2021 DU Build Challenge Update

At this time, we have not yet finalized the plan for presenting the University of Denver project. We do intend to continue forward with the "Mockup wall to showcase our RetroFoam injection insulation." We will have more defining information in the coming weeks as we work with the University of Denver to find out what they anticipate we may be able to do at that time.

Sincerely,

University of Denver
U.S. Department of Energy Solar Decathlon 2020
