is live unless the area is known to be non-hazardous. Do not hot-swap modules unless the area is known to be non-hazardous.
SOLA HEVI-DUTY 24V POWER SUPPLY

[RELATED SECTION 25 35 23]

Model Number: SDP 4-24-100LT
Location: Main House Mechanical Closet
Dimensions:
  Width: 2-7/8" [73 mm]
  Height: 2-7/16" [75 m]
  Depth: 3-7/8" [97 mm]
Weight: 0.7 lbs [.32 kg]
Electrical:
  Input Voltage: 85-132 / 176-264 Vac, 210-376 Vdc
  Input Frequency: 47-63 Hz
  Input Current: 1.8 A / 1 A
  Output Current: 3.8 A
  Output Voltage: 24-28 Vdc
Approval Certificates:
  UL Listed
  CSA Listed
Available: Sola/Hevi-Duty
Power Supplies

SDP™ Low Power DIN Rail Series

The compact, lightweight DIN Rail power supplies come in output voltages from 5 to 48 Vdc and power ratings of up to 100 Watts. These extra small, efficient units are designed specifically for the industrial environment. Each unit is rated from -10°C to 70°C, with no derating necessary until above 60°C.

Many extra “industrial” features are standard for the SDP PowerBoost™ overload circuitry can start up industrial loads (i.e. motors, relays, solenoids and DC-DC converters), that can cause ordinary power supplies to foldback or shutdown. Each unit contains a DC indicator and front panel adjustment potentiometer. With the Sola SDP series, you can count on a high grade design.

Features
- Ultra slim 15W footprint
- No tools required for mounting
- Adjustable output
- PowerBoost™ industrial overload design
- Overvoltage, short circuit protection
- NEC Class 2 Current Limited
- Continuous short circuit protection
- Low output noise
- Screw terminal connections
- RoHS Compliant
- Three year warranty

SOLA HEVI-DUTY 12V POWER SUPPLY

[RELATED SECTION 25 35 23]

Model Number: SDP-2-12-100T
Location: Main House Mechanical Closet
Dimensions:
  - Width: 1-3/4" [45 mm]
  - Height: 2-7/16" [75 m]
  - Depth: 3-7/8" [97 mm]
Weight: 0.5 lbs [.23 kg]
Electrical:
  - Input Voltage: 85-264 Vac, 90-375 Vdc
  - Input Frequency: 47-63 Hz
  - Input Current: 0.6 A @102 Vac, 0.33 A @ 196 Vac
  - Output Current: 3-2.5 A
  - Output Voltage: 10-12 V
Approval Certificates:
  - UL Listed
  - CSA Listed
Available: Sola/Hevi-Duty
Power Supplies

SDP™ Low Power DIN Rail Series

The compact, lightweight DIN Rail power supplies come in output voltages from 5 to 48 Vdc and power ratings of up to 100 Watts. These extra small, efficient units are designed specifically for the industrial environment. Each unit is rated from -10°C to 70°C, with no derating necessary until above 60°C.

Many extra "industrial" features are standard for the SDP PowerBoost™ overload circuitry can start up industrial loads (i.e. motors, relays, solenoids and DC-DC converters), that can cause ordinary power supplies to foldback or shutdown. Each unit contains a DC indicator and front panel adjustment potentiometer. With the SolaHD SDP series, you can count on a high grade design.

Features

- Ultra slim 15W footprint
- No tools required for mounting
- Adjustable output
- PowerBoost™ industrial overload design
- Overvoltage, short circuit protection
- NEC Class 2 Current Limited
- Continuous short circuit protection
- Low output noise
- Screw terminal connections
- RoHS Compliant
- Three year warranty

## Installation

- **Status Indicators**: Green LED on, when V<sub>IN</sub> "OK".
- **Case & Mounting**: Molded plastic housing using UL 94 approved flameproof material rating 94V-2. Simple snap-on to DIN TS35/7.5 or TS35/15 rail system.

## Dimensions

- (H x W x D) (in/mm): 2.95 x 1.77 x 0.68 (76 x 45 x 91)
- Weight – lbs (kg): 0.5 lbs (23 kg)

## Mounting Orientation

- **Standard**: Vertical; **Optional**: Horizontal or On Top (Contact Technical Services).

## Ventilation/Cooling

- Normal convection, no fan required, Above/below: 25 mm recommended.

## Connection/Connector size range

- Input: screw terminals, connector size range: 20-12 AWG (1.5 - 6 mm<sup>2</sup>) for solid or stranded conductors.

## General

- **Temperature**: Storage: -20°C...+85°C; Operation: -10°C...+85°C full power with linear derating to half power from 80°C to 70°C. (Convection cooling, no forced air required).
- **MTBF**: > 500,000 hours according to Telcordia/Belcore Document GR-332, Issue 1.
- **Humidity**: Up to 90% RH, noncondensing; IEC 68-2-3, 68-2-3
- **Electromagnetic Emissions (EME)**: EN61000-6-3 (includes EN61000-6-4) Class B (EN 55022) incl. Annex A
- **Electromagnetic Immunity (EMI)**: EN61000-6-2 (includes EN61000-6-1) (EN55024) Criterion A: no degradation of performance
- **Safe Low Voltage**: SELV (acc. EN60950)
- **Protection Class/Voltage**: IP20 (IEC628), Protection Class 1 (IEC656)
- **Warranty**: 3 years

## Safety

- CB Scheme, EN60601, UL60079-15 (Class 1, Zone 2 Hazardous Locations, Temp Class T3), UL508 Listed, cULus, UL 60650, cURus, CE (LVD 73/23 & 93/68/ECC), (EMC 89/336 & 93/68/ECC), EN61000-3-2, NEC Class 2 power supply acc. To NFPA 70 art. 725-41 (a)(2).

**Notes:**

1. Not UL listed for DC input.
2. Ripple/noise is stated as typical values when measured with a 20 MHz, bandwidth scope and 50 Ohm resistor.
3. Not to exceed 30 watts total.
BELIMO DAMPER

[RELATED SECTION 25 35 23]

Model Number: TF24 US

Location: Main House Mechanical Closet

Dimensions:
- Width: 6-1/4" [160 mm]
- Height: 3" [76 mm]
- Depth: 3-3/8" [84 mm]

Features:
- Two-position actuator
- Spring return fail safe mode
- Rotary
- Torque: 18 lb-in
- Ambient temperature: -22°F - 122°F

Electrical:
- Power supply: 24 Vac ±20%
- Power consumption: 2 W running, 1.3 W holding

Available: PEXSupply.com

Price: $129.95

- **Warranty:** 5-year Limited

---

**Description for Belimo TF24**

**Features**

- Easy-to-adjust mechanical stop to limit damper rotation.
- Cut labor costs with simple direct coupling. Actuator Centers on 1/2” shaft.
- Clockwise or counterclockwise fail-safe mounting for fail-safe.
- Compact size with the shortest shaft-center to edge distance in the industry - 0.77”.
- True mechanical spring return - the most reliable fail-safe.
- Single line voltage model for on/off application has 100 to 240V (±15+/10%), 50/60 Hz supply power.
- Check damper position easily with clear position indicator.
- Don’t worry about actuator burn-out. Belimo is overload-proof throughout rotation.
- Need to change control direction? Do it easily with a simple switch (modulating actuators).
- Built-in auxiliary switch is easy to use, offers feedback or signal for additional device.
- Microprocessor-controlled brushless DC motor increases actuator life span and reliability, provides constant running time (modulating actuators).
- Rugged housing withstands rough handling in the mechanical room.
- 3 ft. standard cable and conduit connector (not shown) eases installation.

The TF24 is used for On/Off, fail-safe control of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer’s specifications. Control is On/Off from an auxiliary contact, or a manual switch.

The TF series actuators provide true spring return operation for reliable fail-safe application and positive close off on air tight dampers. The spring return system provides consistent torque to the damper with, and without, power applied to the actuator.

**Manufacturer's Specifications**

**Torque min. 18 in-lb, for control of air dampers**

**Application**

For On/Off, fail-safe control of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer's specifications. Control is On/Off from an auxiliary contact, or a manual switch.

The actuator is mounted directly to a damper shaft from 1/4" up to 1/2" in diameter by means of its universal clamp, 1/2" shaft centered at delivery. A crank arm and several mounting brackets are available for applications where the actuator cannot be direct coupled to the damper shaft.

**Operation**

The TF series actuators provide true spring return operation for reliable fail-safe application and positive close-off on air tight dampers. The spring return system provides consistent torque to the damper with, and without, power applied to the actuator.

The TF series provides 95° of rotation and is provided with a graduated position indicator showing 0° to 90°.

The actuator may be stalled anywhere in its normal rotation without the need of mechanical end switches. Power consumption is reduced in holding mode.

The TF24-S US versions are provided with one built-in auxiliary switch. This SPDT switch is provided for safety interfacing or signaling, for example, for fan start-up. The switching function is adjustable between 0° and 95°.

**SAFETY NOTE**

Screw a conduit fitting into the actuator's bushing. Jacket the actuator's input and output wiring with suitable flexible conduit. Properly terminate the conduit in a suitable junction box.

---

**Dimensions (inches [mm])**

![Dimensions Diagram]

---

**TF24-S US**

Auxiliary switch

1 x SPDT 3A (0.5A) @ 250 VAC, UL approved adjustable 0° to 95°
**Accessories**

- Tool-36: 8mm and 10 mm wrench
- KH-TF: Crank arm for up to 1/2" round shaft
- ZG-TF2: Crank arm adaptor kit for TF
- ZG-TF112: Mounting bracket, kit for TF
- ZS-100: Weather shield (metal)
- ZS-150: Weather shield (polycarbonate)

**NOTES:** When using TF24 US and TF24-S US actuators, only use accessories listed on this page. For actuator wiring information and diagrams, please see Belimo Wiring Guide (pg 348).

**Typical Specification**

On/Off spring return damper actuators shall be direct coupled type which require no crank arm and linkage and be capable of direct mounting to a shaft up to a 1/2" diameter and center a 1/2" shaft. The actuators must be designed so that they may be used for either clockwise or counterclockwise fail-safe operation. Actuators shall be protected from overload at all angles of rotation. If required, one SPDT auxiliary switch shall be provided having the capability of being adjustable. Actuators with auxiliary switch must be constructed to meet the requirements for Double Insulation so an electrical ground is not required to meet agency listings. Actuators shall be cULus listed certified, have a 5 year warranty, and be manufactured under ISO 9001 International Quality Control Standards. Actuators shall be as manufactured by Belimo.

**Wiring Diagrams**

**INSTALLATION NOTES**

- Provide overload protection and disconnect as required.

**CAUTION Equipment Damage!**

- Actuators may be connected in parallel. Power consumption must be observed.
- Actuators may also be powered by 24 VDC.

- For end position indication, interlock control, fan startup, etc., TF24-S US incorporates a built-in auxiliary switch: 1 x SPDT, 3A (0.5A) @ 250 VAC, UL Approved, adjustable 0 to 95.

**APPLICATION NOTES**

- Meets cULus requirements without the need for an electrical ground connection.

**WARNING Live Electrical Components!**

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

PATENTS PENDING.

Cable Range
• Four termination points for #4-#14 (solid or stranded)
• Attaches to conductor with “Lay in” style lug with cable range of #6-#2
• GBB50 has larger cable range of #6-#1/0

Features and Benefits
• Meets 2008 NEC Ground Requirements
• GB5 has four termination points one more than required by 250.94 of the 2008 NEC
• Available in Zinc and Bronze
• Handles multiple hookups of communications systems – for instance phone, cable TV, or a satellite dish
• Fast, simple installation on grounding conductor
• Plastic cover is textured and paintable for good looks

Installation Instructions
1. Attach grounding bridge to substrate. (Mounting screws not provided.)
2. Insert grounding electrode conductor into the lay in lug. Tighten screw.
3. Finish by attaching the cover. Good looks, a great finish.
IDEAL SPLIT BOLT CONNECTOR
[RELATED SECTION 26 05 26]

Model Number: 6921K58
Location: Outdoor Kitchen Mechanical Closet
Finish: copper
Features:
  - Wire range: 87 solid to 4 solid
  - Minimum tap size: 16 solid
  - Recommended torque: 165 in-lbs

Electrical:
  - Voltage: 600 V

Available: McMaster-Carr
Price: $3.89
Wire Connectors & Lugs

For information about wire size (AWG), see page 742.

Split-Bolt Connectors

Use these connectors for tapping and splicing wire. No special installation tools are needed—just strip wires, insert, and tighten. Insulate with tape in power applications and corrosive environments. All connectors are rated to 600 volts and 194°F UL listed and CSA-certified.

Copper splices are for use with copper and copper weld wire. Suitable for direct burial, except 6921K688. Aluminum splices can be used with any combination of copper and aluminum wire.

Main Wire Range (AWG) describes wire range with equal size main and tap wires. Min. Tap Wire Size (AWG) describes minimum wire size with one max. size main wire.

TE CONNECTIVITY SOLARLOK GROUNDING BOLT

[RELATED SECTION 26 05 26]

Model Number: 2106831-1
Location: Great Porch Canopy
Dimensions:
  Diameter: 0.7”
Finish: stainless steel
Features:
  Thread: #10-32 UNF
  Use with wire sizes: 6 AWG, 7 or 19 stranded
Available: TE Connectivity
Solar Grounding Solutions Overview

TE Connectivity (TE) has expanded its line of SOLARLOK photovoltaic (PV) interconnect products with our grounding products. The electrical and mechanical properties of these products will meet the tough requirements for PV module grounding applications as established by UL.

The SOLARLOK grounding clip provides quick and convenient grounding for solar modules and related products. These grounding clips have four points of electrical contact and are for use with 12-10 AWG uninsulated copper wire. Our grounding clips can be re-used up to 5 times. The ground terminal supplements the existing TE SOLARLOK product portfolio and offers the electrician yet another valuable component for simple and fast wiring of a PV-system.

The ground bolts are designed for solar module grounding applications using solid copper uninsulated 6 AWG to 12 AWG wire. The grounding assembly consists of a wire bolt (wire slot on one end and threaded post on the other), wire binding hex nut, and mounting hex washer nut. The grounding assembly is used with metal-framed photovoltaic (solar) panels and related products that require grounding for safety reasons.

Key Features - SOLARLOK Grounding Clip

- Product comes as an assembled kit that includes an attachment screw
- Contact design provides 4 points of contact to the ground wire for high reliability
- Product is easy to install with simple tools that are readily available
- Integral stamped housing feature cuts through the anodized aluminum surface when securing to the module
- uninsulated solid copper wire 12-10 AWG
- For use with solar panels
- ROHS Compliant

Key Features - SOLARLOK Grounding Bolt

- Rugged and compact hex bolt design made from stainless steel
- Quick and easy mounting procedures
- Patented bottom edge feature cuts through the anodized aluminum surface when securing to the module frame
- No special tooling required to apply product
- Uninsulated solid copper wire 12-6 AWG
- Uninsulated stranded copper wire 10-6 AWG (7 or 19 strands)
- For use with solar panels

Standards and Specs

- SOLARLOK Grounding Clip - UL 467 approved, a requirement for UL 1703 solar panel listing
- SOLARLOK Grounding Bolt - UL 467 approved, a requirement for UL 1703 solar panel listing

Available: TTI
Combiner Box Assembly Overview

SOLARLOK 5-string Combiner Box for residential use to combine up to five strings in a pre-terminated connectorized weather-resistant enclosure to meet National Electric Code (NEC) requirements for series fusing of photovoltaic (PV) modules (solar panels).

The SOLARLOK 5-string Combiner Box for residential use consists of a box, cover (with hinges), transparent dead front lid (under the cover), and 10 pre-terminated male SOLARLOK connectors each with a removable seal cover. The box features 4 knockouts (for output wiring), lock tab, mounting slots, and pre-wired grounding clip.

The interior of the box holds 5 fuse blocks pre-wired to the positive SOLARLOK connectors, 5 terminal blocks pre-wired to the negative SOLARLOK connectors, and an equipment terminal block used to ground the equipment. Fuses are not included.

**Key Features**
- Combines up to 5 PV strings and converts to standard THWN-2 wire (single string) in conduit
- Completely pre-assembled
- 10 pre-terminated SOLARLOK pin (male) connectors
- NEMA3 box is IP65 Rated
- Plug and play design provides labor savings and minimizes installer error during installation

**Applications**
- SOLARLOK connectors
- SOLARLOK grounding solution
- SOLARLOK ground bolt

1. INTRODUCTION

SOLARLOK Combiner Box Assemblies 1954283–1 and 1954283–2 are used to combine up to five strings in a pre-terminated connectorized weather-resistant enclosure to meet National Electric Code (NEC) requirements for series fusing of photovoltaic (PV) modules.

NOTE

All numerical values in this instruction sheet are in metric units [with U.S. customary units in brackets]. Figures are not drawn to scale.

Figure 1

The combiner box assemblies meet the standards of Underwriters Laboratories Inc. (UL) 1741 to be used as an accessory for inverters.

Reasons for reissue of this instruction sheet are provided in Section 5, REVISION SUMMARY.

IMPORTANT SAFETY INSTRUCTIONS

SAVE THESE INSTRUCTIONS

This instruction sheet contains important instructions for Assemblies 1954283–1 and 1954283–2 that must be followed during installation and maintenance of the power system.

Read and understand the following safety precautions before installing or working with the combiner box assembly.

— Wiring methods must comply with the National Electric Code (NEC) and American National Standards Institute (ANSI)/National Fire Protection Association (NFPA).

— The DC input and DC output circuits are isolated from the enclosure. System grounding, if required by Section 250 of the NEC and ANSI/NFPA 70, is the responsibility of the installer.

— The photovoltaic system grounding must be installed according to the requirements of Sections 690.41 through 690.47 of the NEC, ANSI/NFPA 70, and is the responsibility of the installer.

— DO NOT work with the combiner box assembly if it is attached to any live electrical source.

**TYPE 1 SCREW COVER BOXES**

Austin screw cover boxes are Underwriters Laboratories Listed for Junction and Pull box applications. All screw cover boxes meet the general-purpose indoor requirements.

**Construction:**
- Fabricated in accordance with UL specifications from code gauge steel.
- Boxes are furnished with or without knockouts. If knockouts are requested, a combination of 1/2 - 3/4" and 3/4 - 1" standard conduit sizes are furnished.
- Boxes under 48"x 36" have 5/16" mounted holes.
- Boxes 48"x 36" and over have 7/16" mounted holes.

**Finish:**
Austin screw cover boxes are constructed standard in galvanized steel. An ANSI 61 gray polyester powder coating over CRS is available on request.

**Options:**
- Special knockouts or knockout arrangements.
- Special materials.
- Special finishes.
- Custom box size or construction.

Molded Nonmetallic Junction Boxes
6P Rated

It’s another first from Carlon® - the first nonmetallic junction boxes UL Listed with a NEMA 6P rating per Section 314.29, Exception of the National Electrical Code. Manufactured from PVC or PPO thermoplastic molding compound and featuring foam-in-place gasketed lids attached with stainless steel screws, these rugged enclosures offer all the corrosion resistance and physical properties you need for direct burial applications.

Type 6P enclosures are intended for indoor or outdoor use, primarily to provide a degree of protection against contact with enclosed equipment, falling dirt, hose-directed water, entry of water during prolonged submersion at a limited depth, and external ice formation.

RACO 2-GANG METAL SQUARE ELECTRICAL BOX

[RELATED SECTION 26 05 33.16]

Model Number: 8232
Location: Living Module, Outdoor Kitchen, OM Closets
Dimensions:
   Length: 2-1/8"
   Width: 4"
   Depth: 2-1/8"
Features:
   Capacity: 30.3 in³
   Fire rating in minutes: 120
Approval Certificates:
   UL Listed
Available: Lowes
Price: $2.10
4" SQUARE BOXES
1-1/2" AND 2-1/8" DEEP, PLENUM BOXES

Applications
- Plenum boxes are used in above-ceiling applications where air-tight enclosures are required.
- Square boxes are used where multiple conductor runs are split into two or more directions to bring power to a number of electrical devices.

Product Features
- To maintain plenum seal, both RACO® 226 and 239 do not provide ground screw holes.
- Cover gasket is PVC foam material.

Compliance
- [UL] – File E195978

Array connectors

**MC4-Solarline 2 Branch Connectors**
These waterproof Y-connectors make it possible to parallel wire PV modules with Multi-Contact output cables. Maximum current allowed through connectors is 39 amps.

**MC4-Solarline 2 Connectors**
The connector can be assembled quickly on site by a contractor allowing assembly of custom cables at the job site. A special crimping tool and wrench set are required to assemble the connector. We have connectors for 10 AWG USE-2 wire and for larger diameter 12AWG PV wire. Sold in packs of 25 connectors.

3M SCOTCHLOK CONNECTOR  
[RELATED SECTION 26 05 83]

Model Number: UR2  
Location: throughout The Solar Homestead  
Features:  
  - Insulation outside diameter: 0.082” [2.08 mm]  
  - PIC-unfilled: 19-26 AWG  
  - PIC-filled: 19-26 AWG  
Approval Certificates:  
  - UL Listed  
Available: Alternative Energy Engineering
Scotchlok™
UR2, UY2 and UB2A Connectors
Proven splicing technology designed for your specific splicing applications.

Over 30 years ago, 3M introduced the industry’s original IDC Connector, the 3M™ Scotchlok UR Connector. The latest series of connectors, the Scotchlok UR2, UY2, and UB2A Connectors, feature that same originality in technological advantages. Building on the successful Scotchlok Connector’s design, shape, color-coded cap concepts, and element technology, the Scotchlok Series 2 Connectors additionally incorporate full wire range capability, increased port size to accommodate up to .082” (2.08 mm) insulation sizes, double elements in all products and a new solvent resistant plastic construction.

The UR2 Connector for general butt splicing
The UR2 Connector accepts any two or three solid copper conductor combinations of 19-26 AWG (0.9mm - 0.4 mm) air core or filled cable with a maximum insulation O.D. of .082” (2.08 mm). The wires joined can be of different wire gauges.

Its three ports accept two or three conductors for butt splicing. And like most Scotchlok Connectors, the UR2 is filled with a sealant to provide moisture resistance. A dry version of the UR2, the UR2-D, is also available.

The UR2 and UR2-D Connectors are available in box, bulk, bin, jumbo package and cartridge. The cartridges, containing ten connectors each, are for use with the Scotchlok E-9C Series Tools.

The UY2 Connector for smaller splice bundles
Approximately half the size of the UR2, the UY2 Connector can handle a higher pair count cable and keep the splicing bundle O.D. to a minimum.

The UY2’s two ports accept any two solid copper conductor combinations of 19-26 AWG (0.9 mm - 0.4 mm) filled or air core cable with a maximum insulation O.D. of .082” (2.08 mm). The wires joined can be of different wire gauges. Factory inserted sealant insulates the connections, protects against corrosion, and seals out moisture. In addition, the UY2 is available in a dry version, the UY2-D.

The UY2 and UY2-D are available in box, bulk, bin and cartridge.

The UB2A Connector: a unique time-saver for tap splicing
The pre-crimp feature of this compact bridging connector gives the craftsperson a time saving edge. By positioning the UB2A on the conductor and pre-crimping, the connector is prevented from slipping out of the connector before the crimp is completed. A thin membrane molded into the tap wire entry port also assists the craftsperson by securing the tap wire until the crimp is completed. Like the UR2, a factory-installed sealant insulates against corrosion, and seals out moisture. The UB2A-D, a dry version, is available as well.

The UB2A permits tapping directly onto an existing conductor without interrupting service. In ready access closures, the UB2A eliminates cutting cable pairs, opening pairs, and piecing out wires.

Fast and easy to work with, the UB2A accepts 19-26 AWG (0.9 mm - 0.4 mm) plastic-, paper-, or pulp-insulated solid copper wire with a maximum O.D. of .082” (2.08 mm). The wires joined can be of different wire gauges.

The UB2A and UB2A-D are available in box, bulk and bin.

Dry versions of connectors
The UR2-D, UY2-D and UB2A-D are dry versions of the UR2, UY2 and UB2A. They are designed for splicing PIC, pulp and paper conductors where a nonfilled connector is preferred.
3M™ Scotchlok™ UR2, UY2 and UB2A Connectors

*Use caution to make sure insulation is pushed completely into connector before crimping. Scotchlok communication connectors may be used on standard polyethylene wire insulation, the polypropylene wire insulation of Filled Cable and on pulp. Use of a connector is limited only to port size. Wire sizes may be intermixed within a connector.

**The E-9BM and E-9C tools are recommended when splicing 19 AWG conductors.

MOLEX CONNECTOR

[RELATED SECTION 26 05 83]

Model Number:
Location: underneath trailers
Features:
- Wire Size: 12 AWG, 14 AWG
- Operating temperature range: 35°C - 85°C
- Circuit Detail: 3 circuits with ground

Electrical:
- Voltage: 300 V
- Current: 20 A

Approval Certificates:
- UL Listed
- CSA Listed

Available: Mouser Electronics
Price: $17.11

Manufacturer: Molex
Manufacturer Part #: 19401-1000
Description: Heavy Duty Power Connectors CQC-2

Specs:
- Manufacturer: Molex
- Product Category: Heavy Duty Power Connectors
- RoHS: Details
- Series: 19401 Series
- Housing Material: Polycarbonate
- Contact Material: Copper
- Contact Plating: Tin
- Voltage Rating: 300 V
- Current Rating: 20 A
- Insert / Contact Gender: Male
- Number of Positions / Contacts: 3
- Packaging: Bag
- Product Types: S慈OW / DIW Connectors
- Standard Pack Qty: 50
- Termination Style: IDC
- Wire Gauge Range: 14-12
- Part # Aliases: 0194011000 CQC-2,

Availability:
- Stock: 40 Can Ship Immediately
- 241 Can Ship in 10 Days
- On Order: 0
- Factory Lead-Time: 4 Weeks

**Part Number:** 0194011000  
**Status:** Active  
**Overview:** self-contained power connector socc  
**Description:** Self-Contained Power Connector for Solid Nonmetallic Sheathed Cable, 12-14 AWG

### Agency Certification
- **CSA:** LR10039  
- **UL:** E182387

### General
- **Product Family:** I/O Connectors  
- **Series:** 19401  
- **Application:** Wire-to-Wire  
- **Comments:** Used to wire smoke detectors, 3-way lights, entertainment centers, and many other electrical applications using 110 and 220 AC circuits

### Component Type
- **Molex Kit:** Yes  
- **Overview:** self-contained power connector socc

### Physical
- **Circuit(s):** Loaded  
- **Circuit(s) (maximum):** 3  
- **Circuit(s) Detail:** 3 Circuit(s) Ground  
- **Color - Resin:** Clear Natural  
- **Durability ( mating cycles max):** 250  
- **Flammability:** 94V-5/A  
- **Lock to Mating Part:** Yes

### Material
- **Material - Metal:** High Copper  
- **Material - Pin:** Tin  
- **Material - Resin:** Polycarbonate, Polyester  
- **Material Number of Rows:** 1  
- **Orientaion:** Vertical  
- **PCB Retention:** N/A  
- **Packaging Type:** Bag  
- **Panel Mount:** No  
- **Pitch - Mating Interface:** 10.88mm (0.417")  
- **Plating min - Mating:** 1.016µm (40µ")  
- **Plating min - Termination:** 1.016µm (40µ")  
- **Polarized to Mating Part:** Yes  
- **Surface Mount Compatible (SMC):** N/A  
- **Temperature Range - Operating:** -35°C to +85°C  
- ** Termination Interface: Style:** IET or Pierce  
- **Wire Size AWG:** 12, 14

### Electrical
- **Current - Maximum per Contact:** 20A  
- **Voltage - Maximum:** 300V

### Material Info
- **Old Part Number:** COC-2

### Reference - Drawing Numbers
- **Product Specification:** PS-10902-011  
- **Sales Drawing:** SD-10401-002, SD-10401-1000
TED 5004-C WITH GOOGLE POWERMETER

[RELATED SECTION 26 09 13]

Model Number: 5004-C
Location: Electrical Closet, Main House Mechanical Closet
Features:
   1 Gateway embedded with Footprints software
   4 Measuring Transmitting Units/Current Transformers [in the Electrical Closet]
Electrical:
   Wattage:
   Voltage:
   Load Rating:
Approval Certificates:
Available: TED The Energy Detective
Price: $239.95
TED 5000-C (basic model with wireless display)

Availability: in stock
$239.95

Quick Overview

This bestselling model features components necessary to monitor energy usage, plus a sleek, wireless display to serve as a friendly reminder to keep you aware of your household energy usage. In addition, you can use your computer or mobile device to track energy usage, monitor up to five individual appliances, project monthly bills, and view historical data.

The TED 5000-C package has the option to integrate with Google PowerMeter and includes:
- One Measuring Transmitting Unit with a set of Current Transformers (MTU/CT set)
- One Gateway embedded with Footprints software
- One sleek, wireless Display with AC/DC charger and charging stand

Model 5000-C with Google PowerMeter

Includes:
- Gateway
- 1-MTU/CTs
- Display

Works with:
- Homes with Single Electrical Panels
- Homes with Single Electrical Panels and Solar or wind installations (will only record the net of generation/production) (to record generation/production separately, you will need to order the TED 5002-C)

Description:

Model 5000-C comes with all the components necessary to monitor energy usage, plus a sleek, wireless display to serve as a friendly reminder to keep you aware of your household energy usage. In addition, you can still use your computer or mobile device to track your energy data. The TED 5000-C package includes one set of CTs, one MTU, one Display, and one Gateway and works with Google PowerMeter.
LUTRON MAGNETIC LOW VOLTAGE DIMMER

[RELATED SECTION 26 09 33]

Model Number: DVLV-600P [-WH, -GY]
Location: Interior White Walls [-WH], Interior Gray Walls [-GR]
Dimensions:
- Width: 3"
- Height: 4-3/4"
- Depth: 1/2"
Finish: White and Gray
Features:
- Control Type: Rocker
- Actions: On/Off
- Dimmer Type: Slide
Electrical:
- Wattage: 450 W maximum
- Voltage: 120 V
- Load Rating: 600 VA
Approval Certificates:
- UL Safety Approval
- CSA Safety Listing
- Energy Star Qualified
Available: Lowes
Price: $18.00
Product family features

- Large paddle switch with a captive linear-slide dimmer for a standard designer wallplate opening
- Preset dimmer
- Select lighter color models feature built-in soft-glow locator light
- C·L® dimmers offer more reliable dimming performance over standard dimmers when dimming CFLs and LEDs; they also provide full range dimming for incandescent and halogen bulbs as well as mixed loads types
- C·L® dimmers feature HED™ Technology with advanced dimming circuitry designed for compatibility with most high-efficacy light bulbs
- eco-dim® model available
- 1000W preset dimmers have voltage compensation, which maintains stable light levels, despite line voltage variations
- Coordinating Claro®, Satin Colors® and Stainless Steel wallplates only available separately
- Custom engraving available for wallplates, see pg. 155

Control types

- Single-pole (one location)
- 3-way or 4-way (two or more locations)

Direct load type compatibility

- Incandescent/halogen lighting
- Magnetic low-voltage lighting
- Electronic low-voltage lighting
- Fluorescent lighting
- LED lighting
- Dimmable CFL/LED lighting (screw-base)
- Ceiling fans

Load type requiring load interface

- Neon/cold cathode lighting

Lighting load interfaces may be applicable for some additional load type, voltage and capacity combinations. For additional information, see pg. 174.

LUTRON SINGLE POLE SWITCH

[RELATED SECTIONS 26 09 33]

Model Number: CA-1PSH [-WH, -GR]
Location: Interior White Walls [-WH], Interior White Walls [-GR]

Dimensions:
- Width: 3"
- Height: 4-3/4"
- Depth: 1/2"

Finish: White, Gray

Features:
- Control Type: Rocker
- Source Type: Incandescent, Halogen, Magnetic Low Voltage,
  Electronic Low Voltage, Fluorescent, LED

Electrical:
- Wattage:
- Voltage: 120
- Load Rating: 120/277 VAC, 60 Hz

Approval Certificates:
- UL Safety Approval
- CSA Safety Listing

Available: Lowes

Price: $4.14
Field customizable 6-port frame

- Shipped with six blanks in matching colors
- Connectors and wallplate sold separately
- Connectors snap in (no tools required)
- Connectors available in White (WH), unless noted

| 6-port frame* | CA-6PF-CC³ | SC-6PF-CC⁴ |

Connectors for 6-port frame

**Telephone/network jacks**

- 8-conductor, RJ45 category 3: CON-1P-C3-EE⁴
- 8-conductor, RJ45 category 5e: CON-1P-C5E-EE⁴

Features:
  - Three Way Switch
  - Built in soft glow and night light
  - Power failure memory
  - RFI Suppression
  - UV Stable color
  - Control Type: Rocker
  - Source Type: Magnetic Low Voltage
Electrical:
  - Voltage: 120 V
  - Load Rating: 120/277 VAC, 60 Hz
Approval Certificates:
  - UL Safety Approval
  - CSA Safety Listing
Available: Lowes
Price: $5.27
### Field customizable 6-port frame

- Shipped with six blanks in matching colors
- Connectors and wallplate sold separately
- Connectors snap in (no tools required)
- Connectors available in White (WH), unless noted

ELEMENTAL LED DIMMABLE DRIVER

[RELATED SECTION 26 22 16]

Model Number: EL-20WDIM
Location: throughout The Solar Homestead
Dimensions:
  Length: 5-1/2”
  Width: 2”
  Height: 1-1/2”
Electrical:
  Wattage: 20 W
Approval Certificates:
  UL Listed
Available: Elemental LED
12V Dimmable Driver
EL-TMDRVR

UL Recognized Component, E164279 (20W, 60W, 200W):
Electrical Insulation Component
ETL Listed (100W)
Compatible with: 120V AC magnetic
low voltage dimmers
Minimum load: none
Insulation System Temp Class: 268°F / 130°C (B)
Working Temp.: < 140°F / 60°C
(104°F / 40°C ambient temp.)

The 12V Dimmable Driver is a steady low voltage power driver perfect for supplying
dimmable LED lights. Have you been searching everywhere for a way to dim your LED
lights without flickering and using a household dimmer switch? Look no further. This
12V DC transformer—which is available in 20W, 60W, and 200W versions—can be used
to power any of our dimmable LED lights, and allows you to install our low voltage LED
light fixtures while using a common 120V magnetic low voltage dimmer. There's no
need to rewire your kitchen cabinets or living room lights, just tap into the high voltage
AC power near where you intend to install your energy-efficient LED product.

12V Dimmable Drivers can be dimmed with a standard AC magnetic low voltage dim-
mer, with no external fusing required. This DC driver is designed for high voltage AC
dimmer switches that are rated for use with magnetic low voltage loads or that are
stated to have symmetric forward phase control. This driver is not compatible with our
12V Inline Dimmer Switch, which is a 12V DC electronic low voltage dimmer, and will
not work with other switches rated for electronic low voltage power, and is not for use
with incandescent dimmers that do not carry the magnetic low voltage or symmetric
forward phase control ratings.

The following Lutron brand 120V dimmer switches are compatible with our Dimmable
Drivers: Ariachi (model #AYLV-600P), Diva (# DVSCI600P), Glyder (#600V), Skylark
(#SLV-600-P), Vario (#V-600). Lower wattage LED installations, such as one that
would require the 20W Dimmable Driver, may require a specific model of dimmer.

And this power supply's transformer has a sturdy aluminum housing, for protection
against the elements. Just loosen the screw on one side of the driver to separate the
two sections, then connect its wires to your household AC wires through the two knock-
outs at the end of the housing. The driver comes with full instructions, safety guidelines,
and wiring diagrams, so installation is simple.

For optimum performance, do not load the power supply to more than 80% of its
labeled rating.

need to rewire your kitchen cabinets or living room lights, just tap into the high voltage
AC power near where you intend to install your energy-efficient LED product.

12V Dimmable Drivers can be dimmed with a standard AC magnetic low voltage dimmer,
with no external fusing required. This DC driver is designed for high voltage AC
dimmer switches that are rated for use with magnetic low voltage loads or that are
stated to have symmetric forward phase control. This driver is not compatible with our
12V Inline Dimmer Switch, which is a 12V DC electronic low voltage dimmer, and will
not work with other switches rated for electronic low voltage power, and is not for use
with incandescent dimmers that do not carry the magnetic low voltage or symmetric
forward phase control ratings.

The following Lutron brand 120V dimmer switches are compatible with our Dimmable
Drivers: Ariachi (model AYLV-600P), Diva (# DVSLCLV-600P), Glyder (#600V), Skylark
(#SLV-600-P), Vareo (#V-600). Lower wattage LED installations, such as one that
would require the 20W Dimmable Driver, may require a specific model of dimmer.

And this power supply’s transformer has a sturdy aluminum housing, for protection
against the elements. Just loosen the screw on one side of the driver to separate the
two sections, then connect its wires to your household AC wires through the two knock-
outs at the end of the housing. The driver comes with full instructions, safety guidelines,
and wiring diagrams, so installation is simple.

For optimum performance, do not load the power supply to more than 80% of its
labeled rating.

ELEMENTAL LED NON-DIMMABLE DRIVER

[RELATED SECTION 26 22 16]

Model Number: EL-12VDRVR
Location: throughout The Solar Homestead
Dimensions:
  Length: 6-1/2"
  Width: 1-1/8"
  Height: 1-3/4"
Features:
  Input voltage: 100V-240 Vac
  Input current: 0.55 A
  Output voltage: 12 Vdc
Electrical:
  Wattage: 60 W
  Voltage: 1.67 A
Approval Certificates:
  UL Listed
Available: Elemental LED
Elemental’s 12V Driver provides the steady voltage and high efficiency needed to get the most from LED lights. All our 12V LED drivers are energy-efficient, eco-friendly. Also, our 20W, 35W, and 60W drivers have an IP rating of IP67, which means that they’re water resistant and wet location rated, perfect for outdoor use, but it can also be used indoors. The 150W, 200W, 300W and 600W drivers are designed to be used either in a clean, dry environment indoors or to be placed in an enclosure provided by the end user if the driver is used in harsher environments. Our 12V LED power driver is highly efficient and provides extremely steady voltage, so no more flickering lights. All of the LED drivers are solid state, which means they do not have any moving parts, will last longer than a switching power adapter, and draw power only when the attached LED light fixtures are turned on, which eliminates phantom energy consumption.

- Outdoor drivers (which are also for use indoors) are available in these wattages: 20W, 35W, and 60W
- Indoor drivers are available in these wattages: 150W, 200W, 300W and 600W

If you’re working with a permanent low voltage LED lighting installation, it’s vital to use a Power Driver that provides a steady current. The Driver/transformer is a hard-wired power source for your indoor LED lights that is typically placed inside a wall or ceiling, in the attic or under the house, but is also compact enough to tuck into a corner. Think about using this outdoor LED driver near a pool or hot tub, with a water feature, in a garden or as part of landscaping, in a greenhouse, or anywhere your lighting setup will be exposed to moisture and the elements.

Our 12V DC Drivers are compatible with electrical systems from 100V to 240V AC, with frequencies of both 60 Hz (North and Central America) and 50 Hz (the rest of the world). Like all our products, these 12V drivers are RoHS (Restriction of Hazardous Substances) certified.

For optimum performance, we recommend you do not load the power supply to more than 80% of its labeled rating. So a 60W driver should power only 48 Watts of LED lighting.

ROMEX SIMPULL NM-B

[RELATED SECTION 26 27 26]

Model Number: NM-B
Location: throughout The Solar Homestead
Features:
- Gauges vary: 12, 14, 10, 8, and 6 AWG
- Number of conductors: 3 for all gauges

Electrical:
- Voltage: 600 V
- Current: varies between 15, 20, 30, 40, and 55 A

Approval Certificates:
- UL Listed

Available: Lowes
**APPLICATIONS**

Southwire's Romex SIMpull® Type NM-B (nonmetallic-sheathed cable) may be used for both exposed and concealed work in normally dry locations at temperatures not to exceed 90°C (with ampacity limited to that for 60°C conductors) as specified in the National Electrical Code. NM-B cable is primarily used in residential wiring as branch circuits for outlets, switches, and other loads. NM-B cable may be run in air voids of masonry block or tile walls where such walls are not wet or damp locations. Voltage rating for NM-B cable is 600 volts.

**SPECIFICATIONS**

**CONSTRUCTION**

Southwire's Romex SIMpull® Type NM-B cable is manufactured as 2, 3, or 4 conductor cable, with a ground wire. Copper conductors are annealed (soft) copper. Stranded conductors are compressed stranded. Conductor insulation is 90°C-rated polyvinyl chloride (PVC), nylon jacketed. Southwire's SIMpull® Designed for Easier Pulling, Resulting in Easier installation. The cable jacket is color-coded for quick size identification; White - 14 AWG, Yellow - 12 AWG, Orange - 10 AWG, and Black - 8 AWG and 6 AWG.

*Ampacity per 310.15 and 334.80, National Electrical Code, 2008 edition.

NOTE: Jacket thickness for all NM-B cable is 30 mils.

*Color Code for 2/2 Conductor Cable is Black, White, Red, and White with Red Stripe.

**Color Code for 4 Conductor Cable is Black, White, Red, and Blue.

### STANDARD PACKAGE CODE

- B - 1000' Reel
- C - 500' Reel
- E - 1000' Spool
- H - 250' Coil
- K - 125' Coil

### RECOMMENDED SAMPLE SPECIFICATIONS:

Conductors shall be UL-listed Type NM-B, suitable for operation at 600 volts in all installations as specified in the National Electrical Code. SIMpull® jacketed conductors shall be annealed copper as manufactured by Southwire Company or approved equal.
ROMEX SIMPULL THHN/THWN-2

[RELATED SECTION 26 27 26]

Model Number: THHN/THWN-2
Location: throughout The Solar Homestead
Features:
- Grounding wire uses 6 AWG, stranded 19
- Wire gauge varies between 6, 8, 10, 12, and 14 AWG
- Stranded 1 and 19
Electrical:
- Current: varies between 65, 50, 30, 15 A
Approval Certificates:
- UL Listed
Available: Lowes
APPLICATIONS
Southwire SIMpull THHN® or THWN-2 conductors are primarily used in conduit and cable trays for services, feeders, and branch circuits in commercial or industrial applications as specified in the National Electrical Code. When used as Type THHN, or T90 Nylon conductor is suitable for use in dry locations at temperatures not to exceed 90 °C. When used as Type THWN-2 or THWN75, conductor is suitable for use in wet or dry locations at temperatures not to exceed 90 °C or not to exceed 75 °C when exposed to oil. When used as Type MTW, conductor is suitable for use in wet locations or when exposed to oil at temperatures not to exceed 60 °C or dry locations at temperatures not to exceed 90 °C (with ampacity limited to that for 75 °C conductor temperature per NFPA 79). Conductor temperatures not to exceed 105 °C in dry locations when rated AWM and used as appliance wiring material or when used as T90 Nylon. Voltage for all applications is 600 volts. This cable should be installed without application of pulling lubricant.

SPECIFICATIONS
Southwire SIMpull THHN® or THWN-2 or MTW (also AWM) meet or exceed:
- All applicable ASTM specifications
- UL Standard 83, 1581, and 1065 (MTW)
- T90 Nylon/THWN75 sizes through 500 kcmil Standard C22.2 No. 75-08
- NOM-ANCE 90 °C
- National Electrical Code, NFPA 70, 2011 Edition
- VW-1 - Sizes 14 through 1 AWG
- CT Use - UL 1685; Sizes 1/0 AWG and larger
- FT1 - Sizes through 500 kcmil
- RoHS/REACH Compliant
- Sunlight Resistant - Marked and listed in all colors sizes 2 AWG and larger
- NEMA WC 70 Construction Requirements

CONSTRUCTION
Southwire SIMpull THHN® or THWN-2 or MTW copper conductors are annealed (soft) copper, unlay compressed strand, insulated with a tough heat and moisture resistant polyvinyl chloride (PVC), over which a SIM (SLIKQWIK® Infused Membrane) nylon (polyamide) or UL Recognized equal jacket is applied. Available in black, white, red, blue, purple, green, yellow, brown, orange, and gray. Some colors standard, some subject to economic order quantity. THWN sizes 14 - 10 AWG. THWN-2 sizes 8 AWG and larger.

1 Oil and gasoline resistant II as defined by Underwriters Laboratories.

SOUTHWIRE ALUMINUM SER CABLE

[RELATED SECTION 26 27 26]

Location: underneath various trailers

Features:
- Stranding 10 and 19
- Sunlight resistant

Electrical:
- Current: 60C 100, 75C 120, 90C 135 and 60C 150, 75C 180, 90C 205

Approval Certificates:
- UL Listed

Available: Lowes
Copper SE Cable

Service Entrance Cable, Type SE, Style SER and SE Style U
Service Entrance Cable, 600 Volt
Individual Conductors Rated XHHW-2 or THHN/THWN.
Jacket and Individual Conductors Sunlight Resistant.

APPLICATIONS

Southwire Type SE, service entrance cable is primarily used to convey power from the service drop to the meter base and from the meter base to the distribution panelboard; however, the cable may be used in all applications where Type SE cable is permitted. SER may be used in wet or dry locations at temperatures not to exceed 90°C. Voltage rating is 600 volts.

SPECIFICATIONS

CONSTRUCTION

Southwire Type cable is constructed with sunlight resistant Type XHHW-2 conductors or Type THHN/THWN conductors. Copper conductors are annealed (soft) copper. Cable assembly plus reinforcement tape are jacketed with sunlight resistant gray polyvinyl chloride (PVC). Available as 1 conductor with a concentric ground, 2 conductor with a round or concentric ground, or 3 conductor with a bare ground. SE cable is jacketed with gray sunlight resistant polyvinyl chloride (PVC).

### Allowable Ampacities:

Allowable ampacities shown are for general use as specified by the National Electrical Code, 2008 Edition, section 310.15. 60°C - When terminated to equipment for circuits rated 100 amperes or less or marked for 14 through 1 AWG conductors. 75 °C - When terminated to equipment for circuits rated over 100 amperes or marked for conductors larger than 1 AWG. 90°C - Wet or dry locations. For ampacity derating purposes.

Dwelling - For dwelling units, conductors shall be permitted at listed ampacities as 120/240-volt, 3-wire, single-phase services and feeders.

STANDARD PACKAGE CODE:
- B 1000' Reel
- C 500' Reel

- J 150' Coil
- L 100' Coil
- M 50' Coil

**RECOMMENDED SAMPLE SPECIFICATIONS:**

Cable shall be UL-listed Type SE, suitable for operation at 600 volts. Conductors shall be annealed copper, weather resistant PVC jacketed, as manufactured by Southwire Company or approved equal.
SOUTHWIRE THERMOSTAT WIRE

[RELATED SECTION 26 27 26]

Model Number: 64162143
Location: throughout The Solar Homestead
Dimensions:
  Diameter 132 mils
Features:
  Jacket thickness: 14 mils
  Conductor size: 18 AWG
  Number of conductors: 2
  Conductor colors: red, white
  Sunlight resistant
  Can be used in temperatures up to 140°F
Electrical:
  Voltage: 150 V
  Current: 60C
Approval Certificates:
  UL Listed
Available: Lowes
APPLICATIONS

Southwire’s Thermostat Wire is a class 2 power-limited circuit cable for use in heating and air conditioning controls (bell and alarm systems).

SPECIFICATIONS

- CL2- Power Limited per NEC Article 725. MP- Multi Purpose Cable per Articles 725, 760, and 800.
- CM-Communication Cable per Article 800
- FPL - Power Limited Fire Protective Signaling Cable per Article 760
- Sunlight Resistant, PVC Insulation, and Solid Bare Copper per UL Standard 13
- RoHS Compliant
- OSHA Acceptable

CONSTRUCTION

Southwire Thermostat Wire is manufactured using solid copper conductors with 6 mils of polyvinyl chloride insulation. The two conductor cable is flat - multiconductor cables are round.

This UV resistant cable can be used in the following photovoltaic applications:
- Between solar panels
- Between solar roof tiles
- Between panels and the AC/DC inverters

Approval:
- UL 854 approved
- Approved for outdoor use

Material:
- Cable conductor is pre-tinned, stranded copper wire.
- Outside wire jacket provides a robust layer of protection and is UV resistant

Voltage:
600V

Temperature Range:
-40 °C - +90 °C

   1 pole
   AIR: 10 k
Electrical:
   Voltage: 120 V
   Current: 15 and 20 A
Approval Certificates:
   UL Listed
   CSA Listed
   ANSI Certified
Available: Consolidated Electrical Distribution
Interrupting Rating

The interrupting rating of a circuit breaker is the highest current at rated voltage that the circuit breaker is intended to interrupt under standard test conditions. A circuit breaker must be chosen so that the interrupting rating is equal to or greater than the maximum available short-circuit current at the point where the circuit breaker is applied in the system.

Ground Fault Circuit Interrupter Receptacles

2-Pole, 3-Wire Grounding
15A 125V/AC
20A 125V/AC

**Specification Grade GFCIs**

**FEATURES**

- ArrowLink modular plug and connector incorporate a first make/last break grounding design.
- Wire leads (where applicable) are crimped and resistance welded to plug and connector terminals.
- Audible “click” when mating plug and connector indicates proper assembly.
- Pre-wired plugs provide 100% inspected and consistent torque settings.
- Exclusive screw terminal guards insulate conductive surfaces.
- Tamper Resistant models comply with 2008 NEC® Article 406.11 for all dwelling units.
- ShockSentry™ lock-out function prevents miswired line-load connections and GFCI circuitry damage.

Bifacial Photovoltaic Module

HIT Double195

Power per Square Foot up to 19.1 Watts

High Efficiency
HIT® Double bifacial solar panels are the World leaders in sunlight conversion efficiency, helping customers to enjoy the maximum power per square foot from available space.

Power Guarantee
SANYO guarantees customers will receive 100% of the panel’s rated power (or more) at the time of purchase, enabling owners to generate more kWh per rated watt.

Bifacial Effect
The back face of HIT Double solar panels generates electricity from ambient light reflected off surrounding surfaces, and combines with power from the front face of the panel. Dependent upon system design and site albedo, this results in up to 30% higher power generation (more kWh) per square foot.

Application Possibilities
- Architectural, Awnings, Balconies, Bus Shelters, BIPV
- Deck & Porch Coverings, Canopies, Carports, Facades
- Fences, Siding, Trellises, Tracking Systems

Proprietary Technology
HIT bifacial solar cells are hybrids of single crystalline silicon surrounded by ultra-thin amorphous silicon layers, available solely from SANYO.

High Temperature Performance
As temperatures rise, HIT Double solar panels produce more electricity than conventional solar panels at the same temperature, for good performance in high-temperature sites.

Quality Products
SANYO silicon wafers are made in California USA, and assembled in Mexico at SANYO's certified factory. ISO 9001 (quality), 14001 (environment), 18001 (safety).

Valuable Features
HIT Double panels operate silently and have no moving parts. A double glass structure allows some sunlight to penetrate portions of the panel, creating brilliant light and shadows for aesthetic and architectural applications. HIT Double panels are perfect for areas with performance-based incentives and tradable energy credits.

**Section A-A**

- **Ground (1 place):**
  - Negative (−)
  - Positive (+)

- **Connector (MC™ Plug):**
  - Junction Box

Note: A module must be installed on a support structure rail using four symmetrical mounting points within Range A.

**Important:** The rated power of HIT® Double bifacial solar panels is measured under Standard Test Conditions (STC). STC does not account for power produced from the back face of panels. Therefore, HIT Double panels will produce more power than their STC rating, up to 30% more, depending upon the system design and site albedo. Account for the additional power when sizing, selecting system components and wiring.

**CAUTION!** Read the operating instructions carefully before use of these products.

3 Piece Cree Dimmable LED Puck Light Kit

EL-DIM3PKKT

These specs are for one puck:

- Weight: 4 oz.
- Width: 2.72 in.
- Depth: 0.53 in.
- Lead Wire Length: 3 feet
- Fixture Surface Temp.: 68° - 154° F
- UV/IR Radiation: None
- Lifespan: 50,000+ hours

This 3 Piece Cree Dimmable LED Puck Light Kit emphasizes energy efficiency and quality. LED pucks were designed with the kitchen in mind, but are also great for other difficult-to-light areas in your household – perhaps the corner office nook where you struggle with the printer or the dark garage shelves which cry out for light (can you ever find anything without a flashlight?). Whether you choose the kit in neutral white or warm white, you will benefit from the clarity these puck-shaped lights provide in every instance. Built from brushed aluminum, these stylishly-designed dimmable LED kitchen lights fit seamlessly into today’s contemporary homes.

This Cree LED Puck Light 3 Pack features superior and brighter bulbs made by Cree, the most cutting-edge manufacturer of LEDs in the world. Every plug-and-play light kit comes with:

- 3 Cree LED Puck Lights
- a DC 3-Way Splitter
- a 12V Inline Dimmer Switch
- a 24 Watt Plug-in DC Adapter

They also offer a long-term lighting solution. Our LED cabinet lights are estimated to last for more than 50,000 hours. Based on average use, that’s a lifetime of 7 to 8 years. How many other appliances or products in your house can you count on for that long? Better still, these lights consume very little energy. Each light is less than 3 inches across and contains three tiny LED bulbs. A single kit includes an adapter, splitter and screws. Each kit consumes just 9 watts, well below the amount required of traditional incandescent light bulbs. Your electricity bill will drop if you are replacing traditional incandescent bulbs.

You can trust that our high-quality Elemental products are manufactured according to the strictest standards. The LED kitchen lights, like the others devices in our collection, hold the prestigious RoHS, or Restriction of Hazardous Substances, certification. This ensures that no environmentally harmful components were used in the manufacturing process. Not sure if LED cabinet lights are the right products for your home or business? Contact us for a customized plan that will bring beauty and efficiency to your space, all at a reasonable price.

Waterproof Brighter LED Light Bar

EL-BRTWPBAR

Width: 0.6 in.
Height: 0.35 in.
LED Spacing: 0.8 in. (between centers)
0.6 in. (between edges)
Beam Angle: 120°
IP Rating: 68
Operating Temp.: 75° F / 25° C
UV/IR Radiation: None
Lifespan: 50,000 hours

The waterproof version of our Brighter LED Light Bar is here! Elemental’s Waterproof Brighter LED Light Bar is not only twice as bright as our standard LED light bar, thanks to its use of high-power tri-chip SMD bulbs, but it’s completely waterproof. And with its compact size, this super bright LED light fixture makes a great alternative to the fluorescent tube. The Brighter Waterproof LED Bar can be used for many outdoor purposes:

- For patio, deck, yard, garden, greenhouse, and pool lighting
- In the house as kitchen and bathroom lighting, in the laundry room, basement, and garage
- In businesses such as spas, restaurants, bars, lounges, clubs, and coffee shops
- Wine caves and cellars (no UV emissions)
- Vehicular accent lighting for cars, trucks, limousines, and RVs
- Marine lighting on motor boats, fishing boats, yachts, and cruise ships

This outdoor LED light bar requires a low amount of electricity to power it, only 3.6 to 7.2 Watts per bar, which means both that it is safe, so there is no danger of shock, and that the bar gives off very little heat, making it perfect to light heat-sensitive items such as plants, food, wine, art, etc. Consider swapping out your standard incandescent or fluorescent kitchen lights for a moment. If you are currently using an incandescent source, you will experience a 90% savings by switching to LEDs. That means that the light bar will pay for itself within one year.

Installation of this super bright LED Light Bar is quite simple. Every bar includes mounting clips—each clip is attached to the surface with two screws—and a pair of waterproof solder connectors for use with a driver. The bar can be powered with one of our waterproof 12V DC power drivers (see below), or with a 12V DC adapter. And, like all Elemental products, this waterproof LED light holds the prestigious ROHS certificate, which ensures that no environmentally harmful components were used in manufacturing.

SYLVANIA 48” T8 LINEAR FLUORESCENT STRIP
[RELATED SECTION 26 51 13]

Model Number: 22062
Location: Core Shower
Dimensions:
  Length: 48"
Features:
  Lamp application: fluorescent
  Base: med bi pin
  Color temperature: 4,100 Kelvins
  Lumens: 2850
  CRI: 85
Electrical:
  Wattage: 30 W
Efficiency:
  Rate life: 40,000 hrs
Available: Lowes
Price: $5.09
Sylvania 22062 - FO30/841/XP/SS/ECO3 Straight T8 Fluorescent Tube Light Bulb
by Sylvania

Price: $5.09

In stock.
Processing takes an additional 2 to 3 days for orders from this seller.
Ships from and sold by allLightBulbs.

7 new from $4.94

OCTRON® 800 XP® SUPERSAVER® ECOLOGIC®3 EXtended Performance Fluorescent Lamps

Sylvania OCTRON 800 XP SUPERSAVER ECOLOGIC3 lamps operate on standard T8 instant start systems and provide up to 22% energy savings over 32 Watt lamps. At 10c/kWh and 4000 hours of operation per year, the 22% energy savings translates to a savings of $11.74 per fixture per year for a 4-lamp fixture with a normal ballast factor, instant start ballast. The initial lumen output and 94% lumen maintenance of the OCTRON 800 XP SUPERSAVER/ECO3 lamps help ensure that light levels are maintained while energy is saved. These lamps pass the Federal TCLP test, classifying them as non-hazardous waste in most states.

For optimal performance and system warranty pair with QUICKTRONIC® electronic ballast systems.

Key Features & Benefits
- Energy savings compared to standard 32W T8 lamp
  - 6% with the 30W XP®/SS
  - 12% with the 28W XP®/SS
  - 22% with the 25W XP®/SS
- 94% lumen maintenance
- 3000K, 3500K, 4100K & 5000K
- 85 CRI
- Dimmable (see application note 4)
- Retrofit lamp for existing T8 instant start systems
  - 40,000 hours rated life
  - 12 hours per start
- Increased life on SYLVANIA QUICKTRONIC® PROStart® PSX and PSN programmed rapid start ballasts
  - 42,000 hours rated life
  - 12 hours per start
- Available in 4-foot, 8-foot and exTended Life (XL) types

* SYLVANIA OCTRON ECOLOGIC3 T8 fluorescent lamps pass the Federal Toxic Characteristic Leaching Procedure (TCLP) criteria for classification as non-hazardous waste in most states.

ECOLOGIC3 represents a more comprehensive approach to sustainability encompassing high efficiency, long life and RoHS/TCLP compliance.

1. TCLP test results are based on NEMA LL6 Series standards and are available on request.
2. Lamp disposal regulations may vary; check your local & state regulations.

Application Information

Applications
- Hospitals
- Industrial
- Office
- Retail
- Schools

Application Notes
1. Recommended to be used on F32T8 instant start ballast with minimum open circuit voltage of 550V RMS at the lamp.
   a. Electronically ballasted fixture configurations which operate lamps remotely, such as Master/Satellite applications, can cause reduction of lamp open circuit voltage, in the remote fixture, below the minimum required for reliable lamp starting. For more information, please call 1-800-LIGHTBULB and ask for Ballast Technical Assistance or call your fixture manufacturer.
   b. Not recommended to be used: (1) in remotely ballasted fixtures with lamp open circuit voltages below 550V, (2) with Rapid Start ballasts unless the lamp open circuit voltage is greater than 570V, (3) in air handling fixtures, (4) on low power factor ballasts or (5) inverter operated emergency lighting systems unless any of the above equipment is specifically listed for 30 watt lamps. Any of the above situations could result in lamp starting and stabilization problems, or system compatibility issues.
2. If an operating lamp is exposed to drafts or the ambient temperature falls below 60°F, striation (a rhythmic pulsing pattern of light running down the tube) and/or reduction in lamp brightness may occur. While visually disconcerting, neither behavior is damaging to the lamp and removing the cause (draft or temperature) will return the lamp to normal operation.
3. Fixtures must conform to ANSI C78.81-2005 requirements for luminaires design.
4. Contact OSRAM SYLVANIA for approved dimming ballasts.

1. Measured at 40% of rated life.

Sample Specification

Lamp(s) shall be OCTRON® 800 XP® SUPERSAVER® ECOLOGIC®3 (25W, 28W, 30W) lamps(s) having medium bi-pin bases. Lamp(s) shall be designed to pass the Federal TCLP test In force at the time of manufacture. Lamps shall have initial lumens of (2475, 2725, 2850), mean lumens of (2327, 2562, 2679), and a correlated color temperature of (3000K, 3500K, 4100K) Kelvin or initial lumens of (2400, 2600, 2800) and mean lumens of (2256, 2444, 2632) and a correlated color temperature of 5000K. Lamp(s) shall have a minimum of (24,000, 40,000) on (instant start, programmed rapid start) ballasts, 94% lumen maintenance at 40% of rated life and a CRI of (85, 80). The OCTRON XP SUPERSAVER ECOLOGIC®3 lamp(s) shall be operated on QUICKTRONIC® electronic, high frequency ballasts with complete system warranty from the manufacturer covering lamps and ballast.

Application Information

Application Notes

1. F025, F028 and F030 SUPERSAVER lamps are recommended to be used on F32T8 instant start ballast with minimum open circuit voltage of 550V RMS at the lamp.
   a. Electronically ballasted fixture configurations which operate lamps remotely, such as Master/Satellite applications, can cause reduction of lamp open circuit voltage, in the remote fixture, below the minimum required for reliable lamp starting. For more information, please call 1-800-LIGHTBULB and ask for Ballast Technical Assistance or call your fixture manufacturer.
   b. Not recommended to be used (1) in remotely ballasted fixtures with lamp open circuit voltages below 550V; (2) in air handling fixtures, (3) on low power factor ballasts or (4) inverter operated emergency lighting systems unless any of the above equipment is specifically listed for SUPERSAVER (SS) lamps. Any of the above situations could result in lamp starting and stabilization problems, or system compatibility issues.
2. F006 SUPERSAVER lamps are recommended to be used on F39T8 instant start ballast with minimum open circuit voltage of 725V.
3. F108 SUPERSAVER lamp is exposed to drafts or the ambient temperature falls below 60°F (70°F for F108), a rhythmic pulsing pattern of light running down the tube and/or reduction in lamp brightness may occur. While visually disconcerting, neither behavior is damaging to the lamp and removing the cause (draft or temperature) will return the lamp to normal operation.
4. Fixture must conform to ANSI C78.31-2005 requirements for luminaire design.
5. F006 types are not dimmable. For all other types, contact OSRAM SYLVANIA for approved dimming ballasts.

AMERICAN FLUORESCENT 18” STRIP FIXTURE

[RELATED SECTION 26 51 13]

Model Number: ST115
Location: Main House interior
Finish: white enamel
Dimensions:
  Length: 18”
  Width: 2-3/4”
  Height: 3-3/4”
Features:
  Pre-heat ballast
  Mounting: chain, direct, hung individually or in continuous runs
Available: Lowes
**DESCRIPTION**

This series of striplights has been designed for residential and light commercial applications. Choose from 15", 18", 24", 36", 48", and 96" lengths in a one lamp model, or 24", 36", 48" and 96" lengths in a two lamp model. A four lamp 48" fixture is also available. All units use T12 lamps.

**CONSTRUCTION**

Housing, cover and ends are die formed of 22 gauge cold rolled steel. Standard mounting holes and wiring knockouts are included. Can be stem, chain, or direct mounted; and can be hung individually or in continuous runs.

**FINISH**

Housing interior and exterior are finished in lighting grade white baked gloss enamel paint.

**DIFFUSER**

There is no diffuser for these fixtures. The fluorescent lamps are exposed.

**ELECTRICAL**

All ES units are wired with U.L. listed high power factor, rapid start, Class P, energy saving (ES) full light output (T) ballasts for 120 volt, 60 hertz A.C. operation. All non-ES units have trigger start normal power factor ballast. All (CW) units have cold weather ballasts with a minimum starting temperature of 0F for standard lamps, ES lamps are not recommended for cold weather applications. Lampholders are rotating lock, medium bi-pin type. All fixtures are U.L. listed.

**OPTIONS**

Symmetric and asymmetric reflectors are available (contact factory). For ballast upgrades and options, refer to back of guide. Other voltages, listings, and ratings available on request (contact factory).

STWG1 = one light wire guard
STWG2 = two light wire guard

METALUX 24” UTILITY FLUORESCENT STRIP LIGHT FIXTURE

[RELATED SECTION 26 51 13]

Model Number: SNF-120-LTS-120V-U
Location: Main House interior
Dimensions:
  - Length: 24”
  - Width: 3”
  - Height: 3”
Features:
  - Utility fluorescent type: strips
  - Ballast required: yes
Efficiency:
  - Energy Efficiency: T12
Approval Certificates:
  - UL Safety Approval
  - CSA Safety Listing
Available: Lowes
Price: $16.47
COOPER LIGHTING - METALUX®

DESCRIPTION

The SNF Series is a functional and multi-purpose narrow strip family that incorporates premium performance and construction durability. Designed with our easy-to-use Flip-Up socket design, the SNF significantly reduces installation time. The performance and application versatility of this series can be increased by incorporating symmetrical or asymmetrical reflectors. The SNF Series can be installed using various mounting methods and numerous options and accessories are available. The small size of the SNF makes it an ideal choice for size-restricted architectural applications. The SNF Series can be the illumination solution in commercial, industrial, retail and residential applications. Fixtures can be used in storage/utility areas, coves, display cases, shops, task and general area lighting.

SPECIFICATION FEATURES

A. - Construction
Channel is die formed cold rolled steel with numerous KOs for ease of installation. Groove for Tong Hanger. End plate quickly converts to snap-in channel connector for continuous row alignment. Lamp holder bracket flip in place. Channel/wireway cover secured with quarter-turn fasteners.

B. - Electrical
Ballasts are CEB/ETL Class "P" and are positively secured by mounting bolts. Rotor Lock lampholders. UL/CUL listed. Suitable for damp locations.

C. - Finish
Multistage iron phosphate pre-treatment ensures maximum bonding and rust inhibitor. Lighting upgrade, baked white enamel finish. Pre painted material is standard, PAF optional.

D. - Channel/Wireway Cover

| 10 | 30 | 21 | 16 |

MOUNTING - SW4 AND SW5 SERIES

Swag features a die cut backplate with a threaded ⅜" conduit fitting at one end for direct connection to a flexible conduit, which provides the smallest ballast compartment profile and avoids unsightly plates or covers on walls or ceilings. Use a third party ½" conduit fitting and maximum 14 AWG wire for communication to the ballast. Detailed installation instructions are available at www.levitonlighting.com.

Options

DIMMING BALLASTS

Dimming ballast replaces standard canopy. All ballasts require compatible dimmers. Note: pendant distance should not exceed 3 feet. Voltage must be specified.

EMERGENCY BALLASTS

Emergency ballast provides 1300 lumens for 90 minutes. Charge indicator light and test switch visible from below. (Remote test switch available.) Emergency not available for the SW5 series. Voltage must be specified. Order SEM13.

RECESSED BALLAST

For suspended ceilings only. Order SWRB.

THEU WIRING

Replaces standard ballast canopy and dimming canopy. Allows up to ⅜" conduit with 3-in/3-out, #14 AWG. Order SMB.

J-BOX MOUNT

Mounting the SW4 and SW5 series with standard ballast housing to a recessed J-box requires a 3" mud ring, the holes in line with the direction of the fixture. Order SW200, available in S-silver or W-white.

BALLAST HOUSING BOX COVER

Order ST00P to mount ballast to a recessed J-box. For use with the following options:

- SEM13
- Dimming

SW5 PENDANT MOUNT

Adjustable cable grippers, round power feed canopy, and 8' cable and power cord included. (Cable and power cord may be ordered any length.) Order SW5SPS-silver or SW5SPW-white.

Product Description

This item is non-waterproof LED strip, 300 units 3528 SMD LED per roll(16.4ft/5M), White color. It can work for indoor decoration, cove lighting, mood lighting, shopping mall decoration and so on.

HADCO FLOODLIGHT FIXTURE

[RELATED SECTION 26 56 00]

Model Number: BW4 AS
Location: on top of OM Closets and Flex OM
Dimensions:
- Diameter: 6-1/4”
- Length: 16-1/2”
- Height: 2-1/4”
Finish: Powder coat white
Features:
- Rating: dry/damp/wet location
- Lamp type: PAR38 MH med base
- Transformer ballast included
- Mounting: 1/2” NPS thread
Electrical:
- Wattage: 100 W maximum
Approval Certificates:
- UL Safety Approval
- CSA Safety Listing
Available: Philips Hadco

Specifications

HOUSING:
Die-cast aluminum. Fully-adjustable swivel arm with vibration-proof locking teeth. Gasketing is silicone. Fasteners are 300 series stainless steel. Fully rotatable shroud, gasketed die-cast brass. Shroud is optional. 1/2 NPS male threads to screw onto accessory mounting stake or junction box, sold separately.

FINISH:
Thermoset polyester powdercoat is electrostatically applied after a five-stage conversion cleaning process and bonded by heat fusion thermosetting.

OPTICAL ASSEMBLY:
Clear tempered flat glass lens.

LAMPING:
150W maximum PAR30/40 incandescent lamp. HID PAR30 MH or MV acceptable with remote ballast (not included). 150 watt maximum HID lamp. Lamp is not included. Lower wattage lamps are acceptable.

ELECTRICAL ASSEMBLY:
4kv rated medium base porcelain socket. Nickel-plated screw shell with center contact.

BALLAST:
Must order inground (IB-H) or above ground (ABH) ballast housing separately.

CERTIFICATIONS:
Manufactured to ISO 9001:2008 Standards. ETL listed to U.S. safety standards for wet locations. cETL listed to Canadian safety standards for wet locations.

WARRANTY:
Three-year limited warranty.

Height: 2 5/16” (59mm)
Width: 6 1/4” (159mm)
Length: 15 1/2” (419mm)
Max. Weight: 8.15 lb.

TEAR DROP END CAP
WET LOCATION
T5, TSHO or T8 LINEAR LAMP

- 18 gauge steel construction
- milled aluminum end caps for precise fit
- fixtures are available in nominal lengths of 2, 3, 4 and 5 feet, see part numbers to the right for actual fixture lengths
- single T5, TSHO or T8 fluorescent, other lamp types available (consult factory)
- variety of acrylic lens shapes, materials and finishes available (consult factory)
- standard ballasts are integral electronic, consult Options p.5 for available types of dimming and emergency ballasts
- powder coat done post production for strong rust inhibiting protection
- standard finish is Anodized Silver, other finishes are also available
- surface or pendant mount
- UL and C-UL Listing for Wet Locations

DCS AIRSENSE INFRARED CARBON DIOXIDE SENSOR

[RELATED SECTION 28 31 00]

Model Number: 310e
Location: Main House Mechanical Closet
Dimensions:
- Length: 5-1/4"
- Width: 3-1/4"
- Height: 1-3/8"
Features:
- Non-dispersive infrared [NDIR]
- Gas sampling method: diffusion or sample draw
- Measurement range: 0-2000ppm
- Repeatability: ±20 ppm CO2
- Measurement accuracy: ± 30 ppm + 2% of reading
- 5 year recommended calibration interval
- Less than 1 minute warm up time
- Operating temperature range: 10°C - 50°C
- Operating humidity range: 0-95% RH, non-condensing
- Single gas calibration
- Optional relay contact rating: 2 A @ 24 V

Electrical:
- Voltage: 0-10 Vdc
- Current: 4-20 mA

Available:
AirSense™ Model 310e
Infrared Carbon Dioxide Sensor

Reduce energy cost
Isolated power supply
4-20 mA Current loop
Relay output available

Affordable and Ease of Installation

The AirSense™ Elite Beam Model 310e CO2 monitor provides continuous, accurate reading of indoor CO2 levels, making it easy to maintain an optimum level of fresh air while reducing heating and cooling costs to an absolute minimum. Use of the AirSense™ Elite Beam Model 310e enables the building manager to recirculate heated or cooled air, adding outside air only when indoor CO2 levels rise above the set point. Thus “sick building syndrome” and high heating and cooling costs can both be controlled at the same time with the use of the AirSense™ Elite Beam Model 310e.
Single Gas Smart Calibration

The AirSense™ Model 310e single gas verification makes field calibration a snap, and its superior design means significantly longer calibration intervals. Unlike other models, its simple user interface has no complicated menus: all maintenance and calibration operations are easily performed even on units without display.

Easy to install and support.

The AirSense™ Elite Beam Model 310e is easy to install and support. Measurement output is via a 4-20 mA current loop or a 0 to 10 volt interface. A completely isolated power supply eliminates any ground loop or electrical interaction problems when multiple units are connected to the same controller.

KACO blueplanet 2502xi inverter

KACO blueplanet 02xi grid-tied inverter series

The KACO blueplanet 02xi grid-tied inverter series, which was engineered using cutting-edge technology, has the highest energy efficiency in its class at over 95.5%. Incorporating convection-cooled aluminum housing, the inverter is highly reliable. The internal electronic design has been simplified and made more reliable using the latest generation of Digital Control Technology. The inverter features a programmable LCD display with a night switch and a web monitoring option. The units come pre-assembled to a connection box including an NEC compliant AC/DC disconnect switch. A grid voltage of 240 or 208 VAC can be selected depending on the field.

KACO blueplanet 02xi series
grid-tied inverters

Performance
High efficiency: 95.5% CEC efficiency on all 02xi series inverters ensures low energy losses
Wide MPPT range: Highest string sizing flexibility with all modules and temperature ranges
Low start-up voltage: KACO inverters wake up earlier and work longer than the competition
Designed for max. ROI: Newest generation IGBTs and advanced MPPT algorithms

Ease of installation
easy install T-bracket: Minimizes mounting process to approximately 15 minutes
Lockable DC/AC disconnect: Save up to $150 with the pre-wired & separable integrated disconnects
Multiple knock-outs: Knock-outs on bottom, sides and back offer great installation flexibility
Connection box: Avoid costly channel raceways by directly connecting multiple inverters
Reduced weight: KACO inverters are up to 50% lighter than comparably sized inverters
Reduced side clearance: No fan cooling outlets on the sides
Field selectable voltages: Use the same inverter in 208V, 220V or 240V grid settings

Reliability
History: KACO has been manufacturing power electronics for more than 60 years
Experience: More than 2.5GW of inverters worth about $1 billion installed worldwide
Split architecture design: Power electronics are protected in a separate chamber
Sealed outdoor enclosure: Protects power electronics from insects, dust, humidity and ocean air
DC reverse polarity protection: Avoids potential damage to inverter caused by mis-wiring during installation
Redundant power capacitors: Increases the lifetime of your inverter
Convection cooling: No moving parts increases the uptime of your PV system
Monitoring

KACO proLOG: Monitor up to 32 inverters as well as multiple sensors.

KACO watchDOG: Integrated monitoring card decreases costs and increases reliability to give you the most innovative monitoring solution.

easyLink data interface:
Integrated RS485 comm card saves over $200 compared to some competitors.

Integrated inverter display: Easy to use push-button interface to configure the inverter and access stored PV system data on the LCD screen.

Integrated night switch: Activates inverter display even after the PV system has shut down.

blueplanet web: Free monitoring option for residential systems up to 10 kW.

Warranty

KACO easySwap policy: No hassle inverter exchange policy is linked to serial number not original owner. No paperwork necessary.

Reimbursement policy:
KACO’s $150 warranty service reimbursement is among the best in the industry.

KACO guarantee: 02xi series inverter repairs after warranty will never be more than $500.

10 years standard warranty: Warranties are only as valuable as the strength and longevity of the manufacturer. KACO is one of the few established inverter companies older than the warranties they offer.

### Additional data

| AC/DC disconnect ratings | AC: 300 V – 36 A / DC: 600 V – 40 A |
| Cooling | True convection - ultimate reliability (5002xi - fan assisted) |
| DC reverse polarity protection | Yes |
| Ground fault protection | Integrated ground fault detector/Interruption (GFDI) |
| Grounding | Field selectable positive or negative ground option |
| Visual displays | Backlit LCD w/ convenient night switch & push button controls |
| Included accessory interfaces | easyLink RS485 & 50 port |
| Ambient temp @ max AC power | -4°F – +104°F (-20°C – + 40°C) |
| Ambient operating temp | -13°F – +104°F (-25°C – + 40°C) |
| Thermal protection | Yes |
| Noise emissions | < 35 dB (silent operation) / 5002xi < 45 dB (near silent operation) |
| Night power consumption | 0.3 W |
| Warranty | Standard easySwap 10 years |

### Certifications

| Safety compliance | UL 1741, IEEE 1547, NEC, CSA 22.2 No.107.1-01 |
| Communications compliance | FCC Part 15 Class B |

* - Unit will only feed power if the PV voltage is less than 550Vdc.

KACO blueplanet 02xi series
grid-tied inverters

Performance
High efficiency:
Wide MPPT range:
Low start-up voltage:
Designed for max. ROI:
95.5% CEC efficiency on all 02xi series inverters ensures low energy losses
Highest string sizing flexibility with all modules and temperature ranges
KACO inverters wake up earlier and work longer than the competition
Newest generation IGBTs and advanced MPPT algorithms

Ease of installation
easy install T-bracket:
Lockable DC/AC disconnect:
Multiple knock-outs:
Connection box:
Reduced weight:
Reduced side clearance:
Field selectable voltages:
Minimizes mounting process to approximately 15 minutes
Save up to $150 with the pre-wired & separable integrated disconnects
Knock-outs on bottom, sides and back offer great installation flexibility
Avoid costly channel raceways by directly connecting multiple inverters
KACO inverters are up to 50% lighter than comparably sized inverters
No fan cooling outlets on the sides
Use the same inverter in 208V, 220V or 240V grid settings

Reliability
History:
Experience:
Split architecture design:
Sealed outdoor enclosure:
DC reverse polarity protection:
Redundant power capacitors:
Convection cooling:
KACO has been manufacturing power electronics for more than 60 years
More than 2.5GW of inverters worth about $1 billion installed worldwide
Power electronics are protected in a separate chamber
Protects power electronics from insects, dust, humidity and ocean air
Avoids potential damage to inverter caused by mis-wiring during installation
Increases the lifetime of your inverter
No moving parts increases the uptime of your PV system
Monitoring

KACO proLOG: Monitor up to 32 inverters as well as multiple sensors

KACO watchDOG: Integrated monitoring card decreases costs and increases reliability to give you the most innovative monitoring solution

easyLink data interface: Integrated RS485 comm card saves over $200 compared to some competitors

Integrated inverter display: Easy to use push-button interface to configure the inverter and access stored PV system data on the LCD screen

Integrated night switch: Activates inverter display even after the PV system has shut down

blueplanet web: Free monitoring option for residential systems up to 10 kW

Warranty

KACO easySwap policy: No hassle inverter exchange policy is linked to serial number not original owner. No paperwork necessary.

Reimbursement policy: KACO’s $150 warranty service reimbursement is among the best in the industry

KACO guarantee: 02xi series inverter repairs after warranty will never be more than $500

10 years standard warranty: Warranties are only as valuable as the strength and longevity of the manufacturer. KACO is one of the few established inverter companies older than the warranties they offer.

**Additional data**

- Cooling: True convection - ultimate reliability (5002xi - fan assisted)
- DC reverse polarity protection: Yes
- Ground fault protection: Integrated ground fault detector/Interrupter (GFDI)
- Grounding: Field selectable positive or negative ground option
- Visual displays: Backlit LCD w/ convenient night switch & push button controls
- Included accessory interfaces: easyLink RS485 & 50 port
- Ambient temp @ max AC power: -4°F to +104°F (-20°C to + 40°C)
- Ambient operating temp: -4°F to +140°F (-20°C to + 60°C)
- Thermal protection: Yes
- Noise emissions: < 35 dB (silent operation) / 5002xi < 45 dB (near silent operation)
- Night power consumption: 0.3 W
- Warranty: Standard easySwap 10 years

**Certifications**

- Safety compliance: UL 1741, IEEE 1547, NECS, CSA 22.2 No.1071-01
- Communications compliance: FCC Part 15 Class B
